The term common pool resources refers to resources that are available to all, but owned by no one. Nature-based examples include forests, oceans, and vistas, whereas common pool cultural resources can include a community's song, dance, and traditions. Many tourism products and experiences rely on common pool resources. The extent and accessibility of these resources has led McKean to suggest that common pool resources, in addition to being available to anyone, _____. Hardin presented the initial illustration of this concept in his influential article titled "The Tragedy of the Commons." In this article, he described a community that thrives on the growth of its cattle, which graze on communal pastureland. As demand grows, residents are inclined to maximize their benefits by ignoring the cumulative effect of each person grazing an additional head of cattle on the communal lands. Hardin asserted that the ignorance of individuals using common pool resources will lead to eventual depletion of the resource. The potential combined impact of individual use of common pool resources is an important element of tourism's sustainable development.
