18

To whom it may concern,

My name is Michael Brown. I have been a bird-watcher since childhood. I have always enjoyed watching birds in my yard and identifying them by sight and sound. Yesterday, I happened to read an article about your club. I was surprised and excited to find out about a community of passionate bird-watchers who travel annually to go birding. I would love to join your club, but your website appears to be under construction. I could not find any information except for this contact email address. I would like to know how to sign up for the club. I look forward to your reply.

제 이름은 Michael Brown입니다. 저는 어렸을 때부터 조류 관찰자였습니다. 저는 항상 저의 뜰에서 새들을 관찰하여 모습과 소리로 그것들을 식별하는 것을 즐겼습니다. 어제 저는 우연히 귀하의 클럽에 대한 기사를 읽었습니다. 저는 조류 관찰을 하러 매년 여행하는 열정적인 조류 관찰자들의 공동체에 대해 알게 되어 놀랐고 신이 났습니다. 저는 귀하의 클럽에 가입하기를 몹시 원하지만, 귀하의 웹 사이트가 공사 중인 것 같습니다. 이 이메일 주소 외에 다른 정보를 찾을 수가 없었습니다. 클럽에 가입하는 방법을 알고 싶습니다. 귀하의 답장을 기다리겠습니다.

19

Putting all of her energy into her last steps of the running race, Jamie crossed the finish line. To her disappointment, she had failed to beat her personal best time, again. Jamie had pushed herself for months to finally break her record, but it was all for nothing. Recognizing how she felt about her failure, Ken, her teammate, approached her and said, “Jamie, even though you didn’t set a personal best time today, your performances have improved dramatically. Your running skills have progressed so much! You’ll definitely break your personal best time in the next race!” After hearing his comments, she felt confident about herself. Jamie, now motivated to keep pushing for her goal, replied with a smile. “You’re right! Next race, I’ll beat my best time for sure!”

Jamie는 자신의 모든 에너지를 달리기 경주의 마지막 스텝에 쏟으면서 결승선을 통과했다. 실망스럽게도, 그녀는 자신의 개인 최고 기록을 깨는 데 또 실패했다. Jamie는 기어코 자신의 기록을 깨기 위해 몇 달 동안 자신을 몰아붙였지만, 그것은 모두 수포로 돌아갔다. 그녀가 자신의 실패에 대해 어떻게 느끼는지 알아차린 그녀의 팀 동료인 Ken은 그녀에게 다가와 말했다. “Jamie, 비록 오늘 네가 개인 최고 기록을 세우지 않았지만 너의 경기력은 극적으로 향상되었어. 너의 달리기 기량이 아주 많이 발전했어! 다음 경주에서 너는 분명히 너의 개인 최고 기록을 깰 거야!” 그의 말을 들은 후, 그녀는 자신에 대해 자신감을 느꼈다. 이제 자신의 목표를 계속 밀고 나갈 의욕을 갖게 된 Jamie는 미소를 지으며 대답했다. “네 말이 맞아! 다음 경주에서 나는 틀림없이 최고 기록을 깰 거야!”

20

At every step in our journey through life we encounter junctions with many different pathways leading into the distance. Each choice involves uncertainty about which path will get you to your destination. Trusting our intuition to make the choice often ends up with us making a suboptimal choice. Turning the uncertainty into numbers has proved a potent way of analyzing the paths and finding the shortcut to your destination. The mathematical theory of probability hasn't eliminated risk, but it allows us to manage that risk more effectively. The strategy is to analyze all the possible scenarios that the future holds and then to see what proportion of them lead to success or failure. This gives you a much better map of the future ***on which to base*** your decisions about which path to choose.

*junction 분기점 **suboptimal 차선의

평생을 두고 우리 여정의 모든 단계에서 우리는 먼 곳으로 이어지는 많은 다른 길들이 있는 분기점을 만난다. 각각의 선택은 어떤 길이 여러분의 목적지로 데려다줄지에 대한 불확실성을 포함한다. 선택을 하기 위해 우리의 직관을 믿는 것은 흔히 우리가 차선의 선택을 하는 것으로 결국 끝난다. 불확실성을 숫자로 바꾸는 것은 여러분의 목적지로 가는 길을 분석하고 지름길을 찾는 강력한 방법으로 입증되었다. 확률에 대한 수학적 이론은 위험을 제거하지는 않았지만, 우리가 그 위험을 더 효과적으로 관리할 수 있게 해준다. 미래가 안고 있는 모든 가능한 시나리오를 분석한 다음, 그것들이 성공이나 실패로 이어질 비율이 얼마나 되는지를 살펴보는 것이 전략이다. 이것은 여러분이 어떤 길을 선택할 것인지에 관한 결정을 내릴 때 그 근거로 삼을 수 있는 미래에 대한 훨씬 더 좋은 지도를 여러분에게 제공한다.

어법 정리 - 절 대신 구 넣기

접속사, 관계사, 의문사는 S+V를 추가시키는 것이 기본 기능이다. [모든 영어화자가 이 기본 규칙을 다 알기 때문에, 절 대신 구로 바꿔도, 이해한다.]

접속사: I studied math **while** (I was) listening to music.	while 뒤에 I was를 생략해도, ~ing, p.p 만 있으면 이해할 수 있어서, 생략.
관계사: I have a place **in which** to live.	which 뒤에 S+V 대신 to를 써도 [앞으로 살~]이란 의미로 이해 가능해서, 전환 가능.
의문사: I don't know **what** to do.	what 뒤에 S+(should)V 대신 to를 써도 [앞으로 할~]이란 의미로 이해 가능해서, 전환 가능.

This / gives / you / a much better map of the future + you should base your decisions **on the future** (on which) about which (의문사) path to choose

21 = use writing as a means of reflecting on oneself

Coming of age in the 18th and 19th centuries, the personal diary became a centerpiece in the construction of a modern subjectivity, at the heart of which is the application of reason and critique to the understanding of world and self, which allowed the creation of a new kind of knowledge. Diaries were central media **through which** enlightened and free subjects could be constructed. They provided a space where one could write daily about her whereabouts, feelings, and thoughts. Over time and with rereading, disparate entries, events, and happenstances could be rendered into insights and narratives about the self, and allowed for the formation of subjectivity. It is in that context that the idea of "the self [as] both made and explored with words" emerges. Diaries were personal and private; one would write for oneself, or, in Habermas's formulation, one would make oneself public to oneself. By making the self public in a private sphere, the self also became an object for self-inspection and self-critique.

*disparate 이질적인 **render 만들다

18세기와 19세기에 발달한 상태가 된 개인 일기는 근대적 주체성을 구축하는 데 중심물이 되었는데, 그것의 중심에는 세계와 자아에 대한 이해에 이성과 비판의 적용이 있었고, 이는 새로운 종류의 지식을 창조할 수 있게 해주었다. 일기는 그것을 통해 계몽되고 자유로운 주체가 구성될 수 있는 중심 매체였다. 그것은 개인이 자신의 행방, 감정, 생각에 대해 매일 쓸 수 있는 공간을 제공했다. 시간이 지남에 따라 그리고 다시 읽음으로써, 이질적인 항목, 사건 및 우연이 자신에 관한 통찰력과 이야기로 만들어질 수 있었으며, 주체성의 형성을 가능하게 만들었다. '말로 만들어지고 또한 탐구되는 (것으로의) 자아'라는 개념이 나타나는 것은 바로 그러한 맥락에서다. 일기는 개인적이고 사적인 것이었다. 사람들은 자신을 위해 쓰곤 했는데, Habermas의 명확한 표현을 빌리면, 자신을 자신에게 공개적으로 만들곤 했다. 자아를 사적 영역에서 공적으로 만들면서, 자아는 또한 자기 점검과 자기 비판의 대상이 되었다.

Diaries / were / central media + enlightened and free subjects / could be constructed / through central media

Urban delivery vehicles can be adapted to better suit the density of urban distribution, which often involves smaller vehicles such as vans, including bicycles. The ***latter*** have the potential to become a preferred 'last-mile' vehicle, particularly in high-density and congested areas. In locations where bicycle use is high, such as the Netherlands, delivery bicycles ***are also used to carry*** personal cargo (e.g. groceries). Due to their low acquisition and maintenance costs, cargo bicycles convey much potential in developed and developing countries ***alike***, such as the becak (a three-wheeled bicycle) in Indonesia. Services using electrically assisted delivery tricycles have been successfully implemented in France and are gradually being adopted across Europe for services as varied as parcel and catering deliveries. Using bicycles as cargo vehicles is particularly encouraged when combined with policies that restrict motor vehicle *access* to specific areas of a city, such as downtown or commercial districts, or with the extension of dedicated bike lanes.

