**1.** 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[1)]

Nobody has to teach a child to demand fair treatment; children protest unfairness ① **vigorously** and as soon as they can communicate. Nobody has to teach us to admire a person who sacrifices for a group; the admiration for duty is universal. Nobody has to teach us to disdain someone who betrays a friend or ② **is** disloyal to a family or tribe. Nobody has to teach a child the difference between rules that are moral — "Don't hit" — and rules that ③ **are** not — "Don't chew gum in school." These preferences also ④ **are emerged** from somewhere deep inside us. Just as we have a natural suite of emotions to help us love and be loved, so, too, we have a natural suite of moral emotions to make us ⑤ **disapprove** of people who violate social commitments, and approve of people who reinforce ⑥ **them**. There is no society on earth ⑦ **where** people are praised for running away in battle.

**2.** 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[2)]

In a recent presidential election, one of our local ① **comedians** compiled a list of all the recommendations ② **being made** by ③ **both** the Democratic and Republican candidates for the presidency. He then switched them, and asked ④ **committed** Democratic and Republican supporters about them. Democratic voters ⑤ **were told** their candidate thought the American military needed to ⑥ **be strengthened**, the national borders more tightly ⑦ **controlled**, and voter identification efforts strengthened. As for those ⑧ **committed** to the Republican candidate, he questioned them about their support of their candidate's (supposed) statements ⑨ **underscoring** the need to expand national health care, ⑩ **creating** a more equitable tax system, and increase the minimum wage. In every case, the supporters did not question the veracity of the list. Instead, they began justifying their candidate's positions. It was as if it did not matter ⑪ **what** the facts were; once they had made up their minds who they were voting for, their job was to support him, not question him.

**3.** 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[3)]

You may believe that all forms of negative thinking ① **are** unnecessary, extreme, and irrational. Nothing could be ② **further** from the truth. Quite often, you might experience unpleasant, tragic, and upsetting events in your life ③ **that** you believe to be negative. As result of these beliefs, you experience unpleasant emotions. If you are perceiving a situation accurately, your distressing emotions will serve a useful function for you. For example, if a close friend has died and you are extremely sad because you miss your close relationship, crying, grieving, and sadness will allow you ④ **to work** through the difficult situation and incorporate it into your experience so that you can move on with your life. Only when the thoughts take on an unrealistically negative and distorted quality (e.g., "my life is over because my friend is gone; the same fate will soon befall me; I have nothing ⑤ **left** to look forward to in my life") ⑥ **it is** likely that you will experience emotions and behavioral reactions that are dysfunctional and self-defeating.

**4.** 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[4)]

Evolution theory is ① **being challenged**. Darwin saw evolution as a gradual process of natural selection and survival of the fittest as the most likely phenomenon. Now evolutionists such as paleontologists Niles Eldredge and Stephen Jay Gould argue that evolution ② **is characterized** by long periods of relative stability that ③ **are punctuated** by sudden changes, followed by more stability, followed by more changes, and so on. One hypothesis on why this ④ **occurs to be** that changes in environment ⑤ **cause** species ⑥ **to diversify** and specialize into several new niches, ⑦ **creating** new lineages. In Gould's theory, a species will be ⑧ **unchanged** for thousands or hundreds of thousands of years and then suddenly something will happen ⑨ **that** will change it (perhaps gene-splicing?) or even wipe ⑩ **it out**. Gould's theory can be thought of as macroevolution — periodic sudden large changes, and the normal concept of gradual evolution can be thought of as microevolution — a continuous, ⑪ **almost** unnoticeable succession of small changes.

You may believe that all forms of negative thinking are unnecessary, extreme, and irrational.

(A) Only when the thoughts take on an unrealistically negative and distorted quality (e.g., "my life is over because my friend is gone; the same fate will soon befall me; I have nothing left to look forward to in my life") is it likely that you will experience emotions and behavioral reactions that are dysfunctional and self-defeating.

(B) Nothing could be further from the truth. Quite often, you might experience unpleasant, tragic, and upsetting events in your life that you believe to be negative. As result of these beliefs, you experience unpleasant emotions. If you are perceiving a situation accurately, your distressing emotions will serve a useful function for you.

(C) For example, if a close friend has died and you are extremely sad because you miss your close relationship, crying, grieving, and sadness will allow you to work through the difficult situation and incorporate it into your experience so that you can move on with your life.

Evolution theory is being challenged. Darwin saw evolution as a gradual process of natural selection and survival of the fittest as the most likely phenomenon.

