문법

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[1)]

Today we are using some 400 million plus tonnes of paper per annum in a global population of about seven billion, but if we ① **look** at the anticipated population figure in 2045 of nine billion, just on that basis ② **alone** paper production will need to increase by 30 percent. On top of that, within our current population not everybody is able to get a newspaper or has a book to read, or has enough exercise books to write on at school. As their percentage increases the demand for paper will also increase. We have limited land and a limited number of trees, and if we don't recycle we will not be able to supply the 400 million tonnes we need today or meet the demands of an increasing population. Remember of course ③ **that** within the 400 million tonnes we use today about 200 million tonnes of waste paper ④ **is used** in its manufacturing; 200 million tonnes of waste paper generates roughly 160 million tonnes of ⑤ **recycled** paper. Therefore, if we ⑥ **hadn't recycled** we would only have 240 million tonnes of paper so there would be a shortfall or we would have to use more pulp.

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[2)]

The effects of climate change will fall most ① **heavily** upon the poor of the world. Regions such as Africa could face severely ② **compromised** food production and water shortages, while coastal areas in South, East, and Southeast Asia will be at great risk of flooding. Tropical Latin America will see damage to forests and agricultural areas due to drier climate, while in South America changes in precipitation patterns and the disappearance of glaciers will significantly affect water availability. While the richer countries may have the economic resources to adapt to many of the effects of climate change, without significant aid poorer countries will be unable to implement preventive measures, especially ③ **those** that rely on the newest technologies. This ④ **raises** fundamental issues of environmental justice in relation to the impact of economic and political power on environmental policy on a global scale. The concept of climate justice is a term ⑤ **used** for framing global warming as an ethical and political issue, rather than one that is purely environmental or physical in nature. The principles of climate justice imply an equitable sharing ⑥ **both** of the burdens of climate change and the costs of ⑦ **development** policy responses.

For years, companies and countries took their rare metal supply lines for granted, **(A)[aware / unaware]** of the material makeup of their products. In fact, in 2011, Congress forced the U.S. military to research its supply chains **(B)**그 이유는 펜타곤(미국 국방부)이 그것에 어떤 첨단 금속이 필요한지 결정하는 데 어려움을 겪고 있었기 때문이다. As the materials that make up product components have become more varied and complex, those who rely on sophisticated hardware **(C)can no longer afford to remain in the dark**. Now, corporate and government leaders are realizing how **(D)[important / unimportant]** rare metals are. Indeed, efforts to **(E)[secure / neglect]** rare metals have sparked a war over the periodic table. In offices from Tokyo to Washington, D.C., in research and development labs from Cambridge, Massachusetts, to Baotou, China, and in **(F)[strategic / biologic]** command centers the world over, **(G)[noble / novel]** policies and the launching of research programs are ensuring that nations have **(H)[access / press]**. The struggle for minor metals isn't **(I)[imminent / remote]**; it's already here and is shaping the relationship between countries as **(J)[coherence / conflicts]** over other resources **(K)did** in the past.

36. 위 글의 괄호 (A)부분 안에서 문맥에 맞는 낱말로 가장 적절한 것을 고르시오.[서술형36)]

37. 위 글의 밑줄 친 (B)부분의 우리말을 필요시 변형하여 영어로 적으시오.[서술형37)]

difficulty / because / which / the Pentagon / be / have / advance / need / determine / metals / it

38. 위 글의 밑줄 친 (C)부분이 의미하는 바를 우리말로 적으시오.[서술형38)]

39. 위 글의 괄호 (D)부분 안에서 문맥에 맞는 낱말로 가장 적절한 것을 고르시오.[서술형39)]

40. 위 글의 괄호 (E)부분 안에서 문맥에 맞는 낱말로 가장 적절한 것을 고르시오.[서술형40)]

41. 위 글의 괄호 (F)부분 안에서 문맥에 맞는 낱말로 가장 적절한 것을 고르시오.[서술형41)]

42. 위 글의 괄호 (G)부분 안에서 문맥에 맞는 낱말로 가장 적절한 것을 고르시오.[서술형42)]

43. 위 글의 괄호 (H)부분 안에서 문맥에 맞는 낱말로 가장 적절한 것을 고르시오.[서술형43)]

44. 위 글의 괄호 (I)부분 안에서 문맥에 맞는 낱말로 가장 적절한 것을 고르시오.[서술형44)]

45. 위 글의 괄호 (J)부분 안에서 문맥에 맞는 낱말로 가장 적절한 것을 고르시오.[서술형45)]

46. 위 글의 밑줄 친 (K)부분이 의미하는 바를 본문에서 찾아 필요시 변형하여 적으시오.[서술형46)]

47. 위 글의 주제를 적으시오.[서술형47)]

c_____ and n_____ e_____ to s_____ r_____ m_____

48. 아래 영영풀이에 해당하는 단어를 위 글에서 찾아 적으시오.[서술형48)]

highly developed and complex

다음 글을 읽고 물음에 답하시오.

