UNIT 11 어법 정확성 파악

Gate W

Recognizing ethical issues is the most important step in understanding business ethics. An ethical issue is an identifiable problem, situation, or opportunity that requires a person to choose from among several actions that may be evaluated as right or wrong, ethical or unethical. *Learning* how to choose from alternatives and make a decision requires not only good personal values, but also knowledge competence in the business area of concern. Employees also need to know when to rely on their organizations' policies and codes of ethics or have discussions with co-workers or managers on appropriate conduct. Ethical decision making is not always easy because there are always gray areas that create dilemmas, no matter how decisions are made. For instance, should an employee report on a co-worker engaging in time theft? Should a salesperson leave out facts about a product's poor safety record in his presentation to a customer? Such questions require the decision maker to evaluate the ethics of his or her choice and decide whether to ask for guidance.

윤리적 문제를 인식하는 것은 비즈니스 윤리를 이해하는 데 가장 중요한 단계이다. 윤리적 문제는 옳거나 그르다고, 윤리적 또는 비윤리적이라고 평가될 수 있는 여러가지 행동들 가운데에서 한 사람이 선택하기를 요구하는 식별 가능한 문제, 상황 또는 기회이다. 대안 중에서 선택하고 결정을 내리는 방법을 배우는 것은 훌륭한 개인적 가치관뿐만 아니라 관계가 있는 비즈니스 분야에 대한 지식 역량도 필요로 한다. 또한 직원들은 언제 자신이 속한 조직의 정책과 윤리 강령에 의존할지 혹은 언제 동료 또는 관리자와 적절한 행동에 대해 논의해야 할지를 알아야 한다. 윤리적 의사결정이 항상 쉬운 것은 아닌데, 왜냐하면 결정이 어떻게 내려지든 딜레마를 만드는 회색 영역이 늘 있기 때문이다. 예를 들어, 직원은 시간 훔치기를 하는 동료에 대해 보고해야 하는가? 판매원은 고객에게 프레젠테이션을 할 때 어떤 제품의 안전 상태가 좋지 않다는 기록에 대한 사실을 생략해야 하는가? 그러한 질문은 의사결정자가 자신이 선택한 윤리를 평가하여 지침을 요청할 것인지 말지의 여부를 결정할 것을 요구한다.

01

Sometimes it's important to disagree. All the great social reforms which took place in the eighteenth century, for instance, began with the dedicated campaigns of a handful of people who saw something wrong, and did not let it rest. Slavery was widely accepted in Europe in the eighteenth century, but as a result of consistent campaigning, the slave trade was made illegal *near* the beginning of the nineteenth century, and the owning of slaves became illegal a few years ***later***. Social psychologists Moscovici and Nemeth ***showed*** that if just a few people ***stick*** to a particular view, which they are convinced *is* right, then over time they can have a great deal of influence on a larger group. The important thing, though, is that those people who are in the minority and trying to influence the majority ***should be seen to be*** genuine, consistent and resisting social pressure. If we ***see*** people ***acting*** like that, over time we become curious about why they are doing it and so are likely to think more seriously about what they are saying.

때때로 동의하지 않는 것이 중요합니다. 예를 들어, 18세기에 일어난 모든 위대한 사회 개혁은 무언가 잘못된 것을 보고 그것을 쉬지 않는 소수의 사람들의 헌신적인 캠페인으로 시작되었습니다. 노예 제도는 18세기에 유럽에서 널리 받아들여졌지만 지속적인 캠페인의 결과 19세기 초에 노예 매매가 불법이 되었고 몇 년 후에는 노예 소유가 불법이 되었습니다. 사회 심리학자 Moscovici와 Nemeth는 자신이 옳다고 확신하는 특정 견해를 고수하는 소수의 사람들이 시간이 지남에 따라 더 큰 그룹에 큰 영향을 미칠 수 있음을 보여주었습니다. 그러나 중요한 것은 소수에 속하고 다수에 영향을 미치려는 사람들이 진실하고 일관되며 사회적 압력에 저항하는 것으로 보여야 한다는 것입니다. 사람들이 그렇게 행동하는 것을 보면 시간이 지나면서 그들이 왜 그런 행동을 하는지 궁금해지고 그들이 말하는 내용에 대해 더 진지하게 생각하게 될 것입니다.

어휘 정리 - 혼동 어휘

near 전치사: ~근처에 / 형용사: 가까운 [거리/시간] nearby 형/부: ~가까이 [장소] nearly 부사: 거의

어법 정리 - 비교급

순서개념	late 늦은	later 더 늦은(나중에)	last 가장 늦은=마지막	참조: lately 부사 '최근에', lastly 부사 '끝으로'
시간개념	late 늦은	latter 나중의(후자)	latest 최신의	참조: late가 전치수식이면 '고인이 된' The late father was generous.

