고 3 2021년 6 월 모의고사

18

Dear Ms. Larson,

I am writing to you with new information about your current membership. Last year, you signed up for our museum membership that provides special discounts. As stated in the last newsletter, this year we are happy to be celebrating our 50th anniversary. So we would like to offer you further benefits. These include free admission for up to ten people and 20% off museum merchandise on your next visit. You will also be invited to all new exhibition openings this year at discounted prices. We hope you enjoy these offers. For any questions, please feel free to contact us.

귀하의 현재 멤버십에 대한 새로운 정보를 귀하께 글로 알려드립니다. 작년에 귀하께서는 특별 할인을 제공하는 저희 박물관 멤버십을 신청하셨습니다. 지난번 소식지에서 언급되었듯이, 올해 저희는 저희의 50주년을 기념하게 되어 기쁩니다. 그래서 저희는 귀하께 더 많은 혜택을 드리고 싶습니다. 여기에는 귀하의 다음 방문시 최대 10명까지의 무료 입장과 박물관 상품 20% 할인 혜택이 포함됩니다. 귀하께서는 또한 할인된 가격으로 올해 모든 새로운 전시회 개막식에 초대될 것입니다. 저희는 귀하께서 이러한 제공을 누리시기를 바랍니다. 문의 사항이 있으시면 저희에게 언제든지 문의해 주십시오.

19

As Natalie was logging in to her first online counseling session, she wondered, “How can I open my heart to the counselor through a computer screen?” Since the counseling center was a long drive away, she knew that this would save her a lot of time. Natalie just wasn’t sure if it would be as helpful as meeting her counselor in person. Once the session began, however, her concerns went away. She actually started thinking that it was ***much*** more convenient than expected. She felt ***as if*** the counselor ***were*** in the room with her. As the session closed, she told him with a smile, “I’ll definitely see you online again!”

Natalie는 자신의 처음 온라인 상담 시간에 접속하면서, “내가 컴퓨터 화면을 통해 상담사에게 어떻게 나의 마음을 열 수 있을까?”라는 의문을 가졌다. 상담 센터가 차로 오래 가야 하는 곳에 있었기 때문에, 그녀는 이것이 자신에게 많은 시간을 절약해 줄 것임을 알고 있었다. 다만 Natalie는 그것이 상담사를 직접 만나는 것만큼 도움이 될지 확신할 수 없었다. 하지만 일단 (상담)시간이 시작되자, 그녀의 걱정은 사라졌다. 그녀는 실제로 그것이 예상했던 것보다 훨씬 더 편리하다고 생각하기 시작했다. 그녀는 마치 상담사가 자기와 함께 같은 방 안에 있는 것처럼 느꼈다. (상담)시간이 끝났을 때, 그녀는 미소를 지으며 그에게 말했다. “온라인에서 꼭 다시 만나요!”

어법 정리 – 비교급 앞에 표현

much, far, even, still, a lot, by far * very 는 불가

어법 정리 – I wish / as if (though) 가정법

I wish I were rich.	He talks as if he were rich.
지금 바란다 지금 부자이길	지금 말한다 지금 부자처럼
I wish I had been rich.	He talks as if he had been rich.
지금 바란다 전에 부자이길	지금 말한다 전에 부자처럼
I wished I were rich.	He talked as if he were rich.
전에 바랬다 전에(그때) 부자이길	전에 말했다 전에(그때) 부자처럼
I wished I had been rich.	He talked as if he had been rich.
전에 바랬다 그보다 전에 부자였길	전에 말했다 그보다 전에 부자처럼

20

New ideas, such as those inspired by scientific developments, are often aired and critiqued in our popular culture as part of a healthy process of public debate, and scientists sometimes deserve the criticism they get. But the popularization of science would be greatly enhanced by improving the widespread images of the scientist. Part of the problem may be that the majority of the people who are most likely to write novels, plays, and film scripts were educated in the humanities, not in the sciences. Furthermore, the few scientists-turned-writers have used their scientific training as the source material for thrillers that further damage the image of science and scientists. We need more screenplays and novels that present scientists in a positive light. In our contemporary world, television and film are particularly influential media, and it is likely that the introduction of more scientist-heroes would help to make science more attractive.

과학 발전에 영감을 받은 아이디어와 같은 새로운 아이디어는 건전한 공개 토론 과정의 일부로 우리의 대중문화에서 자주 방송되고 비판되는데, 과학자들은 때로 자신들이 받는 비판을 받는 것이 마땅하다. 그러나 널리 퍼진 과학자의 이미지를 개선한다면 과학의 대중화는 크게 증진될 것이다. 그 문제의 일부는 아마도 소설, 희곡, 그리고 영화 대본을 쓸 가능성이 높은 사람 대다수가 과학이 아니라 인문학 분야에서 교육받았다는 것일 수도 있다. 더욱이 작가로 전업한 몇 안 되는 과학자가 자신들이 받은 과학 교육을 과학과 과학자의 이미지를 더욱 해치는 스릴러물의 원자료로 사용해 왔다. 우리는 긍정적인 관점에서 과학자를 보여주는 더 많은 영화대본과 소설이 필요하다. 우리의 현대 세계에서 텔레비전과 영화는 특히 영향력 있는 매체여서, 더 많은 과학자 영웅들을 주인공으로 도입한다면 과학을 더 매력 있게 하는 데 도움이 될 것이다.

21

The single most important change you can make in your working habits is to switch to creative work first, reactive work second. This means blocking off a large chunk of time every day for creative work on your own priorities, with the phone and e-mail off. I used to be a frustrated writer. Making this switch turned me into a productive writer. Yet there wasn't a single day when I sat down to write an article, blog post, or book chapter without a string of people waiting for me to get back to them. It wasn't easy, and it still isn't, particularly when I get phone messages beginning "I sent you an e-mail two hours ago...!" By definition, this approach goes against the grain of others' expectations and the pressures they put on you. It takes willpower to switch off the world, even for an hour. It feels uncomfortable, and sometimes people get upset. But it's better to disappoint a few people over small things, than to abandon your dreams for *an empty inbox*. Otherwise, you're sacrificing your potential for the illusion of professionalism.

여러분이 일하는 습관에서 이뤄낼 수 있는 가장 중요한 단 한 가지 변화는 창조적인 일을 먼저 하고 대응적은 일을 그 다음에 하는 쪽으로 전환하는 것이다. 이것은 전화기와 이메일을 끈 채, 여러분 자신의 우선순위에 따라 창조적인 작업을 위해 매일 많은 시간을 차단한다는 것을 의미한다. 나는 좌절감을 느끼는 작가였다. 이렇게 전환하자 나는 생산적인 작가로 변신했다. 하지만 내가 기사나 블로그 게시글 혹은 책의 한 챕터를 쓰려고 앉을 때마다 일련의 사람들이 내가 그들에게 답장을 주기를 기다리지 않은 날이 단 하루도 없었다. 그것은 쉽지 않았고, 특히 "'2시간 전에' 이메일을 보냈어요...!"라고 시작하는 전화 메시지를 받을 때는 아직도 쉽지 않다. 당연히, 이러한 접근방식은 다른 사람들의 기대와 그들이 여러분에게 가하는 압박에 맞지 않는다. 단 한 시간 동안이라도 세상에 대한 스위치를 끄는 데는 의지가 필요하다. 그것은 불편한 느낌이 들고, 때로 사람들이 기분 상하기도 한다. 그러나 빈 수신함을 위해(수신함을 늘 비어 있게 하려고) 자신의 꿈을 포기하는 것보다, 사소한 것에 대해 몇 사람을 실망하게 하는 것이 낫다. 그렇게 하지 않으면, 여러분은 전문성이라는 환상을 위해 자신의 잠재력을 희생하고 있다.

22

Contractors that will construct a project may place more weight on the planning process. Proper planning forces detailed thinking about the project. It allows the project manager (or team) to “build the project in his or her head.” The project manager (or team) can consider different methodologies thereby deciding what works best or what does not work at all. This detailed thinking may be the only way to discover restrictions or risks that were not addressed in the estimating process. It would be far better to discover in the planning phase that a particular technology or material will not work than in the execution process. The goal of the planning process for the contractor is to produce a workable scheme that uses the resources efficiently within the allowable time and given budget. A well-developed plan does not guarantee that the executing process will proceed flawlessly or that the project will even succeed in meeting its objectives. It does, however, greatly improve its chances.

* execute: 실행하다

주택 단지를 건설하려는 도급업자들은 계획 과정에 비중을 더 많이 둘 수 있다. 적절한 계획은 그 건설 사업에 대해 면밀한 사고를 하게 한다. 그것은 건설 사업 책임자(또는 팀)가 ‘그 주택단지를 자기 머릿속에 지어보게’ 해 준다. 그 건설 사업 책임자(또는 팀)는 여러 다른 방법론을 고려함으로써 어떤 것이 가장 잘 작동되는지 또는 어떤 것이 전혀 작동되지 않는지를 결정할 수 있다. 이런 면밀한 사고는 추정 과정에서 다루지 못했던 제약이나 위험을 발견할 수 있는 유일한 방법일 수 있다. 실행 과정보다는 계획 단계에서 특정 기술이나 재료가 작동되지 않으리라는 것을 발견하는 편이 훨씬 더 나을 것이다. 도급업자에게 계획 과정의 목표는 허용되는 시간과 주어진 예산 내에서 자원을 효율적으로 사용하는 실행 가능한 계획을 만들어 내는 것이다. 잘 만들어진 계획이, 실행 과정이 흠 없이 진행될 것이라거나 심지어 그 건설 사업이 그 목표를 달성하는 데 성공할 것이라고 보장하는 것은 아니다. 하지만 그것은 정말로 그 가능성을 크게 높인다.

23

Children can move effortlessly between play and absorption in a story, as if both are forms of the same activity. The taking of roles in a narratively structured game of pirates is not very different than the taking of roles in identifying with characters as one watches a movie. It might be thought that, as they grow towards adolescence, people give up childhood play, but this is not so. Instead, the bases and interests of this activity change and develop to playing and watching sports, to the fiction of plays, novels, and movies, and nowadays to video games. In fiction, one can enter possible worlds. When we experience emotions in such worlds, this is not a sign that we are being incoherent or regressed. It derives from trying out metaphorical transformations of our selves in new ways, in new worlds, in ways that can be moving and important to us.

아이들은 (혁할)놀이와 이야기로의 몰입이 같은 활동의 형태인 것처럼 쉽게 그 둘 사이를 이동한다. 이야기식 구조의 해적 게임에서 역할을 맡는 것은 영화를 감상하면서 등장인물과 동일시하며 역할을 맡는 것과 크게 다르지 않다. 사람들이 청소년기로 성장하면서 아동기의 놀이를 그만둔다고 여겨질 수도 있겠지만, 이는 그렇지 않다. 대신에, 이런 활동의 기반과 흥미가 바뀌어 스포츠 활동과 관람으로, 연극, 소설, 영화의 허구로, 그리고 최근에는 비디오 게임으로 발전한다. 허구에서 사람들은 있을법한 세계로 들어갈 수 있다. 그런 세계에서 감정들을 경험하면, 이는 우리가 일관되지 않다거나 퇴행하고 있다는 신호가 아니다. 그것은 새로운 방식으로, 새로운 세계에서, 우리에게 감동적이고 중요할 수 있는 방식으로 우리 자신의 은유적 변신을 시도하는 것에서 기인하는 것이다.

24

Although cognitive and neuropsychological approaches emphasize the losses with age that might impair social perception, motivational theories indicate that there may be some gains or qualitative changes. Charles and Carstensen review a *considerable* body of evidence indicating that, as people get older, they tend to prioritize close social relationships, focus more on achieving emotional well-being, and attend more to positive emotional information ***while*** ignoring negative information. These changing motivational goals in old age have implications for attention to and processing of social cues from the environment. Of particular importance in considering emotional changes in old age is the presence of a positivity bias: that is, a tendency to notice, attend to, and remember more positive compared to negative information. The role of life experience in social skills also indicates that older adults might show gains in some aspects of social perception.

* cognitive: 인식의 ** impair: 해치다

인식적 접근법과 신경심리학적 접근법이 사회 지각을 손상시킬지도 모르는 노화에 따른 상실을 강조하긴 하지만, 동기 이론은 어떤 이득이나 질적 변화가 있을 수 있다는 것을 보여 준다. Charles와 Carstensen은 사람들은 나이가 들면서 친밀한 사회적 관계를 우선시하고, 정서적 행복을 성취하는 데 더 주력하고, 긍정적인 정서적 정보를 더 주목하는 반면에 부정적인 정보는 무시하는 경향이 있다는 것을 보여주는 상당한 양의 증거를 재검토한다. 노년의 이런 변화하는 동기 부여상의 목표는 주변 환경으로부터의 사회적 신호를 주목하고 처리하는 것에 영향을 미친다. 노년의 정서적 변화를 고려할 때 특히 중요한 것은 긍정 편향, 즉 부정적 정보와 비교해 더 많은 긍정적 정보를 인지하고, 주목하고, 기억하는 경향의 존재이다. 사회적 기술에 관한 인생 경험의 역할 또한 노년의 성인이 사회 지각의 이부 측면에서 이득을 얻을 수 있다는 것을 보여준다.

운동 어휘

consider ⓥ 고려하다 - considerate ⓐ 사려 깊은 / considerable ⓐ 상당한

어법 정리 – (전치사 + 명사) / { 접속사 S + V }

Emil Záopek, a former Czech athlete, is considered one of the greatest long-distance runners ever. He was also famous for his distinctive running style. While working in a shoe factory, he participated in a 1,500-meter race and won second place. After that event, he took a more serious interest in running and devoted himself to it. At the 1952 Olympic Games in Helsinki, he won three gold medals in the 5,000-meter and 10,000-meter races and in the marathon, breaking Olympic records in each. He was married to Dana Záopková who was an Olympic gold medalist, too. Záopek was also noted for his friendly personality. In 1966, Záopek invited Ron Clarke, a great Australian runner who had never won an Olympic gold medal, to an athletic meeting in Prague. After the meeting, he gave Clarke one of his gold medals as a gift.

전직 체코 육상 선수 Emil Záopek은 역대 가장 위대한 장거리 선수 중 한 명이라고 여겨진다. 그는 또한 독특한 들리기 스타일로 유명했다. 신발 공장에서 일하던 때 그는 1,500미터 경주에 참가해서 2등을 했다. 그 일 이후로 그는 달리기에 더 진지한 흥미를 느끼게 되어 그것에 전념했다. 1952년 헬싱키 올림픽 대회에서 그는 5,000미터, 1만 미터 종목과 마라톤에서 세 개의 금메달을 땄는데, 각 종목에서 올림픽 기록을 깼다. 그는 Dana Záopková와 결혼했는데, 그녀 또한 올림픽 금메달리스트였다. Záopek은 또한 그의 다정한 성격으로 유명했다. 1966년에, Záopek은 올림픽 금메달을 딴 적이 없었던 위대한 호주 달리기 선수 Ron Clarke를 프라하에서 열린 체전에 초대했다. 그 대회 후에 그는 Clarke에게 자신의 금메달 중 하나를 선물로 주었다.

27~28 안내문

29

Most historians of science point to the need for a reliable calendar to regulate agricultural activity as the motivation for learning about what we now call astronomy, the study of stars and planets. Early astronomy provided information about when to plant crops and gave humans their first formal method of recording the passage of time. Stonehenge, the 4,000-year-old ring of stones in southern Britain, is perhaps the best-known monument to the discovery of regularity and predictability in the world we inhabit. The great markers of Stonehenge point to the spots on the horizon where the sun rises at the solstices and equinoxes — the dates we still use to mark the beginnings of the seasons. The stones may even have been used to predict eclipses. The existence of Stonehenge, built by people without writing, bears silent testimony both to the regularity of nature and to the ability of the human mind to see behind immediate appearances and *discover* deeper meanings in events.

* monument: 기념비 ** eclipse: (해·달의) 식(蝕) *** testimony: 증언

대부분의 과학 역사가들은 별과 행성에 대한 연구, 즉 우리가 현재 천문학이라 부르는 것에 대해 배우고자 하는 동기로 농업 활동을 규제하기 위한 신뢰할 만한 달력의 필요성을 지적한다. 초기 천문학은 언제 작물을 심어야 하는지에 대한 정보를 제공했고 인간에게 시간의 흐름을 기록하는 그들 최초의 공식적인 방법을 제공했다. 영국 남부에 있는 4,000년 된 고리 모양을 하고 있는 돌들인 스톤헨지는 아마도 우리가 살고 있는 세계에서 규칙성과 예측 가능성을 발견한 가장 잘 알려진 기념비일 것이다. 스톤헨지의 커다란 표식은 우리가 계절의 시작을 표시하기 위해 여전히 사용하는 날짜인 지점(至點)과 분점(分點)에서 태양이 뜨는 지평선의 장소를 가리킨다. 그 돌들은 심지어 (해•달의) 식(蝕)을 예측하는 데 사용되었을지도 모른다. 글이 없던 시절 사람들이 세운 스톤헨지의 존재는 자연의 규칙성뿐만 아니라 눈앞에 보이는 모습의 이면을 보고 사건에서 더 깊은 의미를 발견할 수 있는 인간의 정신적 능력을 말없이 증언해 준다.

30

Sport can trigger an emotional response in its consumers of the kind rarely brought forth by other products. Imagine bank customers buying memorabilia to show loyalty to their bank, or consumers identifying so strongly with their car insurance company that they get a tattoo with its logo. We know that some sport followers are so passionate about players, teams and the sport itself that their interest borders on obsession. This addiction provides the emotional glue that binds fans to teams, and maintains loyalty even in the face of on-field failure. While most managers can only dream of having customers that are as passionate about their products as sport fans, the emotion triggered by sport can also have a negative impact. Sport's emotional intensity can mean that organisations have strong attachments to the past through nostalgia and club tradition. As a result, they may *ignore* efficiency, productivity and the need to respond quickly to changing market conditions. For example, a proposal to change club colours in order to project a more attractive image may be defeated because it breaks a link with tradition.

* memorabilia: 기념품 ** obsession: 집착

스포츠는 그것의 소비자에게 다른 제품이 좀처럼 일으키지 못하는 종류의 정서적 반응을 촉발시킬 수 있다. 은행 고객이 그들 은행에 대한 충성심을 보여주기 위해 기념품을 구업하거나, 고객이 그들 자동차 보험 회사에 대해 매우 강한 동질감을 가져서 회사 로고로 문신을 한다고 상상해 보라. 우리는 일부 스포츠 추종자들이 선수, 팀, 그리고 그 스포츠 자체에 매우 열정적이어서 그들의 관심이 집착에 아주 가깝다는 것을 알고 있다. 이런 중독은 팬을 팀과 묶어주는 정서적 접착제를 제공하고, 구장에서 일어나는 실패에도 충성심을 유지하게 한다. 대부분의 관리자는 스포츠팬만큼 그들 제품에 열정적인 고객을 가지기를 오직 꿈꾸지만, 스포츠로 인해 촉발되는 감정은 또한 부정적인 영향을 미칠 수 있다. 스포츠의 정서적 격렬함은 조직이 향수와 클럽 전통을 통해 과거에 대한 강한 애착을 가지고 있다는 것을 의미할 수 있다. 그 결과, 그것[조직]은 효율성, 생산성 및 변화하는 시장 상황에 신속하게 대응해야 할 필요성을 무시할 수도 있다. 예를 들어, 더 매력적인 이미지를 투사하기 위해 클럽 색깔을 바꾸자는 제안은 그것이 전통과의 관계를 끊기 때문에 무산될 수도 있다.

31

The growth of academic disciplines and sub-disciplines, such as art history or palaeontology, and of particular figures such as the art critic, helped produce principles and practices for selecting and organizing what was worthy of keeping, though it remained a struggle. Moreover, as museums and universities drew further apart toward the end of the nineteenth century, and as the idea of objects as a highly valued route to knowing the world went into decline, collecting began to lose its status as a worthy intellectual pursuit, especially in the sciences. The really interesting and important aspects of science were increasingly those invisible to the naked eye, and the classification of things collected no longer promised to produce cutting-edge knowledge. The term "butterfly collecting" could come to be used with the adjective "mere" to indicate a pursuit of *secondary* academic status.

* palaeontology: 고생물학 ** adjective: 형용사

학과의 성정과 미술사학이나 고생물학과 같은 하위 학과의 성장, 그리고 미술평론가와 같은 특정 인물의 성장은 비록 힘든 일로 남게 되었지만, 지킬 가치가 있는 것을 선택하고 정리하기 위한 원칙과 관행의 도출에 도움이 되었다. 게다가, 19세기 말엽에 박물관과 대학이 더욱 멀어지면서, 그리고 사상을 알게 되는 매우 가치 있는 경로로서 대상이라는 개념이 쇠퇴하면서, 수집은 특히 과학에서 가치 있는 지적 활동으로써의 지위를 잃기 시작했다. 과학의 참으로 흥미롭고 중요한 측면은 점점 더 육안에 보이지 않는 것들이었고, 수집된 것들에 대한 분류는 더 이상 최첨단의 지식을 생산할 가망이 없었다. '나비 채집'이라는 용어는 '한낱(mere)'이라는 형용사와 사용되어, 부차적인 학문적 지위의 추구를 나타낼 수 있었다.

32

Some of the most insightful work on information seeking emphasizes “strategic self-ignorance,” understood as “the use of ignorance as an excuse to engage excessively in pleasurable activities that may be harmful to one’s future self.” The idea here is that if people are present-biased, they might avoid information that would *make current activities less attractive* — perhaps because it would produce guilt or shame, perhaps because it would suggest an aggregate trade-off that would counsel against engaging in such activities. St. Augustine famously said, “God give me chastity – tomorrow.” Present-biased agents think: “Please let me know the risks – tomorrow.” Whenever people are thinking about engaging in an activity with short-term benefits but long-term costs, they might prefer to delay receipt of important information. The same point might hold about information that could make people sad or mad: “Please tell me what I need to know – tomorrow.”

* aggregate: 합계의 ** chastity: 정결

정보 탐색에 관한 가장 통찰력 있는 연구 중 일부는 ‘전략적 자기 무지’를 강조하는데, 이는 ‘무지를 핑계로 자신의 미래 자아에 해로울 수도 있는 즐거운 활동을 과도하게 하는 것’으로 이해된다. 여기서의 생각은, 만약 사람들이 현재에 편향되어 있다면, 현재의 활동을 덜 매력적으로 만들 정보를 피할 수도 있다는 것인데, 아마도 그것이 죄책감이나 수치심을 유발할 것이고, 그러한 활동을 하지 말라고 충고할 총체적 절충을 제안할 것이기 때문일 것이다. 성 아우구스티누스는 “하나님 제게 정결을 내일 주시옵소서.”라는 유명한 말을 했다. 현재에 편향되어 있는 행위자들은 “제가 위험을 내일 알게 해주세요.”라고 생각한다. 사람들이 단기적인 혜택은 있지만 장기적인 대가가 있는 활동을 하려고 생각하고 있을 때마다, 그들은 중요한 정보의 수신을 미루는 것을 선호할 수도 있다. 사람들을 슬프게 하거나 화나게 할 수 있는 정보에 관해서도 똑같은 점이 있을 수 있다. “제가 알아야 할 것을 내일 말해 주세요.”

