Gate W

The most commonly known form of results-based pricing is a practice called contingency pricing, used by lawyers. Contingency pricing is the major way that personal injury and certain consumer cases are billed. In this approach, lawyers do not receive fees or payment until the case is settled, when they are paid a percentage of the money that the client receives. Therefore, only an outcome in the client's favor is compensated. From the client's point of view, the pricing makes sense in part because most clients in these cases are unfamiliar with and possibly intimidated by law firms. Their biggest fears are high fees for a case that may take years to settle. By using contingency pricing, clients are ensured that they pay no fees until they receive a settlement. In these and other instances of contingency pricing, the economic value of the service is hard to determine before the service, and providers develop a price that allows them to share the risks and rewards of delivering value to the buyer.

*intimidate 위협하다

결과 기반 가격 책정 중 가장 일반적으로 알려진 형태는 변호사가 사용하는 '승소 시 보수 약정'이라고 불리는 관행이다. (C) 승소 시 보수 약정은 개인 상해 및 특정 소비자 소송에 대해 비용이 청구되는 주요 방식이다. 이 방식에서 변호사는 소송이 해결될 때까지 수수료나 지불금을 받지 않는데, 그 때 그들은 의뢰인이 받는 금액의 일정 비율을 받는다. (A) 따라서 의뢰인에게 유리한 결과만 보수가 지불된다. 의뢰인의 관점에서 보면, 이러한 소송의 의뢰인 대부분이 법률 사무소에 익숙하지 않고 아마도 겁을 먹을 수 있다는 부분적인 이유로 그 가격 책정은 타당하다. 그들의 가장 큰 두려움은 해결하는 데 몇 년이 걸릴 수 있는 소송에 대한 높은 수수료이다. (B) 승소 시 보수 약정을 사용함으로써 의뢰인은 합의금을 받을 때까지 수수료를 지불하지 않도록 보장받는다. 승소 시 보수 약정의 이런 경우와 여타 경우에서 서비스의 경제적 가치는 서비스 전에 결정하기 어렵고, 공급자는 구매자에게 가치를 전달하는 위험과 보상을 그들이 나눌 수 있게 하는 가격을 전달한다.

01

What do we want to hear when asking the question why John slammed the door? Probably not that John put more than average energy into his act, giving the door more speed (which *resulted in* a heavy collision of the door with the doorpost, a loud noise and the lamp rocking back and forth). We normally are not interested in a report of the chain of causes and effects leading up to the slamming. ***Neither do*** we expect to hear a report about micro-processes in John's body causing his movements. The why-question asks for reasons — 'He felt offended', for instance. Even when we think in a materialistic frame of mind that the state of being offended can be traced in John's brain, we usually will not be interested in an answer in neurological terms. So, normally, in our day-to-day why-questions about people's actions we expect to hear about their reasons.

John이 문을 쾅 닫은 이유에 대해 질문할 때 우리는 무엇을 듣고 싶어 하는가? (B) 아마도 John이 자기 행위에 보통 수준이 넘는 힘을 주어서 문의 속도를 더 높였다(그것이 결과적으로 문이 문설주에 심하게 충돌하게 하고, 큰 소리가 나게 하고, 등이 이리저리 흔들리게 했다)는 것은 아닐 것이다. 대개 우리는 그 쾅 닫힘까지 이르는 일련의 원인과 결과에 대한 보고에는 관심이 없다. (C) 또한 우리는 John의 움직임을 유발한 그의 몸속의 미세한 과정에 대한 보고를 듣는 것도 기대하지 않는다. 그 왜라는 질문은 가령 '그가 화가 났다'처럼 이유를 요구한다. (A) 심지어 우리가 유물론적인 사고방식으로 화가 난 상태의 원인을 John의 뇌에서 밝혀낼 수 있다고 생각할 때도, 대개 우리는 신경학 용어로 된 대답에는 관심을 두지 않을 것이다. 그러므로 대개 우리는 사람들의 행동에 대한 우리의 일상의 왜라는 질문에서 그들의 이유에 대해 듣기를 기대한다.

