18

Dear Natalie Talley,

My name is Olivia Spikes, the mayor of Millstown. Before you attend the world championships next month, on behalf of everyone in Millstown, I wish to let you know that we are supporting you all the way. As you are the first famous figure skater from Millstown, we are all big fans of yours. Our community was so proud of you for winning the national championships last year. Your amazing performance really moved us all. We all believe that you are going to impress the entire nation again. Your hometown supporters will cheer for you whenever you perform on the ice. Good luck!

제 이름은 Olivia Spikes이며, Millstown의 시장입니다. 다음 달 세계 선수권 대회에 출전하기 전에 Millstown의 모든 이를 대신하여 우리가 당신을 항상 응원하고 있음을 알려드리고 싶습니다. 당신은 Millstown 최초의 유명한 피겨 스케이팅 선수이기에 우리는 모두 당신의 열렬한 팬입니다. 우리 지역 사회는 당신이 지난해에 전국 선수권 대회에서 우승한 것을 매우 자랑스럽게 생각했습니다. 당신의 놀라운 연기는 우리 모두를 감동하게 했습니다. 우리 모두 당신이 다시 온 나라를 감동하게 할 것이라고 믿습니다. 빙판 위에서 연기할 때마다 고향의 서포터들이 응원할 것입니다. 행운을 빕니다!

19

“Daddy!” Jenny called, waving a yellow crayon in her little hand. Nathan approached her, wondering why she was calling him. Jenny, his three-year-old toddler, was drawing a big circle on a piece of paper. “What are you doing, Sweetie?” Nathan asked with interest. She just kept drawing without reply. He continued watching her, wondering what she was working on. She was drawing something that looked like a face. When she finished it, Jenny shouted, “Look, Daddy!” She held her artwork up proudly. Taking a closer look, Nathan recognized that it was his face. The face had two big eyes and a beard just like his. He loved Jenny’s work. Filled with joy and happiness, Nathan gave her a big hug.

* toddler: 아장아장 걷는 아이

"아빠!" Jenny가 작은 손에 쥔 노란색 크레용을 흔들며 불렀다. Nathan은 아이가 왜 자신을 부르는지 궁금해하며 아이에게 다가갔다. 그의 걸음마를 하는 세 살배기 Jenny는 종이에 큰 원을 그리고 있었다. "뭘 하고 있니, 아가야?"라고 Nathan은 관심을 가지고 물었다. 아이는 대답 없이 계속 그림을 그리고 있었다. 그는 아이가 무엇을 하고 있는지 궁금해하면서 계속해서 아이를 보고 있었다. 아이는 얼굴처럼 보이는 것을 그리고 있었다. 그것을 끝냈을 때, Jenny는 “보세요, 아빠!”라고 외쳤다. 그녀는 자신의 작품을 자랑스럽게 들어 올렸다. 자세히 보자 Nathan은 그것이 자신의 얼굴임을 알아차렸다. 그 얼굴에는 그와 똑같은 두 개의 큰 눈과 수염이 있었다. 그는 Jenny가 그린 것이 마음에 들었다. 기쁨과 행복으로 가득 찬 Nathan은 아이를 크게 껴안아 주었다.

20

Becoming competent in another culture means looking beyond behavior to see *if* we can understand the attitudes, beliefs, and values that motivate what we observe. By looking only at the visible aspects of culture — customs, clothing, food, and language — we develop a short-sighted view of intercultural understanding — just the tip of the iceberg, really. If we are to be *successful* in our business interactions with people who have different values and beliefs about how the world is ordered, then we must go below the surface of what it means to understand culture and attempt to see what Edward Hall calls the "hidden dimensions." Those hidden aspects are the very foundation of culture and are the reason why culture is actually more than meets the eye. We tend not to notice those cultural norms until they violate what we consider to be common sense, good judgment, or the nature of things.

타 문화에 유능해진다는 것은 우리가 관찰하는 것의 이유가 되는 태도, 신념, 가치를 이해할 수 있는지 알아보기 위해 행동 그 이상의 것을 살펴보는 것을 의미한다. 문화의 눈에 보이는 면, 즉 관습, 의복, 음식, 언어만 봄으로써, 우리는 타문화 이해에 있어 정말로 빙산의 일각에 불과한 근시안적 시각을 키운다. 세상이 어떻게 질서를 세우는지에 대한 다른 가치와 신념을 가진 사람들과의 사업상의 교류에서 성공하고자 한다면, 문화를 이해한다는 것이 의미하는 것의 그 이면을 들여다볼 수 있어야 하고 Edward Hall이 '숨겨진 차원'이라고 부른 것을 보려고 시도해야 한다. 그런 숨겨진 측면이 바로 문화의 근간이며 문화가 실제로는 눈에 보이는 것 이상인 이유이다. 우리는 그런 문화적 규범들이 우리가 상식, 올바른 판단 또는 사물의 본질이라고 여기는 것을 어기고 나서야 비로소 그것들을 알아차리는 경향이 있다.

[어법 정리] if/ whether ~인지 ~아닌지 [주절 동사가 **'불확실'**을 의미하면 if/whether 만 쓴다. that 은 의미가 다르게 쓰인다.]

I [**don't know, am not sure, wonder, ask** 등] if/whether she would come. 형용사 curious, uncertain 등

[어휘 정리]

succeed ⓥ 성공하다, 계속하다 - success ⓝ 성공 / succession ⓝ 연속 successful ⓐ 성공적인 / successive ⓐ 연속적인

21 = 우리를 각각 자신의 취향에 맞도록 선택된 음악으로 이끌다

You may feel there is something scary about an algorithm deciding what you might like. Could it mean that, if computers conclude you won't like something, you will never get the chance to see it? Personally, I really enjoy being directed toward new music that I ***might not have found*** by myself. I can quickly get stuck in a rut where I put on the same songs over and over. *That's why* I've always enjoyed the radio. But the algorithms that are now pushing and pulling me through the music library are perfectly suited to finding gems that I'll like. My worry originally about such algorithms was that they might drive everyone into certain parts of the library, leaving others lacking listeners. Would they cause a convergence of tastes? But thanks to the nonlinear and chaotic mathematics usually behind them, this doesn't happen. A small divergence in my likes compared to yours can send us off into different far corners of the library.

* rut: 관습, 틀 ** gem: 보석 *** divergence: 갈라짐

여러분은 여러분이 좋아할지도 모를 것을 결정하는 알고리즘에 대해 뭔가 무서운 것이 있다고 느낄 수 있다. 그것은 당신이 뭔가를 좋아하지 않을 것이라고 컴퓨터가 결론을 내린다면 당신은 그것을 볼 기회를 결코 얻지 못할 수도 있다는 뜻인가? 개인적으로, 나는 스스로는 발견하지 못했을 새로운 음악 쪽으로 안내받는 것을 정말 좋아한다. 나는 같은 노래를 계속 반복해서 넣는 틀에 빨리 갇힐 때가 있다. 그래서 나는 항상 라디오를 즐겨 듣는다. 그러나 지금 뮤직 라이브러리를 통해 나를 밀고 당기는 알고리즘은 내가 좋아할 보석을 찾는 데 완벽하게 적합하다. 원래 그런 알고리즘에 대한 나의 걱정은 모든 사람을 라이브러리의 특정 부분으로 몰아넣고 나머지 부분은 듣는 이들이 적은 상태가 되게 만들 수 있다는 것이었다. 그것은 취향의 수렴을 일으킬 것인가? 그러나 일반적으로 그 배후에 있는 비선형적이고 불규칙적인 수학 덕분에 이런 일은 발생하지는 않는다. 여러분이 좋아하는 것과 비교하여 내가 좋아하는 것의 작은 갈라짐이 (결국) 우리를 (뮤직) 라이브러리의 저 멀리 떨어진 구석들로 보낼 수 있다.

[어법 정리] 조동사 have p.p * 해석 [이전에]를 붙이면 쉽게 해석됨

may[might] have p.p : ~했을지도 모른다. may[might] not have p.p : ~하지 않았을지도 모른다.

[숙어 정리] 원인과 결과 구분 – 전치사나 접속사나 뒷 부분과 묶어 해석 하면 쉽다.

result from ~로부터 생기다 [원인] result in ~가 되다 [결과] The accident resulted (from the driver.)

That is because ~ 때문이다 [원인] That is why ~한 이유이다 [결과] That is [why the driver is in hospital.]

22

Historically, drafters of tax legislation are attentive to questions of economics and history, and less attentive to moral questions. Questions of morality are often pushed to the side in legislative debate, labeled too controversial, too difficult to answer, or, worst of all, irrelevant to the project. But, in fact, the moral questions of taxation are at the very heart of the creation of tax laws. Rather than irrelevant, moral questions are fundamental to the imposition of tax. Tax is the application of a society's theories of distributive justice. Economics can go a long way towards helping a legislature determine whether or not a particular tax law will help achieve a particular goal, but economics cannot, in a vacuum, identify the goal. Creating tax policy requires identifying a moral goal, which is a task that must involve ethics and moral analysis.

* legislation: 입법 ** imposition: 부과

역사적으로, 조세 입법 입안자들은 경제학과 역사 문제에 주의를 기울이고 도덕적 질문에는 주의를 덜 기울인다. 도덕성에 관한 질문은 종종 입법 토론에서 옆으로 밀려나면서, 너무 논란이 많거나, 답변하기 너무 어렵거나, 아니면 최악의 경우, 계획과 무관한 것으로 분류된다. 하지만, 사실, 조세의 도덕적 문제는 세법을 만드는 핵심에있다. 무관한 것이 아니라, 도덕적 질문은 세금 부과에 근본적이다. 세금은 사회의 분배 정의 이론을 적용한 것이다. 경제학은 입법부가 특정 세법이 특정 목표를 달성하는 데 도움이 될지를 결정하는 것을 돕는 것에 큰 도움이 될 수 있지만, 경제학만으로는 목표를 규명할 수 없다. 조세 정책을 만드는 것은 도덕적 목표를 규명하는 것을 요구하는데, 그것은 윤리학과 도덕적 분석을 수반해야 하는 과업이다.

23

Environmental learning occurs when farmers base decisions on *observations* of "payoff" information. They may observe their own or neighbors' farms, but it is the empirical results they are using as a guide, not the neighbors themselves. They are looking at farming activities as experiments and assessing such factors as relative advantage, compatibility with existing resources, difficulty of use, and "trialability" — how well can it be experimented with. But that criterion of "trialability" turns out to be a real problem; it's true that farmers are always experimenting, but working farms are very flawed laboratories. Farmers cannot set up the controlled conditions of professional test plots in research facilities. Farmers also often confront complex and difficult-to-observe phenomena that would be hard to manage even if they could run controlled experiments. Moreover farmers can rarely acquire payoff information on more than a few of the production methods they might use, which makes the criterion of "relative advantage" hard to measure.

* empirical: 경험적인 ** compatibility: 양립성 *** criterion: 기준

환경적 학습은 농부들이 '이익' 정보에 관한 관찰에 근거하여 결정할 때 발생한다. 그들은 자기 자신이나 이웃의 농장을 관찰할 수도 있지만, 그들이 지침으로 삼고 있는 것은 이웃 자체가 아니라 경험적 결과이다. 그들은 농업 활동을 실험으로 보고 상대적 이점, 기존 자원과의 양립성, 사용의 어려움, 그리고 '시험 가능성', 즉 그것이 얼마나 잘 실험될 수 있는가와 같은 요인을 평가하고 있다. 하지만 그 '시험 가능성'의 기준은 진짜 문제인 것으로 밝혀지는데, 농부들이 항상 실험하는 것은 사실이지만, 연구하는 농장은 매우 결함이 있는 실험실이다. 농부는 연구 시설에서 전문적인 시험 구성의 통제된 조건을 마련할 수 없다. 통제된 실험을 할 수 있다고 해도, 농부는 복잡하고 관찰하기 어려워 관리하기 힘들 현상에 자주 직면하기도 한다. 게다가 농부는 자신이 사용할 수 있는 몇 가지 생산 방법을 넘어서는 것에 관한 이익 정보를 거의 얻을 수 없고, 이는 '상대적 이점'의 기준을 측정하기 어렵게 만든다.

[어휘 정리]

observe ⓥ 관찰하다 - observation ⓝ 관찰 / observance ⓝ (법을) 준수, 지키기

24

Not only musicians and psychologists, but also committed music enthusiasts and experts often voice the opinion that the beauty of music ***lies*** in an expressive deviation from the exactly defined score. Concert performances become interesting and gain in attraction from the fact that they go far beyond the information printed in the score. In his early studies on musical performance, Carl Seashore ***discovered*** that musicians only rarely ***play*** two equal notes in exactly the same way. Within the same metric structure, there is a wide potential of variations in tempo, volume, tonal quality and intonation. Such variation is based on the composition but diverges from it individually. We generally call this 'expressivity'. This explains why we do not lose interest when we hear different artists perform the same piece of music. It also explains why it is worthwhile for following generations to repeat the same repertoire. New, inspiring interpretations help us to expand our understanding, which serves to enrich and animate the music scene.

* deviation: 벗어남

음악가와 심리학자뿐만 아니라, 열성적인 음악 애호가와 전문가도 음악의 아름다움은 정확히 정해진 악보로부터 표현상 벗어나는 데 있다고 흔히 목소리를 높인다. 콘서트공연은 악보에 인쇄된 정보를 훨씬 뛰어넘는다는 사실에서 흥미롭고 매력을 얻는다. 음악 연주에 관한 자신의 초기 연구에서, Carl Seashore는 음악가가 정확히 같은 방식으로 두 개의 동등한 음을 연주하는 경우가 거의 없다는 것을 발견했다. 같은 미터 구조 내에서, 박자, 음량, 음질 및 인토네이션에 있어 광범위한 변화 가능성이 있다. 이러한 변화는 작품에 기초하지만, 개별적으로 그것으로부터 갈라진다. 우리는 일반적으로 이것을 '표현성'이라고 부른다. 이것은 서로 다른 예술가가 같은 음악을 연주할 때 우리가 흥미를 잃지 않는 이유를 설명해 준다. 이것은 또한 다음 세대가 같은 레퍼토리를 반복하는 것이 가치 있는 이유이기도 하다. 새롭고 영감을 주는 해석은 우리가 이해를 넓히는 데 도움을 주는데, 이 이해는 음악계를 풍부하게 하고 활기를 불어넣는 역할을 한다.

[어법 정리] 자/타동사

Leon Festinger was an American social psychologist. He was born in New York City in 1919 to a Russian immigrant family. As a graduate student at the University of Iowa, Festinger was influenced by Kurt Lewin, a leading social psychologist. After graduating from there, he became a professor at the Massachusetts Institute of Technology in 1945. He later moved to Stanford University, where he continued his work in social psychology. His theory of social comparison earned him a good reputation. Festinger actively participated in international scholarly cooperation. In the late 1970s, he turned his interest to the field of history. He was one of the most cited psychologists of the twentieth century. Festinger's theories still play an important role in psychology today.

Leon Festinger는 미국의 사회 심리학자였다. 그는 1919년 뉴욕에서 러시아인 이민자 가정에서 태어났다. 아이오와대학교의 대학원생으로서, Festinger는 대표적인 사회 심리학자 Kurt Lewin의 영향을 받았다. 그곳에서 졸업한 후, 그는 1945년에 매사추세츠 공과대학의 교수가 되었다. 이후 그는 스탠퍼드대학교로 옮겨 그곳에서 자신의 사회 심리학 연구를 계속했다. 자신의 사회 비교 이론으로 그는 훌륭한 명성을 얻었다. Festinger는 국제 학술 협력에 적극적으로 참여했다. 1970년대 후반, 그는 역사 분야로 자신의 관심을 돌렸다. 그는 20세기에 가장 많이 인용된 심리학자 중 한명이었다. Festinger의 이론은 오늘날에도 여전히 심리학에서 중요한 역할을 한다.

29

Recognizing ethical issues is the most important step in understanding business ethics. An ethical issue is an identifiable problem, situation, or opportunity that requires a person to choose from among several actions that may be evaluated as right or wrong, ethical or unethical. *Learning* how to choose from alternatives and make a decision requires not only good personal values, but also knowledge competence in the business area of concern. Employees also need to know when to rely on their organizations' policies and codes of ethics or have discussions with co-workers or managers on appropriate conduct. Ethical decision making is not always easy because there are always gray areas that create dilemmas, no matter how decisions are made. For instance, should an employee report on a co-worker engaging in time theft? Should a salesperson leave out facts about a product's poor safety record in his presentation to a customer? Such questions require the decision maker to evaluate the ethics of his or her choice and decide whether to ask for guidance.

윤리적 문제를 인식하는 것은 비즈니스 윤리를 이해하는 데 가장 중요한 단계이다. 윤리적 문제는 옳거나 그르다고, 윤리적 또는 비윤리적이라고 평가될 수 있는 여러가지 행동들 가운데에서 한 사람이 선택하기를 요구하는 식별 가능한 문제, 상황 또는 기회이다. 대안 중에서 선택하고 결정을 내리는 방법을 배우는 것은 훌륭한 개인적 가치관뿐만 아니라 관계가 있는 비즈니스 분야에 대한 지식 역량도 필요로 한다. 또한 직원들은 언제 자신이 속한 조직의 정책과 윤리 강령에 의존할지 혹은 언제 동료 또는 관리자와 적절한 행동에 대해 논의해야 할지를 알아야 한다. 윤리적 의사결정이 항상 쉬운 것은 아닌데, 왜냐하면 결정이 어떻게 내려지든 딜레마를 만드는 회색 영역이 늘 있기 때문이다. 예를 들어, 직원은 시간 훔치기를 하는 동료에 대해 보고해야 하는가? 판매원은 고객에게 프레젠테이션을 할 때 어떤 제품의 안전 상태가 좋지 않다는 기록에 대한 사실을 생략해야 하는가? 그러한 질문은 의사결정자가 자신이 선택한 윤리를 평가하여 지침을 요청할 것인지 말지의 여부를 결정할 것을 요구한다.

30

Although the wonders of modern technology have provided people with opportunities beyond the wildest dreams of our ancestors, the good, as usual, is weakened by a downside. One of those downsides is that anyone who so chooses can pick up the virtual megaphone that is the Internet and put in their two cents on any of an infinite number of topics, regardless of their qualifications. After all, on the Internet, there are no regulations preventing a kindergarten teacher from offering medical advice or a physician from suggesting ways to safely make structural changes to your home. As a result, misinformation gets disseminated as information, and it is not always easy to differentiate the two. This can be particularly frustrating for scientists, who ***spend*** their lives ***learning*** how to understand the intricacies of the world around them, only to ***have*** their work summarily ***challenged*** by people whose experience with the topic can be measured in minutes. This frustration is then *amplified* by the fact ***that***, to the general public, both the scientist and the challenger are awarded equal credibility.

* put in one's two cents: 의견을 말하다 ** disseminate: 퍼뜨리다 *** intricacy: 복잡성

현대 기술의 경이로움이 사람들에게 우리 조상들은 꿈에도 생각해 본 적이 없을 만큼의 기회를 제공했지만, 늘 그렇듯이 좋은 점은 부정적인 면에 의해 약화된다. 그 부정적인 면 중 하나는 그렇게 하기로 선택한 사람은 누구나 자신의 자격에 상관없이 인터넷이라는 가상의 확성기를 집어 들고 무한히 많은 주제 중 어느 것에 대해서라도 의견을 말할 수 있다는 것이다. 결국, 인터넷에는 유치원 교사가 의학적인 조언을 제공하거나 의사가 여러분의 집에 안전하게 구조적인 변화를 줄 수 있는 방법을 제안하는 것을 막는 규정이 없다. 결과적으로, 잘못된 정보가 정보로 퍼지게 되고, 그 둘을 구별하는 것이 항상 쉽지만은 않다. 이것은 과학자에게 특히 좌절감을 줄 수 있는데, 그들은 자기 주변 세상의 복잡성을 이해하는 방법을 배우느라 일생을 보내지만 결국 그들의 연구는 그 주제에 대한 경험이 분 단위로 측정될 수 있는 사람들에게 즉석으로 도전을 받게 된다. 그러면 일반 대중들의 눈에는 과학자와 도전자 둘 다 동등한 신뢰성을 부여받는다는 사실에 의해 이 좌절감은 줄어든다(→ 증폭된다).

[어법 정리] 5형식 보어에 ~ing * ~ing 앞에 in 이 들어가도 됨 (문장 형식만 바뀜)

spend [waste, consume] + 돈/시간 + ~ing

부사적: 결과 + 사역동사 p.p

only to have their work summarily challenged - 결과라고 어렵게 생각하지 말 것, to~는 '앞으로 할 일'로 간주함

[어법 정리] To 부정사 부사적 용법

More than just having territories, animals also partition them. And this insight turned out to be particularly useful for zoo husbandry. An animal's territory has an internal arrangement that Heini Hediger compared to the inside of a person's house. Most of us assign separate functions to separate rooms, but even if you look at a one-room house you will find the same internal specialization. In a cabin or a mud hut, or even a Mesolithic cave from 30,000 years ago, this part is for cooking, that part is for sleeping; this part is for making tools and weaving, that part is for waste. We keep *a neat functional organization*. To a varying extent, other animals do the same. A part of an animal's territory is for eating, a part for sleeping, a part for swimming or wallowing, a part may be set aside for waste, depending on the species of animal.

* husbandry: 관리

그저 영역을 '갖는' 것을 넘어서, 동물은 또한 영역을 '분할한다'. 그리고 이러한 통찰은 동물원 관리에 특히 유용한 것으로 밝혀졌다. 동물의 영역에는 Heini Hediger가 사람의 집 내부에 비유한 내부 배치가 있다. 우리 대부분은 별도의 방에 별도의 기능을 할당하지만, 원룸 주택을 살펴봐도 동일한 내부의 전문화를 발견할 것이다. 오두막이나 진흙 오두막, 혹은 심지어 3만년 전의 중석기 시대의 동굴 안에도, 이 부분은 요리를 위한 것이고, 저 부분은 잠을 자기 위한 것이며, 이 부분은 도구 제작과 직조를 위한 것이고, 저 부분은 폐기물을 위한 것이다. 우리는 정돈된 기능적 체계를 유지한다. 다양한 정도로, 다른 동물들도 같은 행동을 한다. 동물의 종에 따라, 동물의 영역 중 일부는 먹기 위한 것이고, 일부는 잠을 자기 위한 것이며, 일부는 헤엄치거나 뒹굴기 위한 것이고, 일부는 폐기물을 위해 남겨둘 수도 있다.