33

Concepts of nature are always cultural statements. This may not strike Europeans as much of an insight, for Europe’s landscape is so much of a blend. But in the new worlds – ‘new’ at least to Europeans – the distinction appeared much clearer not only to European settlers and visitors but also to their descendants. For that reason, they had the fond conceit of primeval nature uncontrolled by human associations which could later find expression in an admiration for wilderness. Ecological relationships certainly have their own logic and in this sense ‘nature’ can be seen to have a self-regulating but not necessarily stable dynamic independent of human intervention. But the context for ecological interactions *has increasingly been set by humanity*. We may not determine how or what a lion eats but we certainly can regulate where the lion feeds.

* conceit: 생각 ** primeval: 원시(시대)의 *** ecological: 생태학의

자연에 대한 개념은 항상 문화적 진술이다. 이것은 유럽인들에게 대단한 통찰이라는 인상을 주지 않을 수도 있는데, 왜냐하면 유럽의 풍경은 너무나 많이 혼합되어 있기 때문이다. 그러나 새로운(적어도 유럽인들에게는 ‘새로운’) 세계에서, 그 차이는 유럽 정착민과 방문객뿐만 아니라 그들의 후손에게도 훨씬 더 분명해 보였다. 그런 이유 때문에 그들은 후에 황야에 대한 감탄에서 표현을 찾을 수 있었던 인간과의 연관에 의해 통제되지 않는 원시 자연이라는 허황된 생각을 가지고 있었다. 생태학적 관계는 확실히 그 나름의 논리를 가지고 있었고, 이런 의미에서 ‘자연’은 인간의 개입과 무관하게, 자율적이지만 반드시 안정적이지는 않은 역동성을 가지고 있다고 볼 수 있다. 그러나 생태학적 상호작용의 맥락은 점점 더 인류에 의해 설정되어 왔다. 우리는 사자가 어떻게 또는 무엇을 먹는지는 정하지 못할 수도 있지만, 사자가 어디에서 먹이를 먹을지는 확실히 규제할 수 있다.

34

Emma Brindley has investigated the responses of European robins to the songs of neighbors and strangers. Despite the large and complex song repertoire of European robins, they were able to discriminate between the songs of neighbors and strangers. When they heard a tape recording of a stranger, they began to sing sooner, sang more songs, and overlapped their songs with the playback more often than they did on hearing a neighbor's song. As Brindley suggests, the overlapping of song may be an aggressive response. However, this difference in responding to neighbor versus stranger occurred only when the neighbor's song was played by a loudspeaker placed at the boundary between that neighbor's territory and the territory of the bird being tested. If the same neighbor's song was played at another boundary, one separating the territory of the test subject from another neighbor, it was treated as the call of a stranger. ***Not only*** ***does*** this result demonstrate that *the robins associate locality with familiar songs*, but it also shows that the choice of songs used in playback experiments is highly important.

* robin: 울새 ** territory: 영역

Emma Brindley는 이웃 새와 낯선 새의 노래에 유럽 울새가 보이는 반응을 조사해왔다. 유럽 울새의 크고 복잡한 노래 목록에도 불구하고, 그것은 이웃 새와 낯선 새의 노래를 구별할 수 있었다. 낯선 새의 테이프 녹음소리를 들었을 때, 그것은 이웃 새의 노래를 들었을 때 그랬던 것보다, 더 빨리 노래를 부르기 시작했고, 더 많은 노래를 불렀으며, 더 자주 자기 노래를 재생된 노래와 겹치게 불렀다. Brindley가 말하는 것처럼, 노래를 겹치게 하는 것은 공격적인 반응일 수도 있다. 그러나 이웃 새와 낯선 새에 대한 반응의 이러한 차이는, 이웃 새의 영역과 실험 대상이 되고 있는 그 새의 영역 사이의 경계에 놓은 확성기로 이웃 새의 노래를 틀었을 때만 발생했다. 같은 이웃 새의 노래를 다른 경계, 즉 실험 대상의 영역을 또 다른 이웃 새의 영역과 분리해 주는 경계에서 틀었을 경우, 그것은 낯선 새의 울음으로 취급되었다. 이 결과는 울새가 장소를 친숙한 노래와 연관시킨다는 것을 입증할 뿐만 아니라, 또한 (녹음소리) 재생 실험에 사용되는 노래의 선택이 매우 중요하다는 것을 보여 준다.

어법 정리 – 부정의미의 부사 (문장의 제일 앞에 위치한 경우 문장의 도치를 일으킴)

부정어 : no, not, never, nor, neither 등
거의 ~없는 : little, few
거의 ~않는 : seldom, hardly, rarely, barely, scarcely
only + 부사/ 부사구/ 부사절

일반 동사 Never **does** she **swim** alone.
조동사 Never **has** she **swum** alone.
be 동사 Never **is** she swimming alone.

* 참조: 부정어 도치, 의문문 도치, 가정법 if 생략 도치의 기본 원리는 같다.

35

Kinship ties continue to be important today. In modern societies such as the United States people frequently have family get-togethers, they telephone their relatives regularly, and they provide their kin with a wide variety of services. Eugene Litwak has referred to this pattern of behaviour as the 'modified extended family'. It is an extended family structure because multigenerational ties are maintained, but it is modified because it does not usually rest on co-residence between the generations and most extended families do not act as corporate groups. Although modified extended family members often live close by, the modified extended family does not require geographical proximity and ties are maintained even when kin are separated by *considerable* distances. In contrast to the traditional extended family where kin always live in close proximity, the members of modified extended families may freely move away from kin to seek opportunities for occupational advancement.

* kin: 친족 ** proximity: 근접

친족 유대 관계는 오늘날에도 계속 중요하다. 사람들이 자주 가족 모임을 갖는 미국과 같은 현대 사회에서, 그들은 자신의 친척에게 자주 전화하고, 아주 다양한 도움을 제공한다. Eugene Litwak은 이 행동 패턴을 '수정확대가족'이라고 언급했다. 그것은 다세대의 유대 관계가 유지되기 때문에 확대가족 구조이지만, 일반적으로 세대 간 공동 거주에 기초를 두지 않고 대부분의 확대가족이 공동 집단으로서 기능하지는 않기 때문에 수정확대가족 구조이다. 비록 수정확대가족의 구성원들이 흔히 가까이 살기는 하지만, 수정확대가족은 지리적 근접이 필요치 않으며, 유대 관계는 친척이 상당히 멀리 떨어져 있더라도 유지된다. 친척이 항상 아주 가까이서 사는 전통적인 확대가족과는 대조적으로, 수정확대가족의 구성원들은 친척에게서 자유로이 멀리 이주해가서 직업상의 발전을 위한 기회를 추구할 수도 있다.

운동 어휘

consider ⓥ 고려하다 - considerate ⓐ 사려 깊은 / considerable ⓐ 상당한

36

Spatial reference points are larger than themselves. This isn't really a paradox: landmarks are themselves, but they also define neighborhoods around themselves. In a paradigm that has been repeated on many campuses, researchers first collect a list of campus landmarks from students. Then they ask another group of students to estimate the distances between pairs of locations, some to landmarks, some to ordinary buildings on campus. The remarkable finding is that distances from an ordinary location to a landmark are judged shorter than distances from a landmark to an ordinary location. So, people would judge the distance from Pierre's house to the Eiffel Tower to be shorter than the distance from the Eiffel Tower to Pierre's house. Like black holes, landmarks seem to pull ordinary locations toward themselves, but ordinary places do not. This asymmetry of distance estimates violates the most elementary principles of Euclidean distance, that the distance from A to B must be the same as the distance from B to A. Judgments of distance, then, are not necessarily coherent.

* asymmetry: 비대칭

공간 기준점(공간적으로 기준이 되는 장소)은 자기 자신보다 더 크다. 이것은 그다지 역설적이지 않은데, 랜드마크(주요 지형지물)는 그 자체이기도 하지만, 또한 자기 자신 주변 지역을 (자신의 범위로) 규정하기도 한다. 많은 대학 캠퍼스에서 반복되어온 한 전형적인 예에서, 연구원들은 학생들에게서 캠퍼스 랜드마크의 목록을 수집한다. 그런 다음, 그들은 다른 학생 집단에게 쌍으로 이루어진 장소 사이의 거리, 즉 캠퍼스에 있는 어떤 장소에서 랜드마크까지, 어떤 장소에서 평범한 건물까지의 거리는 얼마인지를 추정하라고 요청한다. 주목할 만한 결과는 평범한 장소에서 랜드마크까지의 거리가 랜드마크에서 평범한 장소까지의 거리보다 더짧다고 추정된다는 것이다. 그래서 사람들은 Pierre의 집에서 에펠탑까지의 거리가 에펠탑에서 Pierre의 집까지의 거리보다 더 짧다고 추정할 것이다. 블랙홀처럼, 랜드마크는 평범한 장소를 자기 자신 방향으로 끌어들이는 것처럼 보이지만, 평범한 장소들은 그렇지 않다. 거리 추정에 관한 이 비대칭은, A에서부터 B까지의 거리는 B에서부터 A까지의 거리와 같아야 한다는 가장 기초적인 유클리드 거리 법칙에 위배된다. 그렇다면, 거리에 관한 추정은 반드시 인관성이 있는 것은 아니다.

37

A firm is deciding whether to invest in shipbuilding. If it can produce at sufficiently large scale, it knows the venture will be profitable. But one key input is low-cost steel, and it must be produced nearby. The company's decision boils down to this: if there is a steel factory close by, invest in shipbuilding; otherwise, don't invest. Now consider the thinking of potential steel investors in the region. Assume that shipyards are the only potential customers of steel. Steel producers figure they'll make money if there's a shipyard to buy their steel, but not otherwise. Now we have two possible outcomes — what economists call "multiple equilibria." There is a "good" outcome, in which both types of investments are made, and both the shipyard and the steelmakers end up profitable and happy. Equilibrium is reached. Then there is a "bad" outcome, in which neither type of investment is made. This second outcome also is an equilibrium because the decisions not to invest reinforce each other.

* equilibrium: 균형

한 회사가 조선업에 투자할지를 결정하고 있다. 만약 충분히 대규모로 생산할 수 있다면, 그것은 그 (사업상의) 모험이 수익성이 있을 거라는 것을 알고 있다. 하지만 한 가지 핵심 투입 요소는 저가의 강철이고, 그것은 근처에서 생산되어야 한다. 그 회사의 결정은 결국 다음과 같이 된다. 만약 근처에 강철 공장이 있다면, 조선업에 투자하고, 그렇지 않으면 투자하지 마라. 이제 그 지역에 있는 잠재적 강철 투자자들의 생각을 고려해 보라. 조선소가 유일한 잠재적 강철 소비자라고 가정하라. 강철 생산자들은 자신의 강철을 구매할 조선소가 있으면 자신이 돈을 벌 것이고, 그렇지 않으면 돈을 벌지 못하리라고 생각한다. 이제 우리는 경제학자들이 '복수균형'이라고 부르는 가능한 두 가지 결과를 갖게 된다. '좋은' 결과가 있는데, 그 결과 내에서는 두 가지 투자 형태가 모두 이루어지고, 조선소와 제강업자 모두 결국 이득을 얻고 만족하게 된다. 균형이 이루어지는 것이다. 그다음에 '나쁜' 결과가 있는데, 그 결과 내에서는 (둘 중) 어떤 투자 형태도 이루어지지 않는다. 이 두 번째 결과 또한 균형이 이루어진 것인데, 왜냐하면 투자하지 않겠다는 결정이 서로를 강화하기 때문이다.

38

In most organizations, the employee's immediate supervisor evaluates the employee's performance. This is because the supervisor is responsible for the employee's performance, providing supervision, handing out assignments, and developing the employee. A problem, however, is that supervisors often work in locations apart from their employees and therefore are not able to observe their subordinates' performance. Should supervisors rate employees on performance dimensions they cannot observe? To eliminate this dilemma, more and more organizations are implementing assessments referred to as 360-degree evaluations. Employees are rated not only by their supervisors but by coworkers, clients or citizens, professionals in other agencies with whom they work, and subordinates. The reason for this approach is that often coworkers and clients or citizens have a greater opportunity to observe an employee's performance and are in a better position to evaluate many performance dimensions.

* subordinate: 부하 직원

대부분의 조직에서, 직원의 직속상관은 그 직원의 성과를 평가한다. 이것은 그 관리자가 (직원에게) 감독을 제공하고, 과업을 배정하며, 그 직원을 계발하면서, 그 직원의 성과를 책임지기 때문이다. 하지만, 문제는 관리자가 흔히 직원과 떨어진 장소에서 일하기 때문에, 자신의 부하 직원들의 성과를 관찰할 수 없다는 것이다. 관리자는 자신이 관찰할 수 없는 성과 영역에 대해 직원들을 평가해야 하는가? 이 딜레마를 없애기 위해, 점점 더 많은 조직이 '다면 평가'라고 불리는 평가를 시행하고 있다. 직원들은 자신의 관리자에 의해서만이 아니라, 동료, 고객이나 시민, 함께 일하는 다른 대향사의 전문가들, 그리고 부하 직원들에 의해서도 평가를 받는다. 이 방법을 시행하는 이유는 동료와 고객이나 시민들이 흔히 어떤 직원의 성과를 관찰할 더 많은 기회를 가지며, 많은 평가 영역을 평가할 수 있는 더 나은 위치에 있기 때문이다.

39

The role that sleep plays in evolution is still under study. One possibility is that it is an advantageous adaptive state of decreased metabolism for an animal when there are no more pressing activities. This seems true for deeper states of inactivity such as hibernation during the winter when there are few food supplies, and a high metabolic cost to maintaining adequate temperature. It may be true in daily situations as well, for instance for a prey species to avoid predators after dark. On the other hand, the apparent universality of sleep, and the observation that mammals such as cetaceans have developed such highly complex mechanisms to preserve sleep on at least one side of the brain at a time, suggests that sleep additionally provides some vital service(s) for the organism. *This is particularly true since one aspect of sleep is decreased responsiveness to the environment.* If sleep is universal even when this potential price must be paid, the implication may be that it has important functions that cannot be obtained just by quiet, wakeful resting.

* metabolism: 신진대사** mammal: 포유동물

진화에 있어서 잠이 하는 역할은 여전히 연구 중이다. 한 가지 가능성은 그것(잠)이 더 이상 긴급한 활동이 없을 때 신진대사를 줄이는, 동물에게 유리한 적응적 상태라는 것이다. 이것은 먹을 것이 거의 없고 적정한 체온을 유지하는 데 높은 신진대사 비용이 드는 겨울 동안의 겨울잠과 같은, 더 깊은 무활동 상태의 경우에 해당하는 것처럼 보인다. 그것은, 예를 들어, 먹잇감이 되는 동물이 어두워진 이후에 포식자를 피하기 위한 것처럼, 또한 일상 상황에도 해당될지도 모른다. 다른 한편으로는, 잠의 분명한 보편성, 그리고 고래목의 동물들과 같은 포유동물들이 한 번에 적어도 뇌의 한쪽에서는 잠을 유지하는 매우 고도로 복잡한 기제를 발전시켰다는 관찰 결과는 잠이 생명체에게 생명 유지와 관련된 어떤 도움(들)을 추가로 제공한다는 것을 보여 준다. 잠의 한 가지 측면은 환경에 대한 반응성이 감소하는 것이기 때문에 이것은 특히 그러하다. 이러한 잠재적인 대가가 치러져야 할 때조차도 잠이 보편적으로 나타난다면, 그것이 갖는 함의는 조용한, 깨어있는 상태의 휴식만으로는 얻을 수 없는 중요한 기능을 그것(잠)이 갖고 있다는 것일 수도 있다.

40

The idea that planting trees could have a social or political significance appears to have been invented by the English, though it has since spread widely. According to Keith Thomas's history Man and the Natural World, seventeenth- and eighteenth-century aristocrats began planting hardwood trees, usually in lines, to declare the extent of their property and the permanence of their claim to it. "What can be more pleasant," the editor of a magazine for gentlemen asked his readers, "than to have the bounds and limits of your own property preserved and continued from age to age by the testimony of such living and growing witnesses?" Planting trees had the additional advantage of being regarded as a patriotic act, for the Crown had declared a severe shortage of the hardwood on which the Royal Navy depended.

* aristocrat: 귀족 ** patriotic: 애국적인

나무를 '심는 것'이 사회적이거나 정치적인 의미를 가질 수 있다는 생각은, 비록 이후에 널리 퍼져나가기는 했지만, 영국인들에 의해 고안된 것처럼 보인다. Keith Thomas의 역사서 Man and the Natural World에 따르면, 17세기와 18세기의 귀족들은 자신의 재산 정도와 그것에 대한 자신의 권리의 영속성을 선언하기 위해 보통은 줄을 지어 활엽수를 심기 시작했다. 신사들을 위한 잡지의 그 편집자는 자신의 독자들에게 "그런 살아 있고 성장하는 증인들의 증언에 의해 여러분 자신의 재산 경계와 한계가 대대로 보존되고 지속되게 하는 것보다 무엇이 더 즐거울 수 있겠는가?"라고 물었다. 나무를 심는 것은 애국적인 행동으로 여겨지는 추가적인 이점을 가졌는데, 왜냐하면 군주가 영국 해군이 의존하는 경재(활엽수에서 얻은 단단한 목재)가 심각하게 부족하다고 선포했기 때문이었다.

[41~42]

The right to privacy may extend only to the point where it does not restrict someone else's right to freedom of expression or right to information. The scope of the right to privacy is similarly restricted by the general interest in preventing crime or in promoting public health. However, when we move away from the property-based notion of a right (where the right to privacy would protect, for example, images and personality), to modern notions of private and family life, we find it ***harder*** to establish the limits of the right. This is, of course, the strength of the notion of privacy, in that it can adapt to meet changing expectations and technological advances.

In sum, what is privacy today? The concept includes a claim that we should be unobserved, and that certain information and images about us should not be circulated without our permission. Why did these privacy claims arise? They arose because powerful people took offence at such observation. Furthermore, privacy incorporated the need to protect the family, home, and correspondence from arbitrary interference and, in addition, there has been a determination to protect honour and reputation. How is privacy protected? Historically, privacy was protected by restricting circulation of the damaging material. But if the concept of privacy first became interesting legally as a response to reproductions of images through photography and newspapers, more recent technological advances, such as data storage, digital images, and the Internet, pose new threats to privacy. The right to privacy is now being reinterpreted to meet those challenges.

* arbitrary: 임의의

사생활에 대한 권리는 다른 사람의 표현의 자유에 대한 권리나 정보에 대한 권리를 제한하지 않는 정도까지만 확대될 수 있다. 사생활에 대한 권리의 범위는 범죄 예방이나 공중보건증진에서의 공공이익에 의해 비슷하게 제한된다. 하지만 우리가 속성에 기반을 둔 권리 개념(예를 들어, 사생활에 대한 권리가 이미지와 인격을 보호할 개념)에서 사생활과 가족의 생활이라는 현대적 개념으로 옮겨갈 때, 우리는 그 권리의 한계를 설정하기가 더 어렵다는 것을 알게 된다. 이것은 물론 변화하는 기대와 기술 진보에 대처하기 위해 적응할 수 있다는 점에서, 사생활 개념의 강점이다.

요컨대, 오늘날 사생활이란 '무엇'인가? 그 개념은 우리가 주시당하지 않아야 한다는 주장과, 우리에 관한 특정 정보와 이미지가 우리의 허락 없이 유포되어서는 안 된다는 주장을 포함한다. '왜' 이러한 사생활 주장들이 생겼는가? 그것은 영향력 있는 사람들이 그렇게 주시당하는 것에 불쾌감을 느꼈기 때문에 생겼다. 게다가 사생활은 가족, 가정, 그리고 서신을 임의의 간섭으로부터 보호할 필요성을 포함했고, 또한 명예와 평판을 보호하려는 확고한 의지가 있었다. 사생활은 '어떻게' 보호되는가? 역사적으로 사생활은 피해를 주는 자료의 유포를 제한함으로써 보호되었다. 그러나 사생활 개념이 사진과 신문을 통한 이미지 재생산에 대한 대응으로 처음 법적으로 관심을 끌게 되었다면, 자료 저장, 디지털 이미지, 그리고 인터넷과 같은 더 근래의 기술 발전은 사생활에 새로운 위협을 제기한다. 사생활에 대한 권리는 이제 그러한 문제들에 대처하기 위해 재해석되고 있다.

[43~45]

Fighting against the force of the water was a thrilling challenge. Sophia tried to keep herself planted firmly in the boat, paying attention to the waves crashing against the rocks. As the water got rougher, she was forced to paddle harder to keep the waves from tossing her into the water. Her friends Mia and Rebecca were paddling eagerly behind her to balance the boat. They were soaked from all of the spray. Mia shouted to Sophia, “Are you OK? Aren’t you scared?”

“I’m great!” Sophia shouted back excitedly. Even though the boat was getting thrown around, the girls managed to avoid hitting any rocks. Suddenly, almost as quickly as the water had got rougher, the river seemed to calm down, and they all felt relaxed. With a sigh of relief, Sophia looked around. “Wow! What a wonderful view!” she shouted. The scenery around them was breathtaking. Everyone was speechless. As they enjoyed the emerald green Rocky Mountains, Mia said, “No wonder rafting is the best thing to do in Colorado!”

Agreeing with her friend, Rebecca gave a thumbs-up. “Sophia, your choice was excellent!” she said with a delighted smile. “I thought you were afraid of water, though, Sophia,” Mia said. Sophia explained, “Well, I was before I started rafting. But I graduate from college in a few months. And, before I do, I wanted to do something really adventurous to test my bravery. I thought that if I did something completely crazy, it might give me more confidence when I’m interviewing for jobs.” Now they could see why she had suggested going rafting.

“You’ve got a good point. It’s a real advantage to graduate from college with the mindset of a daring adventurer,” Mia said. Rebecca quickly added, “That’s why I went to Mongolia before I started my first job out of college. Teaching English there for two months was a big challenge for me. But I learned a lot from the experience. It really gave me the courage to try anything in life.” Listening to her friends, Sophia looked at her own reflection in the water and saw a confident young woman smiling back at her.

* paddle: 노를 젓다

물의 힘에 맞서 싸우는 것은 짜릿한 도전이었다. Sophia는 바위에 세게 부딪히는 물결에 주목하면서 배에 단단히 버티어 자리 잡고 있으려고 애썼다. 물이 더 거칠어지자, 그녀는 물결이 자기를 물속으로 내동댕이치지 못하게 더 열심히 노를 저을 수밖에 없었다. 그녀의 친구들인 Mia와 Rebecca는 보트의 균형을 유지하려고 그녀의 뒤에서 열심히 노를 젓고 있었다. 그들은 모든 물보라로 흠뻑 젖었다. Mia는 Sophia에게 “너 괜찮니? 너 무섭지 않니?”라고 소리쳤다.