어법 정리 - 반드시 현재 시제 써야 하는 경우 - 현재에도 바뀌지 않는 개념

불변의 진리(법칙)/ 과학적 사실/ 현재 습관/ 속담, 격언등. We learned planets **orbit** the sun. I thought necessity **is** the mother of invention.

사역동사			지각동사		
make have let	+ O +	동사원형 (O) - 직접 시킨 경우 to ~ (X) ~ing (X) - have 만 가능! p.p (O) - 목적어가 당한경우	보다 see, watch, observe, look at, witness 듣다 hear, overhear, listen to 느끼다(알아차리다) feel, notice	+O +	동사원형 (O) - 직접 하는 경우 to ~ (X) ~ing (O) - ~하는 중인 경우 p.p (O) - 목적어가 당한경우

[사역 능동] She made him talk. -> [수동] He was made **to talk**. *수동태는 **사역/ 지각**~ **원형** 기능이 없다. 원형은 to로 바꾸고 ~ing, p.p는 그대로 쓴다.
[지각 능동] We saw him talk. -> [수동] He was seen **to talk**.
[지각 능동] We saw him talking. -> [수동] He was seen **talking**. [지각 능동] We saw him wounded. -> [수동] He was seen **wounded**.

02

Attention is selective. We cannot focus on everything, and the knowledge we bring to a given situation ***allows*** us ***to direct*** our attention to the most important elements and ***to ignore*** the rest. The extent to which our schemas and expectations guide our attention was powerfully demonstrated by an experiment *in which* participants watched a videotape of two "teams" of three people, each passing a basketball back and forth. The members of one team wore white shirts, and the members of the other team wore black shirts. Each participant ***was asked to count*** the number of passes made by the members of one of the teams. Forty-five seconds into the action, a person wearing a gorilla costume strolled into the middle of the action. Although a large black gorilla might seem hard to miss, only half the participants noticed it! The participants' schemas about what is likely to happen in a game of catch directed their attention so intently to some parts of the videotape that they failed to see a rather dramatic stimulus they did not expect to see.

주의는 선택적이다. 우리는 모든 것에 집중할 수 없으며 주어진 상황에 대한 지식을 통해 가장 중요한 요소에 주의를 기울이고 나머지는 무시할 수 있다. 우리의 스키마와 기대가 주의를 이끄는 정도는 참가자들이 3명으로 구성된 두 '팀'이 각자 농구공을 주고받으며 패스하는 비디오테이프를 보는 실험으로 매우 효과적으로 입증되었다. 한 팀의 구성원들은 흰색 셔츠를 입었고, 다른 팀 구성원들은 검은색 셔츠를 입었다. 각 참가자는 한 팀의 구성원들이 한 패스의 횟수를 세어 보라는 요청을 받았다. 활동이 시작되고 45초 후, 고릴라 의상을 입은 한 사람이 그 활동의 한가운데로 걸어 들어갔다. 커다란 검은 고릴라는 놓치기 어려워 보이겠지만, 참가자의 절반만이 그것을 알아챘다! 캐치볼 게임에서 일어날 가능성이 있는 일에 관한 스키마 때문에 참가자들은 비디오테이프의 일부분에 매우 열중하여 주의를 기울였으므로, 자신들이 볼 것으로 예상하지 못한 꽤 인상적인 자극물을 보지 못했다.

어법 정리 - 5형식 동사 - 목적보어자리에 to 부정사 사용 [앞으로 ~할, 아직 안 한일에 사용]

ask, allow, advise, beg, cause, compel, enable, encourage, expect, force, inspire, lead, motivate, persuade, require, urge, want + 목 + to ~

V ~하다 목적어가 ~ 하도록[~하는 것을] > 앞으로 할 일이라서 to 부정사

* 참조 $\overset{S}{\text{She}}$ $\overset{V}{\text{forced}}$ $\overset{O}{\text{him}}$ $\overset{OC}{\text{to do it}}$ [능동] $\overset{S}{\text{He}}$ was $\overset{V}{\text{forced}}$ $\overset{C}{\text{to do it}}$ [수동] - 수동으로 바뀌어도 to 부정사이어야 함 [2형식으로 바뀜]

03 현대 과학 발전으로 인하여, 교실에서 과학 실험이 가능하고, 사람들도 과학적으로 사고하게 되었다.