32

Fans feel for feeling's own sake. They make meanings beyond what seems to be on offer. They build identities and experiences, and make artistic creations of their own to share with others. A person can be an individual fan, feeling an "idealized connection with a star, strong feelings of memory and nostalgia," and engaging in activities like "collecting to develop a sense of self." But, more often, individual experiences are embedded in social contexts where other people with shared attachments socialize around the object of their affections. Much of the pleasure of fandom *comes from being connected to other fans*. In their diaries, Bostonians of the 1800s described being part of the crowds at concerts as part of the pleasure of attendance. A compelling argument can be made that what fans love is less the object of their fandom than the attachments to (and differentiations from) one another that those affections afford.

* embed: 끼워 넣다 ** compelling: 강력한

팬은 감정 그 자체를 느낀다. 그들은 제공되는 것으로 보이는 것을 넘어서는 의미를 만든다. 그들은 정체성과 경험을 만들고, 다른 사람들과 공유하기 위해 그들 자신의 예술적 창작물을 만든다. 한 사람은 개인적인 팬이 되어, '어떤 스타와 이상적인 관계, 기억과 향수의 강한 감정'을 느끼며, '자아감 형성을 위해 수집하기'와 같은 활동을 할 수 있다. 그러나 더 흔히 개인적인 경험은 애착을 공유하는 다른 사람들이 그들의 애정의 대상을 중심으로 교제하는 사회적인 상황에 끼워 넣어져 있다. 팬덤의 많은 즐거움은 다른 팬들과 관계를 맺는 데서 온다. 1800년대의 보스턴 사람들은 그들의 일기에서 콘서트에 모인 군중의 일부가 되는 것을 참석의 즐거움의 일부로 묘사했다. 팬이 사랑하는 것은 그들의 팬덤의 대상이라기보다 그 애정이 제공하는 서로에 대한 애착(그리고 서로 간의 차이)이라는 강력한 주장이 제기될 수 있다.

33

There was nothing modern about the idea of men making women's clothes — we saw them doing it for centuries in the past. In the old days, however, the client was always primary and her tailor was an obscure craftsman, perhaps talented but perhaps not. She had her own ideas like any patron, there were no fashion plates, and the tailor was simply at her service, perhaps with helpful suggestions about what others were wearing. Beginning in the late nineteenth century, with the hugely successful rise of the artistic male couturier, ***it*** was the designer ***who*** became celebrated, and the client elevated by his inspired attention. In a climate of admiration for male artists and their female creations, the dress-designer first flourished as the same sort of creator. Instead of the old rule that dressmaking is a craft, *a modern connection between dress-design and art* was invented **that** had not been there before.

* obscure: 무명의 ** patron: 후원자 *** couturier: 고급 여성복 디자이너

남자가 여자 옷을 만든다는 생각에는 현대적인 것이 전혀 없는데, 우리는 과거 여러세기 동안 그들이 그것을 하는 것을 보았다. 하지만 옛 시절에는 항상 고객 위주였고 그녀의 재단사는 무명의 장인이었는데, 아마도 재능이 있었을 테지만 없었을지도 모른다. 그녀는 여느 후원자처럼 자기 자신의 생각이 있었고, 유행하는 옷의 본이 없었으며, 재단사는 아마도 다른 사람들이 입고 있는 것에 관한 도움이 되는 제안을 가지고 그저 그녀의 생각에 따랐다. 예술적인 남성 고급 여성복 디자이너의 매우 성공적인 부상과 함께 19세기 후반에 시작하여, 유명해진 것은 바로 디자이너였고, 고객은 그의 영감 어린 관심에 의해 치켜세워졌다. 남성 예술가와 여성을 위한 그들의 창작물에 대한 찬탄의 분위기 속에서, 의상 디자이너는 처음으로 같은 종류의 창작자로서 번영했다. 의상 제작은 공예에 불과하다는 옛 규칙 대신에, 예전에는 없던 의상 디자인과 예술 사이의 현대적 연결이 만들어졌다.

[어법 정리] It ~ that 강조구문 [* '강조' 란, 없어도 되는 단어들이 들어감. 예; do 강조, 재귀 강조, the very 강조] *that 대신 관계사도 사용
It is the boy that **you want to see**. that 대신 관계사 사용 가능. It is ~ that을 없애고, the boy를 뒤 문장과 합치면 말이 됨.

s v dress-design and art을 수식

a modern connection (between dress-design and art) **was invented** {that had not been there before}

34

In trying to explain how different disciplines attempt to understand autobiographical memory the literary critic Daniel Albright said, “Psychology is a garden, literature is a wilderness.” He meant, I believe, that psychology seeks to make patterns, find regularity, and ultimately impose order on human experience and behavior. Writers, by contrast, dive into the unruly, untamed depths of human experiences. What he said about understanding memory can be extended to our questions about young children’s minds. If we psychologists are too bent on identifying the orderly pattern, the regularities of children’s minds, we may miss an essential and pervasive characteristic of our topic: the child’s more unruly and imaginative ways of talking and thinking. It is not only the developed writer or literary scholar who seems drawn toward a somewhat wild and idiosyncratic way of thinking; young children are as well. The psychologist interested in young children may have to *venture a little more often into the wilderness* in order to get a good picture of how children think.

* unruly: 제멋대로 구는 ** pervasive: 널리 퍼져 있는 *** idiosyncratic: 색다른

서로 다른 학문이 자전적 기억을 어떻게 이해하려고 하는지 설명하려고 노력할 때, 문학평론가 Daniel Albright는 ‘심리학은 정원이고, 문학은 황무지이다.’라고 말했다. 내가 믿기에, 그는 심리학은 패턴을 만들고, 규칙성을 찾으며, 궁극적으로 인간의 경험과 행동에 질서를 부여하고자 한다는 것을 의미했다. 반면에, 작가는 제멋대로 굴고, 길들여지지 않은 인간 경험의 깊이를 파고든다. 기억을 이해하는 것에 관해 그가 말한 것은 어린아이의 마음에 관한 우리의 질문으로 확장될 수 있다. 만약 우리 심리학자들이 질서 있는 패턴, 즉 아이 마음의 규칙성을 밝히는 데 너무 열중한다면, 우리는 우리 주제의 본질적이고 널리 퍼져 있는 특성, 즉 아이가 지닌 더 제멋대로 굴고 상상력이 풍부한 말하기 방식과 생각하기 방식을 놓칠 수도 있다. 다소 거칠고 색다른 사고방식에 끌리는 것처럼 보이는 것은 비단 성숙한 작가나 문학 연구가뿐만이아니라, 어린아이도 역시 그렇다. 어린아이에게 관심이 있는 심리학자는 아이가 어떻게 생각하는지에 관한 상황을 잘 파악하기 위해 위험을 무릅쓰고 조금 더 자주 황무지에 발을 들여놓아야 할지도 모른다.

35

Because plants tend to recover from disasters more quickly than animals, they are essential to the revitalization of damaged environments. Why do plants have this preferential ability to recover from disaster? It is largely because, unlike animals, they can generate new organs and tissues throughout their life cycle. This ability is due to the activity of plant meristems — regions of undifferentiated tissue in roots and shoots that can, in response to specific cues, differentiate into new tissues and organs. If meristems are not damaged during disasters, plants can recover and ultimately transform the destroyed or barren environment. You can see this phenomenon on a smaller scale when a tree struck by lightning forms new branches that grow from the old scar. In addition to regeneration or resprouting of plants, disturbed areas can also recover through reseeding.

* revitalization: 소생

식물은 동물보다 더 빨리 재해로부터 회복하는 경향이 있기 때문에 손상된 환경의 소생에 필수적이다. 왜 식물에게는 재해로부터 회복할 수 있는 이런 특별한 능력이 있을까? 그것은 대체로 식물이 동물과 달리 생애 주기 내내 새로운 장기와 조직을 생성할 수 있기 때문이다. 이러한 능력은 식물의 분열 조직(分裂組織), 즉 특정 신호에 반응하여 새로운 세포 조직과 기관으로 분화할 수 있는, 뿌리와 싹에 있는 미분화 세포조직 부위의 활동 때문이다. 재해 시에 분열 조직(分裂組織)이 손상되지 않으면, 식물은 회복해서 파괴되거나 척박한 환경을 궁극적으로 변화시킬 수 있다. 번개 맞은 나무가 오래된 상처에서 자라나는 새로운 가지를 형성할 때 더 작은 규모로 이러한 현상을 볼 수 있다. 식물의 재생이나 재발아 외에도, 교란된 지역은 재파종을 통해서도 회복할 수 있다.

36

When two natural bodies of water stand at different levels, building a canal between them presents a complicated engineering problem. To make up for the difference in level, engineers build one or more water "steps," called locks, that carry ships or boats up or down between the two levels. A lock is an artificial water basin. It has a long rectangular shape with concrete walls and a pair of gates at each end. When a vessel is going upstream, the upper gates stay closed as the ship enters the lock at the lower water level. The downstream gates are then closed and more water is pumped into the basin. The rising water lifts the vessel to the level of the upper body of water. Then the upper gates open and the ship passes through. For downstream passage, the process works the opposite way. The ship enters the lock from the upper level, and water is pumped from the lock until the ship is in line with the lower level.

* rectangular: 직사각형의

두 곳의 자연 수역이 서로 다른 수위에 있을 때, 그것들 사이에 운하를 건설하는 것은 복잡한 공학적 문제를 만들어 낸다. (C) 수위의 차이를 보전하기 위해 공학자들은 두 수위 사이에서 배나 보트를 위아래로 운반하는, 로크라고 부르는 하나 이상의 물'계단'을 만든다. 로크는 인공적인 물웅덩이이다. 그것은 콘크리트 벽과 양 끝에 한쌍의 문이 있는 긴 직사각형 모양을 하고 있다. (B) 선박이 상류로 올라가고 있을 때는, 배가 더 낮은 수위에 있는 잠금장치에 들어서는 동안 위쪽 문은 닫혀 있다. 그러고 나서 하류의 문이 닫히고 더 많은 물이 웅덩이 안으로 양수된다. 상승하는 물이 선박을 위쪽의 물 높이 수준까지 끌어올린다. (A) 그러고 나면 위쪽 문이 열리고 배가 통과한다. 하류 통행의 경우, 그 과정은 정반대로 작동한다. 배가 위쪽 수위의 로크로 들어오고, 배가 더 낮은 수위와 일치할 때까지 물이 로크로부터 양수된다.

37

Culture operates in ways we can consciously consider and discuss but also in ways of which we are far less cognizant. When we have to offer an account of our actions, we consciously understand which excuses might prove acceptable, given the particular circumstances we find ourselves in. In such situations, we use cultural ideas as we would use a particular tool. We select the cultural notion as we would select a screwdriver: certain jobs call for a Phillips head while others require an Allen wrench. Whichever idea we insert into the conversation to justify our actions, the point is that our motives are discursively available to us. They are not hidden. In some cases, however, we are far less aware of why we believe a certain claim to be true, or how we are to explain why certain social realities exist. Ideas about the social world become part of our worldview without our necessarily being aware of the source of the particular idea or that we even hold the idea at all.

* cognizant: 인식하는 ** discursively: 만연하게

문화는 우리가 의식적으로 고려하고 논의할 수 있는 방식뿐만 아니라 우리가 훨씬 덜 인식하는 방식으로도 작동한다. (B) 우리의 행동에 대해 설명을 제시해야 할 때, 우리는 우리가 처한 특정한 상황 하에 어떤 변명이 용인되는 것으로 판명될 수도 있는지를 의식적으로 이해한다. 그런 상황에서 우리는 특정 도구를 사용하는 것처럼 문화적 관념을 사용한다. (C) 우리는 스크루드라이버를 선택하는 것처럼 문화적 개념을 선택한다. 어떤 일은 십자 드라이버 헤드를 필요로 하지만 다른 일은 육각 랜치를 필요로 한다. 우리의 행동을 정당화하기 위해 대화에 어떤 생각을 넣든, 요점은 우리의 동기가 우리에게 만연하게 이용 가능하다는 것이다. 그것들은 숨겨져 있지 않다. (A) 하지만 우리는 어떤 경우에는 우리가 왜 어떤 주장을 사실이라고 믿는지 또는 어떤 사회적 현실이 존재하는 이유를 어떻게 우리가 설명할 것인지에 대해 훨씬 덜 알고 있다. 사회적 세계에 대한 관념은 우리가 특정한 관념의 출처에 대해서 혹은 심지어 우리가 그 관념을 갖고 있다는 것조차 반드시 알고 있지 않은 상태에서도 우리 세계관의 일부가 된다.

38

In everyday life, we tend to see any collection of people as a group. However, social psychologists use this term more precisely. *In particular, they define a group as two or more people who interact with, and exert mutual influences on, each other.* It is this sense of mutual interaction or inter-dependence for a common purpose which distinguishes the members of a group from a mere aggregation of individuals. For example, as Kenneth Hodge observed, a collection of people who happen to go for a swim after work on the same day each week does not, strictly speaking, constitute a group because these swimmers do not interact with each other in a structured manner. By contrast, a squad of young competitive swimmers who train every morning before going to school is a group because they not only share a common objective (training for competition) but also interact with each other in formal ways (e.g., by warming up together beforehand). It is this sense of people coming together to achieve a common objective that defines a "team".

* exert: 발휘하다 ** aggregation: 집합

일상생활에서 우리는 어떤 사람들의 무리라도 하나의 집단으로 보는 경향이 있다. 그러나 사회 심리학자들은 이 용어를 더 정확하게 사용한다. 특히, 그들은 서로에게 상호 작용을 하고, 상호 영향력을 발휘하는 둘 이상의 사람들로 집단을 정의한다. 집단의 구성원들을 단순한 개인들의 집합으로부터 구별하는 것은 바로 공동의 목적을 위한 서로의 상호 작용 또는 상호 의존감이다. 예를 들어, Kenneth Hodge가 진술한 바와 같이, 매주 같은 날에 일을 마치고 우연히 수영을 하러 가는 사람들의 무리는 엄밀히 말하면 집단을 구성하지 않는데, 이러한 수영하는 사람들은 구조적인 방식으로 상호 작용하지 않기 때문이다. 대조적으로, 매일 아침 학교에 가기 전에 훈련을 하는, 경쟁을 하는 어린 수영 선수들은 공동의 목표(경기를 위한 훈련)를 공유할 뿐만아니라 공식적인 방식(예를 들면, 미리 함께 워밍업을 함)으로 상호 작용하기 때문에 집단'이다'. '팀'을 정의하는 것은 바로 공동의 목표를 달성하기 위해 사람들이 함께 모이는 이러한 생각이다.

39

Each new wave of technology is intended to enhance user convenience, as well as improve security, but sometimes these do not necessarily go hand-in-hand. For example, the transition from magnetic stripe to embedded chip slightly slowed down transactions, sometimes frustrating customers in a hurry. Make a service too burdensome, and the potential customer will go elsewhere. This obstacle applies at several levels. Passwords, double-key identification, and biometrics such as fingerprint-, iris-, and voice recognition are all ways of keeping the account details hidden from potential fraudsters, of keeping your data dark. But they all inevitably add a burden to the use of the account. *On top of the hurdles introduced in accessing his or her money, if a suspected fraud is detected, the account holder has to deal with the phone call asking if he or she made the suspicious transactions.* This is all useful at some level — indeed, it can be reassuring knowing that your bank is keeping alert to protect you — but it becomes tiresome if too many such calls are received.

* fraud: 사기

각각의 새로운 기술의 물결은 보안을 향상할 뿐만 아니라, 사용자 편의성을 향상하려는 의도이지만, 때때로 이것들이 반드시 함께 진행되지는 않는다. 예를 들어 마그네틱 띠에서 내장형 칩으로의 전환은 거래(의 속도)를 약간 늦췄는데, 때로 바쁜 고객을 좌절시켰다. 서비스를 너무 부담스럽게 만들면, 잠재 고객은 다른 곳으로 갈 것이다. 이런 장벽은 여러 수준에서 적용된다. 비밀번호, 이중 키 확인, 지문, 홍채 및 음성 인식과 같은 생체 인식은 모두 잠재적인 사기꾼으로부터 계정 세부 정보를 숨겨 주는, 즉 여러분의 데이터를 비밀로 유지하는 방법이다. 하지만 그것들은 모두 불가피하게 계좌 사용에 부담을 가중한다. 자신의 돈에 접근하는 데 도입된 난관에 더해, 만약 의심스러운 사기가 감지되면, 예금주는 본인이 그 의심스러운 거래를 했는지 묻는 내용의 전화 통화를 응대해야만 한다. 이것은 모두 어느 정도 도움이 되며, 실제로, 여러분의 은행이 여러분을 보호하기 위해 경계를 늦추지 않고 있다는 것을 알게 되어 안심이 될 수 있지만, 그러한 전화를 너무 많이 받게 되면 귀찮은 일이 된다.

40

A striving to demonstrate individual personality through designs should not be surprising. Most designers are educated to work as individuals, and design literature contains countless references to 'the designer'. Personal flair is without doubt an absolute necessity in some product categories, particularly relatively small objects, with a low degree of technological complexity, such as furniture, lighting, small appliances, and housewares. In larger-scale projects, however, even where a strong personality exercises powerful influence, the fact that substantial numbers of designers are employed in implementing a concept can easily be overlooked. The emphasis on individuality is therefore problematic — rather than actually designing, many *successful* designer 'personalities' function more as creative managers. A distinction needs to be made between designers working truly alone and those working in a group. In the ***latter*** case, management organization and processes can be equally as relevant as designers' creativity.

* strive: 애쓰다 ** flair: 재능

디자인을 통해 개인의 개성을 보여주기 위한 노력은 놀라운 것이 아닐 것이다. 대부분의 디자이너는 개인으로 일하도록 교육받고, 디자인 문헌은 '그 디자이너'에 대한 무수히 많은 언급을 담고 있다. 개인적인 재능이 일부 상품 범주에서는 절대적으로 필요한 것임에는 의심할 여지가 없는데, 가구, 조명, 소형 가전, 그리고 가정용품들과 같은, 낮은 단계의 기술적 복잡성을 가진 상대적으로 작은 물건들에서 특히 그렇다. 그러나, 더 큰 규모의 프로젝트에서, 심지어 강한 개성이 강력한 힘을 발휘하는 곳에서도, 상당한 수의 디자이너가 계획을 실행하는 데 참여한다는 사실이 쉽게 간과될 수 있다. 그러므로 개성에 대한 강조는 문제가 있는데, 많은 성공한 디자이너 '유명인사들'이 실제로 디자인을 하기보다는 창의적인 관리자로서의 기능을 더 많이 한다. 진정으로 혼자 일하는 디자이너와 집단을 이루어 일하는 디자이너는 구분되어야 한다. 후자의 경우, 관리 조직과 과정들이 디자이너들의 창의성 못지않게 똑같이 의미있을 수 있다.

[어휘 정리]

succeed ⓥ 성공하다, 계속하다 - success ⓝ 성공 / succession ⓝ 연속 successful ⓐ 성공적인 / successive ⓐ 연속적인

[어법 정리] 비교급

순서개념	late 늦은	later 더 늦은(나중에)	last 가장 늦은=마지막	참조: lately 부사 '최근에', lastly 부사 '끝으로'

[41 ~ 42]

Climate change experts and environmental humanists alike agree that the climate crisis is, at its core, a crisis of the imagination and much of the popular imagination is shaped by fiction. In his 2016 book The Great Derangement, anthropologist and novelist Amitav Ghosh takes on this relationship between imagination and environmental management, arguing that humans have failed to respond to climate change at least in part because fiction fails to believably represent it. Ghosh explains that climate change is largely absent from contemporary fiction because the cyclones, floods, and other catastrophes it brings to mind simply seem too "improbable" to belong in stories about everyday life. But climate change does not only reveal itself as a series of extraordinary events. In fact, as environmentalists and ecocritics from Rachel Carson to Rob Nixon have pointed out, environmental change can be "imperceptible"; it proceeds ***gradually***, only occasionally producing "explosive and spectacular" events. Most climate change impacts cannot be observed day-to-day, but they become visible when we are confronted with their accumulated impacts.

Climate change evades our imagination because it poses significant representational challenges. It cannot be observed in "human time," which is why documentary filmmaker Jeff Orlowski, who tracks climate change effects on glaciers and coral reefs, uses "before and after" photographs taken several months apart in the same place to highlight changes that occurred gradually.

* anthropologist: 인류학자 ** catastrophe: 큰 재해 *** evade: 피하다

기후 변화 전문가들과 환경 인문주의자들은 기후 위기가 근원적으로 상상력의 위기이며 대중적 상상력의 많은 부분이 소설에 의해 형성된다는 데 똑같이 동의한다. 인류학자이자 소설가인 Amitav Ghosh는 자신의 2016년도 책 'The Great Derangement'에서 상상과 환경 관리 사이의 이러한 관계를 다루면서, 인간이 기후변화에 대응하는 데 실패한 것은 최소한 부분적으로는 소설이 그것을 믿을 수 있게 표현하지 못하기 때문이라고 주장한다. Ghosh는 기후 변화는 그것이 상기시키는 사이클론, 홍수, 그리고 다른 큰 재해들이 그야말로 일상생활에 관한 이야기에 속하기에는 너무 '있을 것 같지 않은' 것처럼 보이기 때문에 현대 소설에 대체로 존재하지 않는다고 설명한다. 그러나 기후 변화는 일련의 놀라운 사건들로만 자신을 드러내는 것은 아니다. 사실, Rachel Carson에서 Rob Nixon에 이르는 환경론자들과 생태비평가들이 지적했듯이, 환경 변화는 '감지할 수 없을' 수 있는데, 즉 그것은 빠르게(→ 점진적으로) 진행되며, 단지 이따금 '폭발적이고 극적인' 사건들을 만들어 낼 뿐이다. 대부분의 기후 변화의 영향은 매일 관찰될 수는 없지만, 우리가 그것들의 축적된 영향에 직면할 때 그것들은 가시화된다.

기후 변화는 그것이 중요한 표현상의 문제를 제기하기 때문에 우리의 상상에서 벗어난다. 그것은 '인간의 시간' 동안에는 관찰될 수 없는데, 그것이 빙하와 산호초에 미치는 기후 변화의 영향을 추적하는 다큐멘터리 영화 제작자 Jeff Orlowski가 점진적으로 일어난 변화를 강조하기 위해 수개월 간격으로 같은 장소에서 찍은 '전과 후'사진을 이용하는 이유이다.