“나는 아주 좋아!”라고 Sophia는 신이 나서 되받아 소리쳤다. 보트가 이리저리 내던져지고 있었지만 그 여자들은 어느 바위에도 부딪치는 것을 피했다. 갑자기, 물이 더 거칠어졌던 것처럼 거의 그만큼 빠르게 강이 잔잔해지는 것처럼 보였고, 그들은 모두 긴장을 풀었다. 안도의 한숨을 쉬면서, Sophia는 주변을 둘러보았다. “우와! 정말 멋진 풍경이다!”라고 그녀는 소리쳤다. 그들 주변의 경치는 숨이 멎을 정도로 멋졌다. 모두가 말문이 막혔다. 그들이 에메랄드빛 녹색의 Rocky산맥을 즐길 때, Mia가 말했다. “래프팅이 Colorado에서 할 수 있는 최고의 일이라는 것은 당연해!”

자기 친구에게 동의하면서 Rebecca는 엄지를 들어 올렸다. “Sophia, 네 선택은 탁월했어!”라고 그녀는 기쁜 미소를 띠면서 말했다. “근데, Sophia, 나는 네가 물을 무서워한다고 생각했어.”라고 Mia가 말했다. Sophia가 설명하기를, “음, 래프팅을 시작하기 전에는 무서워했었지. 하지만 나는 몇 달 후에 대학을 졸업해. 그래서, 그러기 전에, 나는 내 용기를 시험해 볼 수 있는 진짜 모험적인 것을 해보고 싶었어. 나는 완전히 미친 짓을 하면 그것이 나에게 취업 면접할 때 더 많은 자신감을 줄 거라고 생각했어.” 이제 그들은 왜 그녀가 래프팅을 하러 가자고 제안했는지 알 수 있었다.

“네 말은 정말 일리가 있어. 위험을 마다하지 않는 모험가의 마음가짐으로 대학을 졸업하는 것은 정말 유리한 점이야.”라고 Mia가 말했다. Rebecca가 재빨리 덧붙여 말하기를, “그게 내가 대학을 나와서 첫 직장 생활을 시작하기 전에 몽골에 간 이유야. 그곳에서 두 달 동안 영

어를 가르친 것은 내게 큰 도전이었어. 그런데 나는 그 경험에서 많이 배웠어. 그것은 정말 인생에서 무슨 일이든 시도해 볼 용기를 내게 주었어." 자기 친구들의 말을 들으면서, Sophia는 물에 비친 자기 자신의 모습을 보았고 자신에게 미소를 되돌려주는 자신만만한 젊은 여자를 보았다.

New ideas, such as those inspired by scientific d_____, are often aired and critiqued in our p_____ culture as part of a healthy p_____ of public debate, and scientists sometimes d_____ the criticism they get. But the p_____ of science would be greatly e_____ by improving the widespread images of the scientist. Part of the problem may be that the m_____ of the people who are most likely to write novels, plays, and film scripts were e_____ in the humanities, not in the sciences. Furthermore, the few scientists-turned-writers have used their scientific training as the source m_____ for t_____ that further damage the image of science and scientists. We need more screenplays and novels that p_____ scientists in a p_____ light. In our c_____ world, television and film are particularly i_____ media, and it is likely that the introduction of more scientist-heroes would help to make science more a_____.

과학 발전에 영감을 받은 아이디어와 같은 새로운 아이디어는 건전한 공개 토론 과정의 일부로 우리의 대중문화에서 자주 방송되고 비판되는데, 과학자들은 때로 자신들이 받는 비판을 받는 것이 마땅하다. 그러나 널리 퍼진 과학자의 이미지를 개선한다면 과학의 대중화는 크게 증진될 것이다. 그 문제의 일부는 아마도 소설, 희곡, 그리고 영화 대본을 쓸 가능성이 높은 사람 대다수가 과학이 아니라 인문학 분야에서 교육받았다는 것일 수도 있다. 더욱이 작가로 전업한 몇 안 되는 과학자가 자신들이 받은 과학 교육을 과학과 과학자의 이미지를 더욱 해치는 스릴러물의 원자료로 사용해 왔다. 우리는 긍정적인 관점에서 과학자를 보여주는 더 많은 영화대본과 소설이 필요하다. 우리의 현대 세계에서 텔레비전과 영화는 특히 영향력 있는 매체여서, 더 많은 과학자 영웅들을 주인공으로 도입한다면 과학을 더 매력 있게 하는 데 도움이 될 것이다.

21

The single most important change you can make in your working habits is to switch to c_____ work first, r_____ work second. This means b_____ off a large chunk of time every day for creative work on your own priorities, with the phone and e-mail off. I used to be a f_____ writer. Making this switch turned me into a p_____ writer. Yet there wasn't a single day when I sat down to write an article, blog post, or book chapter without a string of people w_____ for me to get back to them. It wasn't easy, and it still isn't, p_____ when I get phone m_____ beginning "I sent you an e-mail two hours ago...!" By definition, this a_____ goes against the grain of others' expectations and the p_____ they put on you. It takes w_____ to switch off the world, even for an hour. It feels u_____, and sometimes people get upset. But it's better to d_____ a few people over small things, than to a_____ your dreams for an empty inbox. Otherwise, you're s_____ your p_____ for the i_____ of professionalism.

여러분이 일하는 습관에서 이뤄낼 수 있는 가장 중요한 단 한 가지 변화는 창조적인 일을 먼저 하고 대응적은 일을 그 다음에 하는 쪽으로 전환하는 것이다. 이것은 전화기와 이메일을 끈 채, 여러분 자신의 우선순위에 따라 창조적인 작업을 위해 매일 많은 시간을 차단한다는 것을 의미한다. 나는 좌절감을 느끼는 작가였다. 이렇게 전환하자 나는 생산적인 작가로 변신했다. 하지만 내가 기사나 블로그 게시글 혹은 책의 한 챕터를 쓰려고 앉을 때마다 일련의 사람들이 내가 그들에게 답장을 주기를 기다리지 않은 날이 단 하루도 없었다. 그것은 쉽지 않았고, 특히 "'2시간 전에' 이메일을 보냈어요...!"라고 시작하는 전화 메시지를 받을 때는 아직도 쉽지 않다. 당연히, 이러한 접근방식은 다른 사람들의 기대와 그들이 여러분에게 가하는 압박에 맞지 않는다. 단 한 시간 동안이라도 세상에 대한 스위치를 끄는 데는 의지가 필요하다. 그것은 불편한 느낌이 들고, 때로 사람들이 기분 상하기도 한다. 그러나 빈 수신함을 위해(수신함을 늘 비어 있게 하려고) 자신의 꿈을 포기하는 것보다, 사소한 것에 대해 몇 사람을 실망하게 하는 것이 낫다. 그렇게 하지 않으면, 여러분은 전문성이라는 환상을 위해 자신의 잠재력을 희생하고 있다.

22

Contractors that will construct a project may place more weight on the p_____ process. Proper p_____ forces d_____ t_____ about the project. It allows the project manager (or team) to "build the p_____ in his or her head." The project m_____ (or team) can consider different methodologies thereby d_____ what works best or what does not work at all. This d_____ thinking may be the only way to d_____ restrictions or risks that were not addressed in the e_____ process. It would be far better to d_____ in the planning phase that a particular technology or material will not work than in the e_____ process. The goal of the planning process for the c_____ is to produce a w_____ scheme that uses the resources efficiently within the allowable time and given budget. A well-developed plan does not g_____ that the executing process will proceed f_____ or that the project will even succeed in meeting its o_____. It does, however, greatly i_____ its chances.

주택 단지를 건설하려는 도급업자들은 계획 과정에 비중을 더 많이 둘 수 있다. 적절한 계획은 그 건설 사업에 대해 면밀한 사고를 하게 한다. 그것은 건설 사업 책임자(또는 팀)가 '그 주택단지를 자기 머릿속에 지어보게' 해 준다. 그 건설 사업 책임자(또는 팀)는 여러 다른 방법론을 고려함으로써 어떤 것이 가장 잘 작동되는지 또는 어떤 것이 전혀 작동되지 않는지를 결정할 수 있다. 이런 면밀한 사고는 추정 과정에서 다루지 못했던 제약이나 위험을 발견할 수 있는 유일한 방법일 수 있다. 실행 과정보다는 계획 단계에서 특정 기술이나 재료가 작동되지 않으리라는 것을 발견하는 편이 훨씬 더 나을 것이다. 도급업자에게 계획 과정의 목표는 허용되는 시간과 주어진 예산 내에서 자원을 효율적으로 사용하는 실행 가능한 계획을 만들어 내는 것이다. 잘 만들어진 계획이, 실행 과정이 흠 없이 진행될 것이라거나 심지어 그 건설 사업이 그 목표를 달성하는 데 성공할 것이라고 보장하는 것은 아니다. 하지만 그것은 정말로 그 가능성을 크게 높인다.

23

Children can move effortlessly between play and a_____ in a story, as if both are forms of the same activity. The taking of roles in a n_____ s_____ game of pirates is not very d_____ than the taking of roles in identifying with characters as one watches a movie. It might be t_____ that, as they grow towards a_____, people give up childhood play, but this is not so. Instead, the bases and interests of this activity change and d_____ to playing and watching sports, to the fiction of plays, novels, and movies, and nowadays to video games. In fiction, one can e_____ possible worlds. When we e_____ e_____ in such worlds, this is not a sign that we are being i_____ or r_____. It derives from trying out metaphorical t_____ of our selves in new ways, in new worlds, in ways that can be moving and i_____ to us.

아이들은 (혁할)놀이와 이야기로의 몰입이 같은 활동의 형태인 것처럼 쉽게 그 둘 사이를 이동한다. 이야기식 구조의 해적 게임에서 역할을 맡는 것은 영화를 감상하면서 등장인물과 동일시하며 역할을 맡는 것과 크게 다르지 않다. 사람들이 청소년기로 성장하면서 아동기의 놀이를 그만둔다고 여겨질 수도 있겠지만, 이는 그렇지 않다. 대신에, 이런 활동의 기반과 흥미가 바뀌어 스포츠 활동과 관람으로, 연극, 소설, 영화의 허구로, 그리고 최근에는 비디오 게임으로 발전한다. 허구에서 사람들은 있을법한 세계로 들어갈 수 있다. 그런 세계에서 감정들을 경험하면, 이는 우리가 일관되지 않다거나 퇴행하고 있다는 신호가 아니다. 그것은 새로운 방식으로, 새로운 세계에서, 우리에게 감동적이고 중요할 수 있는 방식으로 우리 자신의 은유적 변신을 시도하는 것에서 기인하는 것이다.

24

Although cognitive and neuropsychological a_____ e_____ the l_____ with age that might impair social perception, m_____ theories i_____ that there may be some gains or qualitative changes. Charles and Carstensen review a c_____ body of e_____ i_____ that, as people get older, they tend to p_____ close social relationships, focus more on a_____ emotional well-being, and attend more to positive emotional information while i_____ negative information. These changing motivational goals in old age have i_____ for a_____ to and processing of social cues from the environment. Of p_____ importance in considering emotional changes in old age is the presence of a positivity bias: that is, a tendency to notice, a_____ to, and r_____ more positive c_____ to negative information. The role of life e_____ in social skills also indicates that older adults might show gains in some a_____ of social p_____.

인식적 접근법과 신경심리학적 접근법이 사회 지각을 손상시킬지도 모르는 노화에 따른 상실을 강조하긴 하지만, 동기 이론은 어떤 이득이나 질적 변화가 있을 수 있다는 것을 보여 준다. Charles와 Carstensen은 사람들은 나이가 들면서 친밀한 사회적 관계를 우선시하고, 정서적 행복을 성취하는 데 더 주력하고, 긍정적인 정서적 정보를 더 주목하는 반면에 부정적인 정보는 무시하는 경향이 있다는 것을 보여 주는 상당한 양의 증거를 재검토한다. 노년의 이런 변화하는 동기 부여상의 목표는 주변 환경으로부터의 사회적 신호를 주목하고 처리하는 것에 영향을 미친다. 노년의 정서적 변화를 고려할 때 특히 중요한 것은 긍정 편향, 즉 부정적 정보와 비교해 더 많은 긍정적 정보를 인지하고, 주목하고, 기억하는 경향의 존재이다. 사회적 기술에 관한 인생 경험의 역할 또한 노년의 성인이 사회 지각의 이부 측면에서 이득을 얻을 수 있다는 것을 보여준다.

26

Emil Záopek, a former Czech athlete, is c_____ one of the greatest long-distance r_____ ever. He was also f_____ for his d_____ running style. While working in a shoe factory, he p_____ in a 1,500-meter race and won second place. After that event, he took a more s_____ interest in running and d_____ himself to it. At the 1952 Olympic Games in Helsinki, he won three gold medals in the 5,000-meter and 10,000-meter races and in the marathon, b_____ Olympic r_____ in each. He was m_____ to Dana Záopková who was an Olympic gold medalist, too. Záopek was also n_____ for his friendly p_____. In 1966, Záopek i_____ Ron Clarke, a great Australian runner who had never won an Olympic gold medal, to an a_____ meeting in Prague. After the meeting, he gave Clarke one of his gold medals as a gift.

전직 체코 육상 선수 Emil Záopek은 역대 가장 위대한 장거리 선수 중 한 명이라고 여겨진다. 그는 또한 독특한 들리기 스타일로 유명했다. 신발 공장에서 일하던 때 그는 1,500미터 경주에 참가해서 2등을 했다. 그 일 이후로 그는 달리기에 더 진지한 흥미를 느끼게 되어 그것에 전념했다. 1952년 헬싱키 올림픽 대회에서 그는 5,000미터, 1만 미터 종목과 마라톤에서 세 개의 금메달을 땄는데, 각 종목에서 올림픽 기록을 깼다. 그는 Dana Záopková와 결혼했는데, 그녀 또한 올림픽 금메달리스트였다. Záopek은 또한 그의 다정한 성격으로 유명했다. 1966년에, Záopek은 올림픽 금메달을 딴 적이 없었던 위대한 호주 달리기 선수 Ron Clarke를 프라하에서 열린 체전에 초대했다. 그 대회 후에 그는 Clarke에게 자신의 금메달 중 하나를 선물로 주었다.

29

Most historians of science point to the need for a r_____ calendar to regulate a_____ activity as the motivation for learning about what we now call a_____, the study of stars and planets. Early astronomy p_____ information about when to plant crops and gave humans their first formal method of r_____ the passage of time. Stonehenge, the 4,000-year-old ring of stones in southern Britain, is perhaps the best-known m_____ to the d_____ of r_____ and p_____ in the world we i_____. The great markers of Stonehenge point to the spots on the h_____ where the sun rises at the solstices and equinoxes — the dates we still use to mark the beginnings of the seasons. The stones may even have been used to p_____ eclipses. The existence of Stonehenge, built by people without writing, bears silent t_____ both to the regularity of n_____ and to the ability of the human mind to see b_____ i_____ a_____ and discover deeper meanings in e_____.

대부분의 과학 역사가들은 별과 행성에 대한 연구, 즉 우리가 현재 천문학이라 부르는 것에 대해 배우고자 하는 동기로 농업 활동을 규제하기 위한 신뢰할 만한 달력의 필요성을 지적한다. 초기 천문학은 언제 작물을 심어야 하는지에 대한 정보를 제공했고 인간에게 시간의 흐름을 기록하는 그들 최초의 공식적인 방법을 제공했다. 영국 남부에 있는 4,000년 된 고리 모양을 하고 있는 돌들인 스톤헨지는 아마도 우리가 살고 있는 세계에서 규칙성과 예측 가능성을 발견한 가장 잘 알려진 기념비일 것이다. 스톤헨지의 커다란 표식은 우리가 계절의 시작을 표시하기 위해 여전히 사용하는 날짜인 지점(至點)과 분점(分點)에서 태양이 뜨는 지평선의 장소를 가리킨다. 그 돌들은 심지어 (해•달의) 식(蝕)을 예측하는 데 사용되었을지도 모른다. 글이 없던 시절 사람들이 세운 스톤헨지의 존재는 자연의 규칙성뿐만 아니라 눈앞에 보이는 모습의 이면을 보고 사건에서 더 깊은 의미를 발견할 수 있는 인간의 정신적 능력을 말없이 증언해 준다.

30

Sport can trigger an emotional response in its c_____ of the kind rarely b_____ forth by other products. I_____ bank customers buying memorabilia to show loyalty to their bank, or consumers i_____ so s_____ with their car i_____ company that they get a tattoo with its logo. We know that some sport f_____ are so p_____ about players, teams and the sport itself that their interest b_____ on o_____. This a_____ p_____ the emotional glue that binds fans to teams, and m_____ loyalty even in the face of on-field failure. While most m_____ can only d_____ of having customers that are as passionate about their products as sport fans, the emotion t_____ by sport can also have a n_____ impact. Sport's emotional i_____ can mean that organisations have strong a_____ to the past through n_____ and club tradition. As a result, they may ignore efficiency, productivity and the need to respond q_____ to changing market conditions. For example, a proposal to change club colours in order to p_____ a more a_____ image may be d_____ because it b_____ a link with t_____.

스포츠는 그것의 소비자에게 다른 제품이 좀처럼 일으키지 못하는 종류의 정서적 반응을 촉발시킬 수 있다. 은행 고객이 그들 은행에 대한 충성심을 보여주기 위해 기념품을 구입하거나, 고객이 그들 자동차 보험 회사에 대해 매우 강한 동질감을 가져서 회사 로고로 문신을 한다고 상상해 보라. 우리는 일부 스포츠 추종자들이 선수, 팀, 그리고 그 스포츠 자체에 매우 열정적이어서 그들의 관심이 집착에 아주 가깝다는 것을 알고 있다. 이런 중독은 팬을 팀과 묶어주는 정서적 접착제를 제공하고, 구장에서 일어나는 실패에도 충성심을 유지하게 한다. 대부분의 관리자는 스포츠팬만큼 그들 제품에 열정적인 고객을 가지기를 오직 꿈꾸지만, 스포츠로 인해 촉발되는 감정은 또한 부정적인 영향을 미칠 수 있다. 스포츠의 정서적 격렬함은 조직이 향수와 클럽 전통을 통해 과거에 대한 강한 애착을 가지고 있다는 것을 의미할 수 있다. 그 결과, 그것[조직]은 효율성, 생산성 및 변화하는 시장 상황에 신속하게 대응해야 할 필요성을 무시할 수도 있다. 예를 들어, 더 매력적인 이미지를 투사하기 위해 클럽 색깔을 바꾸자는 제안은 그것이 전통과의 관계를 끊기 때문에 무산될 수도 있다.

31

The growth of academic disciplines and sub-disciplines, such as art history or palaeontology, and of p_____ f_____ such as the art critic, helped p_____ p_____ and p_____ for selecting and organizing what was w_____ of keeping, though it r_____ a struggle. Moreover, as museums and universities drew further apart toward the end of the nineteenth century, and as the idea of objects as a h_____ v_____ route to knowing the world went into decline, c_____ began to lose its status as a worthy i_____ pursuit, especially in the sciences. The really i_____ and important a_____ of science were increasingly those i_____ to the naked eye, and the classification of things c_____ no longer p_____ to p_____ cutting-edge k_____. The term "butterfly collecting" could come to be used with the a_____ "mere" to i_____ a p_____ of secondary a_____ status.

학과의 성정과 미술사학이나 고생물학과 같은 하위 학과의 성장, 그리고 미술평론가와 같은 특정 인물의 성장은 비록 힘든 일로 남게 되었지만, 지킬 가치가 있는 것을 선택하고 정리하기 위한 원칙과 관행의 도출에 도움이 되었다. 게다가, 19세기 말엽에 박물관과 대학이 더욱 멀어지면서, 그리고 사상을 알게 되는 매우 가치 있는 경로로서 대상이라는 개념이 쇠퇴하면서, 수집은 특히 과학에서 가치 있는 지적 활동으로써의 지위를 잃기 시작했다. 과학의 참으로 흥미롭고 중요한 측면은 점점 더 육안에 보이지 않는 것들이었고, 수집된 것들에 대한 분류는 더 이상 최첨단의 지식을 생산할 가망이 없었다. '나비 채집'이라는 용어는 '한낱(mere)'이라는 형용사와 사용되어, 부차적인 학문적 지위의 추구를 나타낼 수 있었다.

32

Some of the most insightful work on information seeking e_____ "strategic self-ignorance," understood as "the use of ignorance as an e_____ to e_____ e_____ in pleasurable activities that may be h_____ to one's future self." The idea here is that if people are present-biased, they might avoid i_____ that would make current activities less a_____ — perhaps because it would produce guilt or shame, perhaps because it would suggest an a_____ trade-off that would counsel against engaging in such activities. St. Augustine f_____ said, "God give me chastity — tomorrow." Present-biased agents think: "Please let me know the risks — tomorrow." Whenever people are thinking about e_____ in an activity with short-term b_____ but long-term costs, they might p_____ to delay r_____ of important information. The same point might hold about information that could make people sad or mad: "Please tell me what I need to know — tomorrow."

정보 탐색에 관한 가장 통찰력 있는 연구 중 일부는 '전략적 자기 무지'를 강조하는데, 이는 '무지를 핑계로 자신의 미래 자아에 해로울 수도 있는 즐거운 활동을 과도하게 하는 것'으로 이해된다. 여기서의 생각은, 만약 사람들이 현재에 편향되어 있다면, 현재의 활동을 덜 매력적으로 만들 정보를 피할 수도 있다는 것인데, 아마도 그것이 죄책감이나 수치심을 유발할 것이고, 그러한 활동을 하지 말라고 충고할 총체적 절충을 제안할 것이기 때문일 것이다. 성 아우구스티누스는 "하나님 제게 정결을 내일 주시옵소서."라는 유명한 말을 했다. 현재에 편향되어 있는 행위자들은 "제가 위험을 내일 알게 해주세요."라고 생각한다. 사람들이 단기적인 혜택은 있지만 장기적인 대가가 있는 활동을 하려고 생각하고 있을 때마다, 그들은 중요한 정보의 수신을 미루는 것을 선호할 수도 있다. 사람들을 슬프게 하거나 화나게 할 수 있는 정보에 관해서도 똑같은 점이 있을 수 있다. "제가 알아야 할 것을 내일 말해 주세요."

33

Concepts of nature are always cultural statements. This may not s_____ Europeans as much of an i_____, for Europe's l_____ is so much of a b_____. But in the new worlds — 'new' at least to Europeans — the d_____ a_____ much clearer not only to European settlers and visitors but also to their d_____. For that reason, they had the fond c_____ of primeval n_____ u_____ by human a_____ which could later find e_____ in an admiration for w_____. Ecological relationships c_____ have their own logic and in this sense 'nature' can be seen to have a self-regulating but not n_____ s_____ dynamic independent of human i_____. But the context for ecological interactions has increasingly been set by humanity. We may not d_____ how or what a lion eats but we c_____ can r_____ _____ the lion feeds.

자연에 대한 개념은 항상 문화적 진술이다. 이것은 유럽인들에게 대단한 통찰이라는 인상을 주지 않을 수도 있는데, 왜냐하면 유럽의 풍경은 너무나 많이 혼합되어 있기 때문이다. 그러나 새로운 (적어도 유럽인들에게는 '새로운') 세계에서, 그 차이는 유럽 정착민과 방문객뿐만 아니라 그들의 후손에게도 훨씬 더 분명해 보였다. 그런 이유 때문에 그들은 후에 황야에 대한 감탄에서 표현을 찾을 수 있었던 인간과의 연관에 의해 통제되지 않는 원시 자연이라는 허황된 생각을 가지고 있었다. 생태학적 관계는 확실히 그 나름의 논리를 가지고 있었고, 이런 의미에서 '자연'은 인간의 개입과 무관하게, 자율적이지만 반드시 안정적이지는 않은 역동성을 가지고 있다고 볼 수 있다. 그러나 생태학적 상호작용의 맥락은 점점 더 인류에 의해 설정되어 왔다. 우리는 사자가 어떻게 또는 무엇을 먹는지는 정하지 못할 수도 있지만, 사자가 어디에서 먹이를 먹을지는 확실히 규제할 수 있다.