The effects of climate change will fall most heavily upon the poor of the world. Regions such as Africa could face severely **(A)**_____ food production and water shortages, while coastal areas in South, East, and Southeast Asia will be at great risk of flooding. Tropical Latin America will see damage to forests and agricultural areas due to drier climate, while in South America changes in **(B)**_____ patterns and the **(C)**_____ of glaciers will significantly affect **(D)**_____. While the richer countries may have the economic resources to **(E)**_____ to many of the effects of climate change, without significant aid poorer countries will be **(F)**_____ to implement preventive measures, especially **(G)<u>those</u>** that rely on the newest technologies. This raises fundamental issues of **(H)**_____ in relation to the impact of economic and political power on environmental policy on a global scale. The concept of **(I)**_____ is a term used for framing global warming as an **(J)**_____ issue, rather than **(K)<u>one</u>** that is purely environmental or physical in nature. The principles of **(L)**_____ imply an **(M)**_____ sharing both of the burdens of climate change and the costs of developing policy responses.

66. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?66)

For years, companies and countries took their rare metal supply lines for granted, ① **ignorant** of the material makeup of their products. In fact, in 2011, Congress forced the U.S. military to research its supply chains because the Pentagon was having ② **trouble** determining which advanced metals it needed. As the materials that make up product components have become more varied and complex, those who rely on sophisticated hardware can no longer afford to ③ **remain** in the dark. Now, corporate and government leaders are realizing how ④ **crucial** rare metals are. Indeed, efforts to ⑤ **procure** rare metals have sparked a war over the periodic table. In offices from Tokyo to Washington, D.C., in research and development labs from Cambridge, Massachusetts, to Baotou, China, and in ⑥ **strategic** command centers the world over, ⑦ **novel** policies and the launching of research programs are ensuring that nations have ⑧ **access**. The struggle for minor metals isn't ⑨ **impending**; it's already here and is shaping the relationship between countries as ⑩ **peace** over other resources did in the past.

67. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?67)

The effects of climate change will fall most heavily upon the poor of the world. Regions such as Africa could face severely ① **compromised** food production and water shortages, while coastal areas in South, East, and Southeast Asia will be at great risk of flooding. Tropical Latin America will see damage to forests and agricultural areas due to drier climate, while in South America changes in ② **preparation** patterns and the ③ **evanishment** of glaciers will significantly affect ④ **water availability**. While the richer countries may have the economic resources to ⑤ **adjust** to many of the effects of climate change, without significant aid poorer countries will be ⑥ **incapable** to implement preventive measures, especially those that rely on the newest technologies. This raises fundamental issues of ⑦ **environmental justice** in relation to the impact of economic and political power on environmental policy on a global scale. The concept of climate justice is a term used for framing global warming as an ⑧ **ethical and political** issue, rather than one that is purely environmental or physical in nature. The principles of climate justice imply an ⑨ **impartial** sharing both of the burdens of climate change and the costs of developing policy responses.

68. 다음 글의 밑줄 친 부분 중 영영풀이가 옳은 것은?[68]

Today we are using some 400 million plus tonnes of paper per annum in a global population of about seven billion, but if we look at the anticipated population ① **figure** in 2045 of nine billion, just on that basis alone paper production will need to increase by 30 percent. On top of that within our current population not everybody is able to get a newspaper or has a book to read, or has enough ② **exercise** books to write on at school. As their percentage increases the demand for paper will also increase. We have limited land and a limited number of trees, and if we don't recycle we will not be able to supply the 400 million tonnes we need today or meet the ③ **demands** of an increasing population. Remember of course that within the 400 million tonnes we use today about 200 million tonnes of waste paper is used in its manufacturing; 200 million tonnes of waste paper generates ④ **roughly** 160 million tonnes of recycled paper. Therefore if we didn't recycle we would only have 240 million tonnes of paper so there would be a ⑤ **shortfall** or we would have to use more pulp.

