1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[1)]

It is evident that self-esteem has a significant effect on health — both directly and indirectly. For instance, self-esteem ① **is typically considered** a key feature of mental health and therefore worth ② **pursuing** in its own right. It may also have an indirect influence through its contribution to intentions to undertake healthy or unhealthy actions. For instance, at a commonsense level, individuals who respect and value themselves will, other things ③ **being** equal, ④ **seek to look** after themselves by adopting courses of action that ⑤ **prevents** disease. Less obviously perhaps, there is strong evidence that people ⑥ **enjoying** high self-esteem are less willing to tolerate dissonance and more likely to take rational action to reduce that dissonance, by, for example, ⑦ **rejecting** unhealthy behaviour. Those having low self-esteem ⑧ **are** more likely to conform to interpersonal pressures than ⑨ **those** enjoying high self-esteem with unfortunate consequences when such social pressure ⑩ **results in** 'unhealthy behaviour'. In terms of empowerment, though, any unthinking yielding to social pressure would ⑪ **be considered unhealthy**!

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[2)]

In recent years, researchers have been trying to understand the changes that ① **occur** in the brain during adolescence. Structural brain imaging studies over the past decade ② **have challenged** the belief that structural brain development ends in early childhood, ③ **revealing** that changes occur through early adulthood. In addition, these studies provide an insight into the biological basis for understanding adolescent thinking and behavior. For example, the ventromedial prefrontal cortex of the brain is responsible for evaluating risk and reward to help ④ **guide** the person to make a decision. Imaging studies have shown that this part of the brain is the last to mature in adolescents, which ⑤ **support** behavioral studies that show adolescents take greater risks than adults in activities such as substance abuse. Adolescents tend ⑥ **to engage** in more reckless behaviors because the area of the brain that assesses risk and benefits has not completely developed yet. These findings, along with other studies ⑦ **examining** the maturation of other regions of the prefrontal cortex during adolescence, ⑧ **suggest** that the spontaneity, short-sightedness, and risk-taking behaviors ⑨ **associated** with adolescence could be partially biological in nature.

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[3)]

Both prescription and over-the-counter drugs are subject to strict control by the FDA, ① **including** the regulation of manufacturing processes, specific requirements for the demonstration of safety and efficacy, as well as well-defined limits on advertising and labeling claims. Such controls provide assurances to consumers and health care professionals about the quality of the products and ② **contribute** to their acceptance as "legitimate" treatments. The exemption of dietary supplements from these specific regulatory controls may impact their consideration as "legitimate". If health care professionals feel ③ **that** the quality of dietary supplement products ④ **is** lacking, and if they consider dietary supplements outside the scope of "prevailing" medical or pharmacy practice, then physicians and pharmacists will have a low level of confidence in recommending these products to their patients for fear of legal action. Physicians and pharmacists cannot, however, separate ⑤ **them** from the use of dietary supplements. With more than 29,000 dietary supplements on the market, consumers have broad access to and are using these products. In fact, a survey of consumers ⑥ **has** suggested that approximately 42% of American consumers were using complementary and alternative therapies, with 24% of consumers ⑦ **using** plant-based dietary supplements on a regular basis.

(A) Adolescents tend to engage in more reckless behaviors because the area of the brain that assesses risk and benefits has not completely developed yet. These findings, along with other studies examining the maturation of other regions of the prefrontal cortex during adolescence, suggest that the spontaneity, short-sightedness, and risk-taking behaviors associated with adolescence could be partially biological in nature.

(B) Structural brain imaging studies over the past decade have challenged the belief that structural brain development ends in early childhood, revealing that changes occur through early adulthood. In addition, these studies provide an insight into the biological basis for understanding adolescent thinking and behavior.

(C) For example, the ventromedial prefrontal cortex of the brain is responsible for evaluating risk and reward to help guide the person to make a decision. Imaging studies have shown that this part of the brain is the last to mature in adolescents, which supports behavioral studies that show adolescents take greater risks than adults in activities such as substance abuse.