34

Emma Brindley has investigated the responses of European robins to the songs of neighbors and s_____. Despite the large and c_____ song repertoire of European robins, they were able to d_____ between the songs of neighbors and strangers. When they h_____ a tape recording of a stranger, they began to sing sooner, sang more songs, and o_____ their songs with the p_____ more often than they did on hearing a neighbor's song. As Brindley s_____, the overlapping of song may be an a_____ response. However, this d_____ in responding to neighbor versus stranger o_____ only when the neighbor's song was played by a loudspeaker p_____ at the b_____ between that neighbor's territory and the territory of the bird being t_____. If the same neighbor's song was played at another boundary, one s_____ the territory of the test s_____ from another neighbor, it was t_____ as the call of a stranger. Not only does this r_____ d_____ that the robins a_____ l_____ with familiar songs, but it also shows that the choice of songs used in playback e_____ is highly important.

Emma Brindley는 이웃 새와 낯선 새의 노래에 유럽 울새가 보이는 반응을 조사해왔다. 유럽 울새의 크고 복잡한 노래 목록에도 불구하고, 그것은 이웃 새와 낯선 새의 노래를 구별할 수 있었다. 낯선 새의 테이프 녹음소리를 들었을 때, 그것은 이웃 새의 노래를 들었을 때 그랬던 것보다, 더 빨리 노래를 부르기 시작했고, 더 많은 노래를 불렀으며, 더 자주 자기 노래를 재생된 노래와 겹치게 불렀다. Brindley가 말하는 것처럼, 노래를 겹치게 하는 것은 공격적인 반응일 수도 있다. 그러나 이웃 새와 낯선 새에 대한 반응의 이러한 차이는, 이웃 새의 영역과 실험 대상이 되고 있는 그 새의 영역 사이의 경계에 놓은 확성기로 이웃 새의 노래를 틀었을 때만 발생했다. 같은 이웃 새의 노래를 다른 경계, 즉 실험 대상의 영역을 또 다른 이웃 새의 영역과 분리해 주는 경계에서 틀었을 경우, 그것은 낯선 새의 울음으로 취급되었다. 이 결과는 울새가 장소를 친숙한 노래와 연관시킨다는 것을 입증할 뿐만 아니라, 또한 (녹음소리) 재생 실험에 사용되는 노래의 선택이 매우 중요하다는 것을 보여 준다.

35

Kinship ties continue to be important today. In m_____ societies such as the United States people f_____ have family get-togethers, they telephone their r_____ regularly, and they p_____ their kin with a wide v_____ of services. Eugene Litwak has referred to this p_____ of b_____ as the 'modified extended family'. It is an extended family structure because multigenerational ties are m_____, but it is modified because it does not usually rest on co-residence between the generations and most e_____ families do not act as corporate groups. Although modified extended family members often live close by, the modified extended family does not r_____ geographical proximity and ties are m_____ even when kin are separated by c_____ distances. In contrast to the traditional extended family where kin always live in close p_____, the members of modified extended families may freely move away from kin to seek o_____ for occupational a_____.

친족 유대 관계는 오늘날에도 계속 중요하다. 사람들이 자주 가족 모임을 갖는 미국과 같은 현대 사회에서, 그들은 자신의 친척에게 자주 전화하고, 아주 다양한 도움을 제공한다. Eugene Litwak은 이 행동 패턴을 '수정확대가족'이라고 언급했다. 그것은 다세대의 유대 관계가 유지되기 때문에 확대가족 구조이지만, 일반적으로 세대 간 공동 거주에 기초를 두지 않고 대부분의 확대가족이 공동 집단으로서 기능하지는 않기 때문에 수정확대가족 구조이다. 비록 수정확대가족의 구성원들이 흔히 가까이 살기는 하지만, 수정확대가족은 지리적 근접이 필요치 않으며, 유대 관계는 친척이 상당히 멀리 떨어져 있더라도 유지된다. 친척이 항상 아주 가까이서 사는 전통적인 확대가족과는 대조적으로, 수정확대가족의 구성원들은 친척에게서 자유로이 멀리 이주해가서 직업상의 발전을 위한 기회를 추구할 수도 있다.

36

Spatial reference points are larger than themselves. This isn't really a paradox: l_____ are themselves, but they also d_____ neighborhoods around themselves. In a paradigm that has been r_____ on many campuses, researchers first collect a list of campus landmarks from students. Then they ask another group of students to e_____ the d_____ between pairs of locations, some to landmarks, some to o_____ buildings on campus. The r_____ finding is that d_____ from an ordinary location to a landmark are j_____ shorter than distances from a landmark to an o_____ location. So, people would judge the distance from Pierre's house to the Eiffel Tower to be s_____ than the d_____ from the Eiffel Tower to Pierre's house. Like black holes, landmarks seem to pull o_____ locations toward themselves, but ordinary places do not. This a_____ of distance estimates v_____ the most elementary principles of Euclidean distance, that the distance from A to B must be the same as the distance from B to A. Judgments of distance, then, are not n_____ c_____.

공간 기준점(공간적으로 기준이 되는 장소)은 자기 자신보다 더 크다. 이것은 그다지 역설적이지 않은데, 랜드마크(주요 지형지물)는 그 자체이기도 하지만, 또한 자기 자신 주변 지역을 (자신의 범위로) 규정하기도 한다. 많은 대학 캠퍼스에서 반복되어온 한 전형적인 예에서, 연구원들은 학생들에게서 캠퍼스 랜드마크의 목록을 수집한다. 그런 다음, 그들은 다른 학생 집단에게 쌍으로 이루어진 장소 사이의 거리, 즉 캠퍼스에 있는 어떤 장소에서 랜드마크까지, 어떤 장소에서 평범한 건물까지의 거리는 얼마인지를 추정하라고 요청한다. 주목할 만한 결과는 평범한 장소에서 랜드마크까지의 거리가 랜드마크에서 평범한 장소까지의 거리보다 더 짧다고 추정된다는 것이다. 그래서 사람들은 Pierre의 집에서 에펠탑까지의 거리가 에펠탑에서 Pierre의 집까지의 거리보다 더 짧다고 추정할 것이다. 블랙홀처럼, 랜드마크는 평범한 장소를 자기 자신 방향으로 끌어들이는 것처럼 보이지만, 평범한 장소들은 그렇지 않다. 거리 추정에 관한 이 비대칭은, A에서부터 B까지의 거리는 B에서부터 A까지의 거리와 같아야 한다는 가장 기초적인 유클리드 거리 법칙에 위배된다. 그렇다면, 거리에 관한 추정은 반드시 인관성이 있는 것은 아니다.

37

A firm is deciding whether to i_____ in shipbuilding. If it can produce at sufficiently large s_____, it knows the v_____ will be profitable. But one key i_____ is low-cost steel, and it must be p_____ nearby. The company's decision boils down to this: if there is a steel f_____ close by, invest in shipbuilding; otherwise, don't invest. Now c_____ the thinking of potential steel investors in the region. A_____ that shipyards are the only potential customers of steel. Steel producers figure they'll make money if there's a shipyard to buy their steel, but not o_____. Now we have two possible outcomes — what economists call "multiple equilibria." There is a "good" outcome, in which both types of i_____ are made, and both the shipyard and the steelmakers end up p_____ and happy. Equilibrium is reached. Then there is a "bad" outcome, in which neither type of investment is made. This second o_____ also is an e_____ because the d_____ not to invest r_____ each other.

한 회사가 조선업에 투자할지를 결정하고 있다. 만약 충분히 대규모로 생산할 수 있다면, 그것은 그 (사업상의) 모험이 수익성이 있을 거라는 것을 알고 있다. 하지만 한 가지 핵심 투입 요소는 저가의 강철이고, 그것은 근처에서 생산되어야 한다. 그 회사의 결정은 결국 다음과 같이 된다. 만약 근처에 강철 공장이 있다면, 조선업에 투자하고, 그렇지 않으면 투자하지 마라. 이제 그 지역에 있는 잠재적 강철 투자자들의 생각을 고려해 보라. 조선소가 유일한 잠재적 강철 소비자라고 가정하라. 강철 생산자들은 자신의 강철을 구매할 조선소가 있으면 자신이 돈을 벌 것이고, 그렇지 않으면 돈을 벌지 못하리라고 생각한다. 이제 우리는 경제학자들이 '복수균형'이라고 부르는 가능한 두 가지 결과를 갖게 된다. '좋은' 결과가 있는데, 그 결과 내에서는 두 가지 투자 형태가 모두 이루어지고, 조선소와 제강업자 모두 결국 이득을 얻고 만족하게 된다. 균형이 이루어지는 것이다. 그다음에 '나쁜' 결과가 있는데, 그 결과 내에서는 (둘 중) 어떤 투자 형태도 이루어지지 않는다. 이 두 번째 결과 또한 균형이 이루어진 것인데, 왜냐하면 투자하지 않겠다는 결정이 서로를 강화하기 때문이다.

38

In most organizations, the employee's i_____ s_____ e_____ the employee's p_____. This is because the s_____ is r_____ for the employee's performance, p_____ supervision, handing out assignments, and developing the employee. A problem, however, is that supervisors often work in locations apart from their employees and therefore are not able to observe their subordinates' performance. Should supervisors rate employees on performance d_____ they cannot o_____? To eliminate this dilemma, more and more organizations are implementing a_____ r_____ _____ as 360-degree evaluations. Employees are rated not only by their supervisors but by coworkers, clients or citizens, professionals in other agencies with whom they work, and subordinates. The reason for this approach is that often coworkers and clients or citizens have a greater o_____ to o_____ an employee's performance and are in a better p_____ to e_____ many p_____ dimensions.

대부분의 조직에서, 직원의 직속상관은 그 직원의 성과를 평가한다. 이것은 그 관리자가 (직원에게) 감독을 제공하고, 과업을 배정하며, 그 직원을 계발하면서, 그 직원의 성과를 책임지기 때문이다. 하지만, 문제는 관리자가 흔히 직원과 떨어진 장소에서 일하기 때문에, 자신의 부하 직원들의 성과를 관찰할 수 없다는 것이다. 관리자는 자신이 관찰할 수 없는 성과 영역에 대해 직원들을 평가해야 하는가? 이 딜레마를 없애기 위해, 점점 더 많은 조직이 '다면 평가'라고 불리는 평가를 시행하고 있다. 직원들은 자신의 관리자에 의해서만이 아니라, 동료, 고객이나 시민, 함께 일하는 다른 대향사의 전문가들, 그리고 부하 직원들에 의해서도 평가를 받는다. 이 방법을 시행하는 이유는 동료와 고객이나 시민들이 흔히 어떤 직원의 성과를 관찰할 더 많은 기회를 가지며, 많은 평가 영역을 평가할 수 있는 더 나은 위치에 있기 때문이다.

39

The role that sleep plays in evolution is still under study. One p_____ is that it is an a_____ a_____ state of d_____ metabolism for an a_____ when there are no more pressing activities. This seems true for deeper states of i_____ such as hibernation during the winter when there are few food s_____, and a high metabolic cost to m_____ a_____ t_____. It may be true in daily situations as well, for instance for a prey species to a_____ p_____ after dark. On the other hand, the a_____ universality of sleep, and the o_____ that mammals such as cetaceans have developed such highly c_____ mechanisms to p_____ sleep on at least one side of the brain at a time, s_____ that sleep additionally provides some vital service(s) for the organism. This is particularly true since one aspect of sleep is decreased responsiveness to the e_____. If sleep is universal even when this potential price must be paid, the i_____ may be that it has important functions that cannot be o_____ just by quiet, w_____ resting.

진화에 있어서 잠이 하는 역할은 여전히 연구 중이다. 한 가지 가능성은 그것(잠)이 더 이상 긴급한 활동이 없을 때 신진대사를 줄이는, 동물에게 유리한 적응적 상태라는 것이다. 이것은 먹을 것이 거의 없고 적정한 체온을 유지하는 데 높은 신진대사 비용이 드는 겨울 동안의 겨울잠과 같은, 더 깊은 무활동 상태의 경우에 해당하는 것처럼 보인다. 그것은, 예를 들어, 먹잇감이 되는 동물이 어두워진 이후에 포식자를 피하기 위한 것처럼, 또한 일상 상황에도 해당될지도 모른다. 다른 한편으로는, 잠의 분명한 보편성, 그리고 고래목의 동물들과 같은 포유동물들이 한 번에 적어도 뇌의 한쪽에서는 잠을 유지하는 매우 고도로 복잡한 기제를 발전시켰다는 관찰 결과는 잠이 생명체에게 생명 유지와 관련된 어떤 도움(들)을 추가로 제공한다는 것을 보여 준다. 잠의 한 가지 측면은 환경에 대한 반응성이 감소하는 것이기 때문에 이것은 특히 그러하다. 이러한 잠재적인 대가가 치러져야 할 때조차도 잠이 보편적으로 나타난다면, 그것이 갖는 함의는 조용한, 깨어있는 상태의 휴식만으로는 얻을 수 없는 중요한 기능을 그것(잠)이 갖고 있다는 것일 수도 있다.

40

The idea that planting trees could have a s_____ or p_____ significance appears to have been i_____ by the English, though it has since spread widely. According to Keith Thomas's history Man and the Natural World, seventeenth- and eighteenth-century aristocrats began planting hardwood trees, usually in lines, to d_____ the extent of their property and the p_____ of their claim to it. "What can be more pleasant," the editor of a magazine for g_____ asked his readers, "than to have the bounds and l_____ of your own p_____ p_____ and continued from age to age by the testimony of such living and growing witnesses?" Planting trees had the additional a_____ of being r_____ as a patriotic act, for the Crown had declared a severe s_____ of the hardwood on which the Royal Navy d_____.

나무를 '심는 것'이 사회적이거나 정치적인 의미를 가질 수 있다는 생각은, 비록 이후에 널리 퍼져나가기는 했지만, 영국인들에 의해 고안된 것처럼 보인다. Keith Thomas의 역사서 Man and the Natural World에 따르면, 17세기와 18세기의 귀족들은 자신의 재산 정도와 그것에 대한 자신의 권리의 영속성을 선언하기 위해 보통은 줄을 지어 활엽수를 심기 시작했다. 신사들을 위한 잡지의 그 편집자는 자신의 독자들에게 "그런 살아 있고 성장하는 증인들의 증언에 의해 여러분 자신의 재산 경계와 한계가 대대로 보존되고 지속되게 하는 것보다 무엇이 더 즐거울 수 있겠는가?"라고 물었다. 나무를 심는 것은 애국적인 행동으로 여겨지는 추가적인 이점을 가졌는데, 왜냐하면 군주가 영국 해군이 의존하는 경재(활엽수에서 얻은 단단한 목재)가 심각하게 부족하다고 선포했기 때문이었다.

[41~42]

The right to privacy may extend only to the point _____ it does not r_____ someone else's right to f_____ of e_____ or right to information. The scope of the right to privacy is similarly r_____ by the general interest in p_____ crime or in promoting public health. However, when we move away from the property-based notion of a right (where the right to p_____ would p_____, for example, images and personality), to m_____ notions of private and family life, we find it harder to e_____ the limits of the right. This is, of course, the s_____ of the notion of privacy, in that it can a_____ to meet changing expectations and technological a_____.

In sum, what is privacy today? The concept i_____ a claim that we should be u_____, and that certain information and images about us should not be c_____ without our p_____. Why did these privacy claims arise? They arose because powerful people took offence at such observation. Furthermore, privacy i_____ the need to protect the family, home, and correspondence from arbitrary i_____ and, in addition, there has been a d_____ to protect honour and r_____. How is privacy p_____? Historically, privacy was protected by r_____ circulation of the damaging material. But if the concept of privacy first became interesting l_____ as a response to reproductions of images through photography and newspapers, more r_____ technological advances, such as data storage, digital images, and the Internet, pose new t_____ to privacy. The right to privacy is now being r_____ to meet those challenges.

사생활에 대한 권리는 다른 사람의 표현의 자유에 대한 권리나 정보에 대한 권리를 제한하지 않는 정도까지만 확대될 수 있다. 사생활에 대한 권리의 범위는 범죄 예방이나 공중보건증진에서의 공공이익에 의해 비슷하게 제한된다. 하지만 우리가 속성에 기반을 둔 권리 개념(예를 들어, 사생활에 대한 권리가 이미지와 인격을 보호할 개념)에서 사생활과 가족의 생활이라는 현대적 개념으로 옮겨갈 때, 우리는 그 권리의 한계를 설정하기가 더 어렵다는 것을 알게 된다. 이것은 물론 변화하는 기대와 기술 진보에 대처하기 위해 적응할 수 있다는 점에서, 사생활 개념의 강점이다.
요컨대, 오늘날 사생활이란 '무엇'인가? 그 개념은 우리가 주시당하지 않아야 한다는 주장과, 우리에 관한 특정 정보와 이미지가 우리의 허락 없이 유포되어서는 안 된다는 주장을 포함한다. '왜' 이러한 사생활 주장들이 생겼는가? 그것은 영향력 있는 사람들이 그렇게 주시당하는 것에 불쾌감을 느꼈기 때문에 생겼다. 게다가 사생활은 가족, 가정, 그리고 서신을 임의의 간섭으로부터 보호할 필요성을 포함했고, 또한 명예와 평판을 보호하려는 확고한 의지가 있었다. 사생활은 '어떻게' 보호되는가? 역사적으로 사생활은 피해를 주는 자료의 유포를 제한함으로써 보호되었다. 그러나 사생활 개념이 사진과 신문을 통한 이미지 재생산에 대한 대응으로 처음 법적으로 관심을 끌게 되었다면, 자료 저장, 디지털 이미지, 그리고 인터넷과 같은 더 근래의 기술 발전은 사생활에 새로운 위협을 제기한다. 사생활에 대한 권리는 이제 그러한 문제들에 대처하기 위해 재해석되고 있다.

[43~45]

Fighting against the force of the water was a t_____ challenge. Sophia tried to keep herself p_____ firmly in the boat, paying a_____ to the waves crashing against the rocks. As the water got rougher, she was f_____ to paddle harder to keep the waves from tossing her into the water. Her friends Mia and Rebecca were paddling eagerly behind her to b_____ the boat. They were soaked from all of the spray. Mia shouted to Sophia, "Are you OK? Aren't you s_____?"

"I'm great!" Sophia shouted back e_____. Even though the boat was getting thrown around, the girls m_____ to a_____ hitting any rocks. Suddenly, almost as quickly as the water had got rougher, the river seemed to calm down, and they all felt r_____. With a sigh of relief, Sophia looked around. "Wow! What a wonderful view!" she s_____. The scenery around them was breathtaking. Everyone was s_____. As they enjoyed the emerald green Rocky Mountains, Mia said, "No wonder rafting is the best thing to do in Colorado!"

Agreeing with her friend, Rebecca gave a thumbs-up. "Sophia, your choice was e_____!" she said with a delighted smile. "I thought you were a_____ of water, though, Sophia," Mia said. Sophia e_____, "Well, I was before I started rafting. But I graduate from college in a few months. And, before I do, I wanted to do something really a_____ to test my b_____. I thought that if I did something c_____ crazy, it might give me more c_____ when I'm interviewing for jobs." Now they could see why she had s_____ going rafting.

"You've got a good point. It's a real advantage to g_____ from college with the mindset of a daring adventurer," Mia said. Rebecca quickly a_____, "That's why I went to Mongolia before I started my first job out of college. Teaching English there for two months was a big c_____ for me. But I learned a lot from the experience. It really gave me the c_____ to try anything in life." Listening to her friends, Sophia looked at her own r_____ in the water and saw a c_____ young woman smiling back at her.

물의 힘에 맞서 싸우는 것은 짜릿한 도전이었다. Sophia는 바위에 세게 부딪히는 물결에 주목하면서 배에 단단히 버티어 자리 잡고 있으려고 애썼다. 물이 더 거칠어지자, 그녀는 물결이 자기를 물속으로 내동댕이치지 못하게 더 열심히 노를 저을 수밖에 없었다. 그녀의 친구들인 Mia와 Rebecca는 보트의 균형을 유지하려고 그녀의 뒤에서 열심히 노를 젓고 있었다. 그들은 모든 물보라로 흠뻑 젖었다. Mia는 Sophia에게 "너 괜찮니? 너 무섭지 않니?"라고 소리쳤다.

"나는 아주 좋아!"라고 Sophia는 신이 나서 되받아 소리쳤다. 보트가 이리저리 내던져지고 있었지만 그 여자들은 어느 바위에도 부딪치는 것을 피했다. 갑자기, 물이 더 거칠어졌던 것처럼 거의 그만큼 빠르게 강이 잔잔해지는 것처럼 보였고, 그들은 모두 긴장을 풀었다. 안도의 한숨을 쉬면서, Sophia는 주변을 둘러보았다. "우와! 정말 멋진 풍경이다!"라고 그녀는 소리쳤다. 그들 주변의 경치는 숨이 멎을 정도로 멋졌다. 모두가 말문이 막혔다. 그들이 에메랄드빛 녹색의 Rocky산맥을 즐길 때, Mia가 말했다. "래프팅이 Colorado에서 할 수 있는 최고의 일이라는 것은 당연해!"

자기 친구에게 동의하면서 Rebecca는 엄지를 들어 올렸다. "Sophia, 네 선택은 탁월했어!"라고 그녀는 기쁜 미소를 띠면서 말했다. "근데, Sophia, 나는 네가 물을 무서워한다고 생각했어."라고 Mia가 말했다. Sophia가 설명하기를, "음, 래프팅을 시작하기 전에는 무서워했었지. 하지만 나는 몇 달 후에 대학을 졸업해. 그래서, 그러기 전에, 나는 내 용기를 시험해 볼 수 있는 진짜 모험적인 것을 해보고 싶었어. 나는 완전히 미친 짓을 하면 그것이 나에게 취업 면접할 때 더 많은 자신감을 줄 거라고 생각했어." 이제 그들은 왜 그녀가 래프팅을 하러 가자고 제안했는지 알 수 있었다.

"네 말은 정말 일리가 있어. 위험을 마다하지 않는 모험가의 마음가짐으로 대학을 졸업하는 것은 정말 유리한 점이야."라고 Mia가 말했다. Rebecca가 재빨리 덧붙여 말하기를, "그게 내가 대학을 나와서 첫 직장 생활을 시작하기 전에 몽골에 간 이유야. 그곳에서 두 달 동안 영어를 가르친 것은 내게 큰 도전이었어. 그런데 나는 그 경험에서 많이 배웠어. 그것은 정말 인생에서 무슨 일이든 시도해 볼 용기를 내게 주었어." 자기 친구들의 말을 들으면서, Sophia는 물에 비친 자기 자신의 모습을 보았고 자신에게 미소를 되돌려주는 자신만만한 젊은 여자를 보았다.