(A) One hypothesis on why this occurs is that changes in environment cause species to diversify and specialize into several new niches, creating new lineages. In Gould's theory, a species will be unchanged for thousands or hundreds of thousands of years and then suddenly something will happen that will change it (perhaps gene-splicing?) or even wipe it out.

(B) Gould's theory can be thought of as macroevolution — periodic sudden large changes, and the normal concept of gradual evolution can be thought of as microevolution — a continuous, almost unnoticeable succession of small changes.

(C) Now evolutionists such as paleontologists Niles Eldredge and Stephen Jay Gould argue that evolution is characterized by long periods of relative stability that are punctuated by sudden changes, followed by more stability, followed by more changes, and so on.

You may believe that all forms of negative thinking are unnecessary, extreme, and irrational. _____. Quite often, you might experience unpleasant, tragic, and upsetting events in your life that you believe to be negative. As result of these beliefs, you experience unpleasant emotions. If you are perceiving a situation accurately, your distressing emotions will serve a useful function for you. For example, if a close friend has died and you are extremely sad because you miss your close relationship, crying, grieving, and sadness will allow you to work through the difficult situation and incorporate it into your experience so that you can move on with your life. Only when the thoughts take on an unrealistically negative and distorted quality (e.g., "my life is over because my friend is gone; the same fate will soon befall me; I have nothing left to look forward to in my life") is it likely that you will experience emotions and behavioral reactions that are dysfunctional and self-defeating.

Nothing / be / the truth

**130.** 다음 빈칸에 들어갈 말을 주어진 〈조건〉에 맞게 영어로 쓰시오.[130]

Evolution theory is being challenged. Darwin saw evolution as a gradual process of natural selection and survival of the fittest as the most likely phenomenon. Now evolutionists such as paleontologists Niles Eldredge and Stephen Jay Gould argue that evolution is characterized by long periods of relative stability that are punctuated by sudden changes, followed by more stability, followed by more changes, and so on. One hypothesis on why this occurs is that changes in environment _____, creating new lineages. In Gould's theory, a species will be unchanged for thousands or hundreds of thousands of years and then suddenly something will happen that will change it (perhaps gene-splicing?) or even wipe it out. Gould's theory can be thought of as macroevolution — periodic sudden large changes, and the normal concept of gradual evolution can be thought of as microevolution — a continuous, almost unnoticeable succession of small changes.

**131.** 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?[131)]

Nobody has to teach a child to demand fair treatment; children protest ① **unfairness** vigorously and as soon as they can communicate. Nobody has to teach us to admire a person who ② **sacrifices** for a group; the admiration for duty is ③ **universal**. Nobody has to teach us to disdain someone who ④ **is disloyal to** a friend or is disloyal to a family or tribe. Nobody has to teach a child the difference between rules that are ⑤ **immoral** — "Don't hit" — and rules that are not — "Don't chew gum in school." These preferences also emerge from somewhere deep inside us. Just as we have a natural suite of emotions to help us love and be loved, so, too, we have a natural suite of moral emotions to make us disapprove of people who ⑥ **infringe** social commitments, and approve of people who ⑦ **intensify** them. There is no society on earth where people are ⑧ **complimented** for running away in battle.

**132.** 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?[132)]

In a recent presidential election, one of our local comedians ① **compiled** a list of all the recommendations being made by both the Democratic and Republican candidates for the presidency. He then switched them, and asked committed Democratic and Republican supporters about them. Democratic voters were told their candidate thought the American military needed to be strengthened, the national borders more ② **tightly controlled**, and voter identification efforts ③ **fortified**. As for those committed to the Republican candidate, he questioned them about their support of their candidate's (supposed) statements ④ **emphasizing** the need to expand national health care, create a more ⑤ **unbiased** tax system, and increase the minimum wage. In every case, the supporters did not question the ⑥ **integrity** of the list. Instead, they began ⑦ **avoiding** their candidate's positions. It was as if it did not ⑧ **matter** what the facts were; once they had made up their minds who they were voting for, their job was to ⑨ **support** him, not question him.

**133.** 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?[133)]

You may believe that all forms of negative thinking are unnecessary, extreme, and irrational. ① **Nothing** could be further from the truth. Quite often, you might experience unpleasant, tragic, and upsetting events in your life that you believe to be negative. As result of these beliefs, you experience unpleasant emotions. If you are perceiving a situation accurately, your distressing emotions will serve a ② **useless** function for you. For example, if a close friend has died and you are extremely sad because you miss your close relationship, crying, grieving, and sadness will ③ **permit** you to work through the difficult situation and ④ **integrate** it into your experience so that you can move on with your life. Only when the thoughts take on an unrealistically ⑤ **negative and twisted** quality (e.g., "my life is over because my friend is gone; the same fate will soon befall me; I have ⑥ **nothing** left to look forward to in my life") is it likely that you will experience emotions and behavioral reactions that are dysfunctional and self-defeating.