도시의 배달 운송 수단은 도시 배치의 밀집 상태에 더 잘 맞도록 개조될 수 있는데, 거기에는 자주 밴과 같은 더 작은 운송 수단을 포함하는데, 자전거도 포함된다. 후자 (자전거)는 특히 밀도가 높고 혼잡한 지역에서 선호되는 '최종 단계' 운송 수단이 될 잠재력이 있다. 네덜란드와 같이 자전거 사용이 많은 지역에서 배달 자전거가 또한 개인 짐(예를 들어 식료품)을 운반하기 위해 사용된다. 매입과 유지 비용이 낮아서 짐자전거는 선진국에서 그리고 인도네시아의 becak(바퀴가 세 개 달린 자전거)와 같이 개발도상국에서 똑같이 많은 잠재력을 전달한다. 전기 보조 배달용 세발자전거를 이용하는 서비스는 프랑스에서 성공적으로 시행되었고 소포나 음식 배달과 같은 다양한 서비스를 위해 유럽 전역에서 점차 도입되고 있다. 자전거를 화물 운송 수단으로 사용하는 것은 도심이나 상업 지구처럼 도시의 특정 지역에 자동차 접근을 제한하는 정책이나 자전거 전용 도로의 확장과 결합될 때 특히 장려된다.

23

An important advantage of disclosure, as opposed to more aggressive forms of regulation, is its flexibility and respect for the operation of free markets. Regulatory mandates are blunt swords; they tend to neglect diversity and may have serious unintended adverse effects. For example, energy efficiency requirements for appliances may produce goods that work less well or that have characteristics that consumers do not want. Information provision, by contrast, respects freedom of choice. If automobile manufacturers are required to measure and publicize the safety characteristics of cars, potential car purchasers can trade safety concerns against other attributes, such as price and styling. If restaurant customers are informed of the calories in their meals, those who want to lose weight can make use of the information, leaving those who are unconcerned about calories unaffected. Disclosure does not interfere with, and should even promote, the autonomy (and quality) of individual decision-making.

*mandate 명령 **adverse 거스르는 ***autonomy 자율성

공개의 중요한 이점은 더 공세적인 형태의 규제와는 반대로 자유 시장의 작용에 대한 유연성과 존중이다. 규제하는 명령은 무딘 칼인데, 그것들은 다양성을 무시하는 경향이 있으며, 의도하지 않은 심각한 역효과를 발생시킬 수도 있다. 예를 들어, 가전제품에 대한 에너지 효율 요건은 덜 잘 작동하거나 소비자가 원하지 않는 특성을 가진 제품을 만들어 낼 수도 있다. 반대로 정보 제공은 선택의 자유를 존중한다. 자동차 제조업체가 자동차의 안전 특성을 측정하고 공개해야 한다면, 잠재적인 자동차 구매자는 가격과 스타일 같은 다른 속성과 안전에 대한 우려를 맞바꿀 수 있다. 식당 손님들에게 식사에 들어 있는 칼로리를 알려주면, 살을 빼고 싶은 사람들은 그 정보를 이용할 수 있고, 칼로리에 신경 쓰지 않는 사람들은 영향을 받지 않은 채로 있게 된다. 공개는 개인 의사 결정의 자율성(과 품질)을 방해하지 않으며 심지어 촉진할 것이다.

24

Different parts of the brain's visual system get information on a need-to-know basis. Cells that help your hand muscles reach out to an object need to know the size and location of the object, but they don't need to know about color. They need to know a little about shape, but not in great detail. Cells that help you recognize people's faces need to be extremely sensitive to details of shape, but they can pay less attention to location. It is natural to assume that anyone who sees an object sees everything about it — the shape, color, location, and movement. However, one part of your brain sees its shape, another sees color, another detects location, and another perceives movement. Consequently, after localized brain damage, it is possible to see certain aspects of an object and not others. Centuries ago, people found it difficult to imagine how someone could see an object without seeing what color it is. Even today, you might find it surprising to learn about people who see an object without seeing where it is, or see it without seeing whether it is moving.

뇌 시각 시스템의 다양한 부분들은 꼭 필요한 때 꼭 필요한 것만 알려주는 방식으로 정보를 얻는다. 여러분의 손 근육이 어떤 물체에 닿을 수 있도록 돕는 세포들은 그 물체의 크기와 위치를 알아야 하지만 색깔에 대해 알 필요는 없다. 그것들(그 세포들)은 모양에 대해 약간 알아야 하지만, 매우 자세히는 아니다. 여러분이 사람의 얼굴을 인식하도록 돕는 세포는 모양의 세부 사항에 극도로 예민해야 할 필요가 있지만, 위치에는 신경을 덜 쓸 수 있다. 어떤 물체를 보는 사람은 누구든 모양, 색깔, 위치, 움직임 등 그것에 관한 모든 것을 보고 있다고 추정하는 것은 당연하다. 하지만, 여러분 뇌의 한 부분은 그것의 모양을 보고, 다른 한 부분은 색깔을 보며, 또 다른 부분은 위치를 감지하고, 또 다른 한 부분은 움직임을 인식한다. 따라서 국부적 뇌 손상 후 물체의 특정한 측면은 볼 수 있으면서 다른 측면은 볼 수 없는 것이 가능하다. 수 세기 전, 사람들은 어떻게 누군가가 색깔이 무엇인지 못 보면서 그 물체를 볼 수 있는 지 상상하기가 어려웠다. 심지어 오늘날에도, 여러분은 물체가 어디에 있는지 보지 못하면서 그것을 보거나, 또는 그것이 움직이고 있는지 보지 못하면서 그것을 보는 사람들에 대해 알게 되면 놀라워할 수 있다.

26

Niklas Luhmann, a renowned sociologist of the twentieth century, was born in Lüeburg Germany in1927. After World War II, he studied law at the University of Freiburg until 1949. Early in his career, he worked for the State of Lower Saxony, where he was in charge of educational reform. In 1960—1961, Luhmann had the chance to study sociology at Harvard University, where he was influenced by Talcott Parsons, one of the most famous social system theorists. Later, Luhmann developed his own social system theory. In 1968, he became a professor of sociology at the University of Bielefeld. He researched a variety of subjects, including mass media and law. Although his books are known to be difficult to translate, they have in fact been widely translated into other languages.

20세기의 유명한 사회학자 Niklas Luhmann은 1927년 독일 Luneburg에서 태어났다. 제2차 세계 대전 후, 그는 University of Freiburg에서 1949년까지 법학을 공부했다. 경력 초기에 그는 State of Lower Saxony에서 일했는데, 그곳에서 그는 교육 개혁을 담당했다. 1960년에서 1961년 기간에 Luhmann은 Harvard University에서 사회학을 공부할 기회가 있었는데, 그곳에서 그는 가장 유명한 사회 체계 이론가 중 한 명이었던 Talcott Parsons의 영향을 받았다. 나중에 Luhmann은 자기 자신의 사회 체계 이론을 개발했다. 1968년에 그는 University of Bielefeld에서 사회학 교수가 되었다. 그는 대중 매체와 법을 포함한 다양한 주제를 연구했다. 비록 그의 책들이 번역하기 어렵다고 알려져 있지만, 그것들은 사실 다른 언어들로 널리 번역되었다.

29

Trends constantly suggest new opportunities for individuals to restage themselves, representing occasions for change. To understand how trends can ultimately give individuals power and freedom, one must first discuss fashion's importance as a basis for change. The most common explanation offered by my informants as to why fashion is so appealing is that it constitutes a kind of theatrical costumery. Clothes are part of how people present *themselves* to the world, and fashion locates them in the present, relative to what is happening in society and to fashion's own history. As a form of expression, fashion contains a host of ambiguities, enabling individuals to recreate the meanings associated with specific pieces of clothing. Fashion is among the simplest and cheapest methods of self-expression: clothes can be inexpensively purchased while making it easy to convey notions of wealth, intellectual stature, relaxation or environmental consciousness, even if none of these is true. Fashion can also strengthen agency in various ways, opening up space for action.

*stature 능력

유행은 사람들이 자신을 재조정할 새로운 기회를 끊임없이 제시하고, 변화의 때를 나타낸다. 유행이 궁극적으로 어떻게 개인에게 힘과 자유를 줄 수 있는지를 이해하기 위해서는 먼저 변화를 위한 기반으로서의 패션의 중요성에 대해 논의해야 한다. 왜 패션이 그렇게 매력적인 지에 대해 나의 정보 제공자들이 한 가장 흔한 설명은 그것이 일종의 연극적인 의상을 구성한다는 것이다. 옷은 사람들이 자신을 세상에 보여주는 방식의 일부이고, 패션은 사회에서 일어나고 있는 일, 그리고 패션 자체의 역사와 관련하여 그들을 현재에 위치시킨다. 표현 형태로서 패션은 다수의 모호함을 담고 있어 개인이 특정한 옷과 연관된 의미를 재창조할 수 있게 한다. 패션은 자기표현의 가장 단순하고 값싼 방법 중 하나로, 옷은 저렴하게 구매할 수 있으며, 부, 지적 능력, 휴식 또는 환경 의식에 대한 개념을, 비록 이것 중 어느 것도 사실이 아니라 해도, 쉽게 전달할 수 있다. 패션은 또한 행동을 위한 공간을 열어주며 다양한 방법으로 행동력을 강화할 수 있다.

