Gate W

The animal in a conflict between attacking a rival and fleeing may initially not have sufficient information to enable it to make a decision straight away. If the rival is likely to win the fight, then the optimal decision would be to give up immediately and not risk getting injured. But if the rival is weak and easily defeatable, then there could be *considerable* benefit in going ahead and obtaining the territory, females, food or whatever is at stake. By taking a little extra time to collect information about the opponent, the animal is more likely to reach a decision that maximizes its chances of winning than if it takes a decision without such information. Many signals are now seen as having this information gathering or 'assessment' function, directly contributing to the mechanism of the decision-making process by supplying vital information about the likely outcomes of the various options.

상대를 공격하는 것과 도피하는 것 사이에서 갈등하는 동물은 처음에는 즉시 결정을 내릴 수 있게 해줄 만큼 충분한 정보를 갖지 못할 수도 있다. 상대가 싸움에서 이길 것 같다면, 최적의 결정은 즉시 포기하고 부상당할 위험을 무릅쓰지 않는 것일 것이다. 하지만 상대가 약해서 쉽게 이길만하다면, 싸워서 영역, 암컷, 먹이 또는 성패가 달린 것은 무엇이든 얻는 것에 상당한 이익이 있을 수 있을 것이다. 상대에 대한 정보를 수집하는 데 약간의 추가 시간을 들임으로써, 그 동물은 그러한 정보 없이 결정을 내리는 경우보다 이길 가능성을 최대화하는 결정에 도달할 가능성이 더 크다. 오늘날 많은 신호들이 이러한 정보 수집 또는 '평가' 기능을 갖는 것으로 간주되어, 다양한 선택의 가능한 결과에 관한 매우 중요한 정보를 제공함으로써 의사 결정 과정의 메커니즘에 직접적으로 기여한다.

혼동 어휘

consider ⓥ 고려하다 - considerate ⓐ 사려 깊은 / considerable ⓐ 상당한

01

Random sampling doesn't mean just choosing the people to participate in the study haphazardly — there's a difference between the meaning of the word 'random' in everyday use and its meaning in statistics and research methods. A random sample is a sample in which every member of the population has an equally likely chance of being selected for the study — and that isn't as easy as it sounds. Most sampling methods will unconsciously favour some people, and not others. Picking names at random out of a telephone directory means that people who are ex-directory or who don't use landlines are not going to be included. In a psychological study, that could introduce a bias, because those people may be different from others in some important way — for example, by being younger, or more suspicious of strangers.

* haphazardly: 되는 대로

무작위 샘플링은 연구에 참여할 사람들을 무작위로 선택하는 것을 의미하지 않습니다. 일상적으로 사용되는 '무작위'라는 단어의 의미와 통계 및 연구 방법의 의미에는 차이가 있습니다. 무작위 표본은 모집단의 모든 구성원이 연구 대상으로 선택될 가능성이 동일한 표본이며, 이는 말처럼 쉽지 않습니다. 대부분의 샘플링 방법은 무의식적으로 일부 사람들을 선호하고 다른 사람들은 선호하지 않습니다. 전화번호부에서 임의로 이름을 선택한다는 것은 전화번호부를 가지고 있거나 유선 전화를 사용하지 않는 사람들은 포함되지 않는다는 것을 의미합니다. 심리학 연구에서는 그러한 사람들이 어떤 중요한 면에서 다른 사람들과 다를 수 있기 때문에 편향을 가져올 수 있습니다. 예를 들어, 젊거나 낯선 사람을 더 의심합니다.

02

Spatial position can be indicative of social status. Historical analyses of hundreds of paintings indicate that when two people appear in the same picture the more dominant, powerful person is usually facing to the right. For example, relative to men, women are more often displayed showing the left cheek, consistent with gender roles that consider them as less agentic. In other words, traditionally weak and submissive characters ***have been assigned*** to their respective place by where they are situated in space. From the 15 th century to the 20th century, however, this gender bias in paintings has become less pronounced, therefore paralleling increasingly modern views of women's role in society.

* agentic: 주도적인 ** submissive: 복종하는

공간적 위치는 사회적 지위를 나타낼 수 있습니다. 수백 점의 그림에 대한 역사적 분석은 두 사람이 같은 그림에 나타날 때 더 지배적이고 강력한 사람이 일반적으로 오른쪽을 향하고 있음을 나타냅니다. 예를 들어, 남성에 비해 여성은 왼쪽 뺨을 드러내는 경우가 더 많으며, 이는 덜 주도적이라고 생각하는 성 역할과 일치합니다. 즉, 전통적으로 약하고 복종하는 캐릭터는 공간에서 위치에 따라 각자의 위치에 할당되었습니다. 그러나 15세기부터 20세기까지 회화에서 이러한 성별 편향은 덜 뚜렷해졌으며, 따라서 사회에서 여성의 역할에 대한 점점 더 현대적인 관점과 평행을 이룹니다.

어법 정리 - 동사의 결합

(A) have p.p ~해왔다		(B) be ~ing ~하는 중이다	(C) be p.p ~ 되다/ ~지다
(A) + (B) 완료 진행	I have been studying it	나는 그것을 연구해오던 중이다.	
(A) + (C) 완료 수동	It has been studied	그것은 연구되어져 왔다.	
(B) + (C) 진행 수동	It is being studied	그것은 연구되는 중이다.	