숙어 정리 - 원인과 결과 구분 - 전치사나 접속사나 뒷 부분과 묶어 해석 하면 쉽다.

result from ~로부터 생기다 [원인] result in ~가 되다 [결과] The accident resulted (from the driver.)
That is because ~ 때문이다 [원인] That is why ~한 이유이다 [결과] That is [why the driver is in hospital.]

어법 정리 - 부정의미의 부사 (문장의 제일 앞에 위치한 경우 문장의 도치를 일으킴)

부정어 : no, not, never, nor, neither 등 거의 ~않는 : seldom, hardly, rarely, barely, scarcely
거의 ~없는 : little, few only + 부사/ 부사구/ 부사절

일반 동사 Never **does** she **swim** alone.
조동사 Never **has** she **swum** alone.
be 동사 Never **is** she swimming alone. * 참조: 부정어 도치, 의문문 도치, 가정법 if 생략 도치의 기본 원리는 같다.

02

We can presume that the components of love proposed by Sternberg can be found in all cultures. Intimacy, passion, and commitment are most likely cultural universals. Evidence of this comes from many sources, including cultural anthropology, psychological research, and love poetry from across the world. What does appear to vary across cultures, however, is the emphasis placed on the different components of love and on different types of relationships. In collectivist cultures like those found in Asia and Africa, relationships with family may take priority over relationships with lovers and friends. In individualistic cultures, like those of Northern Europe and North America, friendships and romantic relationships compete with family for priority (and often win). Likewise, the concept of duty (similar to Sternberg's concept of commitment) is absolutely central to Chinese Confucianism. In contrast, judging by the mountains of romance novels, love songs, and beauty products found in North America, ***it*** is the passionate side of love ***that*** is prized in this culture.

스턴버그가 제안한 사랑의 요소는 모든 문화에서 찾아볼 수 있다고 짐작할 수 있다. 친밀감, 열정, 헌신은 문화적으로 보편적 특성일 가능성이 매우 크다. (B) 이것의 증거는 문화 인류학, 심리학적 연구, 그리고 전 세계의 사랑의 시를 포함한 많은 출처에서 나온다. 그러나 정말 문화에 따라 다르게 보이는 것은 사랑의 서로 다른 구성 요소를 어떻게 강조하고 서로 다른 관계 유형을 어떻게 강조하는지이다. (A) 아시아와 아프리카에서 보이는 것과 같은 집단주의 문화에서는, 가족과의 관계가 연인이나 친구와의 관계보다 우선할 수 있다. 북유럽과 북미의 문화와 같은 개인주의 문화에서는, 우정과 연인 관계가 우선순위를 두고 가족과 경쟁한다(그리고 흔히 이긴다). (C) 마찬가지로, (Sternberg의 헌신 개념과 유사한) 의무라는 개념은 중국 유교에 절대적으로 중요하다. 이와 대조적으로, 북미에서 보이는 산더미처럼 많은 로맨스 소설, 사랑의 노래, 미용 제품으로 판단해 보면, 이 문화에서 소중히 여겨지는 것은 바로 사랑의 열정적인 면이다

어법 정리 - It ~ that 강조구문 [* '강조' 란, 없어도 되는 단어들이 들어감. 예; do 강조, 재귀 강조, the very 강조] *that 대신 관계사도 사용

It is the boy that **you want to see**. that 대신 관계사 사용 가능. It is ~ that을 없애고, the boy를 뒤 문장과 합치면 말이 됨.

03 필자 생각 = 어린아이에게도 '사람다움'이 있을 수 있다.

It could be argued that the 'processual' nature of personhood means that one becomes a person as one 'goes along' in society. Indeed, the African philosopher Ifeanyi Menkiti takes this position. He maintains that children are not fully human. Following Kwame Gyekye, a Ghanaian philosopher, however, I would argue that the fact ***that*** personhood must be earned is not a denial of personhood to children. It is an affirmation of the view ***that*** *personhood is an ongoing process* attained through interactions with others and one's community. It requires one to affirm ideals and standards thought to be constitutive of the life of a community. These are standards such as generosity, benevolence and respect. A number of sayings in some African societies *refer to* people who have failed to meet standards expected of a fully human person. These are sayings such as *ga e se motho* (Tswana) or *a ku si muntu* (Nguni), literally meaning 'he or she is not a person'. Because one can fall short of these standards at any stage in the life cycle, personhood could be regarded as a *becoming*. It is an unpredictable, open-ended process during which personhood may be achieved, lost, and regained, depending on a person's circumstances.