[43 ~ 45]

Walking out of Charing Cross Station in London, Emilia and her traveling companion, Layla, already felt their hearts pounding. It was the second day of their European summer trip. They were about to visit one of the world's most famous art galleries. The two of them started hurrying with excitement. Suddenly, Emilia shouted, "Look! There it is! We're finally at the National Gallery!" Layla laughed and responded, "Your dream's finally come true!"

Upon entering the National Gallery, Emilia knew exactly where to go first. She grabbed Layla's hand and dragged her hurriedly to find van Gogh's Sunflowers. It was Emilia's favorite painting and had inspired her to become a painter. Emilia loved his use of bright colors and light. She couldn't wait to finally see his masterpiece in person. "It'll be amazing to see how he communicated the feelings of isolation and loneliness in his work," she said eagerly.

However, after searching all the exhibition rooms, Emilia and Layla couldn't find van Gogh's masterpiece anywhere. "That's weird. Van Gogh's Sunflowers should be here. Where is it?" Emilia looked upset, but Layla kept calm and said, "Maybe you've missed a notice about it. Check the National Gallery app." Emilia checked it quickly. Then, she sighed, "Sunflowers isn't here! It's been lent to a different gallery for a special exhibition. I can't believe I didn't check!"

"Don't lose hope yet! Which gallery is the special exhibition at?" Layla asked. Emilia responded, "Well, his Sunflowers is still in England, but it's at a gallery in Liverpool. That's a long way, isn't it?" After a quick search on her phone, Layla stated, "No! It's only two hours to Liverpool by train. The next train leaves in an hour. Why don't we take it?" After considering the idea, Emilia, now relieved, responded, "Yeah, but you always wanted to see Rembrandt's paintings. Let's do that first, Layla! Then, after lunch, we can catch the next train." Layla smiled brightly.

(A) 런던의 Charing Cross 역에서 걸어 나오면서, Emilia와 그녀의 여행 동반자인 Layla는 벌써 가슴이 두근거리는 것을 느꼈다. 그들의 유럽 여름 여행 둘째 날이었다. 그들은 세계에서 가장 유명한 미술관 중 하나를 방문할 계획이었다. 그들 두 사람은 흥분하여 서두르기 시작했다. 갑자기 Emilia가 "봐! 저기 있어! 우리는 드디어 내셔널 갤러리에 도착한 거야!"라고 소리쳤다. Layla는 웃으며, "너의 꿈이 드디어 이루어졌구나!"라고 대답했다

(D) 내셔널 갤러리에 들어가자마자, Emilia는 처음에 어디로 가야 할지를 정확하게 알았다. 그녀는 van Gogh의 Sunflowers 를 찾으러 Layla의 손을 꼭 잡고 서둘러 그녀를 끌고 갔다. 그것은 Emilia가 가장 좋아하는 그림이며 그녀가 화가가 되도록 영감을 준 것이었다. Emilia는 그의 밝은 색상과 빛의 사용을 아주 좋아했다. 그녀는 그의 걸작을 드디어 직접 보기를 열망했다. 그녀는 "그가 자기 작품에서 고립과 고독의 느낌을 전달한 방식을 보면 놀라울 거야."라고 잔뜩 기대하며 말했다.

(C) 그러나, 모든 전시실을 찾아본 후에도, Emilia와 Layla는 van Gogh의 걸작을 어디에서도 찾을 수가 없었다. "이상해. van Gogh의 Sunflowers 는 여기 있어야 하는데. 그게 어디에 있지?" Emilia는 속상해 보였지만, Layla는 침착함을 유지하며 "아마 네가 그것에 대한 공지를 놓쳤을 거야. 내셔널 갤러리의 앱을 확인해 봐."라고 말했다. Emilia는 빠르게 그것을 확인했다. 그런 다음, 그녀는 한숨을 쉬며, "Sunflowers 는 여기에 없어! 그것은 특별 전시회를 위해 다른 미술관에 대여되었어. 내가 확인을 안 했다는 걸 나는 믿을 수가 없어!"라고 말했다.

(B) Layla는 "아직 희망을 잃지 마! 특별 전시회는 어느 미술관에서 하는 거야?"라고 물었다. Emilia는 "음, 그의 Sunflowers 는 여전히 잉글랜드에 있지만, 그것은 리버풀의 미술관에 있어. 그곳은 거리가 멀지, 그렇지 않아?"라고 대답했다. 전화로 빠르게 검색해 본 다음, Layla는 "아냐! 리버풀까지 기차로 겨우 두 시간 거리야. 다음 기차는 한 시간 후에 떠나. 우리 그걸 타는 게 어때?"라고 말했다. 그 생각을 고려해 본 다음, 이제 마음이 놓인 Emilia는 "응, 하지만 너는 항상 Rembrandt의 그림들을 보고 싶어 했잖아. 그걸 먼저 하자, Layla! 그런 다음, 점심 식사 후에, 그다음 기차를 탈 수 있어."라고 대답했다. Layla가 밝게 미소를 지었다.

Dear Natalie Talley,

My name is Olivia Spikes, the mayor of Millstown. Before you a_____ the world championships next month, on b_____ of e_____ in Millstown, I wish to let you know that we are s_____ you all the way. As you are the first famous f_____ s_____ from Millstown, we are all big fans of yours. Our c_____ was so proud of you for winning the n_____ championships last year. Your amazing p_____ really moved us all. We all b_____ that you are going to i_____ the e_____ nation again. Your h_____ supporters will cheer for you w_____ you p_____ on the ice. Good luck!

제 이름은 Olivia Spikes이며, Millstown의 시장입니다. 다음 달 세계 선수권 대회에 출전하기 전에 Millstown의 모든 이를 대신하여 우리가 당신을 항상 응원하고 있음을 알려드리고 싶습니다. 당신은 Millstown 최초의 유명한 피겨 스케이팅 선수이기에 우리는 모두 당신의 열렬한 팬입니다. 우리 지역 사회는 당신이 지난해에 전국 선수권 대회에서 우승한 것을 매우 자랑스럽게 생각했습니다. 당신의 놀라운 연기는 우리 모두를 감동하게 했습니다. 우리 모두 당신이 다시 온 나라를 감동하게 할 것이라고 믿습니다. 빙판 위에서 연기할 때마다 고향의 서포터들이 응원할 것입니다. 행운을 빕니다!

19

"Daddy!" Jenny called, waving a yellow crayon in her little hand. Nathan a_____ her, w_____ why she was calling him. Jenny, his three-year-old toddler, was d_____ a big circle on a piece of paper. "What are you doing, Sweetie?" Nathan asked with i_____. She just kept d_____ without reply. He c_____ watching her, wondering what she was working on. She was drawing something that looked like a face. When she f_____ it, Jenny s_____, "Look, Daddy!" She held her artwork up proudly. T_____ a closer look, Nathan r_____ that it was his face. The face had two big eyes and a b_____ just like his. He loved Jenny's work. F_____ with joy and happiness, Nathan gave her a big hug.

"아빠!" Jenny가 작은 손에 쥔 노란색 크레용을 흔들며 불렀다. Nathan은 아이가 왜 자신을 부르는지 궁금해하며 아이에게 다가갔다. 그의 걸음마를 하는 세 살배기 Jenny는 종이에 큰 원을 그리고 있었다. "뭘 하고 있니, 아가야?"라고 Nathan은 관심을 가지고 물었다. 아이는 대답 없이 계속 그림을 그리고 있었다. 그는 아이가 무엇을 하고 있는지 궁금해하면서 계속해서 아이를 보고 있었다. 아이는 얼굴처럼 보이는 것을 그리고 있었다. 그것을 끝냈을 때, Jenny는 "보세요, 아빠!"라고 외쳤다. 그녀는 자신의 작품을 자랑스럽게 들어 올렸다. 자세히 보자 Nathan은 그것이 자신의 얼굴임을 알아차렸다. 그 얼굴에는 그와 똑같은 두 개의 큰 눈과 수염이 있었다. 그는 Jenny가 그린 것이 마음에 들었다. 기쁨과 행복으로 가득 찬 Nathan은 아이를 크게 껴안아 주었다.

20

Becoming competent in another culture m_____ looking beyond behavior to see if we can understand the attitudes, beliefs, and values that m_____ what we o_____. By looking only at the v_____ a_____ of culture — customs, clothing, food, and language — we d_____ a short-sighted view of i_____ understanding — just the tip of the iceberg, really. If we are to be s_____ in our business interactions with people who have different values and b_____ about how the world is o_____, then we must go below the s_____ of what it means to understand culture and a_____ to see what Edward Hall calls the "hidden dimensions." Those hidden a_____ are the very f_____ of culture and are the reason why culture is a_____ more than meets the eye. We tend not to n_____ those c_____ norms until they v_____ what we consider to be c_____ sense, good judgment, or the n_____ of things.

타 문화에 유능해진다는 것은 우리가 관찰하는 것의 이유가 되는 태도, 신념, 가치를 이해할 수 있는지 알아보기 위해 행동 그 이상의 것을 살펴보는 것을 의미한다. 문화의 눈에 보이는 면, 즉 관습, 의복, 음식, 언어만 봄으로써, 우리는 타문화 이해에 있어 정말로 빙산의 일각에 불과한 근시안적 시각을 키운다. 세상이 어떻게 질서를 세우는지에 대한 다른 가치와 신념을 가진 사람들과의 사업상의 교류에서 성공하고자 한다면, 문화를 이해한다는 것이 의미하는 것의 그 이면을 들여다볼 수 있어야 하고 Edward Hall이 '숨겨진 차원'이라고 부른 것을 보려고 시도해야 한다. 그런 숨겨진 측면이 바로 문화의 근간이며 문화가 실제로는 눈에 보이는 것 이상인 이유이다. 우리는 그런 문화적 규범들이 우리가 상식, 올바른 판단 또는 사물의 본질이라고 여기는 것을 어기고 나서야 비로소 그것들을 알아차리는 경향이 있다.

21

You may feel there is something scary about an algorithm d_____ what you might like. Could it mean that, if computers c_____ you won't like something, you will never get the c_____ to see it? Personally, I really enjoy being d_____ toward new music that I might not have found by myself. I can q_____ get stuck in a rut where I put on the same songs over and over. That's why I've always e_____ the radio. But the algorithms that are now pushing and pulling me t_____ the music library are perfectly suited to finding gems that I'll like. My worry o_____ about such algorithms was that they might drive everyone into c_____ parts of the library, leaving others lacking listeners. Would they c_____ a c_____ of tastes? But thanks to the nonlinear and c_____ mathematics usually behind them, this doesn't happen. A small d_____ in my likes c_____ to yours can send us off into different far corners of the l_____.

여러분은 여러분이 좋아할지도 모를 것을 결정하는 알고리즘에 대해 뭔가 무서운 것이 있다고 느낄 수 있다. 그것은 당신이 뭔가를 좋아하지 않을 것이라고 컴퓨터가 결론을 내린다면 당신은 그것을 볼 기회를 결코 얻지 못할 수도 있다는 뜻인가? 개인적으로, 나는 스스로는 발견하지 못했을 새로운 음악 쪽으로 안내받는 것을 정말 좋아한다. 나는 같은 노래를 계속 반복해서 넣는 틀에 빨리 갇힐 때가 있다. 그래서 나는 항상 라디오를 즐겨 듣는다. 그러나 지금 뮤직 라이브러리를 통해 나를 밀고 당기는 알고리즘은 내가 좋아할 보석을 찾는 데 완벽하게 적합하다. 원래 그런 알고리즘에 대한 나의 걱정은 모든 사람을 라이브러리의 특정 부분으로 몰아넣고 나머지 부분은 듣는 이들이 적은 상태가 되게 만들 수 있다는 것이었다. 그것은 취향의 수렴을 일으킬 것인가? 그러나 일반적으로 그 배후에 있는 비선형적이고 불규칙적인 수학 덕분에 이런 일은 발생하지는 않는다. 여러분이 좋아하는 것과 비교하여 내가 좋아하는 것의 작은 갈라짐이 (결국) 우리를 (뮤직) 라이브러리의 저 멀리 떨어진 구석들로 보낼 수 있다.

22

Historically, drafters of tax legislation are a_____ to questions of economics and history, and less a_____ to moral questions. Questions of m_____ are often pushed to the side in l_____ debate, labeled too controversial, too difficult to answer, or, worst of all, i_____ to the project. But, in fact, the moral questions of t_____ are at the very heart of the c_____ of tax laws. Rather than irrelevant, moral questions are f_____ to the i_____ of tax. Tax is the a_____ of a society's theories of d_____ justice. Economics can go a long way towards helping a l_____ determine whether or not a particular tax law will help achieve a particular goal, but economics cannot, in a vacuum, i_____ the goal. C_____ tax policy requires identifying a moral goal, which is a task that must i_____ ethics and moral analysis.

역사적으로, 조세 입법 입안자들은 경제학과 역사 문제에 주의를 기울이고 도덕적 질문에는 주의를 덜 기울인다. 도덕성에 관한 질문은 종종 입법 토론에서 옆으로 밀려나면서, 너무 논란이 많거나, 답변하기 너무 어렵거나, 아니면 최악의 경우, 계획과 무관한 것으로 분류된다. 하지만, 사실, 조세의 도덕적 문제는 세법을 만드는 핵심에있다. 무관한 것이 아니라, 도덕적 질문은 세금 부과에 근본적이다. 세금은 사회의 분배 정의 이론을 적용한 것이다. 경제학은 입법부가 특정 세법이 특정 목표를 달성하는 데 도움이 될지를 결정하는 것을 돕는 것에 큰 도움이 될 수 있지만, 경제학만으로는 목표를 규명할 수 없다. 조세 정책을 만드는 것은 도덕적 목표를 규명하는 것을 요구하는데, 그것은 윤리학과 도덕적 분석을 수반해야 하는 과업이다.

23

Environmental learning occurs when farmers base d_____ on o_____ of "payoff" information. They may o_____ their own or neighbors' farms, but it is the empirical r_____ they are using as a guide, not the neighbors themselves. They are looking at f_____ activities as experiments and a_____ such factors as r_____ advantage, compatibility with existing resources, d_____ of use, and "trialability" — how well can it be e_____ with. But that criterion of "trialability" turns out to be a real problem; it's true that farmers are always e_____, but working farms are very f_____ laboratories. Farmers cannot set up the c_____ conditions of professional test plots in research facilities. Farmers also often c_____ c_____ and difficult-to-observe phenomena that would be hard to m_____ even if they could run c_____ experiments. Moreover farmers can rarely a_____ payoff i_____ on more than a few of the production m_____ they might use, which makes the criterion of "relative advantage" hard to measure.

환경적 학습은 농부들이 '이익' 정보에 관한 관찰에 근거하여 결정할 때 발생한다. 그들은 자기 자신이나 이웃의 농장을 관찰할 수도 있지만, 그들이 지침으로 삼고 있는 것은 이웃 자체가 아니라 경험적 결과이다. 그들은 농업 활동을 실험으로 보고 상대적 이점, 기존 자원과의 양립성, 사용의 어려움, 그리고 '시험 가능성', 즉 그것이 얼마나 잘 실험될 수 있는가와 같은 요인을 평가하고 있다. 하지만 그 '시험 가능성'의 기준은 진짜 문제인 것으로 밝혀지는데, 농부들이 항상 실험하는 것은 사실이지만, 연구하는 농장은 매우 결함이 있는 실험실이다. 농부는 연구 시설에서 전문적인 시험 구성의 통제된 조건을 마련할 수 없다. 통제된 실험을 할 수 있다고 해도, 농부는 복잡하고 관찰하기 어려워 관리하기 힘들 현상에 자주 직면하기도 한다. 게다가 농부는 자신이 사용할 수 있는 몇 가지 생산 방법을 넘어서는 것에 관한 이익 정보를 거의 얻을 수 없고, 이는 '상대적 이점'의 기준을 측정하기 어렵게 만든다.

24

Not only musicians and psychologists, but also c_____ music enthusiasts and e_____ often v_____ the o_____ that the beauty of music lies in an e_____ d_____ from the exactly defined score. Concert performances become interesting and gain in a_____ from the fact that they go far beyond the information p_____ in the score. In his early studies on musical performance, Carl Seashore d_____ that musicians only r_____ play two equal notes in e_____ the same way. Within the same metric s_____, there is a wide potential of variations in tempo, volume, tonal quality and intonation. Such v_____ is based on the c_____ but d_____ from it individually. We generally call this 'expressivity'. This explains why we do not lose i_____ when we hear d_____ artists p_____ the same piece of music. It also explains why it is worthwhile for following generations to r_____ the same repertoire. New, inspiring interpretations help us to e_____ our understanding, which s_____ to enrich and a_____ the music scene.

음악가와 심리학자뿐만 아니라, 열성적인 음악 애호가와 전문가도 음악의 아름다움은 정확히 정해진 악보로부터 표현상 벗어나는 데 있다고 흔히 목소리를 높인다. 콘서트공연은 악보에 인쇄된 정보를 훨씬 뛰어넘는다는 사실에서 흥미롭고 매력을 얻는다. 음악 연주에 관한 자신의 초기 연구에서, Carl Seashore는 음악가가 정확히 같은 방식으로 두 개의 동등한 음을 연주하는 경우가 거의 없다는 것을 발견했다. 같은 미터 구조 내에서, 박자, 음량, 음질 및 인토네이션에 있어 광범위한 변화 가능성이 있다. 이러한 변화는 작품에 기초하지만, 개별적으로 그것으로부터 갈라진다. 우리는 일반적으로 이것을 '표현성'이라고 부른다. 이것은 서로 다른 예술가가 같은 음악을 연주할 때 우리가 흥미를 잃지 않는 이유를 설명해 준다. 이것은 또한 다음 세대가 같은 레퍼토리를 반복하는 것이 가치 있는 이유이기도 하다. 새롭고 영감을 주는 해석은 우리가 이해를 넓히는 데 도움을 주는데, 이 이해는 음악계를 풍부하게 하고 활기를 불어넣는 역할을 한다.

26

Leon Festinger was an American social psychologist. He was born in New York City in 1919 to a Russian i_____ family. As a g_____ student at the University of Iowa, Festinger was i_____ by Kurt Lewin, a leading social psychologist. After g_____ from there, he became a professor at the Massachusetts Institute of Technology in 1945. He later moved to Stanford University, where he c_____ his work in social psychology. His t_____ of social c_____ e_____ him a good r_____. Festinger actively participated in international scholarly cooperation. In the late 1970s, he t_____ his interest to the field of history. He was one of the most cited psychologists of the twentieth century. Festinger's theories still play an important r_____ in psychology today.

Leon Festinger는 미국의 사회 심리학자였다. 그는 1919년 뉴욕에서 러시아인 이민자 가정에서 태어났다. 아이오와대학교의 대학원생으로서, Festinger는 대표적인 사회 심리학자 Kurt Lewin의 영향을 받았다. 그곳에서 졸업한 후, 그는 1945년에 매사추세츠 공과대학의 교수가 되었다. 이후 그는 스탠퍼드대학교로 옮겨 그곳에서 자신의 사회 심리학 연구를 계속했다. 자신의 사회 비교 이론으로 그는 훌륭한 명성을 얻었다. Festinger는 국제 학술 협력에 적극적으로 참여했다. 1970년대 후반, 그는 역사 분야로 자신의 관심을 돌렸다. 그는 20세기에 가장 많이 인용된 심리학자 중 한 명이었다. Festinger의 이론은 오늘날에도 여전히 심리학에서 중요한 역할을 한다.

29

Recognizing ethical issues is the most important step in u_____ business ethics. An ethical issue is an i_____ problem, situation, or opportunity that r_____ a person to choose from among s_____ actions that may be e_____ as right or wrong, ethical or unethical. L_____ how to choose from a_____ and make a decision requires not only good p_____ values, but also k_____ c_____ in the business area of concern. Employees also need to know when to rely on their organizations' policies and codes of ethics or have d_____ with co-workers or managers on a_____ conduct. Ethical decision making is not always easy because there are always gray areas that c_____ dilemmas, no matter how decisions are made. For instance, should an employee report on a co-worker e_____ in time theft? Should a salesperson leave out facts about a product's poor s_____ record in his p_____ to a customer? Such questions r_____ the decision maker to e_____ the ethics of his or her choice and decide whether to ask for g_____.

윤리적 문제를 인식하는 것은 비즈니스 윤리를 이해하는 데 가장 중요한 단계이다. 윤리적 문제는 옳거나 그르다고, 윤리적 또는 비윤리적이라고 평가될 수 있는 여러가지 행동들 가운데에서 한 사람이 선택하기를 요구하는 식별 가능한 문제, 상황 또는 기회이다. 대안 중에서 선택하고 결정을 내리는 방법을 배우는 것은 훌륭한 개인적 가치관뿐만 아니라 관계가 있는 비즈니스 분야에 대한 지식 역량도 필요로 한다. 또한 직원들은 언제 자신이 속한 조직의 정책과 윤리 강령에 의존할지 혹은 언제 동료 또는 관리자와 적절한 행동에 대해 논의해야 할지를 알아야 한다. 윤리적 의사결정이 항상 쉬운 것은 아닌데, 왜냐하면 결정이 어떻게 내려지든 딜레마를 만드는 회색 영역이 늘 있기 때문이다. 예를 들어, 직원은 시간 훔치기를 하는 동료에 대해 보고해야 하는가? 판매원은 고객에게 프레젠테이션을 할 때 어떤 제품의 안전 상태가 좋지 않다는 기록에 대한 사실을 생략해야 하는가? 그러한 질문은 의사결정자가 자신이 선택한 윤리를 평가하여 지침을 요청할 것인지 말지의 여부를 결정할 것을 요구한다.

30

Although the wonders of modern technology have p_____ people with o_____ beyond the wildest dreams of our ancestors, the good, as usual, is w_____ by a downside. One of those downsides is that anyone who so chooses can pick up the virtual megaphone that is the Internet and put in their two cents on any of an i_____ number of topics, r_____ of their qualifications. After all, on the Internet, there are no regulations p_____ a kindergarten teacher from offering medical a_____ or a physician from suggesting ways to s_____ make s_____ changes to your home. As a result, misinformation gets d_____ as information, and it is not always easy to d_____ the two. This can be particularly frustrating for scientists, who spend their lives learning how to understand the intricacies of the world around them, only to have their work s_____ c_____ by people whose experience with the topic can be m_____ in minutes. This f_____ is then amplified by the fact that, to the general public, both the scientist and the c_____ are a_____ e_____ credibility.