30

Everywhere we turn we hear about almighty “cyberspace”! The hype promises that we will leave our boring lives, put on goggles and body suits, and enter some metallic, three-dimensional, multimedia other world. When the Industrial Revolution arrived with its great innovation, the motor, we didn’t leave our world to go to some remote motorspace! On the contrary, we brought the motors into our lives, as automobiles, refrigerators, drill presses, and pencil sharpeners. This absorption has been so complete that we refer to all these tools with names that declare their usage, not their “motorness.” These innovations led to a major socioeconomic movement precisely because they entered and affected profoundly our everyday lives. People have not changed fundamentally in thousands of years. Technology changes constantly. It’s the one that must adapt to us. That’s exactly what will happen with information technology and its devices under human-centric computing. The longer we continue to believe that computers will take us to a magical new world, the longer we will *delay* their natural fusion with our lives, the hallmark of every major movement that aspires to be called a socioeconomic revolution.

*hype 과대광고 **hallmark 특징

우리가 고개를 돌리는 곳 어디서든 우리는 전능하신 ‘사이버공간’에 대해 듣는다! 과대 광고는 우리가 지루한 삶을 떠나 고글과 바디 수트를 착용하고, 어떤 금속성의, 3차원의, 멀티미디어로 만들어진 다른 세계로 들어갈 것이라고 약속한다. 위대한 혁신인 모터와 함께 산업혁명이 도래했을 때 우리는 어떤 외딴 모터 공간으로 가기 위해 우리의 세상을 떠나지 않았다! 반대로, 우리는 모터를 자동차, 냉장고, 드릴 프레스, 연필깎이와 같은 것들로 우리 삶에 가져왔다. 이 흡수는 매우 완전해서 우리는 그것들의 ‘모터성’이 아니라 그것들의 사용을 분명하게 밝히는 이름으로 이 모든 도구를 지칭한다. 이러한 혁신품들은 정확히 우리의 일상생활에 들어와 깊은 영향을 미쳤기 때문에 주요한 사회경제적 운동으로 이어졌다. 사람들은 수천 년 동안 근본적으로 변하지 않았다. 기술은 끊임없이 변화한다. 우리에게 적응해야 하는 것은 바로 그것이다. 그것이 바로 정보 기술과 그 장치들이 인간 중심의 컴퓨터 사용 하에 일어날 일이다. 컴퓨터가 우리를 마법 같은 신세계로 데려다줄 것이라고 계속해서 더 오래 믿게 될수록 컴퓨터와 우리 삶의 자연스러운 융합이 더 오래 유지될(→ 지연될) 것인데, 이는 사회경제적 혁명이라고 불리기를 열망하는 모든 주요 운동의 특징이다.

31

There is something deeply paradoxical about the professional status of sports journalism, especially in the medium of print. In discharging their usual responsibilities of description and commentary, reporters' accounts of sports events are eagerly consulted by sports fans, while in their broader journalistic role of covering sport in its many forms, sports journalists are among the most visible of all contemporary writers. The ruminations of the elite class of 'celebrity' sports journalists are much sought after by the major newspapers, their lucrative contracts **being** the envy of colleagues in other 'disciplines' of journalism. Yet sports journalists do not have a standing in their profession that corresponds to the size of their readerships or of their pay packets, with the old saying (now reaching the status of cliche) that sport is the 'toy department of the news media' still readily to hand as a dismissal of the worth of what sports journalists do. This reluctance to take sports journalism seriously produces the paradoxical outcome that sports newspaper writers are much read but little *admired*.

*discharge 이행하다 **rumination 생각 ***lucrative 돈을 많이 버는

스포츠 저널리즘의 전문적 지위에 관해서, 특히 인쇄 매체에서, 매우 역설적인 것이 있다. 기자들이 설명하고 논평하는 통상적으로 자신이 맡은 일을 이행할 때, 스포츠팬들이 스포츠 경기에 관한 기자들의 설명을 열심히 찾아보는 반면, 여러 형식으로 스포츠를 취재하는 그들의 더 폭넓은 저널리스트의 역할에서 스포츠 저널리스트는 동시대의 모든 작가 중에서 가장 눈에 띄는 이들 가운데 있다. '유명인급' 스포츠 저널리스트 중 엘리트 계층의 생각은 주요 신문사들이 많이 원하고, 그들의 돈을 많이 버는 계약은 저널리즘의 다른 '부문'에 있는 동료들의 선망 대상이 된다. 그러나 스포츠 저널리스트는 스포츠는 스포츠 저널리스트들이 하는 일의 가치를 묵살하는 말로 여전히 쉽게 건네지는 '뉴스 매체의 장난감 부서'라는 (이제는 상투적인 문구의 지위에 이르는) 옛말과 더불어 그들의 독자 수나 급여 액수의 크기에 상응하는 그들 전문성에서의 지위를 누리지 못한다. 이렇게 스포츠 저널리즘을 진지하게 여기기를 꺼리는 것은 스포츠 신문 작가들이 많이 읽히면서도 거의 존경받지 못하는 역설적인 결과를 낳는다.

32

People have always wanted to be around other people and to learn from them. Cities have long been dynamos of social possibility, foundries of art, music, and fashion. Slang, or, if you prefer, “lexical innovation,” has always started in cities — an outgrowth of all those different people so frequently exposed to one another. It spreads outward, in a manner not unlike trans-missible disease, which itself typically “takes off” in cities. If, as the noted linguist Leonard Bloomfield argued, the way a person talks is a “composite result of what he has heard before,” then language innovation would happen where the most people heard and talked to the most other people. Cities drive taste change because they *offer the greatest exposure to other people*, who not surprisingly are often the creative people cities seem to attract. Media, ever more global, ever more far-reaching, spread language faster to more people.

*foundry 주물 공장 **lexical 어휘의

사람들은 항상 다른 사람들 주위에 머무르며 그들로부터 배우기를 원해 왔다. 도시는 오랫동안 사회적 가능성의 발전기, 즉 예술, 음악, 패션의 주물 공장이었다. 속어, 또는 여러분이 선호한다면 ‘어휘의 혁신’은 항상 도시에서 시작되었는데, 그 모든 별의 별 사람이 그렇게도 빈번히 서로에게 접촉한 결과물이다. 그것은 전염성 질병과 다르지 않은 방식으로 외부로 퍼져나가는데, 그 전염성 질병 자체도 보통 도시에서 ‘이륙한다.’ 저명한 언어학자 Leonard Bloomfield가 주장하듯, 한 사람이 말하는 방식이 ‘그가 전에 들었던 것을 합성한 결과물’이라면, 언어 혁신은 가장 많은 사람이 가장 많은 다른 사람의 말을 듣고 가장 많은 다른 사람에게 말한 곳에서 일어날 것이다. 도시는 그곳이 다른 사람들과의 가장 많은 접촉을 제공하기 때문에 취향 변화를 이끄는데, 그들은 놀랄 것도 없이 흔히 도시가 끌어들이는 듯 보이는 창의적인 사람들이다. 그 어느 때보다 더 전방위적이고, 그 어느 때보다 더 멀리까지 미치는 미디어는 언어를 더 빨리 더 많은 사람에게 퍼뜨린다.

33

The entrance to a honeybee colony, often ***referred to as*** the dancefloor, is a market place for information about the state of the colony and the environment outside the hive. Studying interactions on the dancefloor *provides* us *with* a number of illustrative examples of how individuals changing their own behavior in response to local information *allow the colony to regulate its workforce*. For example, upon returning to their hive honeybees that have collected water search out a receiver bee to unload their water to within the hive. If this search time is short then the returning bee is more likely to perform a waggle dance to recruit others to the water source. Conversely, if this search time is long then the bee is more likely to give up collecting water. Since receiver bees will only accept water if they require it, either for themselves or to pass on to other bees and brood, this unloading time is correlated with the colony's overall need of water. Thus the individual water forager's response to unloading time (up or down) regulates water collection in response to the colony's need.