I am writing to you with new information about your current membership. Last year, you 1) **signed/ were signed** up for our museum membership that 2) **providing/ provides** special discounts. As 3) **stating/ stated** in the last newsletter, this year we are happy to be celebrating our 50th anniversary. So we would like to 4) **offer/ suffer** you further benefits. These 5) **include/ conclude** free admission for up to ten people and 20% off museum merchandise on your next visit. You will also be invited to all new exhibition openings this year at 6) **counted/ discounted** prices. We hope you enjoy these offers. For any questions, please feel free to 7) **contact/ contract** us.

19

As Natalie was logging in to her first online counseling session, she 8) **wondered/ was wondered**, "How can I open my heart to the counselor through a computer screen?" Since the counseling center was a long drive away, she knew 9) **that/ what** this would save her a lot of time. Natalie just wasn't sure 10) **if/ that** it would be as helpful as meeting her counselor in person. Once the session began, however, her concerns went away. She actually started thinking 11) **that/ what** it was much more convenient than 12) **expecting/ expected**. She felt as if the counselor 13) **is/ were** in the room with her. As the session closed, she told him with a smile, "I'll definitely see you online again!"

20

New ideas, such as those inspired by scientific developments, 14) **is/ are** often aired and critiqued in our popular culture as part of a healthy process of public debate, and scientists sometimes 15) **deserve/ reserve** the criticism they get. But the popularization of science would be greatly 16) **enhanced/ ruined** by improving the widespread images of the scientist. Part of the problem may be 17) **that/ what** the majority of the people who are most likely to write novels, plays, and film scripts 18) **educated/ were educated** in the humanities, not in the sciences. Furthermore, the few scientists-turned-writers 19) **have been used/ have used** their scientific training as the source material for thrillers that further damage the image of science and scientists. We need more screenplays and novels 20) **that/ what** present scientists in a positive light. In our contemporary world, television and film are particularly influential media, and it is likely 21) **that/ what** the introduction of more scientist-heroes would help to make science 22) **more/ less** attractive.

21

The single most important change you can make in your working habits 23) **is/ are** to switch to creative work first, reactive work second. This means blocking off a large chunk of time every day for creative work on your own priorities, with the phone and e-mail off. I used to 24) **be/ being** a frustrated writer. Making this switch turned me into a productive writer. Yet there wasn't a single day when I 25) **sat/ seated** down to write an article, blog post, or book chapter without a string of people waiting for me to get back to 26) **them/ themselves**. It wasn't easy, and it still isn't, particularly when I get phone messages beginning "I sent you an e-mail two hours ago...!" By definition, this approach goes against the grain of others' expectations and the pressures they put on you. It takes willpower to switch 27) **on/ off** the world, even for an hour. It feels 28) **comfortable/ uncomfortable**, and sometimes people get upset. But 29) **its/ it's** better to disappoint a few people over small things, than to 30) **abandon/ keep** your dreams for an empty inbox. Otherwise, you're sacrificing your potential for the illusion of

professionalism.

22

Contractors that will construct a project may place more weight on the planning process. Proper planning 31) **forcing/ forces** detailed thinking about the project. It allows the project manager (or team) to "build the project in his or her head." The project manager (or team) can 32) **consider/ be considered** different methodologies thereby deciding what works best or what does not work at all. This detailed thinking may be the only way to 33) **discover/ recover** restrictions or risks that were not addressed in the estimating process. It would be far better to 34) **discover/ recover** in the planning phase that a particular technology or material will not work than in the execution process. The goal of the planning process for the contractor is to 35) **produce/ reduce** a workable scheme 36) **that/ what** uses the resources efficiently within the allowable time and given budget. A well-developed plan does not guarantee 37) **that/ what** the executing process will proceed flawlessly or that the project will even succeed in meeting 38) **its/ it's** objectives. It does, however, greatly 39) **prove/ improve** its chances.

23

Children can move effortlessly between play and absorption in a story, as if both are forms of the same activity. The taking of roles in a narratively structured game of pirates 40) **is/ are** not very 41) **different/ indifferent** than the taking of roles in identifying with characters as one watches a movie. It might be 42) **thinking/ thought** 43) **that/ what**, as they grow towards adolescence, people give up childhood play, but this is not so. Instead, the bases and interests of this activity change and develop to playing and watching sports, to the fiction of plays, novels, and movies, and nowadays to video games. In fiction, one can enter possible worlds. When we 44) **experience/ are experienced** emotions in such worlds, this is not a sign 45) **that/ what** we are being incoherent or regressed. It 46) **derives/ divides** from trying out metaphorical transformations of our selves in new ways, in new worlds, in ways that can be moving and important to us.

24

Although cognitive and neuropsychological approaches emphasize the losses with age 47) **that/ what** might impair social perception, motivational theories indicate 48) **that/ what** there may be some gains or qualitative changes. Charles and Carstensen 49) **review/ reviewing** a 50) **considerate/ considerable** body of evidence indicating that, as people get older, they tend to prioritize close social relationships, focus more on achieving emotional well-being, and 51) **tend/ attend** more to positive emotional information 52) **during/ while** ignoring negative information. These changing motivational goals in old age have implications for attention to and processing of social cues from the environment. Of particular importance in considering emotional changes in old age is the presence of a positivity bias: that is, a tendency to notice, attend to, and 53) **remember/ forget** more positive compared to negative information. The role of life experience in social skills also 54) **indicate/ indicates** 55) **that/ what** older adults might show gains in some aspects of social perception.

26

Emil Záopek, a former Czech athlete, 56) **considered/ is considered** one of the greatest long-distance runners ever. He was also famous for his distinctive running style. 57) **During/ While** working in a shoe factory, he 58) **participated/ was**

participated in a 1,500-meter race and won second place. After that event, he took a more serious interest in running and devoted 59) **him/ himself** to it. At the 1952 Olympic Games in Helsinki, he won three gold medals in the 5,000-meter and 10,000-meter races and in the marathon, 60) **break/ breaking** Olympic records in each. He was married to Dana Záopková who was an Olympic gold medalist, too. Záopek was also 61) **noting/ noted** for his friendly personality. In 1966, Záopek 62) **inviting/ invited** Ron Clarke, a great Australian runner who had never won an Olympic gold medal, to an athletic meeting in Prague. After the meeting, he gave Clarke one of his gold medals as a gift.

29

Most historians of science point to the need for a reliable calendar to regulate agricultural activity as the motivation for learning about what we now 63) **call/ recall** astronomy, the study of stars and planets. Early astronomy 64) **providing/ provided** information about when to plant crops and gave humans their first formal method of recording the passage of time. Stonehenge, the 4,000-year-old ring of stones in southern Britain, 65) **is/ are** perhaps the best-known monument to the discovery of regularity and predictability in the world we inhabit. The great markers of Stonehenge point to the spots on the horizon 66) **where/ which** the sun 67) **rises/ raises** at the solstices and equinoxes — the dates we still use to mark the beginnings of the seasons. The stones may even 68) **have used/ have been used** to predict eclipses. The existence of Stonehenge, built by people without writing, bears silent testimony both to the regularity of 69) **nature/ nurture** and to the ability of the human mind to see behind immediate appearances and discover deeper meanings in events.

30

Sport can trigger an emotional response in 70) **its/ it's** consumers of the kind rarely 71) **bringing/ brought** forth by other products. Imagine bank customers 72) **buy/ buying** memorabilia to show loyalty to their bank, or consumers identifying so strongly with their car insurance company 73) **that/ what** they get a tattoo with its logo. We know 74) **that/ what** some sport followers are so passionate about players, teams and the sport itself that their interest borders on obsession. This addiction 75) **provides/ prevents** the emotional glue that binds fans to teams, and maintains loyalty even in the face of on-field failure. While most managers can only dream of having customers that are as passionate about their products as sport fans, the emotion 76) **triggered/ is triggered** by sport can also have a negative impact. Sport's emotional intensity can mean 77) **that/ what** organisations have strong attachments to the past through nostalgia and club tradition. As a result, they may 78) **ignore/ respect** efficiency, productivity and the need to respond quickly to changing market conditions. For example, a proposal to change club colours in order to project a 79) **more/ less** attractive image may be defeated because it breaks a link with tradition.

31

The growth of academic disciplines and sub-disciplines, such as art history or palaeontology, and of particular figures such as the art critic, 80) **helping/ helped** produce principles and practices for selecting and organizing 81) **that/ what** was worthy of keeping, though it 82) **remained/ reminded** a struggle. Moreover, as museums and universities drew further apart toward the end of the nineteenth century, and as the idea of objects as a 83) **high/ highly** valued route to knowing the world went

into decline, 84) **collect/ collecting** began to lose its status as a worthy intellectual pursuit, especially in the sciences. The really 85) **interesting/ interested** and important aspects of science 86) **was/ were** increasingly those invisible to the naked eye, and the classification of things collected no longer promised to produce cutting-edge knowledge. The term "butterfly collecting" could come to be 87) **using/ used** with the adjective "mere" to indicate a pursuit of secondary academic status.

32

Some of the most insightful work on information seeking 88) **emphasizing/ emphasizes** "strategic self-ignorance," understood as "the use of ignorance as an excuse to engage excessively in pleasurable activities 89) **that/ what** may be 90) **harmful/ harmless** to one's future self." The idea here is 91) **that/ what** if people are present-biased, they might 92) **accept/ avoid** information that would make current activities 93) **more/ less** attractive — perhaps because it would produce guilt or shame, perhaps because it would suggest an aggregate trade-off that would counsel against engaging in such activities. St. Augustine famously said, "God give me chastity — tomorrow." Present-biased agents think: "Please let me 94) **know/ to know** the risks — tomorrow." Whenever people are thinking about engaging in an activity with short-term benefits but long-term costs, they might 95) **refer/ prefer** to delay receipt of important information. The same point might hold about information 96) **that/ what** could make people sad or mad: "Please tell me what I need to know — tomorrow."

33

Concepts of nature are always cultural statements. This may not strike Europeans as much of an 97) **sight/ insight**, for Europe's landscape is so much of a 98) **blend/ blind**. But in the new worlds — 'new' at least to Europeans — the distinction appeared 99) **much/ very** clearer not only to European settlers and visitors but also to their descendants. For that reason, they had the fond conceit of primeval nature 100) **controlled/ uncontrolled** by human associations which could later find expression in an admiration for wilderness. Ecological relationships certainly 101) **having/ have** their own logic and in this sense 'nature' can be seen to have a self-regulating but not necessarily stable dynamic independent of human intervention. But the context for ecological interactions 102) **has/ have** increasingly been set by humanity. We may not determine how or what a lion eats but we certainly can regulate 103) **where/ which** the lion feeds.

34

Emma Brindley has investigated the responses of European robins to the songs of neighbors and strangers. 104) **Although/ Despite** the large and complex song repertoire of European robins, they were able to discriminate between the songs of neighbors and strangers. When they 105) **heard/ were heard** a tape recording of a stranger, they began to sing sooner, sang more songs, and overlapped their songs with the playback more often than they did on hearing a neighbor's song. As Brindley suggests, the overlapping of song may be an aggressive response. However, this 106) **difference/ indifference** in responding to neighbor versus stranger occurred only when the neighbor's song 107) **played/ was played** by a loudspeaker placed at the boundary between that neighbor's territory and the territory of the bird being tested. If the same neighbor's song was played at another boundary, one separating the territory of the test subject from another neighbor, it 108) **treated/ was treated** as the call of a stranger. Not only 109) **is/ does** this result demonstrate 110) **that/**

what the robins associate locality with familiar songs, but it also shows 111) **that/ what** the choice of songs used in playback experiments 112) **is/ are** highly important.

35

Kinship ties continue to be important today. In modern societies such as the United States people frequently 113) **having/ have** family get-togethers, they telephone their relatives regularly, and they 114) **provide/ prevent** their kin with a wide variety of services. Eugene Litwak has 115) **referred/ preferred** to this pattern of behaviour as the 'modified extended family'. It is an extended family structure 116) **because/ because of** multigenerational ties are maintained, but it is modified because it does not usually rest on co-residence between the generations and most extended families do not act as corporate groups. Although modified extended family members often live close by, the modified extended family does not 117) **require/ inquire** geographical proximity and ties 118) **maintained/ are maintained** even when kin are separated by considerable distances. In contrast to the traditional extended family 119) **where/ which** kin always live in close proximity, the members of modified extended families may freely move away from kin to seek opportunities for occupational advancement.

36

Spatial reference points are larger than 120) **them/ themselves**. This isn't really a paradox: landmarks are themselves, but they also 121) **define/ refine** neighborhoods around themselves. In a paradigm that 122) **has repeated/ has been repeated** on many campuses, researchers first collect a list of campus landmarks from students. Then they 123) **ask/ are asked** another group of students to estimate the distances between pairs of locations, some to landmarks, some to ordinary buildings on campus. The remarkable finding is 124) **that/ what** distances from an ordinary location to a landmark 125) **is/ are** judged shorter than distances from a landmark to an ordinary location. So, people would judge the distance from Pierre's house to the Eiffel Tower to be shorter than the distance from the Eiffel Tower to Pierre's house. Like black holes, landmarks 126) **seem/ seeming** to pull ordinary locations toward themselves, but ordinary places do not. This asymmetry of distance estimates 127) **violate/ violates** the most elementary principles of Euclidean distance, that the distance from A to B must be the same as the distance from B to A. Judgments of distance, then, are not necessarily coherent.

37

A firm is deciding whether to invest in shipbuilding. If it can 128) **produce/ reduce** at sufficiently large scale, it knows the venture will be profitable. But one key input is low-cost steel, and it must be 129) **producing/ produced** nearby. The company's decision boils down to this: if there is a steel factory close by, 130) **invest/ investing** in shipbuilding; otherwise, don't invest. Now consider the thinking of potential steel investors in the region. 131) **Assuming/ Assume** 132) **that/ what** shipyards are the only potential customers of steel. Steel producers figure they'll make money if there's a shipyard to buy their steel, but not otherwise. Now we have two possible outcomes — 133) **that/ what** economists call "multiple equilibria." There is a "good" outcome, in which both types of investments are made, and both the shipyard and the steelmakers 134) **end/ ending** up profitable and happy. Equilibrium 135) **reached/ is reached**. Then there is a "bad" outcome, 136) **which/ in which** neither type of investment is made. This second outcome also is an equilibrium 137) **because/ because of** the decisions not to invest reinforce each other.

38

In most organizations, the employee's immediate supervisor 138) **evaluating/ evaluates** the employee's performance. This is 139) **because/ because of** the supervisor is responsible for the employee's performance, providing supervision, handing out assignments, and 140) **develop/ developing** the employee. A problem, however, is 141) **that/ what** supervisors often work in locations apart from their employees and therefore are not able to 142) **observe/ reserve** their subordinates' performance. Should supervisors rate employees on performance dimensions they cannot 143) **observe/ reserve**? To eliminate this dilemma, more and more organizations are implementing assessments 144) **referred/ referred to** as 360-degree evaluations. Employees are rated not only by their supervisors but by coworkers, clients or citizens, professionals in other agencies 145) **whom/ with whom** they work, and subordinates. The reason for this approach is 146) **that/ what** often coworkers and clients or citizens have a greater opportunity to observe an employee's performance and are in a better position to evaluate many performance dimensions.

39

The role that sleep plays in evolution is still under study. One possibility is 147) **that/ what** it is an advantageous adaptive state of 148) **increased/ decreased** metabolism for an animal when there are no more pressing activities. This seems 149) **true/ false** for deeper states of inactivity such as hibernation 150) **during/ while** the winter when there are few food supplies, and a high metabolic cost to maintaining adequate temperature. It may be true in daily situations as well, for instance for a prey species to 151) **accept/ avoid** predators after dark. On the other hand, the apparent universality of sleep, and the observation 152) **that/ what** mammals such as cetaceans have developed such 153) **high/ highly** complex mechanisms to 154) **preserve/ reverse** sleep on at least one side of the brain at a time, suggests 155) **that/ what** sleep additionally provides some vital service(s) for the organism. This is particularly true since one 156) **aspect/ respect** of sleep is decreased responsiveness to the environment. If sleep is universal even when this potential price must be paid, the implication may be 157) **that/ what** it has important functions that cannot be obtained just by quiet, wakeful resting.

40

The idea that planting trees could have a social or political significance appears to 158) **have invented/ have been invented** by the English, 159) **though/ despite** it has since spread widely. According to Keith Thomas's history Man and the Natural World, seventeenth- and eighteenth-century aristocrats 160) **began/ beginning** planting hardwood trees, usually in lines, to declare the extent of their property and the permanence of their claim to it. "What can be more pleasant," the editor of a magazine for gentlemen 161) **asking/ asked** his readers, "than to have the bounds and limits of your own property 162) **preserved/ deserved** and continued from age to age by the testimony of such living and growing witnesses?" 163) **Plant/ Planting** trees had the additional advantage of being regarded as a patriotic act, for the Crown had declared a 164) **severe/ several** shortage of the hardwood 165) **which/ on which** the Royal Navy depended.

[41~42]

The right to privacy may extend only to the point 166) **where/ which** it does not restrict someone else's right to freedom of expression or right to information. The scope of the right to privacy is similarly 167) **restricted/ unlimited** by the general interest in preventing crime or in promoting public health. However, when we move away from

the property-based notion of a right (where the right to privacy would 168) **protect/ present**, for example, images and personality), to modern notions of private and family life, we find it harder to establish the limits of the right. This is, of course, the strength of the notion of privacy, in that it can 169) **adapt/ adopt** to meet changing expectations and technological advances.

In sum, what is privacy today? The concept 170) **includes/ concludes** a claim 171) **that/ what** we should be 172) **observed/ unobserved**, and that certain information and images about us should not be circulated without our permission. Why did these privacy claims arise? They arose 173) **because/ because of** powerful people took offence at such observation. Furthermore, privacy incorporated the need to 174) **protect/ present** the family, home, and correspondence from arbitrary interference and, in addition, there has been a determination to protect honour and reputation. How is privacy protected? Historically, privacy 175) **protected/ was protected** by restricting circulation of the damaging material. But if the concept of privacy first became interesting 176) **legally/ illegally** as a response to reproductions of images through photography and newspapers, more 177) **decent/ recent** technological advances, such as data storage, digital images, and the Internet, pose new threats to privacy. The right to privacy is now being reinterpreted to meet those challenges.

[43~45]

Fighting against the force of the water was a thrilling challenge. Sophia tried to keep herself planted firmly in the boat, 178) **pay/ paying** attention to the waves crashing against the rocks. As the water got rougher, she 179) **forced/ was forced** 180) **to paddle/ paddling** harder to keep the waves 181) **tossing/ from tossing** her into the water. Her friends Mia and Rebecca were paddling eagerly behind her to balance the boat. They 182) **soaked/ were soaked** from all of the spray. Mia shouted to Sophia, "Are you OK? Aren't you scared?"

"I'm great!" Sophia shouted back excitedly. Even though the boat was getting thrown around, the girls managed to 183) **accept/ avoid** hitting any rocks. Suddenly, almost as quickly as the water had got rougher, the river seemed to calm down, and they all felt relaxed. With a sigh of relief, Sophia looked around. "Wow! What a wonderful view!" she shouted. The scenery around them 184) **was/ were** breathtaking. Everyone was speechless. As they enjoyed the emerald green Rocky Mountains, Mia said, "No wonder rafting is the best thing to do in Colorado!"

Agreeing with her friend, Rebecca 185) **giving/ gave** a thumbs-up. "Sophia, your choice was excellent!" she said with a delighted smile. "I thought you were afraid of water, though, Sophia," Mia said. Sophia explained, "Well, I was before I started rafting. But I graduate from college in a few months. And, before I do, I wanted to do something really adventurous to 186) **text/ test** my bravery. I thought that if I did something completely crazy, it might give me 187) **more/ less** confidence when I'm interviewing for jobs." Now they could see why she 188) **had been suggested/ had suggested** going rafting.

"You've got a good point. It's a real 189) **advantage/ disadvantage** to graduate from college with the mindset of a daring adventurer," Mia said. Rebecca quickly added, "That's why I went to Mongolia before I started my first job out of college. 190) **Teach/ Teaching** English there for two months was a big challenge for me. But I learned a lot from the experience. It really gave me the courage to try anything in life." 191) **Listen/ Listening** to her friends, Sophia looked at her own reflection in the water and saw a confident young woman smiling back at her.

I am writing to you with new information about your current membership.

(A) So we would like to offer you further benefits. These include free admission for up to ten people and 20% off museum merchandise on your next visit.

(B) Last year, you signed up for our museum membership that provides special discounts. As stated in the last newsletter, this year we are happy to be celebrating our 50th anniversary.

(C) You will also be invited to all new exhibition openings this year at discounted prices. We hope you enjoy these offers. For any questions, please feel free to contact us.

As Natalie was logging in to her first online counseling session, she wondered, "How can I open my heart to the counselor through a computer screen?"

(A) Once the session began, however, her concerns went away. She actually started thinking that it was much more convenient than expected.

(B) Since the counseling center was a long drive away, she knew that this would save her a lot of time. Natalie just wasn't sure if it would be as helpful as meeting her counselor in person.

(C) She felt as if the counselor were in the room with her. As the session closed, she told him with a smile, "I'll definitely see you online again!"

New ideas, such as those inspired by scientific developments, are often aired and critiqued in our popular culture as part of a healthy process of public debate, and scientists sometimes deserve the criticism they get.

(A) In our contemporary world, television and film are particularly influential media, and it is likely that the introduction of more scientist-heroes would help to make science more attractive.

(B) Furthermore, the few scientists-turned-writers have used their scientific training as the source material for thrillers that further damage the image of science and scientists. We need more screenplays and novels that present scientists in a positive light.

(C) But the popularization of science would be greatly enhanced by improving the widespread images of the scientist. Part of the problem may be that the majority of the people who are most likely to write novels, plays, and film scripts were educated in the humanities, not in the sciences.

The single most important change you can make in your working habits is to switch to creative work first, reactive work second.

(A) It wasn't easy, and it still isn't, particularly when I get phone messages beginning "I sent you an e-mail two hours ago...!" By definition, this approach goes against the grain of others' expectations and the pressures they put on you. It takes willpower to switch off the world, even for an hour. It feels uncomfortable, and sometimes people get upset.

(B) This means blocking off a large chunk of time every day for creative work on your own priorities, with the phone and e-mail off. I used to be a frustrated writer. Making this switch turned me into a productive writer. Yet there wasn't a single day when I sat down to write an article, blog post, or book chapter without a string of people waiting for me to get back to them.

(C) But it's better to disappoint a few people over small things, than to abandon your dreams for an empty inbox. Otherwise, you're sacrificing your potential for the illusion of professionalism.

Contractors that will construct a project may place more weight on the planning process. Proper planning forces detailed thinking about the project. It allows the project manager (or team) to "build the project in his or her head."

(A) The project manager (or team) can consider different methodologies thereby deciding what works best or what does not work at all. This detailed thinking may be the only way to discover restrictions or risks that were not addressed in the estimating process.

(B) A well-developed plan does not guarantee that the executing process will proceed flawlessly or that the project will even succeed in meeting its objectives. It does, however, greatly improve its chances.