① a person or animal that can be seen only as a shape or outline
② physical activity that is done in order to become stronger and healthier
③ to say in a forceful way that something must be done or given to you, to say that you have a right to (something)
④ in a way that is large or important enough to be noticed or have an effect
⑤ a failure to get what is expected or needed

69. 다음 글의 밑줄 친 부분 중 영영풀이가 맞지 않는 것은?[69]

For years, companies and countries took their rare metal supply lines for granted, unaware of the material makeup of their products. In fact, in 2011, Congress forced the U.S. military to research its supply chains because the Pentagon was having difficulty determining which advanced metals it needed. As the materials that make up product ① **components** have become more varied and complex, those who rely on ② **sophisticated** hardware can no longer afford to remain in the dark. Now, corporate and government leaders are realizing how important rare metals are. Indeed, efforts to ③ **secure** rare metals have sparked a war over the periodic table. In offices from Tokyo to Washington, D.C., in research and development labs from Cambridge, Massachusetts, to Baotou, China, and in ④ **strategic** command centers the world over, new policies and the launching of research programs are ensuring that nations have access. The struggle for minor metals isn't ⑤ **imminent**; it's already here and is shaping the relationship between countries as conflicts over other resources did in the past.

① one of the parts of something (such as a system or mixture), an important piece of something
② having or showing a lot of experience and knowledge about the world and about culture, art, literature, etc.
③ protected from danger or harm
④ of or relating to a general plan that is created to achieve a goal in war, politics, etc., usually over a long period of time
⑤ happening very soon

70. 다음 글의 밑줄 친 부분 중 영영풀이가 맞지 않는 것은?[70]

The effects of climate change will fall most heavily upon the poor of the world. Regions such as Africa could face severely ① **compromised** food production and water shortages, while coastal areas in South, East, and Southeast Asia will be at great risk of flooding. Tropical Latin America will see damage to forests and agricultural areas due to drier climate, while in South America changes in ② **precipitation** patterns and the disappearance of glaciers will significantly affect water availability. While the richer countries may have the economic resources to adapt to many of the effects of climate change, without significant aid poorer countries will be unable to ③ **implement** preventive measures, especially those that rely on the newest technologies. This raises fundamental issues of environmental ④ **justice** in relation to the impact of economic and political power on environmental policy on a global scale. The concept of climate justice is a term used for framing global warming as an ethical and political issue, rather than one that is purely environmental or physical in nature. The principles of climate justice imply an ⑤ **equitable** sharing both of the burdens of climate change and the costs of developing policy responses.

① impaired or diminished in function; weakened, damaged, or flawed
② water that falls to the ground as rain, snow, etc.
③ to begin to do or use (something, such as a plan); to make (something) active or effective
④ the quality of being unfair
⑤ just or fair, dealing fairly and equally with everyone

정답

1) ⑥ didn't recycle
2) ⑦ developing

18) ④
19) ④
20) ④
21) ③
22) ③
23) [look] [alone] [enough exercise] [that] [is used] [recycled] [didn't recycle]
24) [unaware] [to research] [determining] [needed] [that] [to remain] [important] [to secure] [that] [did]
25) [heavily] [compromised] [while] [to adapt] [many] [those] [that] [raises] [used] [that] [developing]
26) look
27) alone
28) On top of that
29) that
30) is used
31) recycled
32) didn't recycle
33) the necessity for paper recycling
34) shortfall
35) ①
36) unaware
37) because the Pentagon was having difficulty determining which advanced metals it needed
38) 정교한 하드웨어에 어떤 첨단 금속이 필요한지 알아야 한다
39) important
40) secure
41) strategic
42) novel
43) access
44) imminent
45) conflicts
46) shaped the relationship between countries
47) corporate and national efforts to secure rare metals
48) sophisticated
49) compromised
50) precipitation
51) disappearance
52) water availability
53) adapt
54) incapable
55) measures
56) environmental justice
57) climate justice
58) ethical and political
59) issue
60) climate justice
61) equitable
62) Concepts and Principles of Climate Justice
63) justice
64) can no longer afford to remain in the dark
65) the impact of economic and political power on environmental policy
66) ⑩ conflicts
67) ② precipitation
68) ⑤
69) ③
70) ④