*brood 애벌레 **forager 조달자

흔히 댄스 플로어라고 불리는 꿀벌 군집의 입구는 군집의 상태와 벌집 밖의 환경에 관한 정보를 교환하기 위한 시장이다. 댄스 플로어에서의 상호 작용을 연구하는 것은 우리에게 지엽적인 정보에 반응하여 그것들 자신의 행동을 바꾸는 개체들이 어떻게 군집이 그것의 노동력을 조절할 수 있게 하는지에 대한 많은 예증이 되는 예들을 제공한다. 예를 들어, 물을 가져온 꿀벌들은 자신들의 벌집으로 돌아오자마자 자신들의 물을 벌집 안으로 넘겨주기 위해 물을 받을 벌을 찾는다. 만약 이 (물을 받을 벌을) 찾는 시간이 짧으면, 그 돌아오는 벌은 물이 있는 곳으로 데려갈 다른 벌들을 모집하기 위해 8자 춤을 출 가능성이 더 크다. 반대로, 이 찾는 시간이 길면 그 벌은 물을 가지러 가는 것을 포기할 가능성이 더 크다. 물을 받는 벌들은 자신들을 위해서든 다른 벌들과 애벌레들에게 전해주기 위해서든, 물이 필요할 때만 물을 받을 것이므로, 이러한 물을 넘겨주는 시간은 군집의 전반적인 물 수요와 상관관계가 있다. 따라서 (시간이 늘어나든 혹은 줄어들든 간에) 물을 넘겨주는 시간에 대한 개별적인 물 조달자의 반응은 군집의 수요에 맞춰서 물 수집(량)을 조절한다.

어법 정리 - refer to A as B; A를 B라고 여기다.

People refer to the team as Avengers. [능동] = The team **is referred to as** Avengers. [수동] refer to만 수동으로 바꾸고, as~는 그대로 둔다.

숙어 정리 - A에게 B를 공급하다(주다). * with가 도움의 재료/내용임을 기억하자

provide, supply, furnish, present, feed, endow, entrust, fill **A with B** = **B for(to) A**

34

We understand that the segregation of our consciousness into present, past, and future is both a fiction and an oddly self-referential framework; your present was part of your mother's future, and your children's past will be in part your present. Nothing is generally wrong with structuring our consciousness of time in this conventional manner, and it often works well enough. In the case of climate change, however, the sharp division of time into past, present, and future has been desperately misleading and has, most importantly, hidden from view the extent of the responsibility of those of us alive now. The narrowing of our consciousness of time smooths the way to divorcing ourselves from responsibility for developments in the past and the future with which our lives are in fact deeply intertwined. In the climate case, it is not that *we face the facts but then deny our responsibility*. **It is that** the realities are obscured from view by the partitioning of time, and so questions of responsibility toward the past and future do not ***arise*** naturally.

*segregation 분리 **intertwine 뒤얽히게 하다 ***obscure 흐릿하게 하다

우리는 우리의 의식을 현재, 과거, 미래로 분리하는 것이 허구이며 또한 이상하게도 자기 지시적인 틀이라는 것을 이해하는데, 여러분의 현재는 여러분 어머니 미래의 일부였고 여러분 자녀의 과거는 여러분 현재의 일부일 것이라는 것이다. 시간에 대한 우리의 의식을 이러한 전통적인 방식으로 구조화하는 것에는 일반적으로 잘못된 것이 전혀 없으며 그것은 흔히 충분히 효과적이다. 그러나 기후 변화의 경우, 시간을 과거, 현재, 미래로 분명하게 구분하는 것은 심하게 (사실을) 오도해왔으며 가장 중요하게는 지금 살아 있는 우리들의 책임 범위를 시야로부터 숨겨왔다. 시간에 대한 우리의 의식을 좁히는 것은 사실 우리의 삶이 깊이 뒤얽혀 있는 과거와 미래의 발전에 대한 책임으로부터 우리를 단절시키는 길을 닦는다. 기후의 경우, 우리가 사실을 직면하면서도 우리의 책임을 부인하는 것이 문제가 아니다. 문제는 시간을 나눔으로써 현실이 시야로부터 흐릿해지고 그래서 과거와 현재의 책임에 관한 질문이 자연스럽게 생겨나지 않는 것이다.

앞 문장에서 it is not that~ 이라고 했으므로, not A but B 로 이해하면 된다.

It is that the realities are obscured from view by the partitioning of time, ~

Actors, singers, politicians and countless others recognise the power of the human voice as a means of communication beyond the simple decoding of the words that are used. Learning to control your voice and use it for different purposes is, therefore, one of the most important skills to develop as an early career teacher. The more confidently you give instructions, the higher the chance of a positive class response. There are times when being able to project your voice loudly will be very useful when working in school, and knowing that you can cut through a noisy classroom, dinner hall or playground is a great skill to have. However, I would always *advise* that you use your loudest voice incredibly sparingly and avoid shouting as much as possible. A quiet, authoritative and measured tone has so much more impact than slightly panicked shouting.

배우, 가수, 정치가, 그리고 무수한 다른 사람은 사용된 단어의 단순한 해독을 넘어서는 의사소통의 수단으로서의 사람 목소리의 힘을 인정한다. 따라서 여러분의 목소리를 통제하고 그것을 다양한 목적을 위해 사용하는 것을 배우는 것은 경력 초기의 교사로서 개발해야 할 가장 중요한 기술 중 하나이다. 여러분이 더 자신 있게 수업할수록, 긍정적인 학급의 반응이 나올 확률은 더 높다. 목소리를 크게 내보낼 수 있는 것이 학교에서 일할 때 매우 유용할 경우가 있으며, 여러분이 시끄러운 교실, 구내식당이나 운동장을 (목소리로) 가를 수 있다는 것을 아는 것은 갖춰야 할 훌륭한 기술이다. 그러나, 나는 가장 큰 목소리는 놀랍도록 드물게 쓰고 소리치는 것을 최대한 피해야 한다고 항상 조언하고자 한다. 조용하고도 권위가 있으며 침착한 어조는 약간 당황한 고함보다 그렇게나 훨씬 더 큰 효과를 가진다.

A fascinating species of water flea exhibits a kind of flexibility that evolutionary biologists call adaptive plasticity. If the baby water flea is developing into an adult in water that includes the chemical signatures of creatures that prey on water fleas, it develops a helmet and spines to defend itself against predators. If the water around it doesn't include the chemical signatures of predators, the water flea doesn't develop these protective devices. That's a clever trick, because producing spines and a helmet is costly, in terms of energy, and conserving energy is essential for an organism's ability to survive and reproduce. The water flea only expends the energy needed to produce spines and a helmet when it needs to. So it may well be that this plasticity is an adaptation: a trait that came to exist in a species because it contributed to reproductive fitness. There are many cases, across many species, of adaptive plasticity. Plasticity is conducive to fitness if there is sufficient variation in the environment.

*spine 가시 돌기 **conducive 도움되는

물벼룩이라는 매혹적인 종은 진화생물학자들이 '적응적 가소성'이라고 부르는 일종의 유연성을 보여 준다. (B) 만일 새끼 물벼룩이 물벼룩을 잡아먹고 사는 생물의 화학적인 (고유한) 특징을 포함하는 물에서 성체로 발달하고 있으면, 그것은 자신을 포식자로부터 지키기 위해 머리 투구와 가시 돌기를 발달시킨다. 만일 자신을 둘러싼 물이 포식자의 화학적인 특징을 포함하지 않으면, 그 물벼룩은 이러한 보호 장치를 발달시키지 않는다. (A) 그것은 영리한 묘책인데, 에너지 면에서 가시 돌기와 머리 투구를 만드는 것은 비용이 많이 들고 에너지를 보존하는 것은 살아남고 생식하는 유기체의 능력을 위해 핵심적이기 때문이다. 물벼룩은 오직 필요할 때만 가시 돌기와 머리 투구를 만드는 데 필요한 에너지를 소모한다. (C) 그러므로 이러한 가소성은 아마 적응일 텐데, 즉 그것은 생식의 적합성에 이바지하기 때문에 생물 종에 존재하게 된 특징이다. 많은 종에 걸쳐 적응적 가소성의 많은 사례가 있다. 가소성은 환경에 충분한 차이가 있을 때 적합성에 도움이 된다.

The most commonly known form of results-based pricing is a practice called contingency pricing, used by lawyers. Contingency pricing is the major way that personal injury and certain consumer cases are billed. In this approach, lawyers do not receive fees or payment until the case is settled, when they are paid a percentage of the money that the client receives. Therefore, only an outcome in the client's favor is compensated. From the client's point of view, the pricing makes sense in part because most clients in these cases are unfamiliar with and possibly intimidated by law firms. Their biggest fears are high fees for a case that may take years to settle. By using contingency pricing, clients are ensured that they pay no fees until they receive a settlement. In these and other instances of contingency pricing, the economic value of the service is hard to determine before the service, and providers develop a price that allows them to share the risks and rewards of delivering value to the buyer.