*benevolence: 자비심 **affirmation: 지지, 확인

인격의 '과정적' 특성은 사람이 사회에서 '살아가면서' 사람이 되는 것을 의미한다고 주장할 수 있다. 사실, 아프리카의 철학자 Ifeanyi Menkiti는 이 입장을 취한다. 그는 아이들은 완전한 사람이 아니라고 주장한다. (C) 그러나 나는 가나의 철학자 Kwame Gyekye를 따라, 사람다움이 획득되어야 한다는 사실이 곧 아이들에게 사람다움이 있는 것을 부인하는 것은 아니라고 주장하고 싶다. 그것은 '사람다움이' 다른 사람 및 공동체와의 상호 작용을 통해 얻어지는 '진행 중인 과정이라는' 견해에 대한 지지이다. 그 때문에 우리는 공동체의 삶을 구성하는 것으로 여겨지는 이상과 규범을 지지해야 한다. (B) 이것은 관용, 자비심, 존경과 같은 규범이다. 일부 아프리카 사회의 여러 속담은 온전한 인격체의 인간에게 기대되는 규범을 충족하지 못한 사람들을 언급한다. 이것들은 ga e se motho(츠와나족)나 a ku si muntu (응구니족)와 같은 속담인데, 말 그대로 '그는 사람이 아니다'라는 뜻이다. (A) 사람은 생애 주기의 어느 단계에서도 이들 규범에 미치지 못할 수 있으므로, 사람다움은 '되어 가는 일'로 여겨질 수도 있을 것이다. 그것은 개인의 환경에 따라 사람다움이 성취되고, 상실되며, 다시 회복될 수 있는, 예측할 수 없고 정해진 결말이 없는 과정이다.

어법 정리 - that 구분

동격 접속사 I know the fact **that** the team is called BTS. ① 앞에 동격인 명사 **있음** ② 뒤에 명사가 **생략되지 않음** (완전)

숙어 정리 - to 를 주로 사용하는 숙어 to가 전치사이기 때문에 반드시 뒤에 명사와 같이 쓰고, 'to+명사' 가 부사구 대용으로 쓰인다.

belong to~ :~ 에 속하다 refer to A (as B) : ~를 언급하다 stick to ~ : 굳게 지키다, 고수하다 참조: You don't belong **here** (또는 to this place)

04

Some countries grow cash crops. These are crops that are in high demand and can be grown in large quantities in specific areas of the world. For example, sugar needs a hot, damp climate; coffee needs a hot climate, rainfall, and higher mountain elevations. Tea needs to grow on hillsides in rainy areas. Bananas grow well in tropical environments. Because there is a worldwide demand for specific items such as these, the farmers in tropical countries grow as much of these commodities as they can. These cash crops are sold all around the world and bring in a lot of money, but there are risks to specializing in just one commodity for trade. If these farmers grow too much of a particular cash crop, that creates more supply than demand, which drops the price of the commodity. If the climate is bad, and the cash crop does not grow well one year, that hurts the country selling it because that crop may be the only one the country provides in large enough quantities to make a living from.

*cash crop: 환금 작물(시장에 내다 팔기 위하여 재배하는 농작물)

일부 국가에서는 환금 작물을 재배합니다. 이들은 수요가 많고 세계의 특정 지역에서 대량으로 재배할 수 있는 작물입니다. 예를 들어, 설탕은 덥고 습한 기후가 필요합니다. 커피는 더운 기후, 강우량, 높은 산 고도가 필요합니다. 차는 비가 오는 지역의 언덕에서 자랄 필요가 있습니다. 바나나는 열대 환경에서 잘 자랍니다. 이와 같은 특정 품목에 대한 세계적인 수요가 있기 때문에 열대 국가의 농부들은 가능한 한 이러한 상품을 많이 재배합니다. 이러한 환금 작물은 전 세계에서 판매되어 많은 돈을 벌어들이지만 무역을 위해 단 하나의 상품에 특화하는 데는 위험이 있습니다. 이 농부들이 특정 환금 작물을 너무 많이 재배하면 수요보다 공급이 더 많아져 상품 가격이 떨어집니다. 기후가 나쁘고 1년 동안 환금작물이 잘 자라지 않으면 그 작물이 생계를 유지하기에 충분한 양을 제공하는 유일한 작물일 수 있기 때문에 그것을 판매하는 국가에 피해를 줍니다.