(C) It would be far better to discover in the planning phase that a particular technology or material will not work than in the execution process. The goal of the planning process for the contractor is to produce a workable scheme that uses the resources efficiently within the allowable time and given budget.

Children can move effortlessly between play and absorption in a story, as if both are forms of the same activity.

(A) Instead, the bases and interests of this activity change and develop to playing and watching sports, to the fiction of plays, novels, and movies, and nowadays to video games. In fiction, one can enter possible worlds.

(B) The taking of roles in a narratively structured game of pirates is not very different than the taking of roles in identifying with characters as

one watches a movie. It might be thought that, as they grow towards adolescence, people give up childhood play, but this is not so.

(C) When we experience emotions in such worlds, this is not a sign that we are being incoherent or regressed. It derives from trying out metaphorical transformations of our selves in new ways, in new worlds, in ways that can be moving and important to us.

24

Although cognitive and neuropsychological approaches emphasize the losses with age that might impair social perception, motivational theories indicate that there may be some gains or qualitative changes.

(A) Charles and Carstensen review a considerable body of evidence indicating that, as people get older, they tend to prioritize close social relationships, focus more on achieving emotional well-being, and attend more to positive emotional information while ignoring negative information.

(B) Of particular importance in considering emotional changes in old age is the presence of a positivity bias: that is, a tendency to notice, attend to, and remember more positive compared to negative information. The role of life experience in social skills also indicates that older adults might show gains in some aspects of social perception.

(C) These changing motivational goals in old age have implications for attention to and processing of social cues from the environment.

Emil Záopek, a former Czech athlete, is considered one of the greatest long-distance runners ever.

(A) Záopek was also noted for his friendly personality. In 1966, Záopek invited Ron Clarke, a great Australian runner who had never won an Olympic gold medal, to an athletic meeting in Prague. After the meeting, he gave Clarke one of his gold medals as a gift.

(B) He was also famous for his distinctive running style. While working in a shoe factory, he participated in a 1,500-meter race and won second place. After that event, he took a more serious interest in running and devoted himself to it.

(C) At the 1952 Olympic Games in Helsinki, he won three gold medals in the 5,000-meter and 10,000-meter races and in the marathon, breaking Olympic records in each. He was married to Dana Záopková who was an Olympic gold medalist, too.

29

Most historians of science point to the need for a reliable calendar to regulate agricultural activity as

the motivation for learning about what we now call astronomy, the study of stars and planets.

(A) The stones may even have been used to predict eclipses. The existence of Stonehenge, built by people without writing, bears silent testimony both to the regularity of nature and to the ability of the human mind to see behind immediate appearances and discover deeper meanings in events.

(B) The great markers of Stonehenge point to the spots on the horizon where the sun rises at the solstices and equinoxes — the dates we still use to mark the beginnings of the seasons.

(C) Early astronomy provided information about when to plant crops and gave humans their first formal method of recording the passage of time. Stonehenge, the 4,000-year-old ring of stones in southern Britain, is perhaps the best-known monument to the discovery of regularity and predictability in the world we inhabit.

30

Sport can trigger an emotional response in its consumers of the kind rarely brought forth by other products. Imagine bank customers buying memorabilia to show loyalty to their bank, or consumers identifying so strongly with their car insurance company that they get a tattoo with its logo.

(A) We know that some sport followers are so passionate about players, teams and the sport itself that their interest borders on obsession. This addiction provides the emotional glue that binds fans to teams, and maintains loyalty even in the face of on-field failure.

(B) As a result, they may ignore efficiency, productivity and the need to respond quickly to changing market conditions. For example, a proposal to change club colours in order to project a more attractive image may be defeated because it breaks a link with tradition.

(C) While most managers can only dream of having customers that are as passionate about their products as sport fans, the emotion triggered by sport can also have a negative impact. Sport's emotional intensity can mean that organisations have strong attachments to the past through nostalgia and club tradition.

The growth of academic disciplines and sub-disciplines, such as art history or palaeontology, and of particular figures such as the art critic, helped produce principles and practices for selecting and organizing what was worthy of keeping, though it remained a struggle.

(A) The term "butterfly collecting" could come to be used with the adjective "mere" to indicate a pursuit of secondary academic status.

(B) Moreover, as museums and universities drew further apart toward the end of the nineteenth century, and as the idea of objects as a highly valued route to knowing the world went into decline, collecting began to lose its status as a

worthy intellectual pursuit, especially in the sciences.

(C) The really interesting and important aspects of science were increasingly those invisible to the naked eye, and the classification of things collected no longer promised to produce cutting-edge knowledge.

32

Some of the most insightful work on information seeking emphasizes "strategic self-ignorance," understood as "the use of ignorance as an excuse to engage excessively in pleasurable activities that may be harmful to one's future self."

(A) St. Augustine famously said, "God give me chastity — tomorrow." Present-biased agents think: "Please let me know the risks — tomorrow."

(B) Whenever people are thinking about engaging in an activity with short-term benefits but long-term costs, they might prefer to delay receipt of important information. The same point might hold about information that could make people sad or mad: "Please tell me what I need to know — tomorrow."

(C) The idea here is that if people are present-biased, they might avoid information that would make current activities less attractive — perhaps because it would produce guilt or shame, perhaps because it would suggest an aggregate trade-off that would counsel against engaging in such activities.

④ 전략적으로 현명한 사람이 대처를 잘한다.
⑤ 사람들은 내일의 위험을 알고 싶어 하지 않는다.

33

Concepts of nature are always cultural statements.

(A) But the context for ecological interactions has increasingly been set by humanity. We may not determine how or what a lion eats but we certainly can regulate where the lion feeds.

(B) This may not strike Europeans as much of an insight, for Europe's landscape is so much of a blend. But in the new worlds — 'new' at least to Europeans — the distinction appeared much clearer not only to European settlers and visitors but also to their descendants.

(C) For that reason, they had the fond conceit of primeval nature uncontrolled by human associations which could later find expression in an admiration for wilderness. Ecological relationships certainly have their own logic and in this sense 'nature' can be seen to have a self-regulating but not necessarily stable dynamic independent of human intervention.

④ the uncontrolled nature
⑤ stable dynamic independence

34

Emma Brindley has investigated the responses of European robins to the songs of neighbors and strangers. Despite the large and complex song repertoire of European robins, they were able to discriminate between the songs of neighbors and strangers.

(A) However, this difference in responding to neighbor versus stranger occurred only when the neighbor's song was played by a loudspeaker placed at the boundary between that neighbor's territory and the territory of the bird being tested. If the same neighbor's song was played at another boundary, one separating the territory of the test subject from another neighbor, it was treated as the call of a stranger.

(B) Not only does this result demonstrate that the robins associate locality with familiar songs, but it also shows that the choice of songs used in playback experiments is highly important.

(C) When they heard a tape recording of a stranger, they began to sing sooner, sang more songs, and overlapped their songs with the playback more often than they did on hearing a neighbor's song. As Brindley suggests, the overlapping of song may be an aggressive response.

35

Kinship ties continue to be important today. In modern societies such as the United States people frequently have family get-togethers, they telephone their relatives regularly, and they provide their kin with a wide variety of services.

(A) Although modified extended family members often live close by, the modified extended family does not require geographical proximity and ties are maintained even when kin are separated by considerable distances.

(B) In contrast to the traditional extended family where kin always live in close proximity, the members of modified extended families may freely move away from kin to seek opportunities for occupational advancement.

(C) Eugene Litwak has referred to this pattern of behaviour as the 'modified extended family'. It is an extended family structure because multigenerational ties are maintained, but it is modified because it does not usually rest on co-residence between the generations and most extended families do not act as corporate groups.

So, people would judge the distance from Pierre's house to the Eiffel Tower to be shorter than the distance from the Eiffel Tower to Pierre's house.

Spatial reference points are larger than themselves. This isn't really a paradox: landmarks are themselves, but they also define neighborhoods around themselves. In a paradigm that has been repeated on many campuses, researchers first collect a list of campus landmarks from students. ① Then they ask another group of students to estimate the distances between pairs of locations, some to landmarks, some to ordinary buildings on campus. ② The remarkable finding is that distances from an ordinary location to a landmark are judged shorter than distances from a landmark to an ordinary location. ③ Like black holes, landmarks seem to pull ordinary locations toward themselves, but ordinary places do not. ④ This asymmetry of distance estimates violates the most elementary principles of Euclidean distance, that the distance from A to B must be the same as the distance from B to A. ⑤ Judgments of distance, then, are not necessarily coherent.

220) 윗글의 주제로 가장 적절한 것을 고르시오.
① the coherent judgments
② living near the landmarks
③ spatial campus landmarks
④ an ordinary location
⑤ relative distance of spatial reference

37
221) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

Now we have two possible outcomes — what economists call "multiple equilibria."

A firm is deciding whether to invest in shipbuilding. If it can produce at sufficiently large scale, it knows the venture will be profitable. But one key input is low-cost steel, and it must be produced nearby. ① The company's decision boils down to this: if there is a steel factory close by, invest in shipbuilding; otherwise, don't invest. Now consider the thinking of potential steel investors in the region. ② Assume that shipyards are the only potential customers of steel. Steel producers figure they'll make money if there's a shipyard to buy their steel, but not otherwise. ③ There is a "good" outcome, in which both types of investments are made, and both the shipyard and the steelmakers end up profitable and happy. ④ Equilibrium is reached. Then there is a "bad" outcome, in which neither type of investment is made. This second outcome also is an equilibrium because the decisions not to invest reinforce each other. ⑤

38

In most organizations, the employee's immediate supervisor evaluates the employee's performance. This is because the supervisor is responsible for the employee's performance, providing supervision, handing out assignments, and developing the employee.

(A) To eliminate this dilemma, more and more organizations are implementing assessments referred to as 360-degree evaluations. Employees are rated not only by their supervisors but by coworkers, clients or citizens, professionals in other agencies with whom they work, and subordinates.

(B) The reason for this approach is that often coworkers and clients or citizens have a greater opportunity to observe an employee's performance and are in a better position to evaluate many performance dimensions.

(C) A problem, however, is that supervisors often work in locations apart from their employees and therefore are not able to observe their subordinates' performance. Should supervisors rate employees on performance dimensions they cannot observe?

39

The role that sleep plays in evolution is still under study. One possibility is that it is an advantageous adaptive state of decreased metabolism for an animal when there are no more pressing activities.

(A) On the other hand, the apparent universality of sleep, and the observation that mammals such as cetaceans have developed such highly complex mechanisms to preserve sleep on at least one side of the brain at a time, suggests that sleep additionally provides some vital service(s) for the organism.

(B) This seems true for deeper states of inactivity such as hibernation during the winter when there are few food supplies, and a high metabolic cost to maintaining adequate temperature. It may be true in daily situations as well, for instance for a prey species to avoid predators after dark.

(C) This is particularly true since one aspect of sleep is decreased responsiveness to the

environment. If sleep is universal even when this potential price must be paid, the implication may be that it has important functions that cannot be obtained just by quiet, wakeful resting.

The idea that planting trees could have a social or political significance appears to have been invented by the English, though it has since spread widely.

(A) Planting trees had the additional advantage of being regarded as a patriotic act, for the Crown had declared a severe shortage of the hardwood on which the Royal Navy depended.

(B) "What can be more pleasant," the editor of a magazine for gentlemen asked his readers, "than to have the bounds and limits of your own property preserved and continued from age to age by the testimony of such living and growing witnesses?"

(C) According to Keith Thomas's history Man and the Natural World, seventeenth- and eighteenth-century aristocrats began planting hardwood trees, usually in lines, to declare the extent of their property and the permanence of their claim to it.

⑤ aristocrats without trees near their houses

[41~42]

The right to privacy may extend only to the point where it does not restrict someone else's right to freedom of expression or right to information. The scope of the right to privacy is similarly restricted by the general interest in preventing crime or in promoting public health.

(A) But if the concept of privacy first became interesting legally as a response to reproductions of images through photography and newspapers, more recent technological advances, such as data storage, digital images, and the Internet, pose new threats to privacy. The right to privacy is now being reinterpreted to meet those challenges.

(B) In sum, what is privacy today? The concept includes a claim that we should be unobserved, and that certain information and images about us should not be circulated without our permission. Why did these privacy claims arise? They arose because powerful people took offence at such observation. Furthermore, privacy incorporated the need to protect the family, home, and correspondence from arbitrary interference and, in addition, there has been a determination to protect honour and reputation. How is privacy protected? Historically, privacy was protected by restricting circulation of the damaging material.

(C) However, when we move away from the property-based notion of a right (where the right to privacy would protect, for example, images and personality), to modern notions of private and family life, we find it harder to establish the limits of the right. This is, of course, the strength of the notion of privacy, in that it can adapt to meet changing expectations and technological advances.

Fighting against the force of the water was a

thrilling challenge. Sophia tried to keep herself planted firmly in the boat, paying attention to the waves crashing against the rocks. As the water got rougher, she was forced to paddle harder to keep the waves from tossing her into the water. Her friends Mia and Rebecca were paddling eagerly behind her to balance the boat. They were soaked from all of the spray. Mia shouted to Sophia, "Are you OK? Aren't you scared?"

(A) Agreeing with her friend, Rebecca gave a thumbs-up. "Sophia, your choice was excellent!" she said with a delighted smile. "I thought you were afraid of water, though, Sophia," Mia said. Sophia explained, "Well, I was before I started rafting. But I graduate from college in a few months. And, before I do, I wanted to do something really adventurous to test my bravery. I thought that if I did something completely crazy, it might give me more confidence when I'm interviewing for jobs." Now they could see why she had suggested going rafting.

(B) "You've got a good point. It's a real advantage to graduate from college with the mindset of a daring adventurer," Mia said. Rebecca quickly added, "That's why I went to Mongolia before I started my first job out of college. Teaching English there for two months was a big challenge for me. But I learned a lot from the experience. It really gave me the courage to try anything in life." Listening to her friends, Sophia looked at her own reflection in the water and saw a confident young woman smiling back at her.

(C) "I'm great!" Sophia shouted back excitedly. Even though the boat was getting thrown around, the girls managed to avoid hitting any rocks. Suddenly, almost as quickly as the water had got rougher, the river seemed to calm down, and they all felt relaxed. With a sigh of relief, Sophia looked around. "Wow! What a wonderful view!" she shouted. The scenery around them was breathtaking. Everyone was speechless. As they enjoyed the emerald green Rocky Mountains, Mia said, "No wonder rafting is the best thing to do in Colorado!"

New ideas, such as those inspired by scientific developments, ① **are** often aired and critiqued in our popular culture as part of a healthy process of public debate, and scientists sometimes deserve the criticism they get. (A) _____ the popularization of science would be greatly enhanced by improving the ② **widespread** images of the scientist. Part of the problem may be that the majority of the people who are most likely to write novels, plays, and film scripts ③ **were educated** in the humanities, not in the sciences. (B) _____, the few scientists-turned-writers have used their scientific training as the source material for thrillers that further damage the image of science and scientists. We need more screenplays and novels ④ **that** present scientists in a positive light. In our contemporary world, television and film are particularly influential media, and it is likely ⑤ **what** the introduction of more scientist-heroes would help to make science more attractive.

234) 윗글 (A) (B) 빈칸에 어울리는 연결어를 고르시오.

① But - Thus ② Fortunately - However
③ But - Moreover ④ Fortunately-For example
⑤ At the same time - Accordingly

21

The single most important change you can make in your working habits is to switch to creative work first, reactive work second. This means ① **blocking off** a large chunk of time every day for creative work on your own priorities, with the phone and e-mail off. I ② **used to be** a frustrated writer. Making this switch turned me into a productive writer. Yet there wasn't a single day when I ③ **seated** down to write an article, blog post, or book chapter without a string of people waiting for me to get back to them. It wasn't

easy, and it still isn't, ④ **particularly** when I get phone messages beginning "I sent you an e-mail two hours ago...!" By definition, this approach goes against the grain of others' expectations and the pressures they put on you. It takes willpower to switch off the world, even for an hour. It feels uncomfortable, and sometimes people get upset. But it's better ⑤ **to disappoint** a few people over small things, than to abandon your dreams for an empty inbox. Otherwise, you're sacrificing your potential for the _____ of professionalism.

236) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① intuition ② immortality ③ illusion
④ relation ⑤ obesity

22

Contractors that will construct a project may place more weight on the planning process. _____ forces detailed thinking about the project. It allows the project manager (or team) to "build the project in his or her head." The project manager (or team) can consider different methodologies thereby ① **deciding** what works best or what does not work at all. This detailed thinking may be the only way ② **to discover** restrictions or risks that were not addressed in the estimating process. It would be far better to discover in the planning phase ③ **that** a particular technology or material will not work than in the execution process. The goal of the planning process for the contractor is ④ **to produce** a workable scheme that uses the resources efficiently within the allowable time and given budget. A well-developed plan does not guarantee that the executing process will proceed flawlessly or that the project will even succeed in meeting its objectives. It does, however, greatly ⑤ **improving** its chances.

238) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① Great improve ② Proper planning
③ Certain change ④ The contractor
⑤ Changable objective

Children can move effortlessly between play and absorption in a story, as if both are forms of the same activity. The taking of roles in a narratively ① **structured** game of pirates is not very different than the taking of roles in identifying with characters as one ② **watches** a movie. It might be thought that, as they grow towards adolescence, people ③ **giving** up childhood play, but this is not so. _____, the bases and interests of this activity change and develop to playing and watching sports, to the fiction of plays, novels, and movies, and nowadays to video games. In fiction, one can enter possible worlds. When we experience emotions in such worlds, this is not a sign that we ④ **are being** incoherent or regressed. It derives from trying out metaphorical transformations of our selves in new ways, in new worlds, in ways ⑤ **that** can be moving and important to us.

240) 윗글 빈칸에 들어갈 연결어로 가장 적절한 것은?

① Likewise ② Otherwise ③ In other words
④ Instead ⑤ In fact

Although cognitive and neuropsychological approaches ① **emphasize** the losses with age that might impair social perception, motivational theories indicate ② **what** there may be some gains or qualitative changes. Charles and Carstensen review a considerable body of evidence indicating that, as people get older, they tend ③ **to prioritize** close social relationships, focus more on achieving emotional well-being, and attend more to (A) p_____ emotional information while ignoring (B) n_____ information. These

changing motivational goals in old age have implications for attention to and processing of social cues from the environment. Of particular importance in considering emotional changes in old age is the presence of a positivity bias: that is, a tendency ④ **to notice**, attend to, and remember more positive compared to negative information. The role of life experience in social skills also indicates that older adults ⑤ **might show** gains in some aspects of social perception.

242) 각 빈칸 (A), (B) 에 알맞은 어휘를 채우시오.

Emil Záopek, a former Czech athlete, is considered one of the greatest long-distance runners ever. He was also famous for his distinctive running style. While ① **working** in a shoe factory, he participated in a 1,500-meter race and won second place. After that event, he took a more serious interest in running and ② **devoted** himself to it. At the 1952 Olympic Games in Helsinki, he won three gold medals in the 5,000-meter and 10,000-meter races and in the marathon, breaking Olympic records in each. He ③ **was married** to Dana Záopková who was an Olympic gold medalist, too. Záopek was also ④ **noting** for his friendly personality. In 1966, Záopek invited Ron Clarke, a great Australian runner ⑤ **who** had never won an Olympic gold medal, to an athletic meeting in Prague. After the meeting, he gave Clarke one of his gold medals as a gift.

Most historians of science point to the need for a reliable c_____ to regulate agricultural activity as the motivation for learning about what we now call astronomy, the study of stars and planets. Early astronomy ① **provided** information about when to plant crops and gave humans their first formal method of recording the passage of time. Stonehenge, the 4,000-year-old ring of stones in southern Britain, ② **is** perhaps the best-known monument to the discovery of regularity and predictability in the world we inhabit. The great markers of Stonehenge point to the spots on the horizon where the sun ③ **rises** at the solstices and equinoxes — the dates we still use to mark the beginnings of the seasons. The stones may even have been used to ④ **predicting** eclipses. The existence of Stonehenge, built by people without writing, bears silent testimony both to the regularity of nature and to the ability of the human mind ⑤ **to see** behind immediate appearances and discover deeper meanings in events.

Sport can trigger an emotional response in its consumers of the kind rarely brought forth by other products. ① **Imagine** bank customers buying memorabilia to show loyalty to their bank, or consumers identifying so strongly with their car insurance company that they get a tattoo with its logo. We know ② **what** some sport followers are so passionate about players, teams and the sport itself that their interest borders on obsession. This addiction ③ **provides** the emotional glue that binds fans to teams, and maintains loyalty even in the face of on-field failure. ④ **While** most

managers can only dream of having customers that are as passionate about their products as sport fans, the emotion triggered by sport can also have a negative impact. Sport's emotional intensity can mean that organisations ⑤ **have** strong attachments to the past through nostalgia and club tradition. (A) _____, they may ignore efficiency, productivity and the need to respond quickly to changing market conditions. (B) _____, a proposal to change club colours in order to project a more attractive image may be defeated because it breaks a link with tradition.

255) 윗글 (A) (B) 빈칸에 어울리는 연결어를 고르시오.

The growth of academic disciplines and sub-disciplines, such as art history or palaeontology, and of particular figures such as the art critic, ① **helped** produce principles and practices for selecting and organizing what was worthy of keeping, though it ② **was remained** a struggle. Moreover, as museums and universities drew further apart toward the end of the nineteenth century, and as the idea of objects as a highly valued route to ③ **knowing** the world went into decline, collecting began ④ **to lose** its status as a worthy intellectual pursuit, especially in the sciences. The really interesting and important aspects of science were increasingly those _____ to the naked eye, and the classification of things collected no longer promised to produce cutting-edge knowledge. The term "butterfly collecting" could come ⑤ **to be used** with the adjective "mere" to indicate a pursuit of secondary academic status.

257) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① oppressive ② authentic ③ invisible
④ audible ⑤ unreasonable

Some of the most insightful work on information seeking ① **emphasizes** "strategic self-ignorance," understood as "the use of ignorance as an excuse to engage excessively in pleasurable activities that may be harmful to one's future self." The idea here is ② **what** if people are present-biased, they might avoid information that would make current activities less attractive — perhaps because it would produce guilt or shame, perhaps because it would suggest an aggregate trade-off that would counsel against ③ **engaging** in such activities. St. Augustine famously said, "God give me chastity — tomorrow." Present-biased agents think: "Please let me ④ **know** the risks — tomorrow." Whenever people are thinking about engaging in an activity with short-term benefits but long-term costs, they might prefer ⑤ **to delay** receipt of important information. The same point might hold about information that could make people sad or mad: "Please tell me what I need to know — _____."

Concepts of nature are always cultural statements. This may not strike Europeans as much of an insight, for Europe's landscape is so much of a blend. (A) _____ in the new worlds — 'new' at least to Europeans — the distinction appeared ① **much** clearer not only to European settlers and visitors but also to their descendants. For that reason, they had the fond conceit of primeval nature ② **uncontrolled** by human associations which could later find expression in an admiration

for wilderness. Ecological relationships certainly have their own logic and in this sense 'nature' can ③ **be seen** to have a self-regulating but not necessarily stable dynamic independent of human intervention. (B) _____ the context for ecological interactions ④ **have** increasingly been set by humanity. We may not determine how or what a lion eats but we certainly ⑤ **can regulate** where the lion feeds.