현대 기술의 경이로움이 사람들에게 우리 조상들은 꿈에도 생각해 본 적이 없을 만큼의 기회를 제공했지만, 늘 그렇듯이 좋은 점은 부정적인 면에 의해 약화된다. 그 부정적인 면 중 하나는 그렇게 하기로 선택한 사람은 누구나 자신의 자격에 상관없이 인터넷이라는 가상의 확성기를 집어 들고 무한히 많은 주제 중 어느 것에 대해서라도 의견을 말할 수 있다는 것이다. 결국, 인터넷에는 유치원 교사가 의학적인 조언을 제공하거나 의사가 여러분의 집에 안전하게 구조적인 변화를 줄 수 있는 방법을 제안하는 것을 막는 규정이 없다. 결과적으로, 잘못된 정보가 정보로 퍼지게 되고, 그 둘을 구별하는 것이 항상 쉽지만은 않다. 이것은 과학자에게 특히 좌절감을 줄 수 있는데, 그들은 자기 주변 세상의 복잡성을 이해하는 방법을 배우느라 일생을 보내지만 결국 그들의 연구는 그 주제에 대한 경험이 분 단위로 측정될 수 있는 사람들에게 즉석으로 도전을 받게 된다. 그러면 일반 대중들의 눈에는 과학자와 도전자 둘 다 동등한 신뢰성을 부여받는다는 사실에 의해 이 좌절감은 줄어든다(→ 증폭된다).

31

More than just having territories, animals also p_____ them. And this i_____ turned out to be particularly u_____ for zoo husbandry. An animal's t_____ has an internal a_____ that Heini Hediger c_____ to the inside of a person's house. Most of us a_____ s_____ functions to separate rooms, but even if you look at a one-room house you will find the same i_____ s_____. In a cabin or a mud hut, or even a Mesolithic cave from 30,000 years ago, this part is for cooking, that part is for sleeping; this part is for making tools and weaving, that part is for w_____. We keep a neat f_____ o_____. To a varying extent, other animals do the same. A part of an animal's territory is for eating, a part for sleeping, a part for swimming or wallowing, a part may be set a_____ for waste, d_____ on the species of animal.

그저 영역을 '갖는' 것을 넘어서, 동물은 또한 영역을 '분할한다'. 그리고 이러한 통찰은 동물원 관리에 특히 유용한 것으로 밝혀졌다. 동물의 영역에는 Heini Hediger가 사람의 집 내부에 비유한 내부 배치가 있다. 우리 대부분은 별도의 방에 별도의 기능을 할당하지만, 원룸 주택을 살펴봐도 동일한 내부의 전문화를 발견할 것이다. 오두막이나 진흙 오두막, 혹은 심지어 3만년 전의 중석기 시대의 동굴 안에도, 이 부분은 요리를 위한 것이고, 저 부분은 잠을 자기 위한 것이며, 이 부분은 도구 제작과 직조를 위한 것이고, 저 부분은 폐기물을 위한 것이다. 우리는 정돈된 기능적 체계를 유지한다. 다양한 정도로, 다른 동물들도 같은 행동을 한다. 동물의 종에 따라, 동물의 영역 중 일부는 먹기 위한 것이고, 일부는 잠을 자기 위한 것이며, 일부는 헤엄치거나 뒹굴기 위한 것이고, 일부는 폐기물을 위해 남겨둘 수도 있다.

32

Fans feel for feeling's own sake. They make m_____ beyond what seems to be on offer. They b_____ identities and experiences, and make artistic c_____ of their own to share with others. A p_____ can be an individual fan, feeling an "idealized c_____ with a star, strong feelings of m_____ and nostalgia," and e_____ in activities like "collecting to develop a sense of self." But, more often, individual e_____ are embedded in social contexts where other people with s_____ attachments s_____ around the o_____ of their affections. Much of the pleasure of fandom comes from being c_____ to other fans. In their diaries, Bostonians of the 1800s d_____ being part of the crowds at concerts as part of the p_____ of attendance. A c_____ a_____ can be made that what fans love is less the o_____ of their fandom than the attachments to (and differentiations from) one another that those a_____ afford.

팬은 감정 그 자체를 느낀다. 그들은 제공되는 것으로 보이는 것을 넘어서는 의미를 만든다. 그들은 정체성과 경험을 만들고, 다른 사람들과 공유하기 위해 그들 자신의 예술적 창작물을 만든다. 한 사람은 개인적인 팬이 되어, '어떤 스타와 이상적인 관계, 기억과 향수의 강한 감정'을 느끼며, '자아감 형성을 위해 수집하기'와 같은 활동을 할 수 있다. 그러나 더 흔히 개인적인 경험은 애착을 공유하는 다른 사람들이 그들의 애정의 대상을 중심으로 교제하는 사회적인 상황에 끼워 넣어져 있다. 팬덤의 많은 즐거움은 다른 팬들과 관계를 맺는 데서 온다. 1800년대의 보스턴 사람들은 그들의 일기에서 콘서트에 모인 군중의 일부가 되는 것을 참석의 즐거움의 일부로 묘사했다. 팬이 사랑하는 것은 그들의 팬덤의 대상이라기보다 그 애정이 제공하는 서로에 대한 애착(그리고 서로 간의 차이)이라는 강력한 주장이 제기될 수 있다.

33

There was nothing modern about the idea of men making women's clothes — we saw them doing it for centuries in the past. In the old days, however, the client was always p_____ and her tailor was an o_____ craftsman, perhaps t_____ but perhaps not. She had her own ideas like any patron, there were no f_____ plates, and the tailor was simply at her service, perhaps with h_____ suggestions about what others were wearing. B_____ in the late nineteenth century, with the hugely s_____ rise of the artistic male couturier, it was the designer who became c_____, and the client e_____ by his i_____ a_____. In a climate of admiration for male artists and their female creations, the dress-designer first f_____ as the same sort of creator. Instead of the old rule that dressmaking is a craft, a modern c_____ between dress-design and art was i_____ that had not been there before.

남자가 여자 옷을 만든다는 생각에는 현대적인 것이 전혀 없는데, 우리는 과거 여러세기 동안 그들이 그것을 하는 것을 보았다. 하지만 옛 시절에는 항상 고객 위주였고 그녀의 재단사는 무명의 장인이었는데, 아마도 재능이 있었을 테지만 없었을지도 모른다. 그녀는 여느 후원자처럼 자기 자신의 생각이 있었고, 유행하는 옷의 본이 없었으며, 재단사는 아마도 다른 사람들이 입고 있는 것에 관한 도움이 되는 제안을 가지고 그저 그녀의 생각에 따랐다. 예술적인 남성 고급 여성복 디자이너의 매우 성공적인 부상과 함께 19세기 후반에 시작하여, 유명해진 것은 바로 디자이너였고, 고객은 그의 영감 어린 관심에 의해 치켜세워졌다. 남성 예술가와 여성을 위한 그들의 창작물에 대한 찬탄의 분위기 속에서, 의상 디자이너는 처음으로 같은 종류의 창작자로서 번영했다. 의상 제작은 공예에 불과하다는 옛 규칙 대신에, 예전에는 없던 의상 디자인과 예술 사이의 현대적 연결이 만들어졌다.

34

In trying to explain how different disciplines attempt to u_____ autobiographical m_____ the l_____ critic Daniel Albright said, "Psychology is a garden, literature is a wilderness." He m_____, I believe, that psychology seeks to make patterns, find r_____, and ultimately impose order on human e_____ and behavior. Writers, by contrast, dive into the u_____, untamed depths of human experiences. What he said about u_____ memory can be e_____ to our questions about young children's minds. If we psychologists are too b_____ on i_____ the o_____ pattern, the regularities of children's minds, we may miss an e_____ and p_____ characteristic of our topic: the child's more unruly and i_____ ways of talking and thinking. It is not only the d_____ writer or literary scholar who seems drawn toward a somewhat wild and idiosyncratic way of thinking; young children are as well. The psychologist i_____ in young children may have to venture a little more often into the w_____ in order to get a good p_____ of how children think.

서로 다른 학문이 자전적 기억을 어떻게 이해하려고 하는지 설명하려고 노력할 때, 문학평론가 Daniel Albright는 '심리학은 정원이고, 문학은 황무지이다.'라고 말했다. 내가 믿기에, 그는 심리학은 패턴을 만들고, 규칙성을 찾으며, 궁극적으로 인간의 경험과 행동에 질서를 부여하고자 한다는 것을 의미했다. 반면에, 작가는 제멋대로 굴고, 길들여지지 않은 인간 경험의 깊이를 파고든다. 기억을 이해하는 것에 관해 그가 말한 것은 어린아이의 마음에 관한 우리의 질문으로 확장될 수 있다. 만약 우리 심리학자들이 질서 있는 패턴, 즉 아이 마음의 규칙성을 밝히는 데 너무 열중한다면, 우리는 우리 주제의 본질적이고 널리 퍼져 있는 특성, 즉 아이가 지닌 더 제멋대로 굴고 상상력이 풍부한 말하기 방식과 생각하기 방식을 놓칠 수도 있다. 다소 거칠고 색다른 사고방식에 끌리는 것처럼 보이는 것은 비단 성숙한 작가나 문학 연구가뿐만이아니라, 어린아이도 역시 그렇다. 어린아이에게 관심이 있는 심리학자는 아이가 어떻게 생각하는지에 관한 상황을 잘 파악하기 위해 위험을 무릅쓰고 조금 더 자주 황무지에 발을 들여놓아야 할지도 모른다.

35

Because plants tend to recover from d_____ more q_____ than animals, they are e_____ to the revitalization of d_____ environments. Why do plants have this p_____ ability to r_____ from disaster? It is largely because, unlike animals, they can g_____ new organs and tissues throughout their life cycle. This a_____ is due to the activity of plant meristems — regions of undifferentiated tissue in roots and shoots that can, in r_____ to specific cues, differentiate into new tissues and organs. If meristems are not d_____ during disasters, plants can r_____ and ultimately t_____ the destroyed or b_____ environment. You can see this phenomenon on a smaller scale when a tree struck by l_____ forms new branches that grow from the old scar. In addition to regeneration or resprouting of plants, d_____ areas can also r_____ through reseeding.

식물은 동물보다 더 빨리 재해로부터 회복하는 경향이 있기 때문에 손상된 환경의 소생에 필수적이다. 왜 식물에게는 재해로부터 회복할 수 있는 이런 특별한 능력이 있을까? 그것은 대체로 식물이 동물과 달리 생애 주기 내내 새로운 장기와 조직을 생성할 수 있기 때문이다. 이러한 능력은 식물의 분열 조직(分裂組織), 즉 특정 신호에 반응하여 새로운 세포 조직과 기관으로 분화할 수 있는, 뿌리와 싹에 있는 미분화 세포조직 부위의 활동 때문이다. 재해 시에 분열 조직(分裂組織)이 손상되지 않으면, 식물은 회복해서 파괴되거나 척박한 환경을 궁극적으로 변화시킬 수 있다. 번개 맞은 나무가 오래된 상처에서 자라나는 새로운 가지를 형성할 때 더 작은 규모로 이러한 현상을 볼 수 있다. 식물의 재생이나 재발아 외에도, 교란된 지역은 재파종을 통해서도 회복할 수 있다.

36

When two natural bodies of water stand at d_____ levels, building a canal between them presents a c_____ engineering problem. To make up for the difference in level, engineers build one or more water "steps," called locks, that c_____ ships or boats up or down between the two levels. A lock is an a_____ water basin. It has a long rectangular s_____ with concrete walls and a pair of gates at each end. When a vessel is going upstream, the upper g_____ s_____ c_____ as the ship enters the lock at the lower water level. The d_____ gates are then closed and more water is p_____ into the basin. The r_____ water lifts the vessel to the level of the upper body of water. Then the upper gates open and the ship p_____ through. For downstream passage, the process works the o_____ way. The ship e_____ the lock from the upper level, and water is p_____ from the lock until the ship is in line with the lower level.

두 곳의 자연 수역이 서로 다른 수위에 있을 때, 그것들 사이에 운하를 건설하는 것은 복잡한 공학적 문제를 만들어 낸다. (C) 수위의 차이를 보전하기 위해 공학자들은 두 수위 사이에서 배나 보트를 위아래로 운반하는, 로크라고 부르는 하나 이상의 물'계단'을 만든다. 로크는 인공적인 물웅덩이이다. 그것은 콘크리트 벽과 양 끝에 한쌍의 문이 있는 긴 직사각형 모양을 하고 있다. (B) 선박이 상류로 올라가고 있을 때는, 배가 더 낮은 수위에 있는 잠금 장치에 들어서는 동안 위쪽 문은 닫혀 있다. 그러고 나서 하류의 문이 닫히고 더 많은 물이 웅덩이 안으로 양수된다. 상승하는 물이 선박을 위쪽의 물 높이 수준까지 끌어올린다. (A) 그러고 나면 위쪽 문이 열리고 배가 통과한다. 하류 통행의 경우, 그 과정은 정반대로 작동한다. 배가 위쪽 수위의 로크로 들어오고, 배가 더 낮은 수위와 일치할 때까지 물이 로크로부터 양수된다.

37

Culture operates in ways we can consciously consider and d_____ but also in ways of which we are far less c_____. When we have to offer an a_____ of our actions, we consciously u_____ which excuses might p_____ a_____, given the p_____ circumstances we find ourselves in. In such situations, we use c_____ ideas as we would use a particular tool. We s_____ the cultural notion as we would select a screwdriver: certain jobs call for a Phillips head while others r_____ an Allen wrench. Whichever idea we insert into the c_____ to justify our actions, the point is that our m_____ are discursively a_____ to us. They are not hidden. In some cases, however, we are far less aware of why we b_____ a certain claim to be true, or how we are to explain why certain social realities e_____. Ideas about the social world become part of our worldview without our necessarily being a_____ of the source of the p_____ idea or that we even hold the idea at all.

문화는 우리가 의식적으로 고려하고 논의할 수 있는 방식뿐만 아니라 우리가 훨씬 덜 인식하는 방식으로도 작동한다. (B) 우리의 행동에 대해 설명을 제시해야 할 때, 우리는 우리가 처한 특정한 상황 하에 어떤 변명이 용인되는 것으로 판명될 수도 있는지를 의식적으로 이해한다. 그런 상황에서 우리는 특정 도구를 사용하는 것처럼 문화적 관념을 사용한다. (C) 우리는 스크루드라이버를 선택하는 것처럼 문화적 개념을 선택한다. 어떤 일은 십자 드라이버 헤드를 필요로 하지만 다른 일은 육각 랜치를 필요로 한다. 우리의 행동을 정당화하기 위해 대화에 어떤 생각을 넣든, 요점은 우리의 동기가 우리에게 만연하게 이용 가능하다는 것이다. 그것들은 숨겨져 있지 않다. (A) 하지만 우리는 어떤 경우에는 우리가 왜 어떤 주장을 사실이라고 믿는지 또는 어떤 사회적 현실이 존재하는 이유를 어떻게 우리가 설명할 것인지에 대해 훨씬 덜 알고 있다. 사회적 세계에 대한 관념은 우리가 특정한 관념의 출처에 대해서 혹은 심지어 우리가 그 관념을 갖고 있다는 것조차 반드시 알고 있지 않은 상태에서도 우리 세계관의 일부가 된다.

38

In everyday life, we tend to see any c_____ of people as a group. However, social psychologists use this term more p_____. In particular, they d_____ a group as two or more people who i_____ with, and exert m_____ i_____ on, each other. It is this sense of mutual interaction or inter-dependence for a common p_____ which d_____ the members of a group from a mere a_____ of individuals. For example, as Kenneth Hodge o_____, a collection of people who happen to go for a swim after work on the same day each week does not, s_____ speaking, c_____ a group because these swimmers do not interact with each other in a structured manner. By contrast, a squad of young c_____ swimmers who train every morning before going to school is a group because they not only share a c_____ objective (training for competition) but also interact with each other in formal ways (e.g., by warming up together beforehand). It is this sense of people coming together to a_____ a common o_____ that defines a "team".

일상생활에서 우리는 어떤 사람들의 무리라도 하나의 집단으로 보는 경향이 있다. 그러나 사회 심리학자들은 이 용어를 더 정확하게 사용한다. 특히, 그들은 서로에게 상호 작용을 하고, 상호 영향력을 발휘하는 둘 이상의 사람들로 집단을 정의한다. 집단의 구성원들을 단순한 개인들의 집합으로부터 구별하는 것은 바로 공동의 목적을 위한 서로의 상호 작용 또는 상호 의존감이다. 예를 들어, Kenneth Hodge가 진술한 바와 같이, 매주 같은 날에 일을 마치고 우연히 수영을 하러 가는 사람들의 무리는 엄밀히 말하면 집단을 구성하지 않는데, 이러한 수영하는 사람들은 구조적인 방식으로 상호 작용하지 않기 때문이다. 대조적으로, 매일 아침 학교에 가기 전에 훈련을 하는, 경쟁을 하는 어린 수영 선수들은 공동의 목표(경기를 위한 훈련)를 공유할 뿐만아니라 공식적인 방식(예를 들면, 미리 함께 워밍업을 함)으로 상호 작용하기 때문에 집단 '이다'. '팀'을 정의하는 것은 바로 공동의 목표를 달성하기 위해 사람들이 함께 모이는 이러한 생각이다.

39

Each new wave of technology is intended to e_____ user c_____, as well as improve s_____, but sometimes these do not n_____ go hand-in-hand. For example, the t_____ from magnetic stripe to e_____ chip slightly s_____ down transactions, sometimes f_____ customers in a hurry. Make a service too burdensome, and the p_____ customer will go elsewhere. This o_____ applies at s_____ levels. Passwords, double-key identification, and biometrics such as fingerprint-, iris-, and voice r_____ are all ways of keeping the a_____ details hidden from potential fraudsters, of keeping your data dark. But they all i_____ add a burden to the use of the account. On top of the hurdles i_____ in accessing his or her money, if a s_____ fraud is d_____, the account holder has to deal with the phone call asking if he or she made the s_____ transactions. This is all u_____ at some level — indeed, it can be reassuring knowing that your bank is keeping a_____ to p_____ you — but it becomes t_____ if too many such calls are r_____.

각각의 새로운 기술의 물결은 보안을 향상할 뿐만 아니라, 사용자 편의성을 향상하려는 의도이지만, 때때로 이것들이 반드시 함께 진행되지는 않는다. 예를 들어 마그네틱 띠에서 내장형 칩으로의 전환은 거래(의 속도)를 약간 늦췄는데, 때로 바쁜 고객을 좌절시켰다. 서비스를 너무 부담스럽게 만들면, 잠재 고객은 다른 곳으로 갈 것이다. 이런 장벽은 여러 수준에서 적용된다. 비밀번호, 이중키 확인, 지문, 홍채 및 음성 인식과 같은 생체 인식은 모두 잠재적인 사기꾼으로부터 계정 세부 정보를 숨겨 주는, 즉 여러분의 데이터를 비밀로 유지하는 방법이다. 하지만 그것들은 모두 불가피하게 계좌 사용에 부담을 가중한다. 자신의 돈에 접근하는 데 도입된 난관에 더해, 만약 의심스러운 사기가 감지되면, 예금주는 본인이 그 의심스러운 거래를 했는지 묻는 내용의 전화 통화를 응대해야만 한다. 이것은 모두 어느 정도 도움이 되며, 실제로, 여러분의 은행이 여러분을 보호하기 위해 경계를 늦추지 않고 있다는 것을 알게 되어 안심이 될 수 있지만, 그러한 전화를 너무 많이 받게 되면 귀찮은 일이 된다.

40

A striving to demonstrate individual personality through designs should not be s_____. Most designers are e_____ to work as individuals, and design literature c_____ countless references to 'the designer'. Personal flair is without doubt an a_____ necessity in some product categories, p_____ r_____ small objects, with a low degree of technological c_____, such as furniture, lighting, small appliances, and housewares. In larger-scale projects, however, even where a strong personality exercises p_____ i_____, the fact that s_____ numbers of designers are employed in implementing a concept can easily be overlooked. The emphasis on i_____ is therefore p_____ — rather than actually designing, many s_____ designer 'personalities' function more as c_____ managers. A distinction needs to be made between designers working truly alone and those working in a group. In the l_____ case, management o_____ and p_____ can be equally as r_____ as designers' c_____.

디자인을 통해 개인의 개성을 보여주기 위한 노력은 놀라운 것이 아닐 것이다. 대부분의 디자이너는 개인으로 일하도록 교육받고, 디자인 문헌은 '그 디자이너'에 대한 무수히 많은 언급을 담고 있다. 개인적인 재능이 일부 상품 범주에서는 절대적으로 필요한 것임에는 의심할 여지가 없는데, 가구, 조명, 소형 가전, 그리고 가정용품들과 같은, 낮은 단계의 기술적 복잡성을 가진 상대적으로 작은 물건들에서 특히 그렇다. 그러나, 더 큰 규모의 프로젝트에서, 심지어 강한 개성이 강력한 힘을 발휘하는 곳에서도, 상당한 수의 디자이너가 계획을 실행하는 데 참여한다는 사실이 쉽게 간과될 수 있다. 그러므로 개성에 대한 강조는 문제가 있는데, 많은 성공한 디자이너 '유명인사들'이 실제로 디자인을 하기보다는 창의적인 관리자로서의 기능을 더 많이 한다. 진정으로 혼자 일하는 디자이너와 집단을 이루어 일하는 디자이너는 구분되어야 한다. 후자의 경우, 관리 조직과 과정들이 디자이너들의 창의성 못지않게 똑같이 의미있을 수 있다.

[41 ~ 42]

Climate change experts and environmental humanists a_____ agree that the climate crisis is, at its core, a crisis of the i_____ and much of the popular imagination is s_____ by f_____. In his 2016 book The Great Derangement, anthropologist and novelist Amitav Ghosh takes on this r_____ between imagination and environmental management, a_____ that humans have failed to r_____ to climate change at least in part because fiction f_____ to believably represent it. Ghosh e_____ that climate change is l_____ a_____ from contemporary fiction because the cyclones, floods, and other catastrophes it brings to mind s_____ seem too "improbable" to belong in stories about everyday life. But climate change does not only r_____ itself as a series of e_____ events. In fact, as environmentalists and ecocritics from Rachel Carson to Rob Nixon have pointed out, environmental change can be "imperceptible"; it proceeds g_____, only occasionally producing "explosive and spectacular" events. Most climate change i_____ cannot be observed day-to-day, but they become v_____ when we are c_____ with their accumulated impacts.

Climate change evades our imagination because it poses significant representational challenges. It cannot be o_____ in "human time," which is why documentary filmmaker Jeff Orlowski, who tracks climate change e_____ on glaciers and coral reefs, uses "before and after" photographs taken s_____ months apart in the same place to highlight changes that o_____ gradually.