05

Some might have had the impression that early scientists like Newton and Galileo belonged to a small sect that conjured science out of the blue as a result of mystical investigation. This wasn't so. Their work did not take place in a cultural vacuum: it was the product of many ancient traditions. One of these was Greek philosophy, which encouraged the belief that the world could be explained by logic, reasoning, and mathematics. Another was agriculture, from which people learned about order and chaos by observing the cycles and rhythms of nature, interrupted periodically by sudden and unpredictable disasters. And then there were religions which encouraged belief in a created world order. The founding assumption of science is that the physical universe is neither random nor absurd; it is not just a meaningless jumble of objects and phenomena randomly placed side by side. Rather, there is a coherent *scheme of things*. This is often expressed by the simple saying that there is order in nature. But scientists have gone beyond this vague notion to formulate a system of well-defined *laws*.

*sect: 종파 **conjure: (마법으로) 불러내다 ***jumble: 뒤범벅

일부 사람들은 뉴턴이나 갈릴레오와 같은 초기 과학자들이 신비로운 조사의 결과로 과학을 갑자기 불러낸 작은 종파에 속했다는 인상을 받았을 것입니다. 그렇지 않았습니다. 그들의 작업은 문화적 진공 상태에서 발생하지 않았습니다. 그것은 많은 고대 전통의 산물이었습니다. 그 중 하나는 논리, 추리, 수학으로 세상을 설명할 수 있다는 믿음을 장려한 그리스 철학이었습니다. 또 하나는 농업으로, 사람들은 갑작스럽고 예측할 수 없는 재해로 인해 주기적으로 중단되는 자연의 순환과 리듬을 관찰함으로써 질서와 혼돈에 대해 배웠습니다. 그리고 창조된 세계 질서에 대한 믿음을 장려하는 종교들이 있었습니다. 과학의 기본적인 가정은 물리적인 우주가 임의적이지도 불합리하지도 않다는 것입니다. 무의미하게 뒤섞인 사물과 현상이 무작위로 나란히 배치된 것이 아닙니다. 오히려 일관된 사물의 체계가 있습니다. 이것은 종종 자연에 질서가 있다는 단순한 말로 표현됩니다. 그러나 과학자들은 이 모호한 개념을 뛰어넘어 잘 정의된 법칙 체계를 공식화했습니다.

06

In English, many spelling errors ***could be avoided*** if we systematically ***transcribed*** each sound with a fixed letter. For instance, if we ***were to avoid*** writing the sound f with both the letter "f" and with "ph," life ***would be*** much simpler. There is little doubt that we could easily get rid of this and many other useless redundancies whose acquisition eats up many years of childhood. In fact, this is the timid direction that American spelling reform took when it simplified the irregular British spellings of "behaviour" or "analyse" into "behavior" and "analyze." Many more steps ***could have been taken*** along the same lines. As expert readers, we cease to be aware of the absurdity of our spelling. Even a letter as simple as "x" is unnecessary, as it stands for two phonemes ks that already have their own spelling. In Turkiye, one takes a "taksi." That country, which in the space of one year adopted the Roman alphabet, drastically simplified its spelling, and taught three million people how to read, sets a beautiful example of the feasibility of spelling reform.

