문법

1. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[1)]

Learners can improve the effectiveness of their attributions through training. In a pioneering study, Carol Susan Dweck, an American psychologist, ① **provided** students who demonstrated learned helplessness with both successful and unsuccessful experiences. When the students were unsuccessful, the experimenter specifically stated that the failure ② **was caused** by lack of effort or ineffective strategies. Comparable students ③ **were given** similar experiences but no training. After 25 sessions, the learners who ④ **were counseled** about their effort and strategies responded more appropriately to failure by persisting longer and ⑤ **adapting** their strategies more effectively. Additional research has corroborated Dweck's findings. Strategy instruction was most effective for students who believed ⑥ **that** they were already trying hard. This research suggests that teachers can increase students' motivation to learn by teaching them learning strategies and ⑦ **encourage** them ⑧ **to attribute** successes to effort.

2. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[2)]

A lot of research ① **discusses** what leads to relatively permanent acquisition of new knowledge or skills. You won't be ② **surprised** to hear that active learning works far better than passive learning. In other words, sitting still in a classroom for more than a half hour at a time (③ **no matter how** interesting the material) isn't nearly as potent as ④ **having** opportunities to engage actively with the concepts through discussion, group interaction, practice, immersion, or some other form of direct experience. Likewise, it is absolutely critical for retaining new knowledge and skills that all your senses ⑤ **are engaged**. It is great to simulate your intellect, but even better if you can become ⑥ **involved** emotionally, physically, and interpersonally. In other words, it isn't enough to merely read this material in a book or hear an instructor ⑦ **talk** about it in class. You must also have opportunities ⑧ **practice** the skills and make the ideas your own.

3. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?[3)]

According to Piaget, organizing, assimilating, and accommodating can ① **be viewed** as a kind of complex balancing act. In his theory, the actual changes in thinking ② **take** place through the process of equilibration — the act of searching for a balance. Piaget assumed ③ **that** people continually test the adequacy of their thinking processes in order to achieve that balance. Briefly, the process of equilibration works like this: If we apply a particular scheme to an event or situation and the scheme works, then equilibrium ④ **existing**. If the scheme does not produce a ⑤ **satisfying** result, then disequilibrium exists, and we become uncomfortable. This motivates us ⑥ **to keep searching** for a solution through assimilation and accommodation, and thus our thinking changes and moves ahead. Of course, the level of disequilibrium must be just right or optimal — too little and we aren't ⑦ **interested** in changing, too much and we may ⑧ **be discouraged** or anxious and not change.

4. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?[4)]

Learners can improve the effectiveness of their ① **attributions** through training. In a pioneering study, Carol Susan Dweck, an American psychologist, provided students who demonstrated learned ② **helplessness** with both successful and unsuccessful experiences. When the students were ③ **unsuccessful**, the experimenter specifically stated that the failure was caused by lack of effort or ④ **ineffective** strategies. Comparable students were given similar experiences but ⑤ **no training**. After 25 sessions, the learners who were counseled about their effort and strategies responded more ⑥ **inappropriately** to failure by persisting longer and adapting their strategies more effectively. Additional research has ⑦ **corroborated** Dweck's findings. Strategy instruction was most ⑧ **effective** for students who believed that they were already trying hard. This research suggests that teachers can increase students' motivation to learn by teaching them learning strategies and encouraging them to **attribute** successes to effort.

5. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?[5)]

A lot of research discusses what leads to relatively ① **permanent acquisition** of new knowledge or skills. You won't be surprised to hear that active learning works far ② **better** than passive learning. In other words, sitting still in a classroom for more than a half hour at a time (no matter how interesting the material) isn't nearly as ③ **potent** as having opportunities to engage ④ **actively** with the concepts through discussion, group interaction, practice, immersion, or some other form of direct experience. Likewise, it is absolutely critical for ⑤ **retaining** new knowledge and skills that all your senses are engaged. It is great to ⑥ **stimulate** your intellect, but even better if you can become involved emotionally, physically, and interpersonally. In other words, it isn't ⑦ **enough** to merely read this material in a book or hear an instructor talk about it in class. You must also have opportunities to practice the skills and make the ideas your own.

Piaget assumed **[that / what]** people continually test the adequacy of their thinking processes in order to achieve that balance. Briefly, the process of equilibration works **[like / alike]** this: If we apply a particular scheme to an event or situation and the scheme works, then equilibrium **[exists / existing]**. If the scheme does not produce a **[satisfying]** result, then disequilibrium **[exists / existing]**, and we become uncomfortable. This motivates us **[to keep / keeping]** **[to search / searching]** for a solution through assimilation and accommodation, and thus our thinking changes and moves ahead. Of course, the level of disequilibrium must be just right or optimal — too little and we aren't **[interesting / interested]** in changing, too much and we may **[discourage / be discouraged]** or anxious and not change.