기후 변화 전문가들과 환경 인문주의자들은 기후 위기가 근원적으로 상상력의 위기이며 대중적 상상력의 많은 부분이 소설에 의해 형성된다는 데 똑같이 동의한다. 인류학자이자 소설가인 Amitav Ghosh는 자신의 2016년도 책 'The Great Derangement'에서 상상과 환경 관리 사이의 이러한 관계를 다루면서, 인간이 기후변화에 대응하는 데 실패한 것은 최소한 부분적으로는 소설이 그것을 믿을 수 있게 표현하지 못하기 때문이라고 주장한다. Ghosh는 기후 변화는 그것이 상기시키는 사이클론, 홍수, 그리고 다른 큰 재해들이 그야말로 일상생활에 관한 이야기에 속하기에는 너무 '있을 것 같지 않은' 것처럼 보이기 때문에 현대 소설에 대체로 존재하지 않는다고 설명한다. 그러나 기후 변화는 일련의 놀라운 사건들로만 자신을 드러내는 것은 아니다. 사실, Rachel Carson에서 Rob Nixon에 이르는 환경론자들과 생태 비평가들이 지적했듯이, 환경 변화는 '감지할 수 없을' 수 있는데, 즉 그것은 빠르게(→ 점진적으로) 진행되며, 단지 이따금 '폭발적이고 극적인' 사건들을 만들어 낼 뿐이다. 대부분의 기후 변화의 영향은 매일 관찰될 수는 없지만, 우리가 그것들의 축적된 영향에 직면할 때 그것들은 가시화된다.

기후 변화는 그것이 중요한 표현상의 문제를 제기하기 때문에 우리의 상상에서 벗어난다. 그것은 '인간의 시간' 동안에는 관찰될 수 없는데, 그것이 빙하와 산호초에 미치는 기후 변화의 영향을 추적하는 다큐멘터리 영화 제작자 Jeff Orlowski가 점진적으로 일어난 변화를 강조하기 위해 수개월 간격으로 같은 장소에서 찍은 '전과 후'사진을 이용하는 이유이다.

[43 ~ 45]

Walking out of Charing Cross Station in London, Emilia and her t_____ c_____, Layla, already felt their hearts pounding. It was the second day of their European summer trip. They were about to visit one of the world's most f_____ art galleries. The two of them started hurrying with e_____. Suddenly, Emilia shouted, "Look! There it is! We're finally at the National Gallery!" Layla laughed and r_____, "Your dream's finally come true!"

Upon e_____ the National Gallery, Emilia knew exactly where to go first. She grabbed Layla's hand and dragged her h_____ to find van Gogh's Sunflowers. It was Emilia's f_____ painting and had inspired her to become a painter. Emilia loved his use of bright colors and light. She couldn't wait to finally see his m_____ in person. "It'll be a_____ to see how he c_____ the feelings of i_____ and l_____ in his work," she said eagerly.

However, after searching all the exhibition rooms, Emilia and Layla couldn't find van Gogh's m_____ anywhere. "That's weird. Van Gogh's Sunflowers should be here. Where is it?" Emilia looked upset, but Layla kept calm and said, "Maybe you've m_____ a n_____ about it. Check the National Gallery app." Emilia c_____ it quickly. Then, she sighed, "Sunflowers isn't here! It's been lent to a d_____ gallery for a special exhibition. I can't believe I didn't check!"

"Don't lose hope yet! Which gallery is the special exhibition at?" Layla asked. Emilia r_____, "Well, his Sunflowers is still in England, but it's at a gallery in Liverpool. That's a long way, isn't it?" After a quick s_____ on her phone, Layla stated, "No! It's only two hours to Liverpool by train. The next train leaves in an hour. Why don't we take it?" After c_____ the idea, Emilia, now r_____, responded, "Yeah, but you always wanted to see Rembrandt's paintings. Let's do that first, Layla! Then, after l_____, we can catch the next train." Layla smiled b_____.

(A) 런던의 Charing Cross 역에서 걸어 나오면서, Emilia와 그녀의 여행 동반자인 Layla는 벌써 가슴이 두근거리는 것을 느꼈다. 그들의 유럽 여름 여행 둘째 날이었다. 그들은 세계에서 가장 유명한 미술관 중 하나를 방문할 계획이었다. 그들 두 사람은 흥분하여 서두르기 시작했다. 갑자기 Emilia가 "봐! 저기 있어! 우리는 드디어 내셔널 갤러리에 도착한 거야!"라고 소리쳤다. Layla는 웃으며, "너의 꿈이 드디어 이루어졌구나!"라고 대답했다

(D) 내셔널 갤러리에 들어가자마자, Emilia는 처음에 어디로 가야 할지를 정확하게 알았다. 그녀는 van Gogh의 Sunflowers 를 찾으러 Layla의 손을 꼭 잡고 서둘러 그녀를 끌고 갔다. 그것은 Emilia가 가장 좋아하는 그림이며 그녀가 화가가 되도록 영감을 준 것이었다. Emilia는 그의 밝은 색상과 빛의 사용을 아주 좋아했다. 그녀는 그의 걸작을 드디어 직접 보기를 열망했다. 그녀는 "그가 자기 작품에서 고립과 고독의 느낌을 전달한 방식을 보면 놀라울 거야."라고 잔뜩 기대하며 말했다.

(C) 그러나, 모든 전시실을 찾아본 후에도, Emilia와 Layla는 van Gogh의 걸작을 어디에서도 찾을 수가 없었다. "이상해. van Gogh의 Sunflowers 는 여기 있어야 하는데. 그게 어디에 있지?" Emilia는 속상해 보였지만, Layla는 침착함을 유지하며 "아마 네가 그것에 대한 공지를 놓쳤을 거야. 내셔널 갤러리의 앱을 확인해 봐."라고 말했다. Emilia는 빠르게 그것을 확인했다. 그런 다음, 그녀는 한숨을 쉬며, "Sunflowers 는 여기에 없어! 그것은 특별 전시회를 위해 다른 미술관에 대여되었어. 내가 확인을 안 했다는 걸 나는 믿을 수가 없어!"라고 말했다.

(B) Layla는 "아직 희망을 잃지 마! 특별 전시회는 어느 미술관에서 하는 거야?"라고 물었다. Emilia는 "음, 그의 Sunflowers 는 여전히 잉글랜드에 있지만, 그것은 리버풀의 미술관에 있어. 그곳은 거리가 멀지, 그렇지 않아?"라고 대답했다. 전화로 빠르게 검색해 본 다음, Layla는 "아냐! 리버풀까지 기차로 겨우 두 시간 거리야. 다음 기차는 한 시간 후에 떠나. 우리 그걸 타는 게 어때?"라고 말했다. 그 생각을 고려해 본 다음, 이제 마음이 놓인 Emilia는 "응, 하지만 너는 항상 Rembrandt의 그림들을 보고 싶어 했잖아. 그걸 먼저 하자, Layla! 그런 다음, 점심 식사 후에, 그다음 기차를 탈 수 있어."라고 대답했다. Layla가 밝게 미소를 지었다.

Dear Natalie Talley,

My name is Olivia Spikes, the mayor of Millstown. Before you 1) **attack/ attend** the world championships next month, on behalf of everyone in Millstown, I wish to let you know 2) **that/ what** we are 3) **supporting/ supported** you all the way. As you are the first famous figure skater from Millstown, we are all big fans of yours. Our community was so 4) **pride/ proud** of you for winning the national championships last year. Your 5) **amazing/ amazed** performance really moved us all. We all 6) **believe/ relieve** 7) **that/ what** you are going to impress the entire nation again. Your hometown supporters will cheer for you whenever you 8) **perform/ reform** on the ice. Good luck!

19

"Daddy!" Jenny called, waving a yellow crayon in her little hand. Nathan 9) **approached/ approached at** her, wondering why she was 10) **calling/ called** him. Jenny, his three-year-old toddler, was drawing a big circle on a piece of paper. "What are you doing, Sweetie?" Nathan 11) **asked/ was asked** with interest. She just kept 12) **to draw/ drawing** without reply. He continued watching her, wondering 13) **that/ what** she was working on. She was drawing something 14) **that/ what** looked like a face. When she finished it, Jenny shouted, "Look, Daddy!" She 15) **held/ was held** her artwork up proudly. 16) **Take/ Taking** a closer look, Nathan recognized 17) **that/ what** it was his face. The face had two big eyes and a beard just like his. He loved Jenny's work. 18) **Filling/ Filled** with joy and happiness, Nathan gave her a big hug.

20

Becoming competent in another culture 19) **meaning/ means** looking beyond behavior to see if we can understand the attitudes, beliefs, and values that motivate 20) **that/ what** we 21) **observe/ reserve**. By looking only at the visible aspects of culture — customs, clothing, food, and language — we develop a short-sighted view of intercultural understanding — just the tip of the iceberg, really. If we are to be 22) **successful/ successive** in our business interactions with people who have 23) **different/ indifferent** values and beliefs about how the world is ordered, then we must go below the surface of what it means to understand culture and attempt to see 24) **that/ what** Edward Hall calls the "hidden dimensions." Those hidden aspects are the very foundation of culture and 25) **is/ are** the reason why culture is actually more than meets the eye. We tend not to 26) **notice/ be noticed** those cultural norms until they violate 27) **that/ what** we consider to be common sense, good judgment, or the 28) **nature/ nurture** of things.

21

You may feel there is something scary about an algorithm deciding 29) **that/ what** you might like. Could it mean 30) **that/ what**, if computers conclude you won't like something, you will never get the chance to 31) **see/ be seen** it? Personally, I really enjoy being directed toward new music 32) **that/ what** I 33) **might/ should** not have found by myself. I can quickly get stuck in a rut 34) **where/ which** I put on the same songs over and over. That's 35) **why/ because** I've always enjoyed the radio. But the algorithms that are now pushing and pulling me through the music library are perfectly suited to finding gems 36) **that/ what** I'll like. My worry originally about such algorithms was 37) **that/ what** they might drive everyone into certain parts of the library, 38) **leave/ leaving** others lacking listeners. Would they cause a convergence of tastes? But thanks to the nonlinear and chaotic mathematics usually behind 39) **them/ themselves**, this doesn't happen. A small divergence in my likes compared to yours can send us off into different far corners of the library.

22

Historically, drafters of tax legislation 40) **is/ are** attentive to questions of economics and history, and 41) **more/ less** attentive to moral questions. Questions of morality are often pushed to the side in legislative debate, labeled too controversial, too 42) **simple/**

difficult to answer, or, worst of all, irrelevant to the project. But, in fact, the moral questions of taxation 43) **is/ are** at the very heart of the creation of tax laws. Rather than irrelevant, moral questions are fundamental to the imposition of tax. Tax is the application of a society's theories of distributive justice. Economics can go a long way towards 44) **helping/ helped** a legislature determine whether or not a particular tax law will help 45) **achieve/ fail** a particular goal, but economics cannot, in a vacuum, identify the goal. 46) **Creation/ Creating** tax policy requires identifying a moral goal, 47) **which/ what** is a task 48) **that/ what** must involve ethics and moral analysis.

23

Environmental learning occurs when farmers base decisions on 49) **observances/ observations** of "payoff" information. They may 50) **observe/ reserve** their own or neighbors' farms, but it is the empirical results they are 51) **using/ used** as a guide, not the neighbors themselves. They are looking at farming activities as experiments and assessing such factors as relative advantage, compatibility with 52) **existing/ insisting** resources, difficulty of use, and "trialability" — how well can it be experimented with. But that criterion of "trialability" turns out to be a real problem; it's true 53) **that/ what** farmers are always experimenting, but working farms are very flawed laboratories. Farmers cannot set up the controlled conditions of professional test plots in research facilities. Farmers also often confront complex and difficult-to-observe phenomena 54) **that/ what** would be hard to manage even if they could run controlled experiments. Moreover farmers can rarely 55) **acquire/ be acquired** payoff information on more than a few of the production methods they might use, 56) **which/ what** 57) **making/ makes** the criterion of "relative advantage" hard to measure.

24

Not only musicians and psychologists, but also committed music enthusiasts and experts often 58) **voicing/ voice** the opinion 59) **that/ what** the beauty of music 60) **lies/ lays** in an expressive deviation from the exactly defined score. Concert performances become 61) **interesting/ interested** and gain in attraction from the fact that they go far beyond the information printed in the score. In his early studies on musical performance, Carl Seashore 62) **discovering/ discovered** 63) **that/ what** musicians only rarely play two equal notes in exactly the same way. Within the same metric structure, there is a wide potential of variations in tempo, volume, tonal quality and intonation. Such variation is based on the composition but 64) **diverge/ diverges** from it individually. We generally call this 'expressivity'. This 65) **explains/ is explained** why we do not lose interest when we hear different artists perform the same piece of music. It also explains why it is worthwhile for following generations to 66) **repeat/ be repeated** the same repertoire. New, inspiring interpretations 67) **help/ helping** us to expand our understanding, 68) **which/ what** 69) **serves/ reserves** to enrich and animate the music scene.

26

Leon Festinger was an American social psychologist. He was born in New York City in 1919 to a Russian immigrant family. As a graduate student at the University of Iowa, Festinger 70) **influenced/ was influenced** by Kurt Lewin, a leading social psychologist. After graduating from there, he became a professor at the Massachusetts Institute of Technology in 1945. He 71) **later/ latter** moved to Stanford University, 72) **where/ which** he continued his work in social psychology. His theory of social comparison 73) **earning/ earned** him a good reputation. Festinger actively participated in international scholarly cooperation. In the late 1970s, he 74) **turned/ was turned** his interest to the field of history. He was one of the most cited psychologists of the twentieth century. Festinger's theories still 75) **play/ playing** an important role in psychology today.

29

Recognizing ethical issues is the most important step in understanding business ethics. An ethical issue is

an identifiable problem, situation, or opportunity 76) **that/ what** 77) **requires/ is required** a person 78) **to choose/ choosing** from among several actions 79) **that/ what** may be evaluated as right or wrong, ethical or unethical. Learning how to choose from alternatives and 80) **making/ make** a decision requires not only good personal values, but also knowledge competence in the business area of concern. Employees also need to know when to rely on their organizations' policies and codes of ethics or have discussions with co-workers or managers on appropriate conduct. Ethical decision making is not always easy 81) **because/ because of** there are always gray areas 82) **that/ what** 83) **create/ are created** dilemmas, no matter how decisions are made. For instance, should an employee report on a co-worker engaging in time theft? Should a salesperson leave out facts about a product's poor safety record in his presentation to a customer? Such questions 84) **requiring/ require** the decision maker 85) **to evaluate/ evaluating** the ethics of his or her choice and decide whether to ask for guidance.

30

Although the wonders of modern technology 86) **has/ have** provided people with opportunities beyond the wildest dreams of our ancestors, the good, as usual, 87) **weakened/ is weakened** by a downside. One of those downsides 88) **is/ are** 89) **that/ what** anyone who so chooses can pick up the virtual megaphone that is the Internet and put in their two cents on any of an infinite number of topics, regardless of their qualifications. After all, on the Internet, there are no regulations 90) **prevent/ preventing** a kindergarten teacher from offering medical advice or a physician from suggesting ways to safely make structural changes to your home. As a result, misinformation gets disseminated as information, and 91) **this/ it** is not always easy to differentiate the two. This can be particularly 92) **frustrating/ frustrated** for scientists, who spend their lives 93) **to learn/ learning** how to understand the intricacies of the world around them, only to have their work summarily 94) **challenging/ challenged** by people 95) **who/ whose** experience with the topic can be measured in minutes. This frustration is then amplified by the fact 96) **that/ what**, to the general public, both the scientist and the challenger are awarded 97) **equal/ unequal** credibility.

31

More than just having territories, animals also partition 98) **them/ themselves**. And this insight 99) **turning/ turned** out to be particularly 100) **useful/ useless** for zoo husbandry. An animal's territory has an internal arrangement that Heini Hediger 101) **compared/ confused** to the inside of a person's house. Most of 102) **whom/ us** assign separate functions to separate rooms, but even if you look at a one-room house you will find the same internal specialization. In a cabin or a mud hut, or even a Mesolithic cave from 30,000 years ago, this part is for cooking, that part is for sleeping; this part is for making tools and weaving, that part is for waste. We 103) **are kept/ keep** a neat functional organization. To a varying extent, other animals do the same. A part of an animal's territory is for eating, a part for sleeping, a part for swimming or wallowing, a part may be set aside for waste, 104) **depend/ depending** on the species of animal.

32

Fans feel for feeling's own sake. They make meanings beyond 105) **that/ what** seems to be on offer. They build identities and experiences, and 106) **making/ make** artistic creations of their own to share with others. A person can be an individual fan, feeling an "idealized connection with a star, strong feelings of memory and nostalgia," and engaging in activities 107) **like/ alike** "collecting to develop a sense of self." But, more often, individual experiences are embedded in social contexts 108) **where/ which** other people with shared attachments socialize around the object of their affections. Much of the pleasure of fandom 109) **coming/ comes** from being connected to other fans. In their diaries, Bostonians of the 1800s 110) **describing/ described** being part of the crowds at concerts as part of the pleasure of attendance. A compelling argument can be 111) **made/ making** that what fans love is less the object of their fandom

than the attachments to (and differentiations from) one another 112) **that/ what** those affections afford.

33

There was nothing modern about the idea of men making women's clothes — we saw them 113) **to do/ doing** it for centuries in the past. In the old days, however, the client was always primary and her tailor was an obscure craftsman, perhaps talented but perhaps not. She had her own ideas 114) **like/ alike** any patron, there were no fashion plates, and the tailor was simply at her service, perhaps with 115) **helpful/ helpless** suggestions about what others were wearing. 116) **Begin/ Beginning** in the late nineteenth century, with the hugely 117) **successful/ successive** rise of the artistic male couturier, it was the designer who became celebrated, and the client elevated by his inspired attention. In a climate of admiration for male artists and their female creations, the dress-designer first 118) **flourishing/ flourished** as the same sort of creator. Instead of the old rule 119) **that/ what** dressmaking is a craft, a modern connection between dress-design and art was invented 120) **that/ what** had not been there before.

34

In trying to explain how different disciplines attempt to 121) **understand/ misunderstand** autobiographical memory the literary critic Daniel Albright said, "Psychology is a garden, literature is a wilderness." He meant, I believe, 122) **that/ what** psychology seeks to make patterns, find regularity, and ultimately impose order on human experience and behavior. Writers, by contrast, dive into the unruly, untamed depths of human experiences. 123) **That/ What** he 124) **said/ was said** about understanding memory can be extended to our questions about young children's minds. If we psychologists are too bent on identifying the orderly pattern, the regularities of children's minds, we may 125)**have/ miss** an essential and pervasive characteristic of our topic: the child's more unruly and imaginative ways of talking and thinking. It is not only the developed writer or literary scholar who seems drawn toward a somewhat wild and idiosyncratic way of thinking; young children are as well. The psychologist 126) **interesting/ interested** in young children may have to venture a little more often into the wilderness in order to get a good picture of how children think.

35

Because plants tend to recover from disasters 127) **more/ less** quickly than animals, they are essential to the revitalization of damaged environments. Why do plants 128) **have/ behave** this preferential ability to 129) **discover/ recover** from disaster? It is largely because, unlike animals, they can 130) **generate/ be generated** new organs and tissues throughout their life cycle. This ability is due to the activity of plant meristems — regions of undifferentiated tissue in roots and shoots 131) **that/ what** can, in response to specific cues, differentiate into new tissues and organs. If meristems are not damaged 132) **during/ while** disasters, plants can recover and ultimately transform the destroyed or barren environment. You can 133) **see/ be seen** this phenomenon on a smaller scale when a tree struck by lightning forms new branches 134) **that/ what** grow from the old scar. In addition to regeneration or resprouting of plants, disturbed areas can also recover through reseeding.

36

When two natural bodies of water stand at different levels, 135) **build/ building** a canal between 136) **them/ themselves** presents a complicated engineering problem. To make up for the difference in level, engineers build one or more water "steps," 137) **called/ recalled** locks, that carry ships or boats up or down between the two levels. A lock is an artificial water basin. It has a long rectangular shape with concrete walls and a pair of gates at each end. When a vessel is going upstream, the upper gates 138) **stay/ staying** closed as the ship enters the lock at the lower water level. The downstream gates are then closed and more water is pumped into the basin. The 139) **rising/ raising** water lifts the vessel to the level of the upper body of water. Then the upper gates open and the ship passes through. For

downstream passage, the process works the opposite way. The ship 140) **entering/ enters** the lock from the upper level, and water 141) **pumped/ is pumped** from the lock until the ship is in line with the lower level.

37

Culture operates in ways we can consciously consider and discuss but also in ways of which we are far 142) **more/ less** cognizant. When we have to 143) **offer/ suffer** an account of our actions, we consciously understand which excuses might 144) **prove/ improve** acceptable, given the particular circumstances we find ourselves in. In such situations, we 145) **use/ are used** cultural ideas as we would use a particular tool. We 146) **elect/ select** the cultural notion as we would select a screwdriver: certain jobs call for a Phillips head 147)**during/ while** others require an Allen wrench. Whichever idea we insert into the conversation to justify our actions, the point is 148) **that/ what** our motives are discursively available to us. They are not hidden. In some cases, however, we are far less aware of why we believe a certain claim to be true, or how we are to explain why certain social realities 149) **exist/ resist**. Ideas about the social world become part of our worldview without our necessarily being 150) **aware/ unaware** of the source of the particular idea or that we even hold the idea at all.

38

In everyday life, we tend to see any collection of people as a group. However, social psychologists 151) **use/ are used** this term more precisely. In particular, they 152) **define/ refine** a group as two or more people 153) **who/ whose** interact with, and exert mutual influences on, each other. It is this sense of mutual interaction or inter-dependence for a common purpose which distinguishes the members of a group from a mere aggregation of individuals. For example, as Kenneth Hodge 154) **served/ observed**, a collection of people who happen to go for a swim after work on the same day each week does not, strictly speaking, 155) **constituting/ constitute** a group 156) **because/ because of** these swimmers do not interact with each other in a structured manner. By contrast, a squad of young competitive swimmers 157) **who/ whose** train every morning before going to school is a group because they not only share a common objective (training for competition) but also interact with each other in formal ways (e.g., by warming up together beforehand). It is this sense of people coming together to 158) **achieve/ fail** a common objective 159) **that/ what** defines a "team".