*phoneme: 음소 **feasibility: 실현 가능성 ***redundancy: 군더더기

영어에서는 고정된 문자로 각 소리를 체계적으로 표기하면 많은 철자 오류를 피할 수 있습니다. 예를 들어, 소리 f를 문자 "f"와 "ph"로 쓰지 않는다면 인생은 훨씬 더 단순해질 것입니다. 우리가 이것과 어린 시절의 수년을 잡아먹는 다른 많은 쓸모없는 중복을 쉽게 제거할 수 있다는 데는 의심의 여지가 없습니다. 사실, 이것은 "behaviour" 또는 "analyse"라는 불규칙한 영국 철자를 "behavior"와 "analyze"로 단순화했을 때 미국 철자 개혁이 취한 소심한 방향입니다. 같은 노선을 따라 더 많은 조치를 취할 수 있었습니다. 전문 독자로서 우리는 철자의 부조리를 더 이상 인식하지 않습니다. 이미 자체 철자가 있는 두 개의 음소 k를 나타내기 때문에 "x"와 같은 간단한 문자도 필요하지 않습니다. Turkiye에서는 "taksi"를 취합니다. 1년 만에 로마 알파벳을 채택하고 철자를 대폭 단순화했으며 300만 명의 사람들에게 읽는 법을 가르친 그 나라는 철자 개혁의 실현 가능성에 대한 아름다운 예를 보여줍니다.

어법 정리 - 가정법

과거	if S (조)동사과거 ~	S w/c/s/m + 동원 ~	[지금 ~라면, ~할 텐데]	If I were a bird, I would fly to you.
미래	if S were to[should] 동원	S w/c/s/m + 동원 ~	[앞으로 ~하면, ~할 텐데]	If I were to die, you should call the police.

*미래에서 if ~ should인 경우, 주절에서 would, could, should, might 외에 will, can, shall, may 도 가능하다. (were to 는 would, could, should, might만 가능하다.)

Rather, there is a coherent scheme of things. This is often e_____ by the simple saying that there is order in n_____. But scientists have gone beyond this vague n_____ to f_____ a system of well-defined laws.

일부 사람들은 뉴턴이나 갈릴레오와 같은 초기 과학자들이 신비로운 조사의 결과로 과학을 갑자기 불러낸 작은 종파에 속했다는 인상을 받았을 것입니다. 그렇지 않았습니다. 그들의 작업은 문화적 진공 상태에서 발생하지 않았습니다. 그것은 많은 고대 전통의 산물이었습니다. 그 중 하나는 논리, 추리, 수학으로 세상을 설명할 수 있다는 믿음을 장려한 그리스 철학이었습니다. 또 하나는 농업으로, 사람들은 갑작스럽고 예측할 수 없는 재해로 인해 주기적으로 중단되는 자연의 순환과 리듬을 관찰함으로써 질서와 혼돈에 대해 배웠습니다. 그리고 창조된 세계 질서에 대한 믿음을 장려하는 종교들이 있었습니다. 과학의 기본적인 가정은 물리적인 우주가 임의적이지도 불합리하지도 않다는 것입니다. 무의미하게 뒤섞인 사물과 현상이 무작위로 나란히 배치된 것이 아닙니다. 오히려 일관된 사물의 체계가 있습니다. 이것은 종종 자연에 질서가 있다는 단순한 말로 표현됩니다. 그러나 과학자들은 이 모호한 개념을 뛰어넘어 잘 정의된 법칙 체계를 공식화했습니다.

06

In English, many spelling errors could be a_____ if we systematically t_____ each sound with a fixed letter. For instance, if we were to avoid writing the sound f with both the letter "f" and with "ph," life would be much s_____. There is little doubt that we could e_____ get rid of this and many other useless redundancies _____ a_____ eats up many years of childhood. In fact, this is the timid d_____ that American spelling reform took when it s_____ the i_____ British spellings of "behaviour" or "analyse" into "behavior" and "analyze." Many more steps could have been taken along the same lines. As expert readers, we c_____ to be a_____ of the absurdity of our spelling. Even a letter as simple as "x" is u_____, as it stands for two phonemes ks that already have their own spelling. In Turkiye, one takes a "taksi." That country, which in the space of one year a_____ the Roman alphabet, drastically s_____ its spelling, and taught three million people how to read, sets a beautiful example of the f_____ of s_____ reform.