*intimidate 위협하다

결과 기반 가격 책정 중 가장 일반적으로 알려진 형태는 변호사가 사용하는 '승소 시 보수 약정'이라고 불리는 관행이다. (C) 승소 시 보수 약정은 개인 상해 및 특정 소비자 소송에 대해 비용이 청구되는 주요 방식이다. 이 방식에서 변호사는 소송이 해결될 때까지 수수료나 지불금을 받지 않는데, 그 때 그들은 의뢰인이 받는 금액의 일정 비율을 받는다. (A) 따라서 의뢰인에게 유리한 결과만 보수가 지불된다. 의뢰인의 관점에서 보면, 이러한 소송의 의뢰인 대부분이 법률 사무소에 익숙하지 않고 아마도 겁을 먹을 수 있다는 부분적인 이유로 그 가격 책정은 타당하다. 그들의 가장 큰 두려움은 해결하는 데 몇 년이 걸릴 수 있는 소송에 대한 높은 수수료이다. (B) 승소 시 보수 약정을 사용함으로써 의뢰인은 합의금을 받을 때까지 수수료를 지불하지 않도록 보장받는다. 승소 시 보수 약정의 이런 경우와 여타 경우에서 서비스의 경제적 가치는 서비스 전에 결정하기 어렵고, 공급자는 구매자에게 가치를 전달하는 위험과 보상을 그들이 나눌 수 있게 하는 가격을 전달한다.

38

Parks take the shape demanded by the cultural concerns of their time. Once parks are in place, they are no inert stage — their purposes and meanings are made and remade by planners and by park users. Moments of park creation are particularly telling, however, for they reveal and actualize ideas about nature and its relationship to urban society. Indeed, what distinguishes a park from the broader category of public space is the representation of nature that parks are meant to embody. Public spaces include parks, concrete plazas, sidewalks, even indoor atriums. Parks typically have trees, grass, and other plants as their central features. When entering a city park, people often imagine a sharp separation from streets, cars, and buildings. *There's a reason for that: traditionally, park designers attempted to create such a feeling by planting tall trees at park boundaries, building stone walls, and constructing other means of partition.* What's behind this idea is not only landscape architects' desire to design aesthetically suggestive park spaces, but a much longer history of Western thought that envisions cities and nature as antithetical spaces and oppositional forces.

*aesthetically 미적으로 **antithetical 대조적인

공원은 그것이 속한 시대의 문화적 관심사가 요구하는 형태를 취한다. 일단 공원이 마련되면, 그것은 비활성화된 단계가 아닌데 그것의 목적과 의미는 계획자와 공원 이용자에 의해 만들어지고 다시 만들어진다. 그러나 공원을 조성하는 순간들은 특히 의미가 있는데, 자연과 그것이 도시 사회와 갖는 관계에 대한 생각을 드러내고 실현하기 때문이다. 실제로 공원을 더 넓은 범주의 공공 공간과 구별하는 것은 공원이 구현하려는 자연의 표현이다. 공공 공간에는 공원, 콘크리트 광장, 보도, 심지어 실내 아트리움도 포함된다. 일반적으로 공원에는 그들의 중심적인 특색으로 나무, 풀, 그리고 다른 식물들이 있다. 도시 공원에 들어갈 때, 사람들은 흔히 거리, 자동차, 그리고 건물과의 뚜렷한 분리를 상상한다. 거기에는 이유가 있는데, 전통적으로 공원 설계자들은 공원 경계에 키 큰 나무를 심고, 돌담을 쌓고, 다른 칸막이 수단을 세워 그런 느낌을 만들어 내려고 했다. 이 생각의 배후에는 미적인 암시가 있는 공원 공간을 설계하려는 조경가의 욕망뿐만 아니라 도시와 자연을 대조적인 공간과 반대 세력으로 상상하는 훨씬 더 오래된 서구 사상의 역사가 있다.

39

Negotiators should try to find ways to slice a large issue into smaller pieces, known as using salami tactics. Issues that can be expressed in quantitative, measurable units are easy to slice. For example, compensation demands can be divided into cents-per-hour increments or lease rates can be quoted as dollars per square foot. When working to fractionate issues of principle or precedent, parties may use the time horizon (when the principle goes into effect or how long it will last) as a way to fractionate the issue. *It may be easier to reach an agreement when settlement terms don't have to be implemented until months in the future.* Another approach is to vary the number of ways that the principle may be applied. For example, a company may devise a family emergency leave plan that allows employees the opportunity to be away from the company for a period of no longer than three hours, and no more than once a month, for illness in the employee's immediate family.

*increment 증가 **fractionate 세분하다

협상가들은 '살라미 전술'을 사용하는 것으로 알려진, 큰 문제를 더 작은 조각으로 나누는 방법을 찾으려고 노력해야 한다. 정량적이고 측정 가능한 단위로 표현될 수 있는 문제는 나누기 쉽다. 예를 들어, 보상 요구는 시간당 센트 증가로 나누거나 임대료는 평방 피트당 달러로 시세를 매길 수 있다. 원칙이나 관례의 쟁점을 세분화하는 작업을 할 때, 당사자들은 그 쟁점을 세분화하는 방법으로 시간 지평(원칙이 효력을 발휘하거나 지속되는 기간)을 사용할 수 있다. 합의 조건이 향후 몇 개월까지 이행될 필요가 없을 때 합의에 도달하는 것이 더 쉬울 수 있다. 또 다른 접근법은 원칙이 적용될 수 있는 방법의 수를 다양화하는 것이다. 예를 들어, 회사는 직원의 직계 가족의 질병에 대해 직원에게 3시간 이내, 한 달에 한 번 이내의 기간 동안 회사를 비울 기회를 제공하는 가족 비상 휴가 계획을 고안할 수 있다.

40

"Craftsmanship" may suggest a way of life that declined with the arrival of industrial society — but this is misleading. Craftsmanship names an enduring, basic human impulse, the desire to do a job well for its own sake. Craftsmanship cuts a far wider swath than skilled manual labor; it serves the computer programmer, the doctor, and the artist; parenting improves when it is practiced as a skilled craft, as does citizenship. In all these domains, craftsmanship focuses on objective standards, on the thing in itself. Social and economic conditions, however, often stand in the way of the craftsman's discipline and commitment: schools may fail to provide the tools to do good work, and workplaces may not truly value the aspiration for quality. And though craftsmanship can reward an individual with a sense of pride in work, this reward is not simple. The craftsman often faces conflicting objective standards of excellence; the desire to do something well for its own sake can be weakened by competitive pressure, by frustration, or by obsession.

*swath 구획

'장인정신'은 산업 사회의 도래와 함께 쇠퇴한 삶의 방식을 나타낼지도 모르지만, 이것은 오해의 소지가 있다. 장인정신은 지속적이고 기본적인 인간의 충동, 즉 일 자체를 위해 그것을 잘하고 싶은 욕망을 말한다. 장인정신은 숙련된 육체 노동보다 훨씬 더 넓은 구획을 가르는데, 그것은 컴퓨터 프로그래머, 의사, 예술가에게 도움이 되고, 시민정신과 마찬가지로 그것이 숙련된 기술로서 실행될 때 양육은 향상된다. 이 모든 영역에서 장인정신은 객관적인 기준, 즉 그 자체의 것에 초점을 맞춘다. 그러나 사회적, 경제적 조건은 흔히 장인의 수련과 전념을 방해하는데, 즉 학교는 일을 잘하기 위한 도구를 제공하지 못할 수 있고, 직장은 품질에 대한 열망을 진정으로 가치 있게 여기지 않을 수 있다. 그리고 비록 장인정신이 일에 대한 자부심으로 개인에게 보상을 줄 수 있지만, 이 보상은 간단하지 않다. 장인은 흔히 뛰어남에 대한 상충되는 객관적 기준에 직면하며, 어떤 일 그 자체를 위해 그것을 잘하려는 욕망은 경쟁적 압력에 의해, 좌절에 의해 또는 집착에 의해 약화될 수 있다.

[41~42]

There is evidence that even very simple algorithms can outperform expert judgement on simple prediction problems. For example, algorithms have proved more accurate than humans in predicting whether a prisoner released on parole will go on to commit another crime, or in predicting whether a potential candidate will perform well in a job in future. In over 100 studies across many different domains, half of all cases show simple formulas make better significant predictions than human experts, and the remainder (except a very small handful), show a tie between the two. When there are a lot of different factors involved and a situation is very uncertain, simple formulas can win out by focusing on the most important factors and being consistent, while human judgement is too easily influenced by particularly salient and perhaps irrelevant considerations. A similar idea is supported by further evidence that 'checklists' can improve the quality of expert decisions in a range of domains by ensuring that important steps or considerations aren't missed when people are feeling *overloaded*. For example, treating patients in intensive care can require hundreds of small actions per day, and one small error could cost a life. Using checklists to ensure that no crucial steps are missed has proved to be remarkably effective in a range of medical contexts, from preventing live infections to reducing pneumonia.