39

Each new wave of technology is intended to 160) **enhance/ be enhanced** user convenience, as well as 161) **prove/ improve** security, but sometimes these do not necessarily go hand-in-hand. For example, the transition from magnetic stripe to embedded chip slightly 162) **slowing/ slowed** down transactions, sometimes frustrating customers in a hurry. Make a service too burdensome, and the potential customer will go elsewhere. This obstacle 163) **applies/ supplies** at several levels. Passwords, double-key identification, and biometrics such as fingerprint-, iris-, and voice recognition are all ways of keeping the account details hidden from potential fraudsters, of keeping your data dark. But they all inevitably 164) **add/ aid** a burden to the use of the account. On top of the hurdles 165) **introducing/ introduced** in accessing his or her money, if a suspected fraud is detected, the account holder has to deal with the phone call 166) **asking/ asked** if he or she made the suspicious transactions. This is all 167) **useful/ useless** at some level — indeed, it can be reassuring knowing 168) **that/ what** your bank is keeping alert to protect you — but it becomes tiresome if too many such calls are 169) **refused/ received**.

40

A striving to demonstrate individual personality through designs should not be 170) **surprising/ surprised**. Most designers 171) **educated/ are educated** to work as individuals, and design literature contains countless references to 'the designer'. Personal flair is without doubt an absolute necessity in some product categories, particularly relatively small objects, with a low degree of technological complexity, such as furniture, lighting, small appliances, and housewares. In larger-scale projects, however, even where a

strong personality exercises 172) **powerful/ powerless** influence, the fact 173) **that/ what** substantial numbers of designers 174) **employed/ are employed** in implementing a concept can easily be overlooked. The emphasis on individuality is therefore problematic — rather than actually designing, many 175) **successful/ successive** designer 'personalities' function more as creative managers. A distinction needs to be 176) **made/ making** between designers working truly alone and those working in a group. In the 177) **later/ latter** case, management organization and processes can be equally as 178) **relevant/ irrelevant** as designers' creativity.

[41 ~ 42]

Climate change experts and environmental humanists 179) **like/ alike** agree 180) **that/ what** the climate crisis is, at its core, a crisis of the imagination and much of the popular imagination 181) **shaped/ is shaped** by fiction. In his 2016 book The Great Derangement, anthropologist and novelist Amitav Ghosh takes on this relationship between imagination and environmental management, 182) **argue/ arguing** 183) **that/ what** humans have failed to respond to climate change at least in part 184) **because/ because of** fiction fails to believably represent it. Ghosh explains 185) **that/ what** climate change is largely absent from contemporary fiction because the cyclones, floods, and other catastrophes it brings to mind simply seem too "improbable" to belong in stories about everyday life. But climate change does not only 186) **reveal/ hide** itself as a series of extraordinary events. In fact, as environmentalists and ecocritics from Rachel Carson to Rob Nixon have pointed out, environmental change can be "imperceptible"; it proceeds gradually, only occasionally producing "explosive and spectacular" events. Most climate change impacts cannot be 187) **observing/ observed** day-to-day, but they become visible when we are confronted with their accumulated impacts.

Climate change evades our imagination 188) **because/ because of** it poses significant representational challenges. It cannot be observed in "human time," 189) **which/ what** is why documentary filmmaker Jeff Orlowski, who tracks climate change 190) **affects/ effects** on glaciers and coral reefs, 191) **use/ uses** "before and after" photographs taken several months apart in the same place to highlight changes 192) **that/ what** occurred gradually.

[43 ~ 45]

Walking out of Charing Cross Station in London, Emilia and her traveling companion, Layla, already felt their hearts pounding. It was the second day of their European summer trip. They were about to 193) **visit/ invite** one of the world's most famous art galleries. The two of 194) **whom/ them** started hurrying with excitement. Suddenly, Emilia shouted, "Look! There it is! We're finally at the National Gallery!" Layla laughed and responded, "Your dream's finally come true!"

Upon 195) **enter/ entering** the National Gallery, Emilia knew exactly where to go first. She grabbed Layla's hand and dragged her hurriedly to find van Gogh's Sunflowers. It was Emilia's favorite painting and had inspired her 196) **to become/ becoming** a painter. Emilia loved his use of bright colors and light. She couldn't wait to finally see his masterpiece in person. "It'll be 197) **amazing/ amazed** to see how he communicated the feelings of isolation and loneliness in his work," she said eagerly.

However, after searching all the exhibition rooms, Emilia and Layla couldn't find van Gogh's masterpiece anywhere. "That's weird. Van Gogh's Sunflowers should be here. Where is it?" Emilia 198) **looked/ was looked** upset, but Layla kept calm and said, "Maybe you've missed a notice about it. Check the National Gallery app." Emilia checked it 199) **quick/ quickly**. Then, she sighed, "Sunflowers isn't here! It's been lent to a different gallery for a special exhibition. I can't 200) **believe/ relieve** I didn't check!"

"Don't lose hope yet! Which gallery is the special exhibition at?" Layla asked. Emilia responded, "Well, his Sunflowers is still in England, but 201) **its/ it's** at a gallery in Liverpool. That's a long way, isn't it?" After a quick search on her phone, Layla stated, "No! It's only two hours to Liverpool by train. The next train leaves in an hour. Why don't we take it?" After 202) **consideration/ considering** the idea, Emilia, now relieved, responded, "Yeah, but you always wanted to see Rembrandt's paintings. Let's do that first, Layla! Then, after lunch, we can 203) **miss/ catch** the next train." Layla smiled brightly.

Dear Natalie Talley,

My name is Olivia Spikes, the mayor of Millstown.

(A) Our community was so proud of you for winning the national championships last year. Your amazing performance really moved us all.

(B) We all believe that you are going to impress the entire nation again. Your hometown supporters will cheer for you whenever you perform on the ice. Good luck!

(C) Before you attend the world championships next month, on behalf of everyone in Millstown, I wish to let you know that we are supporting you all the way. As you are the first famous figure skater from Millstown, we are all big fans of yours.

"Daddy!" Jenny called, waving a yellow crayon in her little hand.

(A) He continued watching her, wondering what she was working on. She was drawing something that looked like a face. When she finished it, Jenny shouted, "Look, Daddy!" She held her artwork up proudly.

(B) Nathan approached her, wondering why she was calling him. Jenny, his three-year-old toddler, was drawing a big circle on a piece of paper. "What are you doing, Sweetie?" Nathan asked with interest. She just kept drawing without reply.

(C) Taking a closer look, Nathan recognized that it was his face. The face had two big eyes and a beard just like his. He loved Jenny's work. Filled with joy and happiness, Nathan gave her a big hug.

Becoming competent in another culture means looking beyond behavior to see if we can understand the attitudes, beliefs, and values that motivate what we observe.

(A) By looking only at the visible aspects of culture — customs, clothing, food, and language — we develop a short-sighted view of intercultural understanding — just the tip of the iceberg, really.

(B) Those hidden aspects are the very foundation of culture and are the reason why culture is actually more than meets the eye. We tend not to notice those cultural norms until they violate what we consider to be common sense, good judgment, or the nature of things.

(C) If we are to be successful in our business interactions with people who have different values and beliefs about how the world is ordered, then we must go below the surface of what it means to understand culture and attempt to see what Edward Hall calls the "hidden dimensions."

206) 윗글의 알맞은 순서를 배열하시오. [주관식]

21

You may feel there is something scary about an algorithm deciding what you might like.

(A) That's why I've always enjoyed the radio. But the algorithms that are now pushing and pulling me through the music library are perfectly suited to finding gems that I'll like. My worry originally about such algorithms was that they might drive everyone into certain parts of the library, leaving others lacking listeners. Would they cause a convergence of tastes?

(B) But thanks to the nonlinear and chaotic mathematics usually behind them, this doesn't happen. A small divergence in my likes compared to yours can send us off into different far corners of the library.

(C) Could it mean that, if computers conclude you won't like something, you will never get the chance to see it? Personally, I really enjoy being directed toward new music that I might not have found by myself. I can quickly get stuck in a rut where I put on the same songs over and over.

208) 윗글의 알맞은 순서를 배열하시오. [주관식]

209) 윗글의 주제로 가장 적절한 것을 고르시오.
① enjoying the radio ② finding gems
③ the scary AI ④ a convergence of tastes
⑤ help from music algorithm

22

Historically, drafters of tax legislation are attentive to questions of economics and history, and less attentive to moral questions.

(A) But, in fact, the moral questions of taxation are at the very heart of the creation of tax laws. Rather than irrelevant, moral questions are fundamental to the imposition of tax. Tax is the application of a society's theories of distributive justice.

(B) Economics can go a long way towards helping a legislature determine whether or not a particular tax law will help achieve a particular goal, but economics cannot, in a vacuum, identify the goal. Creating tax policy requires identifying a moral goal, which is a task that must involve ethics and moral analysis.

(C) Questions of morality are often pushed to the side in legislative debate, labeled too controversial, too difficult to answer, or, worst of all, irrelevant to the project.

⑤ 과도한 세금 부과의 문제

23

Environmental learning occurs when farmers base decisions on observations of "payoff" information.

(A) Farmers also often confront complex and difficult-to-observe phenomena that would be hard to manage even if they could run controlled experiments. Moreover farmers can rarely acquire payoff information on more than a few of the production methods they might use, which makes the criterion of "relative advantage" hard to measure.

(B) But that criterion of "trialability" turns out to be a real problem; it's true that farmers are always experimenting, but working farms are very flawed laboratories. Farmers cannot set up the controlled conditions of professional test plots in research facilities.

(C) They may observe their own or neighbors' farms, but it is the empirical results they are using as a guide, not the neighbors themselves. They are looking at farming activities as experiments and assessing such factors as relative advantage, compatibility with existing resources, difficulty of use, and "trialability" — how well can it be experimented with.

④ 농업에 노동력이 많이 필요하다.
⑤ 농업에서 경험적 관찰을 사용하기 어렵다.

24

Not only musicians and psychologists, but also committed music enthusiasts and experts often voice the opinion that the beauty of music lies in an expressive deviation from the exactly defined score.

(A) Concert performances become interesting and gain in attraction from the fact that they go far beyond the information printed in the score. In his early studies on musical performance, Carl Seashore discovered that musicians only rarely play two equal notes in exactly the same way.

(B) This explains why we do not lose interest when we hear different artists perform the same piece of music. It also explains why it is worthwhile for following generations to repeat the same repertoire. New, inspiring interpretations help us to expand our understanding, which serves to enrich and animate the music scene.

(C) Within the same metric structure, there is a wide potential of variations in tempo, volume, tonal quality and intonation. Such variation is based on the composition but diverges from it individually. We generally call this 'expressivity'.

③ 좋은 음악은 악보 너머에 있다.
④ 악보를 읽어야 음악을 할 수 있다.
⑤ 너무 많은 변주는 음악에 좋지 않다.

26

Leon Festinger was an American social psychologist. He was born in New York City in 1919 to a Russian immigrant family.

(A) He later moved to Stanford University, where he continued his work in social psychology. His theory of social comparison earned him a good reputation. Festinger actively participated in international scholarly cooperation.

(B) As a graduate student at the University of Iowa, Festinger was influenced by Kurt Lewin, a leading social psychologist. After graduating from there, he became a professor at the Massachusetts Institute of Technology in 1945.

(C) In the late 1970s, he turned his interest to the field of history. He was one of the most cited psychologists of the twentieth century. Festinger's theories still play an important role in psychology today.

216) 윗글의 알맞은 순서를 배열하시오. [주관식]

Recognizing ethical issues is the most important step in understanding business ethics.

(A) For instance, should an employee report on a co-worker engaging in time theft? Should a salesperson leave out facts about a product's poor safety record in his presentation to a customer? Such questions require the decision maker to evaluate the ethics of his or her choice and decide whether to ask for guidance.

(B) An ethical issue is an identifiable problem, situation, or opportunity that requires a person to choose from among several actions that may be evaluated as right or wrong, ethical or unethical. Learning how to choose from alternatives and make a decision requires not only good personal values, but also knowledge competence in the business area of concern.

(C) Employees also need to know when to rely on their organizations' policies and codes of ethics or have discussions with co-workers or managers on appropriate conduct. Ethical decision making is not always easy because there are always gray areas that create dilemmas, no matter how decisions are made.

217) 윗글의 알맞은 순서를 배열하시오. [주관식]

218) 윗글의 주제로 가장 적절한 것을 고르시오.
① learning ethic at school
② opportunity for business
③ ethical issues in business
④ how decisions are made
⑤ gray areas that create dilemmas

30

Although the wonders of modern technology have provided people with opportunities beyond the wildest dreams of our ancestors, the good, as usual, is weakened by a downside.

(A) After all, on the Internet, there are no regulations preventing a kindergarten teacher from offering medical advice or a physician from suggesting ways to safely make structural changes to your home. As a result, misinformation gets disseminated as information, and it is not always easy to differentiate the two.

(B) This can be particularly frustrating for scientists, who spend their lives learning how to understand the intricacies of the world around them, only to have their work summarily challenged by people whose experience with the topic can be measured in minutes. This frustration is then amplified by the fact that, to the general public, both the scientist and the challenger are awarded equal credibility.

(C) One of those downsides is that anyone who so chooses can pick up the virtual megaphone that is the Internet and put in their two cents on any of an infinite number of topics, regardless of their qualifications.

219) 윗글의 알맞은 순서를 배열하시오. [주관식]

220) 윗글의 주제로 가장 적절한 것을 고르시오.
① famous scientist online
② benefit for the general public
③ offering good advice
④ negative effect of modern technology
⑤ using Internet to get information

31

More than just having territories, animals also partition them. And this insight turned out to be particularly useful for zoo husbandry.

(A) In a cabin or a mud hut, or even a Mesolithic cave from 30,000 years ago, this part is for cooking, that part is for sleeping; this part is for making tools and weaving, that part is for waste. We keep a neat functional organization.

(B) To a varying extent, other animals do the same. A part of an animal's territory is for eating, a part for sleeping, a part for swimming or wallowing, a part may be set aside for waste, depending on the species of animal.

(C) An animal's territory has an internal arrangement that Heini Hediger compared to the inside of a person's house. Most of us assign separate functions to separate rooms, but even if you look at a one-room house you will find the same internal specialization.

③ 동물의 영역 다툼 ④ 가사일의 분할
⑤ 동물의 잠자리 찾기

32

Fans feel for feeling's own sake. They make meanings beyond what seems to be on offer.

(A) But, more often, individual experiences are embedded in social contexts where other people with shared attachments socialize around the object of their affections. Much of the pleasure of fandom comes from being connected to other fans.

(B) They build identities and experiences, and make artistic creations of their own to share with others. A person can be an individual fan, feeling an "idealized connection with a star, strong feelings of memory and nostalgia," and engaging in activities like "collecting to develop a sense of self."

(C) In their diaries, Bostonians of the 1800s described being part of the crowds at concerts as part of the pleasure of attendance. A compelling argument can be made that what fans love is less the object of their fandom than the attachments to (and differentiations from) one another that those affections afford.

223) 윗글의 알맞은 순서를 배열하시오. [주관식]

③ 팬 클럽 가입 조건 ④ 팬들 서로 간의 애착
⑤ 팬의 인기를 원하는 연예인

33

There was nothing modern about the idea of men making women's clothes — we saw them doing it for centuries in the past.

(A) In the old days, however, the client was always primary and her tailor was an obscure craftsman, perhaps talented but perhaps not. She had her own ideas like any patron, there were no fashion plates, and the tailor was simply at her service, perhaps with helpful suggestions about what others were wearing.

(B) In a climate of admiration for male artists and their female creations, the dress-designer first flourished as the same sort of creator. Instead of the old rule that dressmaking is a craft, a modern connection between dress-design and art was invented that had not been there before.

(C) Beginning in the late nineteenth century, with the hugely successful rise of the artistic male couturier, it was the designer who became celebrated, and the client elevated by his inspired attention.

⑤ 의상 디자이너의 등장

34

In trying to explain how different disciplines attempt to understand autobiographical memory the literary critic Daniel Albright said, "Psychology is a garden, literature is a wilderness." He meant, I believe, that psychology seeks to make patterns, find regularity, and ultimately impose order on human experience and behavior.

(A) If we psychologists are too bent on identifying the orderly pattern, the regularities of children's minds, we may miss an essential and pervasive characteristic of our topic: the child's more unruly and imaginative ways of talking and thinking.

(B) It is not only the developed writer or literary scholar who seems drawn toward a somewhat wild and idiosyncratic way of thinking; young children are as well. The psychologist interested in young children may have to venture a little more often into the wilderness in order to get a good picture of how children think.

(C) Writers, by contrast, dive into the unruly, untamed depths of human experiences. What he said about understanding memory can be extended to our questions about young children's minds.

227) 윗글의 알맞은 순서를 배열하시오. [주관식]

③ 아동을 위한 심리학 ④ 심리학과 문학의 차이
⑤ 심리학이 가진 통찰력

35

Because plants tend to recover from disasters more quickly than animals, they are essential to the revitalization of damaged environments.

(A) You can see this phenomenon on a smaller scale when a tree struck by lightning forms new branches that grow from the old scar. In addition to regeneration or resprouting of plants, disturbed areas can also recover through reseeding.

(B) This ability is due to the activity of plant meristems — regions of undifferentiated tissue in roots and shoots that can, in response to specific cues, differentiate into new tissues and organs. If meristems are not damaged during disasters, plants can recover and ultimately transform the destroyed or barren environment.

(C) Why do plants have this preferential ability to recover from disaster? It is largely because, unlike animals, they can generate new organs and tissues throughout their life cycle.

229) 윗글의 알맞은 순서를 배열하시오. [주관식]

230) 윗글의 주제로 가장 적절한 것을 고르시오.

① the life cycle ② recovery of plants
③ damaged environments ④ organs of animals
⑤ competition of animals and plants

36

231) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

For downstream passage, the process works the opposite way.

When two natural bodies of water stand at different levels, building a canal between them presents a complicated engineering problem. ① To make up for the difference in level, engineers build one or more water "steps," called locks, that carry ships or boats up or down between the two levels. A lock is an artificial water basin. ② It has a long rectangular shape with concrete walls and a pair of gates at each end. When a vessel is going upstream, the upper gates stay closed as the ship enters the lock at the lower water level. ③ The downstream gates are then closed and more water is pumped into the basin. The rising water lifts the vessel to the level of the upper body of water. Then the upper gates open and the ship passes through. ④ The ship enters the lock from the upper level, and water is pumped from the lock until the ship is in line with the lower level. ⑤

232) 윗글의 주제로 가장 적절한 것을 고르시오.

① building a canal ② the natural disaster
③ how the lock works ④ making the ship
⑤ problems of upstream

37

233) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

In some cases, however, we are far less aware of why we believe a certain claim to be true, or how we are to explain why certain social realities exist.

Culture operates in ways we can consciously consider and discuss but also in ways of which we are far less cognizant. ① When we have to offer an account of our actions, we consciously understand which excuses might prove acceptable, given the particular circumstances we find ourselves in. In such situations, we use cultural ideas as we would use a particular tool. ② We select the cultural notion as we would select a screwdriver: certain jobs call for a Phillips head while others require an Allen wrench. ③ Whichever idea we insert into the conversation to justify our actions, the point is that our motives are discursively available to us. They are not hidden. ④ Ideas about the social world become part of our worldview without our necessarily being aware of the source of the particular idea or that we even hold the idea at all. ⑤

234) 윗글의 주제로 가장 적절한 것을 고르시오.

① circumstances for people ② the acceptable culture
③ how culture flows ④ the hidden facts
⑤ conversation to justify our actions

38

In everyday life, we tend to see any collection of people as a group.

(A) For example, as Kenneth Hodge observed, a collection of people who happen to go for a swim after work on the same day each week does not, strictly speaking, constitute a group because these swimmers do not interact with each other in a structured manner.

(B) However, social psychologists use this term more precisely. In particular, they define a group as two or more people who interact with, and exert mutual influences on, each other. It is this sense of mutual interaction or inter-dependence for a common purpose which distinguishes the members of a group from a mere aggregation of individuals.

(C) By contrast, a squad of young competitive swimmers who train every morning before going to school is a group because they not only share a common objective (training for competition) but also interact with each other in formal ways (e.g., by warming up together beforehand). It is this sense of people coming together to achieve a common objective that defines a "team".

235) 윗글의 알맞은 순서를 배열하시오. [주관식]

236) 윗글의 주제로 가장 적절한 것을 고르시오.

① a rare objective
② a group for social psychologists
③ quarrel of individuals
④ breaking the teamwork
⑤ becoming a social psychologists

39

Each new wave of technology is intended to enhance user convenience, as well as improve security, but sometimes these do not necessarily go hand-in-hand. For example, the transition from magnetic stripe to embedded chip slightly slowed down transactions, sometimes frustrating customers in a hurry. Make a service too burdensome, and the potential customer will go elsewhere.

(A) This is all useful at some level — indeed, it can be reassuring knowing that your bank is keeping alert to protect you — but it becomes tiresome if too many such calls are received.

(B) This obstacle applies at several levels. Passwords, double-key identification, and biometrics such as fingerprint-, iris-, and voice recognition are all ways of keeping the account details hidden from potential fraudsters, of keeping your data dark.

(C) But they all inevitably add a burden to the use of the account. On top of the hurdles introduced in accessing his or her money, if a suspected fraud is detected, the account holder has to deal with the phone call asking if he or she made the suspicious transactions.

237) 윗글의 알맞은 순서를 배열하시오. [주관식]

238) 윗글의 주제로 가장 적절한 것을 고르시오.

① suspicious transactions ② the voice recognition
③ keeping your data dark ④ the voice fishing
⑤ frustration from high security

40

A striving to demonstrate individual personality through designs should not be surprising. Most designers are educated to work as individuals, and design literature contains countless references to 'the designer'.

(A) A distinction needs to be made between designers working truly alone and those working in a group. In the latter case, management organization and processes can be equally as relevant as designers' creativity.

(B) Personal flair is without doubt an absolute necessity in some product categories, particularly relatively small objects, with a low degree of technological complexity, such as furniture, lighting, small appliances, and housewares.

(C) In larger-scale projects, however, even where a strong personality exercises powerful influence, the fact that substantial numbers of designers are employed in implementing a concept can easily be overlooked. The emphasis on individuality is therefore problematic — rather than actually designing, many successful designer 'personalities' function more as creative managers.