영어에서는 고정된 문자로 각 소리를 체계적으로 표기하면 많은 철자 오류를 피할 수 있습니다. 예를 들어, 소리 f를 문자 "f"와 "ph"로 쓰지 않는다면 인생은 훨씬 더 단순해질 것입니다. 우리가 이것과 어린 시절의 수년을 잡아먹는 다른 많은 쓸모없는 중복을 쉽게 제거할 수 있다는 데는 의심의 여지가 없습니다. 사실, 이것은 "behaviour" 또는 "analyse"라는 불규칙한 영국 철자를 "behavior"와 "analyze"로 단순화했을 때 미국 철자 개혁이 취한 소심한 방향입니다. 같은 노선을 따라 더 많은 조치를 취할 수 있었습니다. 전문 독자로서 우리는 철자의 부조리를 더 이상 인식하지 않습니다. 이미 자체 철자가 있는 두 개의 음소 k를 나타내기 때문에 "x"와 같은 간단한 문자도 필요하지 않습니다. Turkiye에서는 "taksi"를 취합니다. 1년 만에 로마 알파벳을 채택하고 철자를 대폭 단순화했으며 300만 명의 사람들에게 읽는 법을 가르친 그 나라는 철자 개혁의 실현 가능성에 대한 아름다운 예를 보여줍니다.

The most commonly known form of results-based pricing is a practice 1) **called/ recalled** contingency pricing, 2) **using/ used** by lawyers. Contingency pricing is the major way that personal injury and certain consumer cases are billed. In this approach, lawyers do not 3) **relieve/ receive** fees or payment until the case is settled, when they 4) **paid/ are paid** a percentage of the money 5) **that/ what** the client receives. Therefore, only an outcome in the client's favor is compensated. From the client's point of view, the pricing 6) **making/ makes** sense in part 7) **because/ because of** most clients in these cases are 8) **familiar/ unfamiliar** with and possibly intimidated by law firms. Their biggest fears are high fees for a case 9) **that/ what** may take years to settle. By using contingency pricing, clients 10) **ensured/ are ensured** 11) **that/ what** they pay no fees until they receive a settlement. In these and other instances of contingency pricing, the economic value of the service is hard to 12) **determine/ detect** before the service, and providers develop a price 13) **that/ what** allows them 14) **to share/ sharing** the risks and rewards of delivering value to the buyer.

01

What do we want to hear when asking the question why John 15) **slamming/ slammed** the door? Probably not 16) **that/ what** John put more than average energy into his act, giving the door more speed (which resulted 17) **in/ from** a heavy collision of the door with the doorpost, a loud noise and the lamp rocking back and forth). We normally are not 18) **interesting/ interested** in a report of the chain of causes and effects leading up to the slamming. Neither do we expect 19) **to hear/ hearing** a report about micro-processes in John's body causing his movements. The why-question asks for reasons — 'He felt offended', for instance. Even when we think in a materialistic frame of mind 20) **that/ what** the state of being offended can be traced in John's brain, we usually will not be 21) **interesting/ interested** in an answer in neurological terms. So, normally, in our day-to-day why-questions about people's actions we 22) **expect/ expire** to hear about their reasons.

02

We can presume that the components of love 23) **proposed/ are proposed** by Sternberg can be found in all cultures. Intimacy, passion, and commitment are most likely cultural universals. Evidence of this comes from many sources, 24) **including/ concluding** cultural anthropology, psychological research, and love poetry from across the world. 25) **That/ What** does appear to vary across cultures, however, 26) **is/ are** the emphasis placed on the different components of love and on different types of relationships. In collectivist cultures like those 27) **found/ founded** in Asia and Africa, relationships with family may 28) **take/ be taken** priority over relationships with lovers and friends. In individualistic cultures, like those of Northern Europe and North America, friendships and romantic relationships compete with family for priority (and often win). Likewise, the concept of duty (similar to Sternberg's concept of commitment) is absolutely central to Chinese Confucianism. In contrast, 29) **judge/ judging** by the mountains of romance novels, love songs, and beauty products found in North America, it is the passionate side of love 30) **that/ what** is prized in this culture.