**134.** 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?[134)]

Evolution theory is being challenged. Darwin saw evolution as a ① **steady** process of natural selection and survival of the fittest as the most likely phenomenon. Now evolutionists such as paleontologists Niles Eldredge and Stephen Jay Gould argue that evolution is characterized by long periods of ② **relative stability** that are punctuated by sudden changes, followed by more stability, followed by more changes, and so on. One hypothesis on why this occurs is that changes in environment cause species to ③ **vary** and specialize into several new niches, ④ **creating** new lineages. In Gould's theory, a species will be ⑤ **changed** for thousands or hundreds of thousands of years and then suddenly something will happen that will change it (perhaps gene-splicing?) or even wipe it out. Gould's theory can be thought of as ⑥ **macroevolution** — periodic sudden large changes, and the normal concept of gradual evolution can be thought of as ⑦ **microevolution** — a continuous, almost ⑧ **unnoticeable** succession of small changes.

**135.** 다음 글의 밑줄 친 부분 중 의미가 같은 어휘로 바르게 연결되지 않은 것은?[135)]

Nobody has to teach a child to demand fair treatment; children ① **protest** unfairness vigorously and as soon as they can communicate. Nobody has to teach us to ② **admire** a person who sacrifices for a group; the admiration for duty is universal. Nobody has to teach us to ③ **disdain** someone who betrays a friend or is disloyal to a family or tribe. Nobody has to teach a child the difference between rules that are moral — "Don't hit" — and rules that are not — "Don't chew gum in school." These preferences also emerge from somewhere deep inside us. Just as we have a natural suite of emotions to help us love and be loved, so, too, we have a natural suite of moral emotions to make us ④ **disapprove** of people who violate social commitments, and approve of people who reinforce them. There is no society on earth where people are ⑤ **praised** for running away in battle.

① resist
② esteem
③ despise
④ object to
⑤ complemented

**137.** 다음 글의 밑줄 친 부분 중 영영풀이가 맞지 않는 것은?[137)]

You may believe that all forms of negative thinking are unnecessary, extreme, and ① **irrational**. Nothing could be further from the truth. Quite often, you might experience unpleasant, tragic, and upsetting events in your life that you believe to be negative. As result of these beliefs, you experience unpleasant emotions. If you are perceiving a situation accurately, your distressing emotions will serve a useful function for you. For example, if a close friend has died and you are extremely sad because you ② **miss** your close relationship, crying, grieving, and sadness will allow you to work through the difficult situation and ③ **incorporate** it into your experience so that you can move on with your life. Only when the thoughts take on an unrealistically negative and ④ **distorted** quality (e.g., "my life is over because my friend is gone; the same fate will soon befall me; I have nothing left to look forward to in my life") is it likely that you will experience emotions and behavioral reactions that are ⑤ **dysfunctional** and self-defeating.

① not thinking clearly, not able to use reason or good judgment
② to fail to hit, catch, reach, or get (something)
③ to include (something) as part of something else
④ be changed the natural, normal, or original shape, appearance, or sound of (something) in a way that is usually not attractive or pleasing
⑤ not designed to have a practical use

**138.** 다음 글의 밑줄 친 부분 중 영영풀이가 맞지 않는 것은?[138]

Evolution theory is being challenged. Darwin saw evolution as a ① **gradual** process of natural selection and survival of the fittest as the most likely phenomenon. Now evolutionists such as paleontologists Niles Eldredge and Stephen Jay Gould argue that evolution is characterized by long periods of relative stability that are ② **punctuated** by sudden changes, followed by more stability, followed by more changes, and so on. One hypothesis on why this occurs is that changes in environment cause species to diversify and specialize into several new ③ **niches**, creating new ④ **lineages**. In Gould's theory, a species will be unchanged for thousands or hundreds of thousands of years and then suddenly something will happen that will change it (perhaps gene-splicing?) or even wipe it out. Gould's theory can be thought of as macroevolution — periodic sudden large changes, and the normal concept of gradual evolution can be thought of as microevolution — a continuous, almost unnoticeable ⑤ **succession** of small changes.

① moving or changing in small amounts, happening in a slow way over a long period of time
② to use punctuation marks in (a piece of writing)
③ an environment that has all the things that a particular plant or animal needs in order to live
④ the living thing who were in someone's family in past times
⑤ the act of getting a title or right after the person who had that title or right before you has died or is no longer able or allowed to have it