With the rise of modern science new habits of mind developed. The method of the sciences and the image of scientific narratives became unquestioned and reinforced the new habits of mind, becoming an accomplice to those that would best accommodate the new image. These habits of mind became a duplication in the classroom of what the sciences were supposed to be doing in the laboratory. They developed clear and distinct ideas imitating mathematical models that are hypothetical, abstract, ahistorical, and humanly disembodied. Descartes, Newton, Galileo, Locke, and Rousseau are the best examples. The mind was trained to repeat certain logical operations until a habit was developed of reading the world according to those skills. Even if the reading was supposed to be disembodied and therefore objective, the result was that the viewpoints and skills became embodied in those using *them*. For the older habits of mind, external cosmologies (now considered outdated) were substituted in all classrooms.

* accomplice: 공범 ** duplication: 복제, 복제품 *** cosmology: 우주론

현대 과학의 등장과 함께 새로운 마음의 습관이 생겨났습니다. 과학의 방법과 과학적 내러티브의 이미지는 의문의 여지가 없게 되었고 새로운 이미지를 가장 잘 수용할 사람들의 공범자가 되어 마음의 새로운 습관을 강화했습니다. 이러한 마음의 습관은 과학이 실험실에서 해야 할 일을 교실에서 복제하게 되었습니다. 그들은 가상적이고 추상적이며 비역사적이며 인간적으로 분리된 수학적 모델을 모방하는 명확하고 뚜렷한 아이디어를 개발했습니다. Descartes, Newton, Galileo, Locke, Rousseau가 가장 좋은 예입니다. 마음은 그러한 기술에 따라 세상을 읽는 습관이 개발될 때까지 특정 논리적 연산을 반복하도록 훈련되었습니다. 읽기가 실체가 없어 객관적이라고 가정하더라도 그 결과 관점과 기술이 그것을 사용하는 사람들에게 구체화되었습니다. 구식 사고 습관이 모든 교실에서 (지금은 시대에 뒤떨어진 것으로 간주되는) 외부 우주론으로 대체되었습니다.

04 일반 상품의 가격 책정과 유통은 잘 알려져 있지만, 영화의 배급 과정은 잘 알려져 있지 않다.

Commodities do not go to market all on their own. Someone has to take them there. Goods must be moved, prices agreed, and only after a long and complicated process will the commodity in question be there for the end-user to enjoy. This applies to films and videos as much as it *does* to any other commodity, and it applies even in that sector of the film and video business that likes to think of itself as remote from and even antagonistic to the regular processes of commodity exchange. But perhaps because of this aversion, the process by which commodities get to market — generally referred to in the film trade as distribution — is the least studied of all the aspects of cinema and other forms of moving image. A lot is written about film and video production, about the films and videos produced and about how they are perceived/received by the spectator, but very little about the intermediate stages between production and consumption. Sometimes it seems as if, in the world of cinema and the moving image, commodities do indeed mysteriously get to market all on their own.

* antagonistic: 상반되는 ** aversion: 반감

상품은 저절로 시장에 출시되지 않습니다. 누군가 그들을 그곳으로 데려가야 합니다. 상품을 이동하고 가격을 합의해야 하며 길고 복잡한 과정을 거쳐야 해당 상품을 최종 사용자가 즐길 수 있습니다. 이것은 다른 상품과 마찬가지로 영화와 비디오에 적용되며, 상품 교환의 정규 프로세스와 동떨어져 있고 심지어 적대적이라고 생각하는 영화 및 비디오 비즈니스 부문에도 적용됩니다. 그러나 아마도 이러한 반감 때문에 상품이 시장에 도달하는 과정(일반적으로 영화 무역에서 유통이라고 함)은 영화와 다른 형태의 동영상의 모든 측면에 대해 가장 적게 연구되었습니다. 영화와 비디오 제작, 제작된 영화와 비디오, 관객이 어떻게 인식/수용하는지에 대해서는 많은 글이 쓰였지만 제작과 소비 사이의 중간 단계에 대해서는 거의 언급되지 않았습니다. 때로는 영화와 동영상의 세계에서 상품이 신비롭게도 저절로 시장에 나오는 것처럼 보입니다.

Recognizing ethical issues is the most important step in understanding business ethics.

(A) For instance, should an employee report on a co-worker engaging in time theft? Should a salesperson leave out facts about a product's poor safety record in his presentation to a customer? Such questions require the decision maker to evaluate the ethics of his or her choice and decide whether to ask for guidance.

(B) An ethical issue is an identifiable problem, situation, or opportunity that requires a person to choose from among several actions that may be evaluated as right or wrong, ethical or unethical. Learning how to choose from alternatives and make a decision requires not only good personal values, but also knowledge competence in the business area of concern.

(C) Employees also need to know when to rely on their organizations' policies and codes of ethics or have discussions with co-workers or managers on appropriate conduct. Ethical decision making is not always easy because there are always gray areas that create dilemmas, no matter how decisions are made.