261) 윗글 (A) (B) 빈칸에 어울리는 연결어를 고르시오.

Emma Brindley has investigated the responses of European robins to the songs of neighbors and strangers. Despite the large and complex song repertoire of European robins, they were able to _____ between the songs of neighbors and strangers. When they ① **heard** a tape recording of a stranger, they began to sing sooner, sang more songs, and overlapped their songs with the playback more often than they did on hearing a neighbor's song. As Brindley ② **suggests**, the overlapping of song may be an aggressive response. However, this difference in responding to neighbor versus stranger ③ **occurred** only when the neighbor's song was played by a loudspeaker placed at the boundary between that neighbor's territory and the territory of the bird ④ **being tested**. If the same neighbor's song was played at another boundary, one separating the territory of the test subject from another neighbor, it was treated as the call of a stranger. Not only ⑤ **is** this result demonstrate that the robins associate locality with familiar songs, but it also shows that the choice of songs used in playback experiments is highly important.

Kinship ties continue to be important today. In modern societies such as the United States people ① **frequently** have family get-togethers, they telephone their relatives regularly, and they provide their kin with a wide variety of services. Eugene Litwak ② **has referred** to this pattern of behaviour as the 'modified extended family'. It is an extended family structure because multigenerational ties ③ **maintained**, but it is modified because it does not usually rest on co-residence between the generations and most extended families do not act as corporate groups. Although modified extended family members often live close by, the modified extended family does not require geographical _____ and ties are maintained even when kin are separated by considerable distances. In contrast to the traditional extended family ④ **where** kin always live in close proximity, the members of modified extended families may freely move away from kin ⑤ **to seek** opportunities for occupational advancement.

265) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① misfortune ② receptivity ③ circulation
④ pervasion ⑤ proximity

36

266) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

Spatial reference points are larger than themselves. This isn't really a paradox: landmarks are themselves, (A) _____ they also define neighborhoods around themselves. In a paradigm that ① **has been repeated** on many campuses, researchers first collect a list of campus landmarks from students. Then they ask another group of students ② **to estimate** the distances between

pairs of locations, some to landmarks, some to ordinary buildings on campus. The remarkable finding is ③ **what** distances from an ordinary location to a landmark are judged shorter than distances from a landmark to an ordinary location. (B) _____, people would judge the distance from Pierre's house to the Eiffel Tower to be shorter than the distance from the Eiffel Tower to Pierre's house. Like black holes, landmarks ④ **seem** to pull ordinary locations toward themselves, but ordinary places do not. This asymmetry of distance estimates violates the most elementary principles of Euclidean distance, ⑤ **that** the distance from A to B must be the same as the distance from B to A. Judgments of distance, then, are not necessarily coherent.

267) 윗글 (A) (B) 빈칸에 어울리는 연결어를 고르시오.

① But - So ② Fortunately-For example
③ But - Otherwise ④ Fortunately -In addition
⑤ At the same time - Accordingly

37

268) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

A firm is deciding whether to invest in shipbuilding. If it can produce at sufficiently large scale, it ① **knows** the venture will be profitable. But one key input is low-cost steel, and it must be produced nearby. The company's decision boils down to this: if there is a steel factory close by, ② **invest** in shipbuilding; otherwise, don't invest. Now consider the thinking of potential steel investors in the region. Assume ③ **what** shipyards are the only potential customers of steel. Steel producers figure they'll make money if there's a shipyard to buy their steel, but not otherwise. Now we have two possible outcomes — what economists call "multiple equilibria." There is a "good" outcome, ④ **in which** both types of investments are made, and both the shipyard and the steelmakers end up profitable and happy. _____ is reached. Then there is a "bad" outcome, in which neither type of investment is made. This second outcome also is an equilibrium ⑤ **because** the decisions not to invest reinforce each other.

269) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① Equilibrium ② Evaporation ③ Imagination
④ Admiration ⑤ Interdependence

38

270) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

In most organizations, the employee's immediate supervisor evaluates the employee's performance. This is because the supervisor is responsible for the employee's performance, providing supervision, handing out assignments, and developing the employee. A problem, however, is ① **that** supervisors often work in locations apart from their employees and therefore are not able ② **to observe** their subordinates' performance. Should supervisors rate employees on performance dimensions they cannot observe? ③ **To eliminate** this dilemma, more and more organizations are implementing assessments referred to as _____. Employees are rated not only by their supervisors but by coworkers, clients or citizens, professionals in other agencies with whom they work, and subordinates. The reason for this approach is ④ **what** often coworkers and clients or citizens have a greater opportunity to observe an employee's performance and are in a better position ⑤ **to evaluate** many performance dimensions.

271) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① 3D dimensions ② 360-degree evaluations
③ the sole evaluations ④ normal professionals
⑤ opportunity routines

272) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

The role that sleep plays in evolution is still under study. One possibility is that it is an advantageous

adaptive state of decreased metabolism for an animal when _____. This seems true for deeper states of inactivity such as hibernation ① **during** the winter when there are few food supplies, and a high metabolic cost to maintaining adequate temperature. It may be true in daily situations as well, for instance for a prey species ② **to avoid** predators after dark. On the other hand, the apparent universality of sleep, and the observation that mammals such as cetaceans ③ **have developed** such highly complex mechanisms to preserve sleep on at least one side of the brain at a time, suggests ④ **what** sleep additionally provides some vital service(s) for the organism. This is particularly true since one aspect of sleep is decreased responsiveness to the environment. If sleep is universal even when this potential price must be paid, the implication may be that it has important functions that cannot ⑤ **be obtained** just by quiet, wakeful resting.

273) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① they need to move faster
② the brain needs to work
③ there is much of the observation
④ the work of brain has potential price
⑤ there are no more pressing activities

The right to privacy may extend only to the point where it does not restrict someone else's right to freedom of expression or right to information. The scope of the right to privacy is similarly ① **restricted** by the general interest in preventing crime or in promoting public health. (A) _____, when we move away from the property-based notion of a right (where the right to privacy would protect, for example, images and personality), to modern notions of private and family life, we find ② **them** harder to establish the limits of the right. This is, of course, the strength of the notion of privacy, in that it can adapt to meet changing expectations and technological advances.

In sum, what is privacy today? The concept includes a claim that we should ③ **be unobserved**, and that certain information and images about us should not be circulated without our permission. Why did these privacy claims arise? They arose because powerful people took offence at such observation. (B) _____, privacy incorporated the need to protect the family, home, and correspondence from arbitrary interference and, in addition, there has been a determination ④ **to protect** honour and reputation. How is privacy protected? Historically, privacy was protected by restricting circulation of the damaging material. But if the concept of privacy first became interesting legally as a response to reproductions of images through photography and newspapers, more recent technological advances, such as data

storage, digital images, and the Internet, pose new threats to privacy. The right to privacy ⑤ **is now being reinterpreted** to meet those challenges.

277) (A) (B) 빈칸에 어울리는 연결어를 고르시오.

Fighting against the force of the water was a thrilling challenge. Sophia tried to keep herself planted firmly in the boat, paying attention to the waves crashing against the rocks. As the water got rougher, sheqq **was forced** to paddle harder to keep the waves from tossing her into the water. Her friends Mia and Rebecca were paddling eagerly behind her to balance the boat. They were soaked from all of the spray. Mia shouted to Sophia, "Are you OK? Aren't you scared?"

"I'm great!" Sophia shouted back excitedly. ② **Even though** the boat was getting thrown around, the girls managed to avoid hitting any rocks. Suddenly, almost as quickly as the water had got rougher, the river seemed to calm down, and they all felt relaxed. With a sigh of relief, Sophia looked around. "Wow! What a wonderful view!" she shouted. The scenery around them was breathtaking. Everyone was speechless. As they ③ **enjoyed** the emerald green Rocky Mountains, Mia said, "No wonder rafting is the best thing to do in Colorado!"

Agreeing with her friend, Rebecca gave a thumbs-up. "Sophia, your choice was excellent!" she said with a delighted smile. "I thought you were afraid of water, though, Sophia," Mia said. Sophia explained, "Well, I was before I started rafting. But I graduate from college in a few months. And, before I do, I wanted to do something really adventurous to test my _____. I thought that if I did something completely crazy, it might give me more confidence when I'm ④ **interviewing** for jobs." Now they could see why she had suggested going rafting.

"You've got a good point. It's a real advantage to graduate from college with the mindset of a daring adventurer," Mia said. Rebecca quickly added, "That's why I went to Mongolia before I started my first job out of college. Teaching English there for two months was a big challenge for me. But I learned a lot from the experience. It really gave me the courage to try anything in life." ⑤ **Listen** to her friends, Sophia looked at her own reflection in the water and saw a confident young woman smiling back at her.

Most historians of science point to the need for a reliable calendar to _____ as the motivation for learning about what we now call astronomy, the study of stars and planets. Early astronomy ① **provided** information about when to plant crops and gave humans their first formal method of recording the passage of time. Stonehenge, the 4,000-year-old ring of stones in southern Britain, is perhaps the best-known monument to the ② **discovery** of regularity and predictability in the world we inhabit. The great markers of Stonehenge point to the spots on the horizon where the sun ③ **rises** at the solstices and equinoxes — the dates we still use to mark the beginnings of the seasons. The stones may even have been used to ④ **predict** eclipses. The existence of Stonehenge, built by people without writing, bears silent testimony both to the regularity of nature and to the ability of the human mind to see behind immediate appearances and ⑤ **hide** deeper meanings in events.

297) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① celebrate the birthday
② welcome the new years
③ travel around the world
④ visit the other planets
⑤ regulate agricultural activity

Sport can _____ in its consumers of the kind rarely brought forth by

other products. Imagine bank customers buying memorabilia to show loyalty to their bank, or consumers ① **identifying** so strongly with their car insurance company that they get a tattoo with its logo. We know that some sport followers are so passionate about players, teams and the sport itself ② **that** their interest borders on obsession. This addiction provides the emotional glue that binds fans to teams, and maintains loyalty even in the face of on-field failure. ③ **During** most managers can only dream of having customers that are as passionate about their products as sport fans, the emotion ④ **triggered** by sport can also have a negative impact. Sport's emotional intensity can mean that organisations have strong attachments to the past through nostalgia and club tradition. As a result, they may ignore efficiency, productivity and the need to respond quickly to ⑤ **changing** market conditions. For example, a proposal to change club colours in order to project a more attractive image may be defeated because it breaks a link with tradition.

299) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① break a link with tradition
② lose the strong attachments
③ trigger an emotional response
④ remove emotional intensity
⑤ have nothing to do with nostalgia

Some of the most insightful work on information seeking emphasizes "strategic self-ignorance," understood as "the use of ignorance as an excuse ① **to engage** excessively in pleasurable activities that may be harmful to one's future self." The idea here is that if people are present-biased, they ② **might avoid** information that would make current activities less attractive — perhaps because it would produce guilt or shame, perhaps because it ③ **would suggest** an aggregate trade-off that would counsel against engaging in such activities. St. Augustine famously said, "God give me chastity — tomorrow." Present-biased agents think: "Please let me ④ **to know** the risks — tomorrow." Whenever people are thinking about engaging in an activity with short-term benefits but long-term costs, they might prefer to _____. The same point might hold about information ⑤ **that** could make people sad or mad: "Please tell me what I need to know — tomorrow."

303) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① make people sad or mad
② make current activities more attractive
③ delay receipt of important information

④ keep the risk today for the God's shake
⑤ know the information as soon as possible

Concepts of nature are always cultural statements. This may not strike Europeans as much of an insight, for Europe's landscape is so much of a blend. But in the new worlds — 'new' at least to Europeans — the distinction ① **appeared** much clearer not only to European settlers and visitors but also to their descendants. For that reason, they ② **had** the fond conceit of primeval nature uncontrolled by human associations ③ **which** could later find expression in an admiration for wilderness. Ecological relationships ④ **certainly** have their own logic and in this sense 'nature' can be seen to have a self-regulating but not necessarily stable dynamic independent of human intervention. But the context for ecological interactions has increasingly ⑤ **set** by humanity. We may not determine how or what a lion eats but we certainly can regulate _____.

305) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① how to raise the lion ② what the nature is
③ where the lion feeds ④ how the lion hunts
⑤ why we destroy the nature

Emma Brindley has investigated the responses of European robins to the songs of neighbors and strangers. ① **Despite** the large and complex song repertoire of European robins, they were able to discriminate between the songs of neighbors and strangers. When they ② **were heard** a tape recording of a stranger, they began to sing sooner, sang more songs, and ③ **overlapped** their songs with the playback more often than they did on hearing a neighbor's song. As Brindley suggests, the overlapping of song may be an aggressive response. However, this difference in responding to neighbor versus stranger ④ **occurred** only when the neighbor's song was played by a loudspeaker placed at the boundary between that neighbor's _____ and the _____ of the bird being tested. If the same neighbor's song was played at another boundary, one separating the territory of the test subject from another neighbor, it was treated as the call of a stranger. Not only does this result demonstrate ⑤ **that** the robins associate locality with familiar songs, but it also shows that the choice of songs used in playback experiments is highly important.

307) 윗글의 빈칸에 공통으로 들어갈 단어를 고르시오.

Kinship ties continue to be important today. In modern societies such as the United States people frequently ① **have** family get-togethers, they telephone their relatives regularly, and they ② **provide** their kin with a wide variety of services. Eugene Litwak has referred to this pattern of behaviour as the 'modified extended family'. It is an extended family structure ③ **because of** multigenerational ties are maintained, but it is modified because it does not usually rest on co-residence between the generations and most extended families do not act as corporate groups. ④ **Although** modified extended family members often live close by, the modified extended family does not require geographical proximity and ties are maintained even when kin are _____ by considerable distances. In contrast to the traditional extended family where kin always live in close proximity, the members of modified extended families ⑤ **may freely move** away from kin to seek opportunities for occupational

advancement.

310) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

Spatial reference points are larger than themselves. This isn't really a paradox: landmarks are ① **themselves**, but they also define neighborhoods around themselves. In a paradigm that has been repeated on many campuses, researchers first collect a list of campus landmarks from students. Then they ask another group of students ② **estimating** the distances between pairs of locations, some to landmarks, some to ordinary buildings on campus. The remarkable finding is that distances from an ordinary location to a landmark ③ **are judged** shorter than distances from a landmark to an ordinary location. So, people would judge the distance from Pierre's house to the Eiffel Tower to be shorter than the distance from the Eiffel Tower to Pierre's house. Like black holes, landmarks seem ④ **to pull** ordinary locations toward themselves, but ordinary places do not. This asymmetry of distance estimates violates the most elementary principles of Euclidean distance, ⑤ **that** the distance from A to B must be the same as the distance from B to A.

311) 윗글의 내용을 한 문장으로 요약하고자 한다. 빈 칸 (A)와 (B)에 들어갈 말로 가장 적절한 것은?

A firm is deciding whether to invest in shipbuilding. If it can produce at sufficiently large scale, it knows the venture will be profitable. (A) _____ one key input is low-cost steel, and it ① **must be produced** nearby. The company's decision boils down to this: if there is a steel factory close by, invest in shipbuilding; otherwise, don't invest. Now consider the thinking of potential steel investors in the region. ② **Assume** that shipyards are the only potential customers of steel. Steel producers figure they'll make money if there's a shipyard ③ **to buy** their steel, but not otherwise. Now we have two possible outcomes — ④ **what** economists call "multiple equilibria." There is a "good" outcome, in which both types of investments are made, and both the shipyard and the steelmakers end up profitable and happy. Equilibrium is reached. Then there is a "bad" outcome, ⑤ **which** neither type of investment is made. This second outcome also is an equilibrium because the decisions not to invest reinforce each other.

In most organizations, the employee's immediate supervisor _____. This is because the supervisor is responsible for the employee's performance, providing supervision, handing out assignments, and ① **developing** the employee. A problem, however, is that supervisors often work in locations apart from their employees and therefore are not able to observe their subordinates' performance. Should supervisors ② **rate** employees on performance dimensions they cannot observe? To eliminate this dilemma, more and more organizations are implementing assessments ③ **referred** as 360-degree evaluations. Employees are rated not only by their supervisors but by coworkers, clients or citizens, professionals in other agencies ④ **with whom** they work, and subordinates. The reason for this approach is that

often coworkers and clients or citizens ⑤ **have** a greater opportunity to observe an employee's performance and are in a better position to evaluate many performance dimensions.

315) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① is not going to evaluate others
② meets clients or citizens
③ evaluates the employee's performance
④ becomes more tired
⑤ has nothing to do with employees

The role that sleep plays in evolution is still under study. One possibility is ① **that** it is an advantageous adaptive state of decreased metabolism for an animal when there are no more pressing activities. This seems true for deeper states of inactivity such as hibernation during the winter ② **when** there are few food supplies, and a high metabolic cost ③ **to maintaining** adequate temperature. It may be true in daily situations as well, (A) _____ for a prey species to avoid predators after dark. (B) _____, the apparent universality of sleep, and the observation that mammals such as cetaceans have developed such highly complex mechanisms ④ **to preserve** sleep on at least one side of the brain at a time, suggests that sleep additionally provides some vital service(s) for the organism. This is particularly true since one aspect of sleep is decreased responsiveness to the environment. If sleep is universal even when this potential price must be paid, the implication may be ⑤ **what** it has important functions that cannot be obtained just by quiet, wakeful resting.

The right to _____ may extend only to the point where it does not restrict someone else's right to freedom of expression or right to information. The scope of the right to privacy is similarly restricted by the general interest in ① **preventing** crime or in promoting public health. However, when we move away from the property-based notion of a right (where the right to privacy would protect, for example, images and personality), to modern notions of private and family life, we find it harder ② **to establish** the limits of the right. This is, of course, the strength of the notion of privacy, in that it can adapt to meet changing

expectations and technological advances.

In sum, what is privacy today? The concept includes a claim that we should be unobserved, and that certain information and images about us ③ **should not be circulated** without our permission. Why did these privacy claims arise? They arose ④ **because of** powerful people took offence at such observation. Furthermore, privacy incorporated the need to protect the family, home, and correspondence from arbitrary interference and, in addition, there has been a determination to protect honour and reputation. How is privacy protected? Historically, privacy was protected by restricting circulation of the damaging material. But if the concept of privacy first became interesting ⑤ **legally** as a response to reproductions of images through photography and newspapers, more recent technological advances, such as data storage, digital images, and the Internet, pose new threats to privacy. The right to privacy is now being reinterpreted to meet those challenges.

Fighting against the force of the water was a thrilling challenge. Sophia tried to keep herself planted firmly in the boat, paying attention to the waves crashing against the rocks. As the water got rougher, she was forced (A) **to paddle/ paddling** harder to keep the waves from tossing her into the water. Her friends Mia and Rebecca were paddling eagerly behind her to balance the boat. They were soaked from all of the spray. Mia shouted to Sophia, "Are you OK? Aren't you scared?"

"I'm great!" Sophia shouted back excitedly. Even though the boat was getting thrown around, the girls managed to avoid hitting any rocks. Suddenly, almost as quickly as the water had got rougher, the river seemed to calm down, and they all felt relaxed. With a sigh of relief, Sophia looked around. "Wow! What a wonderful view!" she shouted. The scenery around them was breathtaking. Everyone was speechless. As they enjoyed the emerald green Rocky Mountains, Mia said, "No wonder rafting is the best thing to do in Colorado!"

Agreeing with her friend, Rebecca gave a thumbs-up. "Sophia, your choice was excellent!" she said with a delighted smile. "I thought you were afraid of water, though, Sophia," Mia said. Sophia explained, "Well, I was before I started rafting. But I graduate from college in a few months. And, before I do, I wanted to do something really adventurous to test my bravery. I thought (B) **that/ what** if I did something completely crazy, it might give me more confidence when I'm interviewing for jobs." Now they could see why she (C) **had been suggested/ had suggested** going rafting.

"You've got a good point. It's a real advantage to graduate from college with the mindset of a daring adventurer," Mia said. Rebecca quickly added, "That's why I went to Mongolia before I started my first job out of college. Teaching English there for two months was a big challenge for me. But I learned a lot from the experience. It really gave me the courage to try anything in life." Listening to her friends, Sophia looked at her own _____ in the water and saw a confident young woman smiling back at her.

Most historians of science point to the need for a ① **reliable** calendar to regulate agricultural activity as the motivation for learning about what we now call astronomy, the study of stars and planets. Early astronomy provided information about when to ② **plant** crops and gave humans their first formal method of recording the passage of time. Stonehenge, the 4,000-year-old ring of stones in southern Britain, is perhaps the best-known ③ **monument** to the discovery of regularity and _____ in the world we inhabit. The great markers of Stonehenge point to the spots on the horizon where the sun ④ **rises** at the solstices and equinoxes — the dates we still use to mark the beginnings of the seasons. The stones may even have been used to predict eclipses. The existence of Stonehenge, built by people without writing, ⑤ **removes** silent testimony both to the regularity of nature and to the ability of the human mind to see behind immediate appearances and discover deeper meanings in events.

341) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① extension ② outcome ③ exclusion
④ adversity ⑤ predictability

30

342) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Sport can trigger an emotional response in its consumers of the kind rarely brought forth by other products. (A) **Imagining/ Imagine** bank customers buying memorabilia to show loyalty to their bank, or consumers identifying so strongly with their car insurance company that they get a tattoo with its logo. We know that some sport

followers are so passionate about players, teams and the sport itself that their interest borders on obsession. This addiction provides the emotional glue that binds fans to teams, and (B) **maintain/ maintains** loyalty even in the face of on-field failure. While most managers can only dream of having customers that are as passionate about their products as sport fans, the emotion triggered by sport can also _____. Sport's emotional intensity can mean that organisations have strong attachments to the past through nostalgia and club tradition. As a result, they may (C) **ignore/ be ignored** efficiency, productivity and the need to respond quickly to changing market conditions. For example, a proposal to change club colours in order to project a more attractive image may be defeated because it breaks a link with tradition.

343) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① support the fans ② raise larger tradition
③ produce sport fans ④ have a negative impact
⑤ help the professionals

31

344) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The growth of academic disciplines and sub-disciplines, such as art history or palaeontology, and of particular figures such as the art critic, (A) **helping/ helped** produce principles and practices for selecting and organizing what was worthy of keeping, though it remained a struggle. Moreover, as museums and universities drew further apart toward the end of the nineteenth century, and as the idea of objects as a highly valued route to knowing the world (B) **went/ going** into decline, collecting began to lose its status as a worthy intellectual pursuit, especially in the sciences. The really interesting and important aspects of science (C) **was/ were** increasingly those invisible to the naked eye, and the classification of things collected no longer _____. The term "butterfly collecting" could come to be used with the adjective "mere" to indicate a pursuit of secondary academic status.

345) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① became available at school
② costed a lot of money
③ made invisible things in nature
④ began to lose its status
⑤ promised to produce cutting-edge knowledge

32

346) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Some of the most insightful work on information seeking (A) **emphasizing/ emphasizes** "strategic self-ignorance," understood as "the use of ignorance as an excuse to engage excessively in pleasurable activities that may be harmful to one's future self." The idea here is that if people are present-biased, they might avoid information that would make current activities less attractive — perhaps because it would (B) **produce/ be produced** guilt or shame, perhaps because it would suggest an aggregate trade-off that would counsel against engaging in such activities. St. Augustine famously said, "God give me chastity — tomorrow." Present-biased agents think: "Please let me know the risks — tomorrow." Whenever people are thinking about engaging in an activity with short-term benefits but long-term costs, they might prefer to delay receipt of important information. The same point might hold about information that could make people sad or mad: "Please tell me (C) **that/ what** I need to know — tomorrow."