⑤ something that happens as a result of a particular action or set of conditions

115. 다음 글의 밑줄 친 부분 중 영영풀이가 맞지 않는 것은?[115)]

Both prescription and over-the-counter drugs are subject to strict control by the FDA, including the regulation of manufacturing processes, specific requirements for the demonstration of safety and ① **efficacy**, as well as well-defined limits on advertising and labeling claims. Such controls provide assurances to consumers and health care professionals about the quality of the products and contribute to their acceptance as "② **legitimate**" treatments. The ③ **exemption** of dietary supplements from these specific regulatory controls may impact their consideration as "legitimate". If health care professionals feel that the quality of dietary supplement products is lacking, and if they consider dietary supplements outside the scope of "prevailing" medical or pharmacy practice, then physicians and pharmacists will have a low level of confidence in recommending these products to their patients for fear of legal action. Physicians and pharmacists cannot, however, separate themselves from the use of dietary supplements. With more than 29,000 dietary supplements on the market, consumers have broad access to and are using these products. In fact, a survey of consumers has suggested that approximately 42% of American consumers were using ④ **complementary** and ⑤ **alternative** therapies, with 24% of consumers using plant-based dietary supplements on a regular basis.

① the power to produce a desired result or effect
② not allowed by the law
③ freedom from being required to do something that others are required to do
④ completing something else or making it better, serving as a complement
⑤ offering or expressing a choice

정답

1) ⑤ prevent
2) ⑤ supports
3) ⑤ themselves
4) ⑧ maturation
5) ⑤ exemption
6) ②
7) ④
8) ①
9) ⑤
10) ⑤
11) ②
12) ①
13) ⑤
14) ③
15) ④
16) ③
17) ①
18) ④
19) ⑤
20) ④
21) ④
22) ①
23) ②
24) ②
25) ④
26) ⑤
27) ④
28) ③
29) ③
30) [that] [is typically considered] [pursuing] [themselves] [being] [seek] [to look] [themselves] [prevent] [that] [enjoying] [are] [rejecting] [having] [are] [those] [enjoying] [results] [in] [be considered] [unhealthy]
31) [occur] [have challenged] [that] [revealing] [that] [occur] [guide] [have] [that] [supports] [that] [to engage] [that] [examining] [suggest] [that] [associated] [partially]
32) [including] [contribute] [that] [is] [separate] [themselves] [has] [that] [using]
33) 자존감이 건강에 큰 영향을 미치는 것
34) self-esteem
35) health
36) self-esteem
37) is typically considered
38) mental health
39) pursuing
40) to undertake
41) actions
42) themselves
43) being
44) seek to look
45) themselves
46) adopting
47) prevent
48) ②
49) enjoying
50) high self-esteem
51) are
52) dissonance
53) rational action
54) dissonance
55) rejecting
56) having
57) low self-esteem
58) are
59) interpersonal pressures
60) enjoying
61) high self-esteem
62) results in
63) unhealthy behaviour
64) unthinking yielding
65) be considered unhealthy
66) the effects of self-esteem on health
67) tolerate
68) ①
69) challenged
70) ②
71) ends
72) revealing
73) occur
74) 위험과 이득을 평가하는 뇌의 영역이 아직 완전히 발달하지는 않았기 때문에 청소년은 더 무모한 행동을 하는 경향이 있다
75) biological
76) evaluating
77) last
78) 뇌의 복내측 시상하핵 전전두엽 피질이 청소년에게 있어서 가장 마지막으로 발달한다
79) supports
80) to engage
81) reckless
82) has
83) examining
84) maturation
85) suggest
86) associated
87) biological
88) changes in the brain happening in puberty
89) abuse
90) ①
91) strict control
92) including
93) well-defined limits
94) assurances
95) contribute

96) acceptance
97) legitimate
98) exemption
99) legitimate
100) is
101) prevailing
102) low level of confidence
103) separate
104) broad access
105) has
106) alternative
107) with 24% of consumers using plant-based dietary supplements on a regular basis
108) health supplements out of control
109) self-esteem has a significant effect on health
110) provide an insight into the biological basis for understanding adolescent thinking and behavior
111) separate themselves from the use of dietary supplements
112) ⑦ reckless
113) ⑤ exemption
114) ②
115) ②