*parole 가석방 **salient 두드러진 ***pneumonia 폐렴

매우 간단한 알고리즘조차도 간단한 예측 문제에 대한 전문가의 판단을 능가할 수 있다는 증거가 있다. 예를 들어, 가석방으로 풀려난 죄수가 계속해서 다른 범죄를 저지를 것인지 예측하거나, 잠재적인 후보자가 장차 직장에서 일을 잘할 것인지를 예측하는 데 알고리즘이 인간보다 더 정확하다는 것이 입증되었다. 많은 다른 영역에 걸친 100개가 넘는 연구에서, 모든 사례의 절반은 간단한 공식이 인간 전문가보다 중요한 예측을 더 잘하고, 그 나머지(아주 적은 소수를 제외하고)는 둘 사이의 무승부를 보여준다. 관련된 많은 다른 요인이 있고 상황이 매우 불확실할 때, 가장 중요한 요소에 초점을 맞추고 일관성을 유지함으로써 간단한 공식이 승리할 수 있는 반면, 인간의 판단은 특히 두드러지고 아마도 관련이 없는 고려 사항에 의해 너무 쉽게 영향을 받는다. 사람들이 편안하다고(→ 일이 너무 많다고) 느낄 때 중요한 조치나 고려사항을 놓치지 않도록 함으로써 '체크리스트'가 다양한 영역에서 전문가의 결정의 질을 향상할 수 있다는 추가적인 증거가 유사한 아이디어를 뒷받침한다. 예를 들어, 집중 치료 중인 환자를 치료하려면 하루에 수백 가지의 작은 조치가 필요할 수 있으며, 작은 실수 하나로 목숨을 잃게 할 수 있다. 어떠한 중요한 조치라도 놓치지 않기 위해 체크리스트를 사용하는 것은 당면한 감염을 예방하는 것에서부터 폐렴을 줄이는 것에 이르기까지 다양한 의학적 상황에서 현저하게 효과적이라는 것이 입증되었다.

[43~45]

"Hailey, be careful!" Camila yelled uneasily, watching her sister carrying a huge cake to the table. "Don't worry, Camila," Hailey responded, smiling. Camila relaxed only when Hailey had safely placed the cake on the party table. "Dad will be here shortly. What gift did you buy for his birthday?" Camila asked out of interest. "Dad will be surprised to find out what it is!" Hailey answered with a wink.

"I bet you bought a wallet or a watch for him," Camila said. In reply, Hailey answered, "No. I bought something much more personal. By the way, there's something you should know about Dad..." They were suddenly interrupted by the doorbell ringing. It was their dad and they were overjoyed to see him. "My lovely ladies, thank you for inviting me to your place for my birthday." He walked in joyfully, hugging his daughters. They all walked into the dining room, where he was greeted with a rainbow-colored birthday cake and fifty red roses.

"Happy birthday! You're fifty today, Dad. We love you!" Camila said before her sister handed him a small parcel. When he opened it, he discovered a pair of glasses inside. "Hailey, Dad doesn't have eyesight problems," Camila said, puzzled. "Actually Camila, I recently found out he has long been suffering from color blindness. He's kept it a secret so as not to worry us," Hailey explained.

"Dad, these glasses can help correct your red-green color blindness," said Hailey. He slowly put them on, and stared at the birthday presents on the table. Seeing vivid red and green colors for the first time ever, he started to cry. "Incredible! Look at those wonderful colors!" He shouted in amazement. Hailey told him in tears, "Dad, I'm glad you can now finally enjoy the true beauty of rainbows and roses. Red represents love and green represents health. You deserve both." Camila nodded, seeing how happy her gift of the glasses had made their dad.

(A) "Hailey, 조심해!" Camila는 동생이 테이블로 커다란 케이크를 들고 오는 것을 보며 걱정되어 소리쳤다. "걱정 마, Camila." Hailey는 미소 지으며 답했다. Camila는 Hailey가 파티 테이블에 케이크를 무사히 올려 두었을 때 비로소 안심했다. "아빠가 곧 오실 거야. 너는 아빠 생일을 위해 무슨 선물을 샀어?" Camila는 호기심에서 물었다. "그게 뭔지 알면 아빠가 깜짝 놀라실 거야!" Hailey는 윙크를 하며 답했다.

(D) "틀림없이 너는 아빠를 위해 지갑이나 시계를 샀을 거야."라고 Camila가 말했다. 대꾸하면서 Hailey는 "아니. 난 훨씬 더 개인적인 것을 샀어. 그건 그렇고 언니가 아빠에 대해 알아야 할 게 있어…"라고 대답했다. 초인종이 울리면서 그들의 대화는 갑자기 중단되었다. 그들의 아빠가 왔고 그들은 그를 보고 매우 기뻐했다. "사랑하는 우리 아가씨들, 내 생일에 너희들 집에 초대해줘서 고맙구나." 그는 기쁨에 차서 걸어 들어와 딸들을 껴안았다. 그들은 모두 식당으로 들어갔고, 그곳에서 그는 무지개색 생일 케이크와 50송이의 빨간 장미로 환영받았다.

(C) "생일 축하드려요! 오늘 쉰 살이세요, 아빠. 사랑해요!"라고 Camila가 말하고 나서 그녀의 동생이 그에게 작은 꾸러미를 드렸다. 그것을 열었을 때 그는 안에서 안경을 발견했다. "Hailey, 아빠에게 시력 문제는 없어."라고 Camila가 어리둥절해하며 말했다. "사실은 Camila, 난 아빠가 오랫동안 색맹을 앓고 있다는 것을 최근에 알게 되었어. 아빠는 우리를 걱정시키지 않으려고 그것을 비밀로 해왔어."라고 Hailey가 설명했다.

(B) "아빠, 이 안경은 적록색맹을 교정하는 데 도움이 될 수 있어요."라고 Hailey가 말했다. 그는 천천히 그것을 쓰고, 테이블 위에 있는 생일 선물을 바라보았다. 지금껏 처음으로 선명한 빨강색과 초록색을 보고 그는 울기 시작했다. "믿을 수가 없구나! 저 경이로운 색깔들을 보렴!" 그는 깜짝 놀라 소리쳤다. Hailey는 눈물을 흘리며 그에게 말했다. "아빠, 난 아빠가 이제 마침내 무지개와 장미의 진정한 아름다움을 즐길 수 있어서 기뻐요. 빨강색은 사랑을 나타내고 초록색은 건강을 나타내요. 아빠는 둘 다 누릴 자격이 있으세요." Camila는 고개를 끄덕이고서, 그녀의 안경 선물이 그들의 아빠를 얼마나 행복하게 했는지 알게 되었다.

Putting all of her energy into her last steps of the running race, Jamie crossed the finish line. To her d_____, she had failed to beat her p_____ best time, again. Jamie had pushed herself for months to finally b_____ her record, but it was all for nothing. R_____ how she felt about her failure, Ken, her teammate, a_____ her and said, "Jamie, even though you didn't set a personal best time today, your p_____ have i_____ d_____. Your running skills have p_____ so much! You'll definitely break your personal best time in the next race!" After hearing his comments, she felt c_____ about herself. Jamie, now m_____ to keep pushing for her goal, r_____ with a smile. "You're right! Next race, I'll beat my best time for sure!"

Jamie는 자신의 모든 에너지를 달리기 경주의 마지막 스텝에 쏟으면서 결승선을 통과했다. 실망스럽게도, 그녀는 자신의 개인 최고 기록을 깨는 데 또 실패했다. Jamie는 기어코 자신의 기록을 깨기 위해 몇 달 동안 자신을 몰아붙였지만, 그것은 모두 수포로 돌아갔다. 그녀가 자신의 실패에 대해 어떻게 느끼는지 알아차린 그녀의 팀 동료인 Ken은 그녀에게 다가와 말했다. "Jamie, 비록 오늘 네가 개인 최고 기록을 세우지 않았지만 너의 경기력은 극적으로 향상되었어. 너의 달리기 기량이 아주 많이 발전했어! 다음 경주에서 너는 분명히 너의 개인 최고 기록을 깰 거야!" 그의 말을 들은 후, 그녀는 자신에 대해 자신감을 느꼈다. 이제 자신의 목표를 계속 밀고 나갈 의욕을 갖게 된 Jamie는 미소를 지으며 대답했다. "네 말이 맞아! 다음 경주에서 나는 틀림없이 최고 기록을 깰 거야!"

At every step in our journey through life we e_____ junctions with many d_____ pathways l_____ into the distance. Each choice i_____ u_____ about which path will get you to your d_____. T_____ our i_____ to make the choice often ends up with us making a suboptimal choice. Turning the u_____ into numbers has proved a potent way of a_____ the paths and finding the shortcut to your destination. The m_____ t_____ of probability hasn't eliminated risk, but it a_____ us to m_____ that risk more effectively. The strategy is to a_____ all the p_____ scenarios that the future holds and then to see what p_____ of them lead to success or f_____. This gives you a much better map of the f_____ on which to base your decisions about which p_____ to choose.