03

Within travel destinations, it is not uncommon to see higher sticker prices in areas most frequented by tourists; prices are much lower elsewhere where locals shop. A few smart tourists soon learn to get away from these "tourist traps" to find better deals where there are not as many tourists. Most tourists will not, because it doesn't pay to ***spend*** their scarce vacation time ***attempting*** to find cheaper restaurants, souvenirs, and so on outside the tourist areas. If the time spent in searching and shopping for the best deals is included as part of the prices of the purchases, "prices" are actually lower in the tourist areas for most tourists. In sum, locational price differences are generally not considered price discrimination.

여행지 내에서 관광객이 가장 많이 찾는 지역에서 더 높은 스티커 가격을 보는 것은 드문 일이 아닙니다. 현지인들이 쇼핑하는 다른 곳에서는 가격이 훨씬 저렴합니다. 소수의 현명한 관광객들은 관광객이 많지 않은 곳에서 더 나은 거래를 찾기 위해 이러한 "관광 함정"에서 벗어나는 방법을 곧 배웁니다. 대부분의 관광객은 관광 지역 밖에서 더 저렴한 식당, 기념품 등을 찾으려고 노력하면서 부족한 휴가 시간을 보내는 데 비용을 지불하지 않기 때문에 그렇게 하지 않을 것입니다. 최고의 거래를 검색하고 쇼핑하는 데 소요되는 시간이 구매 가격의 일부로 포함되면 실제로 대부분의 관광객에게 "가격"은 관광 지역에서 더 낮습니다. 요컨대 위치 가격 차이는 일반적으로 가격 차별로 간주되지 않습니다.

어법 정리 - 5형식 보어에 ~ing * ~ing 앞에 in 이 들어가도 됨 (문장 형식만 바뀜)

spend [waste, consume] + 돈/시간 + ~ing

04

The desire for esteem ***can be used*** effectively by society ***to influence*** how people act. Systems of prestige are found in all cultures, and in general prestige ***is used to recognize and reward*** people who do what is most useful to the culture. People will labor for years, even decades, in the hope of securing the esteem of their fellows and the accompanying right to think well of themselves. By linking prestige and esteem to particular activities or accomplishments, a culture can direct many people to devote their energies in those directions. It is no accident that in small societies struggling for survival, prestige comes with bringing in large amounts of protein (hunting) or defeating the most dangerous enemies (fighting). By the same token, the prestige of motherhood probably ***rises*** and falls with the society's need to increase population, and the prestige of entertainers ***rises*** and falls with how much time and money the population can devote to leisure activities.

*esteem 존중 prestige 명성 protein 단백질 (위 지문에서는 '고기'의 의미)

존중에 대한 욕구는 사람들이 행동하는 방식에 영향을 미치기 위해 사회에서 효과적으로 사용될 수 있습니다. 명성 시스템은 모든 문화에서 발견되며 일반적으로 명성은 문화에 가장 유용한 일을 하는 사람들을 인정하고 보상하는 데 사용됩니다. 사람들은 동료의 존경과 이에 수반되는 자신에 대해 좋게 생각할 권리를 확보하기 위해 수년, 심지어 수십 년 동안 일할 것입니다. 명성과 존중을 특정 활동이나 성취에 연결함으로써 문화는 많은 사람들이 그러한 방향으로 그들의 에너지를 바치도록 지시할 수 있습니다. 생존을 위해 고군분투하는 작은 사회에서 많은 양의 단백질을 가져오거나(사냥) 가장 위험한 적을 물리치는 것(싸움)에서 위신이 오는 것은 우연이 아닙니다. 마찬가지로 모성의 위신은 사회의 인구증가 필요성에 따라 오르락내리락하고, 연예인의 위신은 인구가 여가활동에 얼마나 많은 시간과 돈을 쏟을 수 있는지에 따라 오르락내리락할 것이다.

숙어 정리 -

used to 동원: 습관 ~하곤 했다 (would) be used to 동원: 수동태 ~사용되다 be[get, become] used[accustomed] to (동)명사: ~익숙하다

어법 정리 - 자/타동사

rise - rose - risen - rising :자/ 일어나다 raise - raised - raised - raising :타/ 일으키다

The animal in a conflict between attacking a rival and fleeing may initially not have sufficient information to enable it ① **to make** a decision straight away. If the rival is likely to win the fight, then the optimal decision would be to give up ② **immediately** and not risk getting injured. But if the rival is weak and easily defeatable, then there could be considerable benefit in going ahead and obtaining the territory, females, food or whatever is at stake. By taking a little extra time to _____ about the opponent, the animal is more likely to reach a decision that maximizes its chances of winning than if it ③ **is taken** a decision without such information. Many signals are now seen as ④ **having** this information gathering or 'assessment' function, ⑤ **directly** contributing to the mechanism of the decision-making process by supplying vital information about the likely outcomes of the various options.

61) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① continue to grow ② attack others
③ endeavor for success ④ spend money
⑤ collect information

Random sampling doesn't mean just ① **choosing** the people to participate in the study haphazardly — there's a difference between the meaning of the word 'random' in everyday use and its meaning in statistics and research methods. A random sample is a sample in which every member of the population has an equally ② **likely** chance of being selected for the study — and that isn't as easy as it sounds. Most sampling methods will unconsciously _____ _____. Picking names at random out of a telephone directory means ③ **what** people who are ex-directory or who don't use landlines are not going ④ **to be included**. In a psychological study, that could introduce a bias, ⑤ **because** those people may be different from others in some important way — for example, by being younger, or more suspicious of strangers.

63) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① make a phone call
② make the random case
③ become perfectly random
④ favour some people, and not others
⑤ use the telephone directory