239) 윗글의 알맞은 순서를 배열하시오. [주관식]

240) 윗글의 요지로 가장 적절한 것을 고르시오.
① 디자이너는 창의적이야 한다.
② 디자이너는 계획 수립을 잘 한다.
③ 디자이너 특성을 구분해야 한다.
④ 집단에서 디자이너가 리더가 된다.
⑤ 혼자 일하는 디자이너는 고독하다.

[41 ~ 42]

Climate change experts and environmental humanists alike agree that the climate crisis is, at its core, a crisis of the imagination and much of the popular imagination is shaped by fiction.

(A) Climate change evades our imagination because it poses significant representational challenges. It cannot be observed in "human time," which is why documentary filmmaker Jeff Orlowski, who tracks climate change effects on glaciers and coral reefs, uses "before and after" photographs taken several months apart in the same place to highlight changes that occurred gradually.

(B) But climate change does not only reveal itself as a series of extraordinary events. In fact, as environmentalists and ecocritics from Rachel Carson to Rob Nixon have pointed out, environmental change can be "imperceptible"; it proceeds gradually, only occasionally producing "explosive and spectacular" events. Most climate change impacts cannot be observed day-to-day, but they become visible when we are confronted with their accumulated impacts.

(C) In his 2016 book The Great Derangement, anthropologist and novelist Amitav Ghosh takes on this relationship between imagination and environmental management, arguing that humans have failed to respond to climate change at least in part because fiction fails to believably represent it. Ghosh explains that climate change is largely absent from contemporary fiction because the cyclones, floods, and other catastrophes it brings to mind simply seem too "improbable" to belong in stories about everyday life.

Historically, drafters of tax legislation are attentive to questions of economics and history, and less attentive to moral questions. Questions of morality are often ① **pushed** to the side in legislative debate, labeled too controversial, too difficult to answer, or, worst of all, _____ to the project. But, in fact, the moral questions of taxation ② **are** at the very heart of the creation of tax laws. Rather than irrelevant, moral questions are fundamental to the imposition of tax. Tax is the application of a society's theories of distributive justice. Economics can go a long way towards ③ **helping** a legislature determine ④ **whether or not** a particular tax law will help achieve a particular goal, but economics cannot, in a vacuum, identify the goal. Creating tax policy ⑤ **requiring** identifying a moral goal, which is a task that must involve ethics and moral analysis.

253) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① unbearable ② inactive ③ inferior
④ abstract ⑤ irrelevant

Not only musicians and psychologists, but also committed music enthusiasts and experts often voice the opinion that the beauty of music lies in an expressive _____ from the exactly defined score. Concert performances become interesting and gain in attraction from the fact that they go far beyond the information ① **printed** in the score. In his early studies on musical performance, Carl Seashore discovered ② **that** musicians only rarely play two equal notes in exactly the same way. Within the same metric structure, there is a wide potential of variations in tempo, volume, tonal quality and intonation. Such variation ③ **is based** on the composition but diverges from it individually. We generally call this 'expressivity'. This explains ④ **why** we do not lose interest when we hear different artists perform the same piece of music. It also explains why it is worthwhile for following generations ⑤ **to repeat** the same repertoire. New, inspiring interpretations help us to expand our understanding, which serves to enrich and animate the music scene.

257) 윗글의 빈칸에 가장 적절한 답을 고르시오.

Leon Festinger was an American social psychologist. He was born in New York City in 1919 to a Russian immigrant family. As a graduate student at the University of Iowa, Festinger ① **was influenced** by Kurt Lewin, a leading social psychologist. After graduating from there, he became a professor at the Massachusetts Institute of Technology in 1945. He later ② **moved** to Stanford University, where he ③ **was continued** his work in social psychology. His theory of social comparison earned him a good reputation. Festinger actively ④ **participated** in international scholarly cooperation. In the late 1970s, he turned his interest to the field of history. He was one of the most cited psychologists of the twentieth century. Festinger's theories still ⑤ **play** an important role in psychology today.

【내용일치 O, X 선택형】

259) Leon Festinger는 미국의 사회 심리학자였다.

260) 1919년 뉴욕에서 토종 미국인으로 태어났다.

261) Festinger는 대표적인 사회 심리학자 Kurt Lewin의 영향을 받았다.

262) 1945년에 매사추세츠 공과대학의 교수가 되었다.

263) 그곳에서 계속 사회 심리학 연구를 계속했다.

264) 사회 비교 이론으로 그는 훌륭한 명성을 얻었다.

265) 후에 그는 역사 분야로 자신의 관심을 돌렸다.

_____ is the most important step in understanding business ethics. An ethical issue is an identifiable problem, situation, or opportunity that ① **requires** a person to choose from among several actions that may be evaluated as right or wrong, ethical or unethical. Learning how to choose from alternatives and ② **make** a decision requires not only good personal values, but also knowledge competence in the business area of concern. Employees also need to know when to rely on their organizations' policies and codes of ethics or have discussions with co-workers or managers on appropriate conduct. Ethical decision making is not always easy ③ **because** there are always gray areas that create dilemmas, no matter how decisions are made. For instance, should an employee ④ **report** on a co-worker engaging in time theft? Should a salesperson leave out facts about a product's poor safety record in his presentation to a customer? Such questions require the decision maker ⑤ **evaluating** the ethics of his or her choice and decide whether to ask for guidance.

267) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① Lunching a start-up ② How to make decisions
③ Creating dilemmas ④ Recognizing ethical issues
⑤ Becoming a business owner

In trying to explain how different disciplines attempt ① **to understand** autobiographical memory the literary critic Daniel Albright said, "Psychology is a garden, literature is a wilderness." He meant, I believe, that psychology seeks ② **to make** patterns, find regularity, and ultimately impose order on human experience and behavior. Writers, _____, dive into the unruly, untamed depths of human experiences. What he said about understanding memory ③ **can be extended** to our questions about young children's minds. If we psychologists are too ④ **bent** on identifying the orderly pattern, the regularities of children's minds, we may miss an essential and pervasive characteristic of our topic: the child's more unruly and imaginative ways of talking and thinking. It is not only the developed writer or literary scholar who seems drawn toward a somewhat wild and idiosyncratic way of thinking; young children are as well. The psychologist ⑤ **interesting** in young children may have to venture a little more often into the wilderness in order to get a good picture of how children think.

Because plants tend to recover from disasters ① **more quickly** than animals, they are essential to the revitalization of damaged environments. Why do plants have this preferential ability to recover from disaster? It is largely because, unlike animals, they can _____ throughout their life cycle. This ability is due to the activity of plant meristems — regions of undifferentiated tissue in roots and shoots that can, in response to specific cues, ② **differentiate** into new tissues and organs. If meristems are not damaged during disasters, plants can recover and ultimately transform the destroyed or barren environment. You can ③ **be seen** this phenomenon on a smaller scale ④ **when** a tree struck by lightning forms new branches that grow from the old scar. In addition to regeneration or resprouting of plants, ⑤ **disturbed** areas can also recover through reseeding.

279) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① attack other animals
② not move in the woods
③ generate new organs and tissues
④ prevent themselves from animals
⑤ detect disasters faster than others

280) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

When two natural bodies of water stand at different levels, ① **building** a canal between them presents a complicated engineering problem. ② **To make** up for the difference in level, engineers build one or more water "steps," called locks, that carry ships or boats up or down between the two levels. A lock is an _____ water basin. It has a long rectangular shape with concrete walls and a pair of gates at each end. ③ **When** a vessel is going upstream, the upper gates stay closed as the ship enters the lock at the lower water level. The downstream gates are then closed and more water ④ **is pumped** into the basin. The rising water lifts the vessel to the level of the upper body of water. Then the upper gates open and the ship ⑤ **passing** through. For downstream passage, the process works the opposite way. The ship enters the lock from the upper level, and water is pumped from the lock until the ship is in line with the lower level.

_____ operates in ways we can consciously consider and discuss but also in ways of which we are far less cognizant. When we have to offer an account of our actions, we ① **consciously** understand which excuses might prove acceptable, given the particular circumstances we find ourselves in. In such situations, we ② **are used** cultural ideas as we would use a particular tool. We select the cultural notion as we would select a screwdriver: certain jobs call for a Phillips head ③ **while** others require an Allen wrench. Whichever idea we insert into the conversation to justify our actions, the point is ④ **that** our motives are discursively available to us. They are not hidden. In some cases, however, we are far less aware of why we believe a certain claim to be true, or how we are to explain why certain social realities ⑤ **exist**. Ideas about the social world become part of our worldview without our necessarily being aware of the source of the particular idea or that we even hold the idea at all.

In everyday life, we tend to see any collection of people as a group. However, social psychologists ① **use** this term more precisely. In particular, they define a group as two or more people ② **who** interact with, and exert mutual influences on, each other. It is this sense of mutual interaction or inter-dependence for a common purpose which distinguishes the members of a group from a mere aggregation of individuals. (A) _____, as Kenneth Hodge observed, a collection of people who ③ **happen** to go for a swim after work on the same day each week does not, strictly speaking, constitute a group because these swimmers do not interact with each other in a structured manner. (B) _____, a squad of young competitive swimmers who train every morning before going to school is a group because they not only ④ **sharing** a common objective (training for competition) but also interact with each other in formal ways (e.g., by warming up together beforehand). It is this sense of people coming together ⑤ **to achieve** a common objective that defines a "team".

Each new wave of technology is intended to enhance user convenience, as well as improve security, but sometimes these **do not necessarily go hand-in-hand**. For example, the transition from magnetic stripe to embedded chip slightly ① **slowed** down transactions, sometimes frustrating customers in a hurry. Make a service too burdensome, and the potential customer will go elsewhere. This obstacle ② **applies** at several levels. Passwords, double-key identification, and biometrics such as fingerprint-, iris-, and voice recognition are all ways of keeping the account details ③ **hidden** from potential fraudsters, of keeping your data dark. But they all inevitably add a burden to the use of the account. On top of the hurdles introduced in accessing his or her money, if a suspected fraud ④ **is detected**, the account holder has to deal with the phone call asking ⑤ **that** he or she made the suspicious transactions. This is all useful at some level — indeed, it can be reassuring knowing that your bank is keeping alert to protect you — but it becomes tiresome if too many such calls are received.

287) 위 밑줄이 의미하는 바로 가장 적절한 것은?

① prevent financial crime
② protect users in many ways
③ detect problems earlier
④ may give users the stress
⑤ block the suspicious transactions

40

288) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

A striving to demonstrate individual personality through designs should not be ① **surprising**. Most designers are educated to work as individuals, and design literature contains countless references to 'the designer'. Personal flair is without doubt an absolute necessity in some product categories, ② **particularly** relatively small objects, with a low degree of technological complexity, such as furniture, lighting, small appliances, and housewares. In larger-scale projects, however, ③ **even where** a strong personality exercises powerful influence, the fact that substantial numbers of designers ④ **are employed** in implementing a concept can easily be overlooked. The emphasis on individuality is therefore problematic — rather than actually designing, many successful designer 'personalities' function more as creative managers. A _____ needs to be made between designers working truly alone and those working in a group. In the latter case, management organization and processes can be equally as ⑤ **relevantly** as designers' creativity.

289) 윗글의 빈칸에 가장 적절한 답을 고르시오.

Climate change experts and environmental humanists alike agree that the climate crisis is, at its core, a crisis of the _____ and much of the popular imagination is shaped by fiction. In his 2016 book The Great Derangement, anthropologist and novelist Amitav Ghosh ① **takes** on this relationship between imagination and environmental management, arguing that humans ② **have failed** to respond to climate change at least in part because fiction fails to believably represent it. Ghosh explains that climate change is largely absent from contemporary fiction because the cyclones, floods, and other catastrophes it brings to mind simply seem too "improbable" ③ **to belong** in stories about everyday life. But climate change does not only reveal itself as a series of extraordinary events. In fact, as environmentalists and ecocritics from Rachel Carson to Rob Nixon have pointed out, environmental change can be "imperceptible"; it proceeds gradually, only occasionally producing "explosive and spectacular" events. Most climate change impacts ④ **cannot be observed** day-to-day, but they become visible when we are confronted with their accumulated impacts.

Climate change evades our imagination because it poses significant representational challenges. It cannot be observed in "human time," which is why documentary filmmaker Jeff Orlowski, ⑤ **whose** tracks climate change effects on glaciers and coral reefs, uses "before and after" photographs taken several months apart in the same place to highlight changes that occurred gradually.

Walking out of Charing Cross Station in London, Emilia and her traveling companion, Layla, already felt their hearts pounding. It was the second day of their European summer trip. They were about to visit one of the world's most famous art galleries. The two of them started ① **hurrying** with excitement. Suddenly, Emilia shouted, "Look! There it is! We're finally at the National Gallery!" Layla laughed and responded, "Your dream's finally come true!"

Upon entering the National Gallery, Emilia knew exactly ② **where to go** first. She grabbed Layla's hand and dragged her hurriedly to find van Gogh's Sunflowers. It was Emilia's favorite painting and had inspired her to become a painter. Emilia loved his use of bright colors and light. She couldn't wait to finally ③ **be seen** his masterpiece in person. "It'll be amazing to see how he communicated the feelings of isolation and loneliness in his work," she said eagerly.

(A) _____, after searching all the exhibition rooms, Emilia and Layla couldn't find van Gogh's masterpiece anywhere. "That's weird. Van Gogh's Sunflowers should be here. Where is it?" Emilia looked upset, but Layla kept calm and said, "Maybe you've missed a notice about it. Check the National Gallery app." Emilia checked it ④ **quickly**. Then, she sighed, "Sunflowers isn't here! It's been lent to a different gallery for a special exhibition. I can't believe I didn't check!"

"Don't lose hope yet! Which gallery is the special exhibition at?" Layla asked. Emilia responded, "Well, his Sunflowers is still in England, (B) _____ it's at a gallery in Liverpool. That's a long way, isn't it?" After a quick search on her phone, Layla stated, "No! It's only two hours to Liverpool by train. The next train leaves in an hour. Why don't we take it?" After considering the idea, Emilia, now relieved, responded, "Yeah, but you always ⑤ **wanted** to see Rembrandt's paintings. Let's do that first, Layla! Then, after lunch, we can catch the next train." Layla smiled brightly.

Not only musicians and psychologists, but also committed music enthusiasts and experts often ① **voice** the opinion that the beauty of music ② **lays** in an expressive deviation from the exactly defined score. Concert performances become interesting and gain in attraction from the fact ③ **that** they go far beyond the information printed in the score. In his early studies on musical performance, Carl Seashore discovered that musicians _____. Within the same metric structure, there is a wide potential of variations in tempo, volume, tonal quality and intonation. Such variation is based on the composition but ④ **diverges** from it individually. We generally call this 'expressivity'. This explains why we do not lose interest when we hear different artists perform the same piece of music. It also explains why it is worthwhile for following generations ⑤ **to repeat** the same repertoire. New, inspiring interpretations help us to expand our understanding, which serves to enrich and animate the music scene.

307) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① rarely play the notes with other musicians
② do not make repertoire in the future
③ explain how the music was made
④ play their notes in online format like YouTube
⑤ only rarely play two equal notes in exactly the same way

Recognizing ethical issues is the most important step in understanding business ethics. An ethical issue is an identifiable problem, situation, or opportunity that ① **requires** a person to choose from among several actions that may be ② **evaluated** as right or wrong, ethical or unethical. Learning how to choose from alternatives and make a decision requires not only good personal values, but also knowledge ③ **competence** in the business area of concern. Employees also need to ④ **miss** when to rely on their organizations' policies and codes of ethics or have discussions with co-workers or managers on appropriate conduct. Ethical decision making is not always easy because there are always gray areas that _____, no matter how decisions are made. For instance, should an employee report on a co-worker engaging in time theft? Should a salesperson ⑤ **leave** out facts about a product's poor safety record in his presentation to a customer? Such questions require the decision maker to evaluate the ethics of his or her choice and decide whether to ask for guidance.

310) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① minimize disruptions ② sustain vision
③ facilitate communication ④ find the truth
⑤ create dilemmas

Because plants tend to recover from disasters more quickly than animals, they are essential to the revitalization of damaged environments. Why do plants have this preferential ability ① **to recover** from disaster? It is largely because, unlike animals, they can ② **be generated** new organs and tissues throughout their life cycle. This ability is due to the activity of plant meristems — regions of undifferentiated tissue in roots and shoots that can, in response to specific cues, ③ **differentiate** into new tissues and organs. If meristems are not damaged during disasters, plants ④ **can recover** and ultimately transform the destroyed or barren environment. You can see this phenomenon on a smaller scale when a tree struck by lightning forms new branches that _____. In addition to regeneration or resprouting of plants, ⑤ **disturbed** areas can also recover through reseeding.

322) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① block the lightning ② absorb the energy
③ grow from the old scar ④ move from that place
⑤ transform the energy

When two natural bodies of water stand at different levels, _____ presents a complicated engineering problem. To make up for the difference in level, engineers build one or more water "steps," ① **called** locks, that carry ships or boats up or down between the two levels. A lock is an artificial water basin. It has a long rectangular shape with concrete walls and a pair of gates at each end. When a vessel is going upstream, the upper gates stay ② **closed** as the ship enters the lock at the lower water level. The downstream gates are then closed and more water ③ **is pumped** into the basin. The rising water lifts the vessel to the level of the upper body of water. Then the upper gates open and the ship passes through. For downstream passage, the process works the opposite way. The ship ④ **entering** the lock from the upper level, and water is pumped from the lock until the ship ⑤ **is** in line with the lower level.

324) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① pumping all the water ② living nearby
③ making a contraction ④ possessing many ships
⑤ building a canal between them

Culture operates in ways we can consciously consider and discuss but also in ways of which we are far less cognizant. When we ① **have to offer** an account of our actions, we consciously understand which excuses might prove acceptable, given the particular circumstances we find ourselves in. In such situations, we use cultural ideas as we would use a particular tool. We ② **select** the cultural notion as we would select a screwdriver: certain jobs call for a Phillips head while others ③ **requiring** an Allen wrench. Whichever idea we insert into the conversation to justify our actions, the point is ④ **that** our motives are discursively available to us. They are not hidden. In some cases, _____, we are far less aware of why we believe a certain claim to be true, or how we are to explain why certain social realities exist. Ideas about the social ⑤ **world become** part of our worldview without our necessarily being aware of the source of the particular idea or that we even hold the idea at all.

In everyday life, we tend to see any collection of people as a group. However, social psychologists use this term more _____. In particular, they define a group as two or more people who interact with, and exert mutual influences on, each other. It is this sense of mutual interaction or inter-dependence for a common purpose ① **which** distinguishes the members of a group from a mere aggregation of individuals. For example, as Kenneth Hodge ② **observed**, a collection of people who happen to go for a swim after work on the same day each week does not, strictly speaking, ③ **constitute** a group because these swimmers do not interact with each other in a structured manner. By contrast, a squad of young competitive swimmers ④ **whose** train every morning before going to school is a group because they not only share a common objective (training for competition) but also ⑤ **interact** with each other in formal ways (e.g., by warming up together beforehand). It is this sense of people coming together to achieve a common objective that defines a "team".

328) 윗글의 빈칸에 가장 적절한 답을 고르시오.

Each new wave of technology is intended ① **to enhance** user convenience, as well as improve security, but sometimes these do not necessarily go hand-in-hand. (A) _____, the transition from magnetic stripe to embedded chip slightly slowed down transactions, sometimes frustrating customers in a hurry. ② **Making** a service too burdensome, and the potential customer will go elsewhere. This obstacle applies at several levels. Passwords, double-key identification, and biometrics such as fingerprint-, iris-, and voice recognition are all ways of keeping the account details hidden from potential fraudsters, of keeping your data dark. (B) _____ they all inevitably add a burden to the use of the account. On top of the hurdles ③ **introduced** in accessing his or her money, if a suspected fraud ④ **is detected**, the account holder has to deal with the phone call asking if he or she made the suspicious transactions. This is all useful at some level — indeed, it can be reassuring knowing ⑤ **that** your bank is keeping alert to protect you — but it becomes tiresome if too many such calls are received.

A striving to demonstrate individual personality through designs should not be surprising. Most designers are educated to _____, and design literature contains countless references to 'the designer'. Personal flair is without doubt an absolute necessity in some product categories, particularly relatively small objects, with a low degree of technological complexity, ① **such as** furniture, lighting, small appliances, and housewares. In larger-scale projects, however, even where a strong personality exercises powerful influence, the fact ② **which** substantial numbers of designers are employed in implementing a concept can easily ③ **be overlooked**. The emphasis on individuality is therefore problematic — rather than actually designing, many successful designer 'personalities' function more as creative managers. A distinction needs ④ **to be made** between designers working truly alone and those ⑤ **working** in a group. In the latter case, management organization and processes can be equally as relevant as designers' creativity.

332) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① be employed ② break the group
③ work as individuals ④ make money
⑤ become successful

Climate change experts and environmental humanists alike agree ① **that** the climate crisis is, at its core, a crisis of the imagination and much of the popular imagination is shaped by fiction. In his 2016 book The Great Derangement, anthropologist and novelist Amitav Ghosh takes on this relationship between imagination and environmental management, arguing ② **what** humans have failed to respond to climate change at least in part because fiction fails to believably represent it. Ghosh explains that climate change is largely absent from contemporary fiction because the cyclones, floods, and other catastrophes it brings to mind simply ③ **seem** too "improbable" to belong in stories about everyday life. But climate change does not only reveal itself as a series of extraordinary events. (A) _____, as environmentalists and ecocritics from Rachel Carson to Rob Nixon have pointed out, environmental change can be "imperceptible"; it proceeds gradually, only occasionally producing "explosive and spectacular" events. Most climate change impacts cannot be observed day-to-day, (B) _____ they become visible when we are confronted with their accumulated impacts.

Climate change ④ **evades** our imagination because it poses significant representational challenges. It cannot be observed in "human time," which is why documentary filmmaker Jeff Orlowski, who ⑤ **tracks** climate change effects on glaciers and coral reefs, uses "before and after" photographs taken several months apart in the same place to highlight changes that occurred gradually.

Walking out of Charing Cross Station in London, Emilia and her traveling companion, Layla, already felt their hearts pounding. It was the second day of their European summer trip. They were about to visit one of the world's most famous art galleries. The two of them started hurrying with excitement. Suddenly, Emilia ① **shouted**, "Look! There it is! We're finally at the National Gallery!" Layla laughed and responded, "Your dream's finally come true!"

Upon entering the National Gallery, Emilia knew exactly where to go first. She grabbed Layla's hand and ② **dragging** her hurriedly to find van Gogh's Sunflowers. It was Emilia's favorite painting and had inspired her to become a painter. Emilia loved his use of bright colors and light. She couldn't wait to finally see his masterpiece in person. "It'll be amazing ③ **to see** how he communicated the feelings of isolation and loneliness in his work," she said eagerly.