평생을 두고 우리 여정의 모든 단계에서 우리는 먼 곳으로 이어지는 많은 다른 길들이 있는 분기점을 만난다. 각각의 선택은 어떤 길이 여러분의 목적지로 데려다줄지에 대한 불확실성을 포함한다. 선택을 하기 위해 우리의 직관을 믿는 것은 흔히 우리가 차선의 선택을 하는 것으로 결국 끝난다. 불확실성을 숫자로 바꾸는 것은 여러분의 목적지로 가는 길을 분석하고 지름길을 찾는 강력한 방법으로 입증되었다. 확률에 대한 수학적 이론은 위험을 제거하지는 않았지만, 우리가 그 위험을 더 효과적으로 관리할 수 있게 해준다. 미래가 안고 있는 모든 가능한 시나리오를 분석한 다음, 그것들이 성공이나 실패로 이어질 비율이 얼마나 되는지를 살펴보는 것이 전략이다. 이것은 여러분이 어떤 길을 선택할 것인지에 관한 결정을 내릴 때 그 근거로 삼을 수 있는 미래에 대한 훨씬 더 좋은 지도를 여러분에게 제공한다.

21

Coming of age in the 18th and 19th centuries, the p_____ diary became a centerpiece in the c_____ of a modern s_____, at the heart of which is the a_____ of reason and critique to the understanding of world and self, which a_____ the creation of a new kind of k_____. Diaries were central media through which e_____ and free subjects could be c_____. They p_____ a space where one could write daily about her whereabouts, feelings, and thoughts. Over time and with rereading, d_____ entries, events, and happenstances could be r_____ into insights and narratives about the self, and a_____ for the formation of subjectivity. It is in that c_____ that the idea of "the self [as] both made and e_____ with words" emerges. Diaries were personal and private; one would write for oneself, or, in Habermas's f_____, one would make oneself p_____ to oneself. By making the self public in a p_____ sphere, the self also became an o_____ for self-inspection and self-critique.

18세기와 19세기에 발달한 상태가 된 개인 일기는 근대적 주체성을 구축하는 데 중심물이 되었는데, 그것의 중심에는 세계와 자아에 대한 이해에 이성과 비판의 적용이 있었고, 이는 새로운 종류의 지식을 창조할 수 있게 해주었다. 일기는 그것을 통해 계몽되고 자유로운 주체가 구성될 수 있는 중심 매체였다. 그것은 개인이 자신의 행방, 감정, 생각에 대해 매일 쓸 수 있는 공간을 제공했다. 시간이 지남에 따라 그리고 다시 읽음으로써, 이질적인 항목, 사건 및 우연이 자신에 관한 통찰력과 이야기로 만들어질 수 있었으며, 주체성의 형성을 가능하게 만들었다. '말로 만들어지고 또한 탐구되는 (것으로의) 자아'라는 개념이 나타나는 것은 바로 그러한 맥락에서다. 일기는 개인적이고 사적인 것이었다. 사람들은 자신을 위해 쓰곤 했는데, Habermas의 명확한 표현을 빌리면, 자신을 자신에게 공개적으로 만들곤 했다. 자아를 사적 영역에서 공적으로 만들면서, 자아는 또한 자기 점검과 자기 비판의 대상이 되었다.

22

Urban delivery vehicles can be adapted to better suit the d_____ of urban d_____, which often i_____ smaller vehicles such as vans, including bicycles. The latter have the p_____ to become a p_____ 'last-mile' vehicle, particularly in high-density and c_____ areas. In locations _____ bicycle use is high, such as the Netherlands, delivery bicycles are also used to c_____ personal cargo (e.g. groceries). Due to their low acquisition and m_____ costs, cargo bicycles c_____ much potential in developed and d_____ countries alike, such as the becak (a three-wheeled bicycle) in Indonesia. Services using electrically a_____ delivery tricycles have been s_____ i_____ in France and are gradually being a_____ across Europe for services as varied as parcel and catering deliveries. Using bicycles as cargo vehicles is particularly e_____ when c_____ with policies that restrict motor vehicle a_____ to s_____ areas of a city, such as downtown or commercial districts, or with the e_____ of d_____ bike lanes.

도시의 배달 운송 수단은 도시 배치의 밀집 상태에 더 잘 맞도록 개조될 수 있는데, 거기에는 자주 밴과 같은 더 작은 운송 수단을 포함하는데, 자전거도 포함된다. 후자 (자전거)는 특히 밀도가 높고 혼잡한 지역에서 선호되는 '최종 단계' 운송 수단이 될 잠재력이 있다. 네덜란드와 같이 자전거 사용이 많은 지역에서 배달 자전거가 또한 개인 짐(예를 들어 식료품)을 운반하기 위해 사용된다. 매입과 유지 비용이 낮아서 짐자전거는 선진국에서 그리고 인도네시아의 becak(바퀴가 세 개 달린 자전거)와 같이 개발도상국에서 똑같이 많은 잠재력을 전달한다. 전기 보조 배달용 세발자전거를 이용하는 서비스는 프랑스에서 성공적으로 시행되었고 소포나 음식 배달과 같은 다양한 서비스를 위해 유럽 전역에서 점차 도입되고 있다. 자전거를 화물 운송 수단으로 사용하는 것은 도심이나 상업 지구처럼 도시의 특정 지역에 자동차 접근을 제한하는 정책이나 자전거 전용 도로의 확장과 결합될 때 특히 장려된다.

23

An important advantage of disclosure, as opposed to more a_____ forms of regulation, is its f_____ and r_____ for the operation of free markets. Regulatory m_____ are b_____ swords; they tend to neglect diversity and may have s_____ u_____ adverse effects. For example, energy e_____ requirements for appliances may p_____ goods that work less well or that have characteristics that c_____ do not want. Information p_____, by contrast, respects freedom of choice. If automobile manufacturers are r_____ to measure and publicize the s_____ characteristics of cars, p_____ car purchasers can trade safety concerns against other attributes, such as price and styling. If restaurant customers are i_____ of the calories in their meals, those who want to lose weight can make use of the information, l_____ those who are unconcerned about calories unaffected. D_____ does not interfere with, and should even promote, the a_____ (and quality) of i_____ decision-making.

공개의 중요한 이점은 더 공세적인 형태의 규제와는 반대로 자유 시장의 작용에 대한 유연성과 존중이다. 규제하는 명령은 무딘 칼인데, 그것들은 다양성을 무시하는 경향이 있으며, 의도하지 않은 심각한 역효과를 발생시킬 수도 있다. 예를 들어, 가전제품에 대한 에너지 효율 요건은 덜 잘 작동하거나 소비자가 원하지 않는 특성을 가진 제품을 만들어 낼 수도 있다. 반대로 정보 제공은 선택의 자유를 존중한다. 자동차 제조업체가 자동차의 안전 특성을 측정하고 공개해야 한다면, 잠재적인 자동차 구매자는 가격과 스타일 같은 다른 속성과 안전에 대한 우려를 맞바꿀 수 있다. 식당 손님들에게 식사에 들어 있는 칼로리를 알려주면, 살을 빼고 싶은 사람들은 그 정보를 이용할 수 있고, 칼로리에 신경 쓰지 않는 사람들은 영향을 받지 않은 채로 있게 된다. 공개는 개인 의사 결정의 자율성(과 품질)을 방해하지 않으며 심지어 촉진할 것이다.

24

Different parts of the brain's visual system get i_____ on a need-to-know basis. Cells that help your hand m_____ r_____ out to an object need to know the size and l_____ of the object, but they don't need to know about color. They need to know a l_____ about shape, but not in great detail. Cells that help you r_____ people's faces need to be extremely s_____ to d_____ of shape, but they can pay less a_____ to location. It is n_____ to a_____ that anyone who sees an o_____ sees everything about it — the shape, color, location, and movement. However, one part of your brain sees its shape, another sees color, another d_____ location, and another p_____ m_____. Consequently, after localized brain damage, it is possible to see certain a_____ of an object and not others. Centuries ago, people found it d_____ to i_____ how someone could see an object without seeing what color it is. Even today, you might find it s_____ to learn about people who see an object without seeing where it is, or see it without seeing w_____ it is moving.