347) 윗글에 어울리는 표현으로 적절한 것은?

① 발 없는 말이 천리를 간다.
② 천리 길도 한 걸음부터.
③ 성공을 위해서는 재능이 필요하다.
④ 오늘 대처할 일을 미루지 마라.
⑤ 일찍 포기하면 건강에 좋다.

33

348) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Concepts of nature are always cultural statements. This may not strike Europeans as much of an insight, for Europe's landscape is so much of a blend. But in the new worlds — 'new' at least to Europeans — the distinction appeared much clearer not only to European settlers and visitors but also to their descendants. For that reason, they had the fond conceit of primeval nature uncontrolled by human associations (A) **which/ what** could later find expression in an admiration for wilderness. Ecological relationships certainly have their own logic and in this sense 'nature' can be (B) **seeing/ seen** to have a self-regulating but not necessarily stable dynamic independent of human _____. But the context for ecological interactions has increasingly been set by humanity. We may not determine how or what a lion eats but we certainly can regulate (C) **where/ which** the lion feeds.

349) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① opposite ② appointment ③ identity
④ emergence ⑤ intervention

34

350) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Emma Brindley has investigated the responses of European robins to the songs of neighbors and strangers. (A) **Although/ Despite** the large and complex song repertoire of European robins, they were able to discriminate between the songs of neighbors and strangers. When they heard a tape recording of a stranger, they began to sing sooner, sang more songs, and overlapped their songs with the playback more often than they did on hearing a neighbor's song. As Brindley suggests, the overlapping of song may be an aggressive response. However, this difference in responding to neighbor versus stranger (B) **occurring/ occurred** only when the neighbor's song was played by a loudspeaker placed at the boundary between that neighbor's territory and the territory of the bird being tested. If the same neighbor's song was played at another boundary, one separating the territory of the test subject from another neighbor, it was treated as the call of a stranger. **this result / only / does / Not / demonstrate** that the robins associate locality with familiar songs, but it also shows that the choice of songs used in playback experiments (C) **is/ are** highly important.

35

352) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Kinship ties continue to be important today. In modern societies such as the United States people frequently (A) **having/ have** family get-togethers, they telephone their relatives regularly, and they provide their kin with a wide variety of services. Eugene Litwak (B) **has been referred/ has referred** to this pattern of behaviour as the 'modified extended family'. It is an extended family structure because multigenerational ties are maintained, but it is modified because it does not usually rest on co-residence between the generations and most extended families do not act as corporate groups. (C) **Although/ Despite** modified extended family members often live close by, the modified extended family does not require geographical proximity and ties are maintained even when kin are separated by considerable distances. In contrast to the _____ extended family where kin always live in close proximity, the members of modified extended families may freely move away from kin to seek opportunities for occupational advancement.

353) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① supportive ② traditional ③ reflective
④ transparent ⑤ structural

36

354) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

_____ are larger than themselves. This isn't really a paradox: landmarks are themselves, but they also define neighborhoods around themselves. In a paradigm that (A) **has repeated/ has been repeated** on many campuses, researchers first collect a list of campus landmarks from students. Then they ask another group of students to estimate the distances between pairs of locations, some to landmarks, some to ordinary buildings on campus. The remarkable finding is that distances from an ordinary location to a landmark are judged shorter than distances from a landmark to an ordinary location. So, people would (B) **judge/ be judged** the distance from Pierre's house to the Eiffel Tower to be shorter than the distance from the Eiffel Tower to Pierre's house. Like black holes, landmarks seem to pull ordinary locations toward themselves, but ordinary places do not. This asymmetry of distance estimates violates the most elementary principles of Euclidean distance, (C) **that/ what** the distance from A to B must be the same as the distance from B to A. Judgments of distance, then, are not necessarily coherent.

355) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① The black holes
② Spatial reference points
③ The places you are living in
④ The normal distances
⑤ The students in a location

37

356) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

A firm is deciding whether to invest in shipbuilding. If it can produce at sufficiently large scale, it knows the venture will be profitable. But one key input is low-cost steel, and it must be (A) **producing/ produced** nearby. The company's decision boils down to this: if there is a steel factory close by, invest in shipbuilding; otherwise, don't invest. Now (B) **consider/ considering** the thinking of potential steel investors in the region. Assume that shipyards are the only potential customers of steel. Steel producers figure they'll make money if there's a shipyard to buy their steel, but not otherwise. Now we have two possible outcomes — what economists call "multiple equilibria." There is a "good" outcome, in which both types of investments (C) **are made/ are made**, and both the shipyard and the steelmakers end up profitable and happy. Equilibrium is reached. Then there is a "bad" outcome, in which neither type of investment is made. This second outcome also is an equilibrium because the decisions not to invest _____.

357) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① are for the ships ② reinforce each other
③ become successful ④ bring more benefits
⑤ are from the economists

38

358) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

In most organizations, the employee's immediate supervisor evaluates the employee's performance. This is because the supervisor is responsible for the employee's performance, providing supervision, handing out assignments, and developing the employee. A problem, however, is (A) **that/ what** supervisors often work in locations apart from their employees and therefore are not able to observe their subordinates' performance. Should supervisors rate employees on performance dimensions they cannot observe? To _____, more and more organizations are implementing assessments referred to as 360-degree evaluations. Employees are rated not only by their supervisors but by coworkers, clients or citizens, professionals in other agencies (B) **whom/ with whom** they work, and subordinates. The reason for this approach is that often

coworkers and clients or citizens have a greater opportunity to observe an employee's performance and (C) **is/ are** in a better position to evaluate many performance dimensions.

359) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① go wrong ② maintain their position
③ benefit mutual relations ④ eliminate this dilemma
⑤ notice many variations

39

360) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The role that sleep plays in evolution is still under study. One possibility is (A) **that/ what** it is an advantageous adaptive state of decreased metabolism for an animal when there are no more pressing activities. This seems true for deeper states of _____ such as hibernation (B) **during/ while** the winter when there are few food supplies, and a high metabolic cost to maintaining adequate temperature. It may be true in daily situations as well, for instance for a prey species to avoid predators after dark. On the other hand, the apparent universality of sleep, and the observation that mammals such as cetaceans have developed such highly complex mechanisms to preserve sleep on at least one side of the brain at a time, (C) **suggest/ suggests** that sleep additionally provides some vital service(s) for the organism. This is particularly true since one aspect of sleep is decreased responsiveness to the environment. If sleep is universal even when this potential price must be paid, the implication may be that it has important functions that cannot be obtained just by quiet, wakeful resting.

361) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① annoyance ② addiction ③ attention
④ establishment ⑤ inactivity

362) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The idea that planting trees could have a social or political significance appears to (A) **have invented/ have been invented** by the English, (B) **though/ despite** it has since spread widely. According to Keith Thomas's history Man and the Natural World, seventeenth- and eighteenth-century aristocrats began planting hardwood trees, usually in lines, to declare the extent of their property and the permanence of their claim to it. "What can be more pleasant," the editor of a magazine for gentlemen asked his readers, "than to have the bounds and limits of your own property preserved and continued from age to age by the testimony of **such living and growing witnesses**?" Planting trees had the additional advantage of being regarded as a patriotic act, for the Crown had declared a severe shortage of the hardwood (C) **which/ on which** the Royal Navy depended.

363) 밑줄이 의미하는 한 단어를 지문에서 찾아 쓰시오.

[41~42]

364) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The right to privacy may extend only to the point (A) **where/ which** it does not restrict someone else's right to freedom of expression or right to information. The scope of the right to privacy is similarly restricted by the general interest in preventing crime or in promoting public health. However, when we move away from the property-based notion of a right (where the right to privacy would protect, for example, images and personality), to modern notions of private and family life, we find it harder to establish the limits of the right. This is, of course, the strength of the notion of privacy, in that it can adapt to _____.

In sum, what is privacy today? The concept includes a claim (B) **that/ what** we should be unobserved, and that certain information and images about us should not be circulated without

our permission. Why did these privacy claims arise? They (C) **arose/ aroused** because powerful people took offence at such observation. Furthermore, privacy incorporated the need to protect the family, home, and correspondence from arbitrary interference and, in addition, there has been a determination to protect honour and reputation. How is privacy protected? Historically, privacy was protected by restricting circulation of the damaging material. But if the concept of privacy first became interesting legally as a response to reproductions of images through photography and newspapers, more recent technological advances, such as data storage, digital images, and the Internet, pose new threats to privacy. The right to privacy is now being reinterpreted to meet those challenges.

365) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① protect the privacy over other's advantage
② make people more selfish than ever before
③ avoid the recent technological advances
④ keep restricting circulation of the damaging material
⑤ meet changing expectations and technological advances

[43~45]

366) 밑줄 친 부분 중 가리키는 대상이 다른 하나는?

Fighting against the force of the water was a thrilling challenge. Sophia tried to keep herself planted firmly in the boat, paying attention to the waves crashing against the rocks. As the water got rougher, ① **she** was forced to paddle harder to keep the waves from tossing her into the water. Her friends Mia and Rebecca were paddling eagerly behind her to balance the boat. They were soaked from all of the spray. Mia shouted to Sophia, "Are you OK? Aren't you scared?"

"I'm great!" Sophia shouted back excitedly. Even though the boat was getting thrown around, the girls managed to avoid hitting any rocks. Suddenly, almost as quickly as the water had got rougher, the river seemed to calm down, and they all felt relaxed. With a sigh of relief, Sophia looked around. "Wow! What a wonderful view!" ② **she** shouted. The scenery around them was breathtaking. Everyone was speechless. As they enjoyed the emerald green Rocky Mountains, Mia said, "No wonder rafting is the best thing to do in Colorado!"

Agreeing with her friend, Rebecca gave a thumbs-up. "Sophia, your choice was excellent!" she said with a delighted smile. "I thought ③ **you** were afraid of water, though, Sophia," Mia said. Sophia explained, "Well, I was before I started rafting. But I graduate from college in a few months. And, before I do, I wanted to do something really adventurous to test my bravery. I thought that if I did something completely crazy, it might give me more _____ when I'm interviewing for jobs." Now they could see why she had suggested going rafting.

"You've got a good point. It's a real advantage to graduate from college with the mindset of a daring adventurer," Mia said. Rebecca quickly added, "That's why I went to Mongolia before I started my first job out of college. Teaching English there for two months was a big challenge for me. But I learned a lot from the experience. It really gave ④ **me** the courage to try anything in life." Listening to her friends, Sophia looked at her own reflection in the water and saw ⑤ **a confident young woman** smiling back at her.

New ideas, such as those inspired by scientific developments, are often aired and critiqued in our popular culture as part of a healthy process of public debate, and scientists sometimes (A) **deserve/ reserve** the criticism they get. ① Part of the problem may be that the majority of the people who are most likely to write novels, plays, and film scripts were educated in the humanities, not in the sciences. ② Furthermore, the few scientists-turned-writers have used their scientific training as the source material for thrillers that further (B) **help/ damage** the image of science and scientists. ③ We need more screenplays and novels that present scientists in a positive light. ④ In our contemporary world, television and film are particularly influential media, and it is likely that the introduction of more scientist-heroes would help to make science (C) **more/ less** attractive. ⑤

373) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

But the popularization of science would be greatly enhanced by improving the widespread images of the scientist.

21

374) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The single most important change you can make in your working habits is to switch to creative work first, reactive work second. ① This means blocking off a large chunk of time every day for creative work on your own (A) **previews/ priorities**, with the phone and e-mail off. ② I used to be a frustrated writer. Making this switch turned me into a productive writer. ③ Yet there wasn't a single day when I sat down to write an article, blog post, or book chapter without a string of people waiting for me to get back to them. It wasn't easy, and it still isn't, particularly when I get phone messages beginning "I sent you an e-mail two hours ago...!" ④ By definition, this approach goes against the grain of others' expectations and the pressures they put on you. It

takes willpower to switch (B) **on/ off** the world, even for an hour. It feels (C) **comfortable/ uncomfortable**, and sometimes people get upset. ⑤ Otherwise, you're sacrificing your potential for the illusion of professionalism.

375) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

But it's better to disappoint a few people over small things, than to abandon your dreams for an empty inbox.

22

376) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Contractors that will construct a project may place more weight on the planning process. Proper planning forces (A) **detailed/ retailed** thinking about the project. It allows the project manager (or team) to "build the project in his or her head." The project manager (or team) can consider different methodologies thereby deciding what works best or what does not work at all. This detailed thinking may be the only way to (B) **discover/ recover** restrictions or risks that were not addressed in the estimating process. It would be far better to discover in the planning phase that a particular technology or material will not work than in the execution process. The goal of the planning process for the contractor is to produce a workable scheme that uses the resources efficiently within the allowable time and given budget. A well-developed plan does not guarantee that the executing process will proceed flawlessly or that the project will even (C) **succeed/ fail** in meeting its objectives. It does, however, greatly improve its chances.

23

377) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Children can move effortlessly between play and (A) **abortion/ absorption** in a story, as if both are forms of the same activity. The taking of roles in a narratively structured game of pirates is not very (B) **different/ indifferent** than the taking of roles in identifying with characters as one watches a movie. It might be thought that, as they grow towards _____, people give up childhood play, but this is not so. Instead, the bases and interests of this activity change and develop to playing and watching sports, to the fiction of plays, novels, and movies, and nowadays to video games. In fiction, one can enter possible worlds. When we experience emotions in such worlds, this is not a sign that we are being incoherent or regressed. It (C) **derives/ divides** from trying out metaphorical transformations of our selves in new ways, in new worlds, in ways that can be moving and important to us.

Emma Brindley has investigated the responses of European robins to the songs of neighbors and strangers. Despite the large and complex song repertoire of European robins, they were able to discriminate between the songs of neighbors and strangers. When they heard a tape recording of a stranger, they began to sing sooner, sang more songs, and overlapped their songs with the playback more often than they did on hearing a neighbor's song. As Brindley (A) **resists/ suggests**, the overlapping of song may be an aggressive response. However, this difference in responding to neighbor versus stranger occurred only when the neighbor's song was played by a loudspeaker placed at the boundary between that neighbor's territory and the territory of the bird being (B) **texted/ tested**. If the same neighbor's song was played at another boundary, one separating the territory of the test subject from another neighbor, it was treated as the call of a _____. Not only does this result demonstrate that the robins associate locality with familiar songs, but it also shows that the choice of songs used in playback experiments is (C) **high/ highly** important.

Kinship ties continue to be important today. In modern societies such as the United States people frequently have family get-togethers, they telephone their relatives regularly, and they (A) **provide/ prevent** their kin with a wide variety of services. Eugene Litwak has referred to this pattern of behaviour as the 'modified extended family'. It is an extended family structure because multigenerational ties are maintained, but it is modified because it does not usually rest on co-residence between the generations and most extended families do not act as corporate groups. Although modified extended family members often live close by, the modified extended family does not (B) **require/ inquire** geographical proximity and ties are maintained even when kin are separated by (C) **considerable/ considerate** distances. In contrast to the traditional extended family where kin always live in close proximity, the members of modified extended families may freely move away from kin to seek opportunities for occupational advancement.

36

395) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Spatial reference points are larger than themselves. This isn't really a paradox: landmarks are themselves, but they also define neighborhoods around themselves. In a paradigm that has been (A) **repeated/ respected** on many campuses, researchers first collect a list of campus landmarks from students. Then they ask another group of students to (B) **estimate/ educate** the distances between pairs of locations, some to landmarks, some to ordinary buildings on campus. The remarkable finding is that distances from an ordinary location to a landmark are judged shorter than distances from a landmark to an ordinary location. So, people would judge the distance from Pierre's house to the Eiffel Tower to be _____ than the distance from the Eiffel Tower to Pierre's house. Like black holes, landmarks seem to pull ordinary locations toward themselves, but ordinary places do not. This asymmetry of distance estimates (C) **violates/ keeps** the most elementary principles of Euclidean distance, that the distance from A to B must be the same as the distance from B to A. Judgments of distance, then, are not necessarily coherent.

396) 빈칸에 맞는 한 단어를 지문에 있는 단어에서 골라서 채우시오.

397) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

A firm is deciding whether to invest in shipbuilding. ① If it can produce at sufficiently large scale, it knows the venture will be (A) **profitable/ unprofitable**. ② The company's decision boils down to this: if there is a steel factory close by, invest in shipbuilding; otherwise, don't invest. ③ Now consider the thinking of potential steel investors in the region. Assume that shipyards are the only potential customers of steel. Steel producers figure they'll make money if there's a shipyard to buy their steel, but not otherwise. ④ Now we have two (B) **possible/ impossible** outcomes — what economists call "multiple equilibria." There is a "good" outcome, in which both types of investments are made, and both the shipyard and the steelmakers end up profitable and happy. Equilibrium is reached. ⑤ Then there is a "bad" outcome, in which (C) **either/ neither** type of investment is made. This second outcome also is an equilibrium because the decisions not to invest reinforce each other.

398) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

But one key input is low-cost steel, and it must be produced nearby.

399) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

In most organizations, the employee's immediate supervisor evaluates the employee's performance. This is because the supervisor is responsible for the employee's performance, (A) **providing/ preventing** supervision, handing out assignments, and developing the employee. A problem, however, is that supervisors often work in locations apart from their employees and therefore are not able to observe their subordinates' performance. Should supervisors rate employees on performance dimensions they cannot (B) **observe/ reserve**? To eliminate this dilemma, more and more organizations are implementing assessments referred to as 360-degree evaluations. Employees are (C) **raged/ rated** not only by their supervisors but by coworkers, clients or citizens, professionals in other agencies with whom they work, and subordinates. The reason for this approach is that often coworkers and clients or citizens have a greater opportunity to _____ and are in a better position to evaluate many performance dimensions.

400) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① meet the supervisors
② get out of organizations
③ keep certain kind of dilemma
④ kook around for the position
⑤ observe an employee's performance

39

401) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The role that sleep plays in _____ is still under study. One possibility is that it is an advantageous adaptive state of (A) **increased/ decreased** metabolism for an animal when there are no more pressing activities. This seems true for deeper states of inactivity such as hibernation during the winter when there are few food supplies, and a high metabolic cost to maintaining adequate temperature. It may be true in daily situations as well, for instance for a prey species to (B) **avoid/ welcome** predators after dark. On the other hand, the apparent universality of sleep, and the observation that mammals such as cetaceans have developed such highly complex mechanisms to (C) **preserve/ reverse** sleep on at least one side of the brain at a time, suggests that sleep additionally provides some vital service(s) for the organism. This is particularly true since one aspect of sleep is decreased

responsiveness to the environment. If sleep is universal even when this potential price must be paid, the implication may be that it has important functions that cannot be obtained just by quiet, wakeful resting.

402) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① evacuation ② authority ③ ambiguity
④ evolution ⑤ independence

40

403) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The idea that planting trees could have a social or political significance appears to have been (A) **invented/ invited** by the English, though it has since spread widely. According to Keith Thomas's history Man and the Natural World, seventeenth- and eighteenth-century aristocrats began planting hardwood trees, usually in lines, to declare the extent of their property and the permanence of their claim to it. "What can be more pleasant," the editor of a magazine for gentlemen asked his readers, "than to (B) **miss/ have** the bounds and limits of your own property preserved and continued from age to age by the testimony of such living and growing witnesses?" Planting trees had the additional (C) **advantage/ disadvantage** of being regarded as a patriotic act, for the Crown had declared a severe _____ of the hardwood on which the Royal Navy depended.

404) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① donation ② consent ③ ritual
④ shortage ⑤ sentiment

[41~42]

405) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The right to privacy may extend only to the point where it does not restrict someone else's right to freedom of expression or right to information. The scope of the right to privacy is similarly (A) **accepted/ restricted** by the general interest in preventing crime or in promoting public health. However, when we move away from the property-based notion of a right (where the right to privacy would protect, for example, images and personality), to modern notions of private and family life, we find it harder to establish the limits of the right. This is, of course, the strength of the notion of privacy, in that it can adapt to meet changing expectations and technological advances.

In sum, what is privacy today? The concept includes a claim that we should be unobserved, and that certain information and images about us should not be circulated without our permission. Why did these privacy claims arise? They arose because (B) **powerful/ powerless** people took offence at such observation. Furthermore, privacy incorporated the need to protect the family, home, and correspondence from arbitrary interference and, in addition, there has been a determination to protect honour and reputation. How is privacy _____? Historically, privacy was protected by restricting circulation of the damaging material. But if the concept of privacy first became interesting legally as a response to reproductions of images through photography and newspapers, more (C) **decent/ recent** technological advances, such as data storage, digital images, and the Internet, pose new threats to privacy. The right to privacy is now being reinterpreted to meet those challenges.

406) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① spoiled ② protected ③ restricted
④ filtered ⑤ completed

[43~45]

407) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Fighting against the force of the water was a thrilling challenge. Sophia tried to keep herself planted firmly in the boat, paying attention to the waves crashing against the rocks. As the water got rougher, she was forced to paddle harder to keep the waves (A) **tossing/ from tossing** her into the

water. Her friends Mia and Rebecca were paddling eagerly behind her to balance the boat. They were soaked from all of the spray. Mia shouted to Sophia, "Are you OK? Aren't you scared?"

"I'm great!" Sophia shouted back excitedly. Even though the boat was getting thrown around, the girls managed to (B) **accept/ avoid** hitting any rocks. Suddenly, almost as quickly as the water had got rougher, the river seemed to calm down, and they all felt relaxed. With a sigh of relief, Sophia looked around. "Wow! What a wonderful view!" she shouted. The scenery around them was breathtaking. Everyone was speechless. As they enjoyed the emerald green Rocky Mountains, Mia said, "No wonder rafting is the best thing to do in Colorado!"

Agreeing with her friend, Rebecca gave a thumbs-up. "Sophia, your choice was excellent!" she said with a delighted smile. "I thought you were afraid of water, though, Sophia," Mia said. Sophia explained, "Well, I was before I started rafting. But I graduate from college in a few months. And, before I do, I wanted to do something really adventurous to test my bravery. I thought that if I did something completely (C) **normal/ crazy**, it might give me more confidence when I'm interviewing for jobs." Now they could see why she had suggested going rafting.

"You've got a good point. It's a real advantage to graduate from college with the mindset of a daring adventurer," Mia said. Rebecca quickly added, "That's why I went to Mongolia before I started my first job out of college. Teaching English there for two months was a big challenge for me. But I learned a lot from the experience. It really gave me the courage to try anything in life." Listening to her friends, Sophia looked at her own reflection in the water and saw a confident young woman smiling back at her.

408) 윗글의 요지로 가장 적절한 것을 고르시오.

① 변명은 무익하다.
② 더 큰 환경에서 배워야 한다.
③ 모험의 극복은 자신감을 고양시킨다.
④ 늦었다고 생각할 때가 정말 늦은 때다.
⑤ 고된 노동의 결실이 낭비될 때 고통을 느낀다.