However, after searching all the exhibition rooms, Emilia and Layla couldn't find van Gogh's masterpiece anywhere. "That's weird. Van Gogh's Sunflowers should be here. Where is it?" Emilia looked upset, but Layla kept calm and said, "Maybe you've missed a notice about it. Check the National Gallery app." Emilia ④ **checked** it quickly. Then, she sighed, "Sunflowers isn't here! It's been lent to a different gallery for a special exhibition. I can't believe I didn't check!"

"_____! Which gallery is the special exhibition at?" Layla asked. Emilia responded, "Well, his Sunflowers is still in England, but it's at a gallery in Liverpool. That's a long way, isn't it?" After a quick search on her phone, Layla ⑤ **stated**, "No! It's only two hours to Liverpool by train. The next train leaves in an hour. Why don't we take it?" After considering the idea, Emilia, now relieved, responded, "Yeah, but you always wanted to see Rembrandt's paintings. Let's do that first, Layla! Then, after lunch, we can catch the next train." Layla smiled brightly.

More than just having territories, animals also partition them. And this insight turned out to be particularly useful for zoo husbandry. An animal's territory has an ① **internal** arrangement that Heini Hediger compared to the inside of a person's house. Most of us ② **assign** separate functions to separate rooms, but even if you look at a one-room house you will ③ **miss** the same internal specialization. In a cabin or a mud hut, or even a Mesolithic cave from 30,000 years ago, this part is for cooking, that part is for sleeping; this part is for making tools and weaving, that part is for ④ **waste**. We keep a neat functional organization. To a varying extent, other animals do the same. A part of an animal's territory is for eating, a part for sleeping, a part for swimming or wallowing, a part may be set ⑤ **aside** for waste, depending on the species of animal.

357) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

팬은 감정 그 자체를 느낀다. They make meanings beyond what seems to be on offer. They build identities and experiences, and make artistic creations of their own to share with others. A person can be an individual fan, feeling an "idealized connection with a star, strong feelings of memory and nostalgia," and (A) **engaging/ engaged** in activities like "collecting to develop a sense of self." But, more often, individual experiences are embedded in social contexts (B) **where/ which** other people with shared attachments socialize around the object of their affections. Much of the pleasure of fandom comes from being connected to other fans. In their diaries, Bostonians of the 1800s described being part of the crowds at concerts as part of the pleasure of attendance. A compelling argument can be (C) **made/ making** that what fans love is less the object of their fandom than the attachments to (and differentiations from) one another that those affections afford.

In trying to explain how different disciplines attempt to understand autobiographical memory the literary critic Daniel Albright said, "Psychology is a (A) g_____, literature is a (B) w_____." He meant, I believe, that psychology seeks to make patterns, find regularity, and ① **ultimately** impose order on human experience and behavior. Writers, by contrast, dive into the unruly, untamed depths of human experiences. ② **That** he said about understanding memory can be extended to our questions about young children's minds. If we psychologists are too ③ **bent** on identifying the orderly pattern, the regularities of children's minds, we may miss an essential and pervasive characteristic of our topic: the child's more unruly and imaginative ways of talking and thinking. It is not only the ④ **developed** writer or literary scholar who seems drawn toward a somewhat wild and idiosyncratic way of thinking; young children are ⑤ **as well**. The psychologist interested in young children may have to venture a little more often into the wilderness in order to get a good picture of how children think.

362) 각 빈칸 (A), (B) 에 알맞은 어휘를 채우시오.

⑤ is in line with

37

367) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Culture operates in ways we can consciously consider and discuss but also in ways of which we are far less cognizant. When we have to offer an account of our actions, we consciously understand which excuses might prove acceptable, given the particular circumstances we find ourselves in. In such situations, we use cultural ideas as we would use a particular tool. We select the cultural notion as we would (A) **select/ be selected** a screwdriver: certain jobs call for a Phillips head (B) **during/ while** others require an Allen wrench. Whichever idea we insert into the conversation to justify our actions, the point is (C) **that/ what** our motives are discursively available to us. They are not hidden. In some cases, however, we are far less aware of why we believe a certain claim to be true, or how we are to explain why certain social realities exist. Ideas about the social world _____ without our necessarily being aware of the source of the particular idea or that we even hold the idea at all.

368) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① make the obstacles
② become part of our worldview
③ betray our though often
④ hide the real truth
⑤ can not overcome the barrier

38

369) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

In everyday life, we tend to see any collection of people as a _____. However, social psychologists use this term more precisely. In particular, they define a group as two or more people who (A) **interact/ interacting** with, and exert mutual influences on, each other. It is this sense of mutual interaction or inter-dependence for a common purpose which distinguishes the members of a group from a mere aggregation of individuals. For example, as Kenneth Hodge observed, a collection of people who happen to go for a swim after work on the same day each week does not, strictly speaking, constitute a group (B) **because/ because of** these swimmers do not interact with each other in a structured manner. By contrast, a squad of young competitive swimmers who train every morning before going to school is a group because they not only share a common objective (training for competition) but also interact with each other in formal ways (e.g., by warming up together beforehand). It is this sense of people coming together to achieve a common objective (C) **that/ what** defines a "team".

370) 빈칸에 맞는 한 단어를 지문에 있는 단어에서 골라서 채우시오.

39

371) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Each new wave of technology is intended to enhance user convenience, as well as improve security, but sometimes these do not necessarily go hand-in-hand. For example, the transition from magnetic stripe to embedded chip slightly (A) **slowing/ slowed** down transactions, sometimes frustrating customers in a hurry. Make a service too burdensome, and the potential customer will _____. This obstacle applies at several levels. Passwords, double-key identification, and biometrics such as fingerprint-, iris-, and voice recognition are all ways of keeping the account details hidden from potential fraudsters, of keeping your data dark. But they all inevitably add a burden to the use of the account. On top of the hurdles (B) **introducing/ introduced** in accessing his or her money, if a suspected fraud is detected, the account holder has to deal with the phone call (C) **asking/ asked** if he or she made the suspicious transactions. This is all useful at some level — indeed, it can be reassuring knowing that your bank is keeping alert to protect you — but it becomes tiresome if too many such calls are received.

372) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① like it ② pay more ③ go elsewhere
④ get used to it ⑤ lose nothing

40

373) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

A striving to demonstrate individual personality through designs should not be (A) **surprising/ surprised**. Most designers are educated to work as individuals, and design literature (B) **containing/ contains** countless references to 'the designer'. Personal flair is without doubt an absolute necessity in some product categories, particularly relatively small objects, with a low degree of technological complexity, such as furniture, lighting, small appliances, and housewares. In larger-scale projects, however, even where a strong personality exercises powerful influence, the fact that substantial numbers of designers (C) **employed/ are employed** in implementing a concept can easily be overlooked. The emphasis on individuality is therefore problematic — rather than actually designing, many successful designer 'personalities' function more as creative managers. A distinction needs to be made between designers working truly alone and _____ working in a group. In the latter case, management organization and processes can be equally as relevant as designers' creativity.

374) 빈칸에 들어갈 한 단어를 본문을 참조하여 쓰고, 바꿀 수 있는 단어도 찾아 쓰시오.

[41 ~ 42]

375) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Climate change experts and environmental humanists alike agree (A) **that/ what** the climate crisis is, at its core, a crisis of the imagination and much of the popular imagination is shaped by fiction. In his 2016 book The Great Derangement, anthropologist and novelist Amitav Ghosh takes on this relationship between imagination and environmental management, arguing that humans have failed (B) **to respond/ responding** to climate change at least in part because fiction fails to believably represent it. Ghosh explains that climate change is largely absent from contemporary fiction because the cyclones, floods, and other catastrophes it brings to mind simply seem too "_____" to belong in stories about everyday life. But climate change does not only reveal itself as a series of extraordinary events. In fact, as environmentalists and ecocritics from Rachel Carson to Rob Nixon have pointed out, environmental change can be "imperceptible"; it proceeds gradually, only occasionally producing "explosive and spectacular" events. Most climate change impacts cannot be (C) **observing/ observed** day-to-day, but they become visible when we are confronted with their accumulated impacts.

Climate change evades our imagination because it poses significant representational challenges. It cannot be observed in "human time," which is why documentary filmmaker Jeff Orlowski, who tracks climate change effects on glaciers and coral reefs, uses "before and after" photographs taken several months apart in the same place to highlight changes that occurred gradually.

376) 윗글의 빈칸에 가장 적절한 답을 고르시오.

377) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Walking out of Charing Cross Station in London, Emilia and her traveling companion, Layla, already felt their hearts pounding. It was the second day of their European summer trip. **were / visit / about / to / They** one of the world's most famous art galleries. The two of them started hurrying with excitement. Suddenly, Emilia shouted, "Look! There it is! We're finally at the National Gallery!" Layla laughed and responded, "Your dream's finally come true!"

Upon (A) **enter/ entering** the National Gallery, Emilia knew exactly where to go first. She grabbed Layla's hand and dragged her hurriedly to find van Gogh's Sunflowers. It was Emilia's favorite painting and had inspired her to become a painter. Emilia loved his use of bright colors and light. She couldn't wait to finally see his masterpiece in person. "It'll be (B) **amazing/ amazed** to see how he communicated the feelings of isolation and loneliness in his work," she said eagerly.

However, after searching all the exhibition rooms, Emilia and Layla couldn't find van Gogh's masterpiece anywhere. "That's weird. Van Gogh's Sunflowers should be here. Where is it?" Emilia looked upset, but Layla kept calm and said, "Maybe you've missed a notice about it. Check the National Gallery app." Emilia checked it quickly. Then, she sighed, "Sunflowers isn't here! It's been lent to a different gallery for a special exhibition. I can't (C) **believe/ be believed** I didn't check!"

"Don't lose hope yet! Which gallery is the special exhibition at?" Layla asked. Emilia responded, "Well, his Sunflowers is still in England, but it's at a gallery in Liverpool. That's a long way, isn't it?" After a quick search on her phone, Layla stated, "No! It's only two hours to Liverpool by train. The next train leaves in an hour. Why don't we take it?" After considering the idea, Emilia, now relieved, responded, "Yeah, but you always wanted to see Rembrandt's paintings. Let's do that first, Layla! Then, after lunch, we can catch the next train." Layla smiled brightly.

385) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

You may feel there is something scary about an algorithm **like / you / what / might / deciding**. Could it mean that, if computers conclude you won't like something, you will never get the chance to see it? Personally, I really enjoy being directed toward new music that I might not have found by myself. I can quickly get stuck in a rut where I put on the same songs over and over. That's (A) **why/ because** I've always enjoyed the radio. But the algorithms that are now pushing and pulling me through the music library are perfectly suited to finding gems that I'll like. My worry originally about such algorithms was that they might (B) **dive/ drive** everyone into certain parts of the library, leaving others lacking listeners. Would they cause a convergence of tastes? But thanks to the nonlinear and chaotic mathematics usually behind them, this doesn't happen. A small divergence in my likes (C) **compared/ confused** to yours can send us off into different far corners of the library.

386) 윗글 주어진 문장을 문맥에 맞게 배열하시오.

22

387) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Historically, drafters of tax legislation are attentive to questions of economics and history, and less attentive to moral questions. Questions of morality are often (A) **punished/ pushed** to the side in legislative debate, labeled too controversial, too difficult to answer, or, worst of all, irrelevant to the project. But, in fact, the moral questions of taxation are at the very heart of the creation of tax laws. Rather than irrelevant, moral questions are fundamental to the imposition of tax. Tax is the (B) **application/ allowment** of a society's theories of distributive justice. Economics can go a long way towards helping a legislature determine whether or not a particular tax law will help (C) **achieve/ fail** a particular goal, but economics cannot, in a vacuum, identify the goal. Creating tax policy requires _____, which is a task that must involve ethics and moral analysis.

388) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① making money income ② helping only the poor
③ constructing buildings ④ identifying a moral goal
⑤ making a strong country

23

389) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Environmental learning occurs when farmers base decisions on (A) **observances/ observations** of "payoff" information. ① They may observe their own or neighbors' farms, but it is the empirical results they are using as a guide, not the neighbors themselves. ② They are looking at farming activities as experiments and assessing such factors as relative advantage, compatibility with (B) **existing/ insisting** resources, difficulty of use, and "trialability" — how well can it be experimented with. ③ Farmers cannot set up the controlled conditions of professional test plots in research facilities. Farmers also often (C) **solve/ confront** complex and difficult-to-observe phenomena that would be hard to manage even if they could run controlled experiments. ④ Moreover farmers can rarely acquire payoff information on more than a few of the production methods they might use, which makes the criterion of "relative advantage" hard to measure. ⑤

390) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

But that criterion of "trialability" turns out to be a real problem; it's true that farmers are always experimenting, but working farms are very flawed laboratories.

24

391) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Not only musicians and psychologists, but also committed music enthusiasts and experts often voice the opinion that the beauty of music lies in an expressive deviation from the exactly (A) **defined/ refined** score. Concert performances become interesting and gain in attraction from the fact that they go far beyond the information printed in the score. In his early studies on musical performance, Carl Seashore discovered that musicians only (B) **often/ rarely** play two equal notes in exactly the same way. Within the same metric structure, there is a wide potential of variations in tempo, volume, tonal quality and intonation. Such variation is based on the composition but diverges from it individually. We generally call this 'expressivity'. **This / do / we / lose / not / explains / why / interest** when we hear different artists perform the same piece of music. It also explains why it is worthwhile for following generations to (C) **retreat/ repeat** the same repertoire. New, inspiring interpretations help us to expand our understanding, which serves to enrich and animate the music scene.

392) 윗글 주어진 문장을 문맥에 맞게 배열하시오.

26

393) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Leon Festinger was an American social psychologist. He was born in New York City in 1919 to a Russian immigrant family. As a graduate student at the University of Iowa, Festinger was influenced by Kurt Lewin, a (A) **leading/ loading** social psychologist. After graduating from there, he became a professor at the Massachusetts Institute of Technology in 1945. He later moved to Stanford University, where he (B) **confused/ continued** his work in social psychology. His theory of social comparison earned him a good reputation. Festinger actively participated in international scholarly cooperation. In the late 1970s, he turned his interest to the field of history. He was one of the most cited psychologists of the twentieth century. Festinger's theories still play an important (C) **rule/ role** in psychology today.

29

394) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Recognizing ethical issues is the most important step in understanding business ethics. An ethical issue is an identifiable problem, situation, or opportunity that requires a person to choose from among (A) **severe/ several** actions that may be evaluated as right or wrong, ethical or unethical. ① Learning how to choose from alternatives and make a decision requires not only good personal values, but also knowledge competence in the business area of concern. ② Employees also need to know when to rely on their organizations' policies and (B) **curses/ codes** of ethics or have discussions with co-workers or managers on appropriate conduct. ③ Ethical decision making is not always easy because there are always (C) **bright/ gray** areas that create dilemmas, no matter how decisions are made. ④ Should a salesperson leave out facts about a product's poor safety record in his presentation to a customer? Such questions require the decision maker to evaluate the ethics of his or her choice and decide whether to ask for guidance. ⑤

395) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

For instance, should an employee report on a co-worker engaging in time theft?

When two natural bodies of water stand at different levels, building a canal between them presents a complicated engineering problem. **make / difference / the / for / up / To** in level, engineers build one or more water "steps," called locks, that carry ships or boats up or down between the two levels. A lock is an artificial water basin. It has a long rectangular (A) **shape/ share** with concrete walls and a pair of gates at each end. When a vessel is going upstream, the upper gates stay closed as the ship (B) **erases/ enters** the lock at the lower water level. The downstream gates are then closed and more water is pumped into the basin. The rising water lifts the vessel to the level of the upper body of water. Then the upper gates open and the ship passes through. For downstream passage, the process works the (C) **same/ opposite** way. The ship enters the lock from the upper level, and water is pumped from the lock until the ship is in line with the lower level.

408) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Culture operates in ways we can consciously consider and discuss but also in ways of which we are far less cognizant. When we have to offer an account of our actions, we consciously understand which excuses might (A) **prove/ improve** acceptable, given the particular circumstances we find ourselves in. In such situations, we use cultural ideas as we would use a particular tool. We select the cultural notion as we would select a screwdriver: certain jobs call for a Phillips head while others require an Allen wrench. Whichever idea we insert into the (B) **conservation/ conversation** to justify our actions, the point is that our motives are discursively available to us. They are not hidden. In some cases, however, we are far less aware of **believe / we / true / why / certain / be / to / claim / a**, or how we are to explain why certain social realities (C) **exist/ resist**. Ideas about the social world become part of our worldview without our necessarily being aware of the source of the particular idea or that we even hold the idea at all.

In everyday life, we tend to see any collection of people as a group. However, social psychologists use this term (A) **more/ less** precisely. In particular, they define a group as two or more people who interact with, and exert mutual influences on, each other. It is this sense of mutual interaction or inter-dependence for a common purpose which distinguishes the members of a group from a mere aggregation of individuals. For example, as Kenneth Hodge observed, a (B) **collection/ correction** of people who happen to go for a swim after work on the same day each week does not, strictly speaking, constitute a group because these swimmers do not interact with each other in a structured manner. By contrast, a squad of young competitive swimmers who (C) **treat/ train** every morning before going to school is a group because they not only share a common objective (training for competition) but also interact with each other in formal ways (e.g., by warming up together beforehand). It is this sense of people coming together to achieve a common objective that defines a "team".

Each new wave of technology is intended to (A) **enhance/ harm** user convenience, as well as improve security, but sometimes these do not necessarily go hand-in-hand. For example, the transition from magnetic stripe to embedded chip slightly slowed down transactions, sometimes frustrating customers in a hurry. Make a service too burdensome, and the potential customer will go elsewhere. This obstacle (B) **applies/ supplies** at several levels. Passwords, double-key identification, and biometrics such as fingerprint-, iris-, and voice recognition are all ways of keeping the account details hidden from potential fraudsters, of keeping your data dark. But they all inevitably add a burden to the use of the account. On top of the hurdles introduced in accessing his or her money, if a suspected fraud is (C) **detected/ devoted**, the account holder has to deal with the phone call asking if he or she made the suspicious transactions. This is all useful at some level — indeed, it can be reassuring knowing that your bank is keeping _____ to protect you — but it becomes tiresome if too many such calls are received.

412) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① affirmative ② exotic ③ enormous
④ absolute ⑤ alert

40

413) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

A striving to demonstrate individual personality through designs should not be surprising. **Most / to / designers / as / are / work / individuals / educated**, and design literature contains countless references to 'the designer'. Personal flair is without doubt an absolute necessity in some product categories, particularly relatively small objects, with a low degree of technological complexity, such as furniture, lighting, small appliances, and housewares. In larger-scale projects, however, even where a strong personality exercises (A) **powerful/ powerless** influence, the fact that substantial numbers of designers are employed in implementing a concept can easily be overlooked. The emphasis on individuality is therefore problematic — rather than actually designing, many (B) **successful/ successive** designer 'personalities' function more as creative managers. A distinction needs to be made between designers working truly alone and those working in a group. In the latter case, management organization and processes can be equally as (C) **relevant/ irrelevant** as designers' creativity.

Climate change experts and environmental humanists (A) **like/ alike** agree that the climate crisis is, at its core, a crisis of the imagination and much of the popular imagination is shaped by fiction. In his 2016 book The Great Derangement, anthropologist and novelist Amitav Ghosh takes on this relationship between imagination and environmental management, arguing that humans have failed to respond to climate change at least in part because fiction fails to believably represent it. Ghosh explains that climate change is largely absent from contemporary fiction (B) **because/ because of** the cyclones, floods, and other catastrophes it brings to mind simply seem too "improbable" to belong in stories about everyday life. But climate change does not only reveal itself as a series of extraordinary events. In fact, as environmentalists and ecocritics from Rachel Carson to Rob Nixon (C) **have been pointed/ have pointed** out, environmental change can be "imperceptible"; it proceeds gradually, only occasionally producing "explosive and spectacular" events. Most climate change impacts cannot be observed day-to-day, but they become _____ when we are confronted with their accumulated impacts.

Climate change evades our imagination because it poses significant representational challenges. It cannot be observed in "human time," which is why documentary filmmaker Jeff Orlowski, who tracks climate change effects on glaciers and coral reefs, uses "before and after" photographs taken several months apart in the same place to highlight changes that occurred gradually.

416) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① versatile ② victorious ③ voiceless
④ visible ⑤ vulnerable

[43 ~ 45]

417) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Walking out of Charing Cross Station in London, Emilia and her traveling companion, Layla, already felt their hearts pounding. It was the second day of their European summer trip. They were about to visit one of the world's most famous art galleries. The two of them (A) **stopped/ started** hurrying with excitement. Suddenly, Emilia shouted, "Look! There it is! We're finally at the National Gallery!" Layla laughed and responded, "Your dream's finally come true!"

Upon entering the National Gallery, Emilia knew exactly where to go first. She grabbed Layla's hand and dragged her hurriedly to find van Gogh's Sunflowers. It was Emilia's favorite painting and had inspired her to become a painter. Emilia loved his use of bright colors and light. She couldn't wait to finally see his masterpiece in person. "It'll be amazing to see how he communicated the feelings of isolation and loneliness in his work," she said eagerly.

However, after searching all the exhibition rooms, Emilia and Layla couldn't find van Gogh's masterpiece anywhere. "That's weird. Van Gogh's Sunflowers should be here. Where is it?" Emilia looked upset, but Layla kept calm and said, "Maybe you've missed a notice about it. Check the National Gallery app." Emilia (B) **missed/ checked** it quickly. Then, she sighed, "Sunflowers isn't here! It's been lent to a different gallery for a special exhibition. I can't believe I didn't check!"

"Don't lose hope yet! Which gallery is the special exhibition at?" Layla asked. Emilia responded, "Well, his Sunflowers is still in England, but it's at a gallery in Liverpool. That's a long way, isn't it?" After a quick search on her phone, Layla stated, "No! It's only two hours to Liverpool by train. The next train leaves in an hour. Why don't we take it?" After (C) **ignoring/ considering** the idea, Emilia, now relieved, responded, "Yeah, but you always wanted to see Rembrandt's paintings. Let's do that first, Layla! Then, after lunch, we can catch the next train." Layla smiled brightly.

418) Layla 의 심경 변화로 가장 적절한 것은?

① angered > irritated ② depressed > happy
③ sorrowful > happy ④ excited > worried
⑤ surprised > pleased