40) 윗글의 알맞은 순서를 배열하시오. [주관식]

41) 윗글의 주제로 가장 적절한 것을 고르시오.

① learning ethic at school
② opportunity for business
③ ethical issues in business
④ how decisions are made
⑤ gray areas that create dilemmas

01

Sometimes it's important to disagree.

(A) The important thing, though, is that those people who are in the minority and trying to influence the majority should be seen to be genuine, consistent and resisting social pressure. If we see people acting like that, over time we become curious about why they are doing it and so are likely to think more seriously about what they are saying.

(B) All the great social reforms which took place in the eighteenth century, for instance, began with the dedicated campaigns of a handful of people who saw something wrong, and did not let it rest. Slavery was widely accepted in Europe in the eighteenth century, but as a result of consistent campaigning, the slave trade was made illegal near the beginning of the nineteenth century, and the owning of slaves became illegal a few years later.

(C) Social psychologists Moscovici and Nemeth showed that if just a few people stick to a particular view, which they are convinced is right, then over time they can have a great deal of influence on a larger group.

⑤ 특정 그룹에 대한 비난

02

Attention is selective. We cannot focus on everything, and the knowledge we bring to a given situation allows us to direct our attention to the most important elements and to ignore the rest.

(A) Although a large black gorilla might seem hard to miss, only half the participants noticed it! The participants' schemas about what is likely to happen in a game of catch directed their attention so intently to some parts of the videotape that they failed to see a rather dramatic stimulus they did not expect to see.

(B) Each participant was asked to count the number of passes made by the members of one of the teams. Forty-five seconds into the action, a person wearing a gorilla costume strolled into the middle of the action.

(C) The extent to which our schemas and expectations guide our attention was powerfully demonstrated by an experiment in which participants watched a videotape of two "teams" of three people, each passing a basketball back and forth. The members of one team wore white shirts, and the members of the other team wore black shirts.

44) 윗글의 알맞은 순서를 배열하시오. [주관식]

03

With the rise of modern science new habits of mind developed.

(A) They developed clear and distinct ideas imitating mathematical models that are hypothetical, abstract, ahistorical, and humanly disembodied. Descartes, Newton, Galileo, Locke, and Rousseau are the best examples. The mind was trained to repeat certain logical operations until a habit was developed of reading the world according to those skills.

(B) Even if the reading was supposed to be disembodied and therefore objective, the result was that the viewpoints and skills became embodied in those using them. For the older habits of mind, external cosmologies (now considered outdated) were substituted in all classrooms.

(C) The method of the sciences and the image of scientific narratives became unquestioned and reinforced the new habits of mind, becoming an accomplice to those that would best accommodate the new image. These habits of mind became a duplication in the classroom of what the sciences were supposed to be doing in the laboratory.

④ 뛰어난 과학자들이 엉뚱함
⑤ 현대 과학으로 인한 새로운 사고 습관

04

Commodities do not go to market all on their own. Someone has to take them there.

(A) Goods must be moved, prices agreed, and only after a long and complicated process will the commodity in question be there for the end-user to enjoy. This applies to films and videos as much as it does to any other commodity, and it applies even in that sector of the film and video business that likes to think of itself as remote from and even antagonistic to the regular processes of commodity exchange.

(B) A lot is written about film and video production, about the films and videos produced and about how they are perceived/received by the spectator, but very little about the intermediate stages between production and consumption. Sometimes it seems as if, in the world of cinema and the moving image, commodities do indeed mysteriously get to market all on their own.

(C) But perhaps because of this aversion, the process by which commodities get to market — generally referred to in the film trade as distribution — is the least studied of all the aspects of cinema and other forms of moving image.

_____ is the most important step in understanding business ethics. An ethical issue is an identifiable problem, situation, or opportunity that ① **requires** a person to choose from among several actions that may be evaluated as right or wrong, ethical or unethical. Learning how to choose from alternatives and ② **make** a decision requires not only good personal values, but also knowledge competence in the business area of concern. Employees also need to know when to rely on their organizations' policies and codes of ethics or have discussions with co-workers or managers on appropriate conduct. Ethical decision making is not always easy ③ **because** there are always gray areas that create dilemmas, no matter how decisions are made. For instance, should an employee ④ **report** on a co-worker engaging in time theft? Should a salesperson leave out facts about a product's poor safety record in his presentation to a customer? Such questions require the decision maker ⑤ **evaluating** the ethics of his or her choice and decide whether to ask for guidance.

49) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① Lunching a start-up ② How to make decisions
③ Creating dilemmas ④ Recognizing ethical issues
⑤ Becoming a business owner