Learners can improve the effectiveness of their **(A)**_____ through **(B)**_____. In a pioneering study, Carol Susan Dweck, an American psychologist, **(C)provide** students who demonstrated **(D)**_____ with both successful and unsuccessful experiences. When the students were **(E)[successful / unsuccessful]**, the experimenter specifically stated that the failure **(F)cause** by **(G)**_____ or **(H)[effective / ineffective]** strategies. Comparable students **(I)give** similar experiences but **(J)**_____. After 25 sessions, the learners who **(K)counsel** about their effort and strategies **(L)respond** more **(M)[appropriately / inappropriately]** to failure by persisting longer and **(N)adapt** their strategies more effectively. Additional research has **(O)**_____ Dweck's findings. Strategy instruction was most **(P)[effective / ineffective]** for students who believed that they were already trying hard. This research suggests that teachers can increase students' motivation to learn **(Q)**학생들에게 학습 전략을 가르치고 성공을 노력 덕분으로 생각하도록 고무함으로써.

100. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?100)

Learners can improve the effectiveness of their ① **attributions** through training. In a pioneering study, Carol Susan Dweck, an American psychologist, provided students who demonstrated learned ② **helplessness** with both successful and unsuccessful experiences. When the students were ③ **unproductive**, the experimenter specifically stated that the failure was caused by lack of effort or ④ **fruitless** strategies. Comparable students were given similar experiences but ⑤ **no training**. After 25 sessions, the learners who were counseled about their effort and strategies responded more ⑥ **adequately** to failure by persisting longer and adapting their strategies more effectively. Additional research has ⑦ **collaborated** Dweck's findings. Strategy instruction was most ⑧ **effective** for students who believed that they were already trying hard. This research suggests that teachers can increase students' motivation to learn by teaching them learning strategies and encouraging them to ⑨ **attribute** successes to effort.

101. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?101)

A lot of research discusses what leads to relatively ① **lasting acquisition** of new knowledge or skills. You won't be surprised to hear that active learning works far ② **better** than passive learning. In other words, sitting still in a classroom for more than a half hour at a time (no matter how interesting the material) isn't nearly as ③ **mighty** as having opportunities to engage ④ **actively** with the concepts through discussion, group interaction, practice, immersion, or some other form of direct experience. Likewise, it is absolutely critical for ⑤ **retaining** new knowledge and skills that all your senses are engaged. It is great to ⑥ **simulate** your intellect, but even better if you can become involved emotionally, physically, and interpersonally. In other words, it isn't ⑦ **insufficient** to merely read this material in a book or hear an instructor talk about it in class. You must also have opportunities to practice the skills and make the ideas your own.

102. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?102)

According to Piaget, organizing, assimilating, and accommodating can be viewed as a kind of complex ① **balancing act**. In his theory, the actual changes in thinking take place through the process of ② **equilibration** — the act of searching for a balance. Piaget assumed that people continually test the ③ **inadequacy** of their thinking processes in order to achieve that balance. Briefly, the process of equilibration works like this: If we apply a particular scheme to an event or situation and the scheme works, then ④ **equilibrium** exists. If the scheme does not produce a satisfying result, then ⑤ **disequilibrium** exists, and we become ⑥ **uncomfortable**. This motivates us to ⑦ **keep** searching for a solution through assimilation and accommodation, and thus our thinking changes and moves ahead. Of course, the level of ⑧ **disequilibrium** must be just right or optimal — too little and we aren't interested in changing, too much and we may be discouraged or anxious and not change.

103. 다음 글의 밑줄 친 부분 중 영영풀이가 맞지 않는 것은?[103)]

Learners can improve the effectiveness of their attributions through training. In a pioneering study, Carol Susan Dweck, an American psychologist, provided students who demonstrated learned helplessness with both successful and unsuccessful experiences. When the students were unsuccessful, the experimenter specifically stated that the failure was caused by lack of effort or ineffective strategies. ① **Comparable** students were given similar experiences but no training. After 25 sessions, the learners who were counseled about their effort and strategies responded more appropriately to failure by ② **persisting** longer and ③ **adapting** their strategies more effectively. Additional research has ④ **corroborated** Dweck's findings. Strategy instruction was most effective for students who believed that they were already trying hard. This research suggests that teachers can increase students' motivation to learn by teaching them learning strategies and encouraging them to ⑤ **attribute** successes to effort.

① used to say that two or more things are very similar and can be compared to each other
② to remain strong against the force or effect of (something), to not be affected or harmed by (something)
③ to change (something) so that it functions better or is better suited for a purpose
④ to support or help prove (a statement, theory, etc.) by providing information or evidence
⑤ to say that (something) is because of (someone or something)

104. 다음 글의 밑줄 친 부분 중 영영풀이가 맞지 않는 것은?[104)]

A lot of research discusses what leads to relatively permanent ① **acquisition** of new knowledge or skills. You won't be surprised to hear that active learning works far better than passive learning. In other words, sitting still in a classroom for more than a half hour at a time (no matter how interesting the material) isn't nearly as ② **potent** as having opportunities to engage actively with the concepts through discussion, group interaction, practice, ③ **immersion**, or some other form of direct experience. Likewise, it is absolutely critical for ④ **retaining** new knowledge and skills that all your senses are engaged. It is great to simulate your intellect, but even better if you can become involved emotionally, physically, and ⑤ **interpersonally**. In other words, it isn't enough to merely read this material in a book or hear an instructor talk about it in class. You must also have opportunities to practice the skills and make the ideas your own.

① the act or process of gaining skill, knowledge, etc.