03

It could be argued that the 'processual' nature of personhood means 31) **that/ what** one becomes a person as one 'goes along' in society. Indeed, the African philosopher Ifeanyi Menkiti takes this position. He maintains 32) **that/ what** children are not fully human. Following Kwame Gyekye, a Ghanaian philosopher, however, I would argue 33) **that/ what** the fact that personhood must be earned is not a denial of personhood to children. It is an affirmation of the view that personhood is an ongoing process attained through interactions with others and one's community. It 34) **requires/ is required** one to affirm ideals and standards thought to be constitutive of the life of a community. These are standards such as generosity, benevolence and respect. A number of sayings in some African societies 35) **refer/ refer to**

people who have failed to meet standards 36) **expecting/ expected** of a fully human person. These are sayings such as ga e se motho (Tswana) or a ku si muntu (Nguni), literally meaning 'he or she is not a person'. 37) **Because/ Because of** one can fall short of these standards at any stage in the life cycle, personhood could be regarded as a becoming. It is an unpredictable, open-ended process 38) **which/ during which** personhood may be achieved, lost, and regained, depending on a person's circumstances.

04

Some countries grow cash crops. These are crops 39) **that/ what** are in high demand and can be grown in large quantities in specific areas of the world. For example, sugar needs a hot, damp climate; coffee needs a hot climate, rainfall, and higher mountain elevations. Tea needs to grow on hillsides in rainy areas. Bananas grow well in tropical environments. 40) **Because/ Because of** there is a worldwide demand for specific items such as these, the farmers in tropical countries 41) **grow/ grows** as much of these commodities as they can. These cash crops are sold all around the world and bring in a lot of money, but there are risks to specializing in just one commodity for trade. If these farmers 42) **grow/ growing** too much of a particular cash crop, 43) **that/ what** creates more supply than demand, 44) **which/ what** drops the price of the commodity. If the climate is bad, and the cash crop does not grow well one year, that hurts the country selling it 45) **because/ because of** that crop may be the only one the country provides in large enough quantities to make a living from.

05

Some might have had the impression 46) **that/ what** early scientists like Newton and Galileo 47) **belonged/ belonged to** a small sect that conjured science out of the blue as a result of mystical investigation. This wasn't so. Their work did not take place in a cultural vacuum: it was the product of many ancient traditions. One of these 48) **was/ were** Greek philosophy, 49) **which/ what** encouraged the belief that the world could be explained by logic, reasoning, and mathematics. Another was agriculture, from which people 50) **learning/ learned** about order and chaos by 51) **serving/ observing** the cycles and rhythms of nature, interrupted periodically by sudden and unpredictable disasters. And then there were religions 52) **which/ what** encouraged belief in a created world order. The founding assumption of science is 53) **that/ what** the physical universe is neither random nor absurd; it is not just a meaningless jumble of objects and phenomena randomly placed side by side. Rather, there is a coherent scheme of things. This is often expressed by the simple saying 54) **that/ what** there is order in 55) **nature/ nurture**. But scientists have gone beyond this vague notion to formulate a system of well-defined laws.

06

In English, many spelling errors could be avoided if we systematically 56) **transcribe/ transcribed** each sound with a fixed letter. For instance, if we were to 57) **accept/ avoid** writing the sound f with both the letter "f" and with "ph," life would be much simpler. There is little doubt 58) **that/ what** we could easily get rid of this and many other useless redundancies 59) **which/ whose** acquisition eats up many years of childhood. In fact, this is the timid direction that American spelling reform took when it 60) **simplified/ was simplified** the irregular British spellings of "behaviour" or "analyse" into "behavior" and "analyze." Many more steps could 61) **have taken/ have been taken** along the same lines. As expert readers, we cease to be aware of the absurdity of our spelling. Even a letter as simple as "x" is unnecessary, as it stands for two phonemes ks 62) **that/ what** already have their own spelling. In Turkiye, one takes a "taksi." That country, 63) **which/ what** in the space of one year adopted the Roman alphabet, drastically simplified its spelling, and taught three million people how to read, sets a beautiful example of the feasibility of spelling reform.

We can presume that _____ proposed by Sternberg can be found in all cultures. Intimacy, passion, and commitment are most likely cultural universals. Evidence of this ① **comes** from many sources, including cultural anthropology, psychological research, and love poetry from across the world. What does appear to vary across cultures, however, ② **are** the emphasis placed on the different components of love and on different types of relationships. In collectivist cultures like those found in Asia and Africa, relationships with family ③ **may take** priority over relationships with lovers and friends. In individualistic cultures, like those of Northern Europe and North America, friendships and romantic relationships ④ **compete** with family for priority (and often win). Likewise, the concept of duty (similar to Sternberg's concept of commitment) is absolutely central to Chinese Confucianism. In contrast, judging by the mountains of romance novels, love songs, and beauty products ⑤ **found** in North America, it is the passionate side of love that is prized in this culture.

100) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① normal dream ② reading novels
③ life of the priority ④ the components of love
⑤ the emphasis on living

It could be argued that the 'processual' nature of personhood means that one becomes a person as one '_____' in society. Indeed, the African philosopher Ifeanyi Menkiti takes this position. He maintains ① **that** children are not fully human. Following Kwame Gyekye, a Ghanaian philosopher, however, I would argue ② **what** the fact that personhood must be earned is not a denial of personhood to children. It is an affirmation of the view that personhood is an ongoing process ③ **attained** through interactions with others and one's community. It requires one to affirm ideals and standards thought to be constitutive of the life of a community. These are standards such as generosity, benevolence and respect. A number of sayings in some African societies refer to people who have failed to meet standards expected of a fully human person. These are sayings ④ **such as** ga e se motho (Tswana) or a ku si muntu (Nguni), literally meaning 'he or she is not a person'. Because one can fall short of these standards at any stage in the life cycle, personhood ⑤ **could be regarded** as a becoming. It is an unpredictable, open-ended process during which personhood may be achieved, lost, and regained, depending on a person's circumstances.

Some countries grow cash crops. These are crops that are in high demand and ① **can be grown** in large quantities in specific areas of the world. For example, sugar needs a hot, damp climate; coffee needs a hot climate, rainfall, and higher mountain elevations. Tea needs to grow on hillsides in rainy areas. Bananas ② **grow** well in tropical environments. Because there is a worldwide demand for specific items such as these, the farmers in tropical countries grow as much of these commodities as they can. These cash crops are sold all around the world and ③ **brings** in a lot of money, but there are risks to specializing in just one commodity for trade. If these farmers grow too much of a particular cash crop, that creates more (A) s_____ than (B) d_____, which drops the price of the commodity. If the climate is bad, and the cash crop does not grow well one year, ④ **that** hurts the country selling it because that crop may be the only one the country provides in large enough quantities ⑤ **to make** a living from.

Some might have had the impression ① **that** early scientists like Newton and Galileo ② **belonged** a small sect that conjured science out of the blue as a result of mystical investigation. This wasn't so. Their work did not take place in a cultural vacuum: _____. One of these was Greek philosophy, which encouraged the belief that the world could be explained by logic, reasoning, and mathematics. Another was agriculture, ③ **from which** people learned about order and chaos by observing the cycles and rhythms of nature, interrupted ④ **periodically** by sudden and unpredictable disasters. And then there were religions which encouraged belief in a created world order. The founding assumption of science is that the physical universe is neither random nor absurd; it is not just a meaningless jumble of objects and phenomena randomly ⑤ **placed** side by side. Rather, there is a coherent scheme of things. This is often expressed by the simple saying that there is order in nature. But scientists have gone beyond this vague notion to formulate a system of well-defined laws.

106) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① it is interrupted by unpredictable disasters
② life is a meaningless jumble of objects
③ it was the product of many ancient traditions
④ children should learn science at school
⑤ there doesn't seem to be order in nature

The most commonly known form of results-based pricing is a practice (A) **calling/ called** contingency pricing, used by lawyers. Contingency pricing is the major way that personal injury and certain consumer cases are billed. In this approach, lawyers do not receive fees or payment until the case is settled, when they are paid a percentage of the money that the client receives. Therefore, only an outcome in the client's favor is compensated. From the client's point of view, the pricing makes sense in part because most clients in these cases are unfamiliar with and possibly intimidated by law firms. Their biggest fears are high fees for a case **settle / years / may / to / that / take**. By using contingency pricing, clients are ensured (B) **that/ what** they pay no fees until they receive a settlement. In these and other instances of contingency pricing, the economic value of the service is hard to determine before the service, and providers develop a price that allows them (C) **to share/ sharing** the risks and rewards of delivering value to the buyer.