뇌 시각 시스템의 다양한 부분들은 꼭 필요한 때 꼭 필요한 것만 알려주는 방식으로 정보를 얻는다. 여러분의 손 근육이 어떤 물체에 닿을 수 있도록 돕는 세포들은 그 물체의 크기와 위치를 알아야 하지만 색깔에 대해 알 필요는 없다. 그것들(그 세포들)은 모양에 대해 약간 알아야 하지만, 매우 자세히는 아니다. 여러분이 사람의 얼굴을 인식하도록 돕는 세포는 모양의 세부 사항에 극도로 예민해야 할 필요가 있지만, 위치에는 신경을 덜 쓸 수 있다. 어떤 물체를 보는 사람은 누구든 모양, 색깔, 위치, 움직임 등 그것에 관한 모든 것을 보고 있다고 추정하는 것은 당연하다. 하지만, 여러분 뇌의 한 부분은 그것의 모양을 보고, 다른 한 부분은 색깔을 보며, 또 다른 부분은 위치를 감지하고, 또 다른 한 부분은 움직임을 인식한다. 따라서 국부적 뇌 손상 후 물체의 특정한 측면은 볼 수 있으면서 다른 측면은 볼 수 없는 것이 가능하다. 수 세기 전, 사람들은 어떻게 누군가가 색깔이 무엇인지 못 보면서 그 물체를 볼 수 있는 지 상상하기가 어려웠다. 심지어 오늘날에도, 여러분은 물체가 어디에 있는지 보지 못하면서 그것을 보거나, 또는 그것이 움직이고 있는지 보지 못하면서 그것을 보는 사람들에 대해 알게 되면 놀라워할 수 있다.

26

Niklas Luhmann, a renowned sociologist of the twentieth century, was born in Lüeburg Germany in1927. After World War II, he s_____ law at the University of Freiburg until 1949. Early in his career, he worked for the State of Lower Saxony, where he was in c_____ of e_____ reform. In 1960—1961, Luhmann had the chance to study sociology at Harvard University, where he was i_____ by Talcott Parsons, one of the most f_____ social system theorists. Later, Luhmann d_____ his own social system theory. In 1968, he became a professor of sociology at the University of Bielefeld. He r_____ a v_____ of subjects, including mass media and law. Although his books are known to be d_____ to t_____, they have in fact been w_____ t_____ into other languages.

20세기의 유명한 사회학자 Niklas Luhmann은 1927년 독일 Luneburg에서 태어났다. 제2차 세계 대전 후, 그는 University of Freiburg에서 1949년까지 법학을 공부했다. 경력 초기에 그는 State of Lower Saxony에서 일했는데, 그곳에서 그는 교육 개혁을 담당했다. 1960년에서 1961년 기간에 Luhmann은 Harvard University에서 사회학을 공부할 기회가 있었는데, 그곳에서 그는 가장 유명한 사회 체계 이론가 중 한 명이었던 Talcott Parsons의 영향을 받았다. 나중에 Luhmann은 자기 자신의 사회 체계 이론을 개발했다. 1968년에 그는 University of Bielefeld에서 사회학 교수가 되었다. 그는 대중 매체와 법을 포함한 다양한 주제를 연구했다. 비록 그의 책들이 번역하기 어렵다고 알려져 있지만, 그것들은 사실 다른 언어들로 널리 번역되었다.

29

Trends constantly suggest new opportunities for i_____ to restage themselves, representing o_____ for change. To understand how t_____ can ultimately give individuals power and f_____, one must first discuss fashion's i_____ as a basis for change. The most c_____ e_____ o_____ by my informants as to why fashion is so a_____ is that it constitutes a kind of theatrical costumery. Clothes are part of how people p_____ themselves to the world, and fashion locates them in the p_____, relative to what is happening in society and to fashion's own history. As a form of e_____, fashion contains a host of ambiguities, e_____ individuals to recreate the meanings a_____ with specific pieces of clothing. Fashion is among the simplest and cheapest methods of self-expression: clothes can be inexpensively p_____ while making it easy to c_____ notions of wealth, intellectual stature, relaxation or e_____ consciousness, even if none of these is true. Fashion can also s_____ agency in v_____ ways, opening up space for action.

유행은 사람들이 자신을 재조정할 새로운 기회를 끊임없이 제시하고, 변화의 때를 나타낸다. 유행이 궁극적으로 어떻게 개인에게 힘과 자유를 줄 수 있는지를 이해하기 위해서는 먼저 변화를 위한 기반으로서의 패션의 중요성에 대해 논의해야 한다. 왜 패션이 그렇게 매력적인 지에 대해 나의 정보 제공자들이 한 가장 흔한 설명은 그것이 일종의 연극적인 의상을 구성한다는 것이다. 옷은 사람들이 자신을 세상에 보여주는 방식의 일부이고, 패션은 사회에서 일어나고 있는 일, 그리고 패션 자체의 역사와 관련하여 그들을 현재에 위치시킨다. 표현 형태로서 패션은 다수의 모호함을 담고 있어 개인이 특정한 옷과 연관된 의미를 재창조할 수 있게 한다. 패션은 자기표현의 가장 단순하고 값싼 방법 중 하나로, 옷은 저렴하게 구매할 수 있으며, 부, 지적 능력, 휴식 또는 환경 의식에 대한 개념을, 비록 이것 중 어느 것도 사실이 아니라 해도, 쉽게 전달할 수 있다. 패션은 또한 행동을 위한 공간을 열어주며 다양한 방법으로 행동력을 강화할 수 있다.

30

Everywhere we turn we hear about almighty "cyberspace"! The hype p_____ that we will leave our boring lives, put on goggles and body suits, and e_____ some metallic, three-dimensional, multimedia other world. When the Industrial Revolution arrived with its great i_____, the motor, we didn't leave our world to go to some r_____ motorspace! On the contrary, we b_____ the motors into our lives, as automobiles, refrigerators, drill presses, and pencil sharpeners. This a_____ has been so c_____ that we r_____ _____ all these tools with names that d_____ their usage, not their "motorness." These innovations led to a major socioeconomic movement p_____ because they entered and a_____ profoundly our everyday lives. People have not changed f_____ in thousands of years. Technology changes constantly. It's the one that must a_____ to us. That's exactly what will happen with information technology and its d_____ under human-centric computing. The longer we c_____ to believe that computers will take us to a m_____ new world, the longer we will delay their n_____ fusion with our lives, the hallmark of every major m_____ that a_____ to be called a socioeconomic r_____.

우리가 고개를 돌리는 곳 어디서든 우리는 전능하신 '사이버공간'에 대해 듣는다! 과대 광고는 우리가 지루한 삶을 떠나 고글과 바디 수트를 착용하고, 어떤 금속성의, 3차원의, 멀티미디어로 만들어진 다른 세계로 들어갈 것이라고 약속한다. 위대한 혁신인 모터와 함께 산업 혁명이 도래했을 때 우리는 어떤 외딴 모터 공간으로 가기 위해 우리의 세상을 떠나지 않았다! 반대로, 우리는 모터를 자동차, 냉장고, 드릴 프레스, 연필깎이와 같은 것들로 우리 삶에 가져왔다. 이 흡수는 매우 완전해서 우리는 그것들의 '모터성'이 아니라 그것들의 사용을 분명하게 밝히는 이름으로 이 모든 도구를 지칭한다. 이러한 혁신품들은 정확히 우리의 일상생활에 들어와 깊은 영향을 미쳤기 때문에 주요한 사회경제적 운동으로 이어졌다. 사람들은 수천 년 동안 근본적으로 변하지 않았다. 기술은 끊임없이 변화한다. 우리에게 적응해야 하는 것은 바로 그것이다. 그것이 바로 정보 기술과 그 장치들이 인간 중심의 컴퓨터 사용 하에 일어날 일이다. 컴퓨터가 우리를 마법 같은 신세계로 데려다줄 것이라고 계속해서 더 오래 믿게 될수록 컴퓨터와 우리 삶의 자연스러운 융합이 더 오래 유지될(→ 지연될) 것인데, 이는 사회경제적 혁명이라고 불리기를 열망하는 모든 주요 운동의 특징이다.

31

There is something deeply paradoxical about the p_____ status of sports journalism, e_____ in the medium of print. In discharging their usual responsibilities of d_____ and commentary, reporters' accounts of sports events are eagerly c_____ by sports fans, while in their broader journalistic role of c_____ sport in its many forms, sports journalists are among the most v_____ of all contemporary writers. The ruminations of the elite class of 'celebrity' sports journalists are much s_____ after by the major newspapers, their lucrative c_____ being the envy of colleagues in other 'disciplines' of journalism. Yet sports journalists do not have a standing in their profession that c_____ to the size of their readerships or of their pay packets, with the old saying (now reaching the status of cliche) that sport is the 'toy department of the news media' still readily to hand as a d_____ of the worth of what sports journalists do. This r_____ to take sports journalism seriously p_____ the paradoxical o_____ that sports newspaper writers are much read but little a_____.

스포츠 저널리즘의 전문적 지위에 관해서, 특히 인쇄 매체에서, 매우 역설적인 것이 있다. 기자들이 설명하고 논평하는 통상적으로 자신이 맡은 일을 이행할 때, 스포츠팬들이 스포츠 경기에 관한 기자들의 설명을 열심히 찾아보는 반면, 여러 형식으로 스포츠를 취재하는 그들의 더 폭넓은 저널리스트의 역할에서 스포츠 저널리스트는 동시대의 모든 작가 중에서 가장 눈에 띄는 이들 가운데 있다. '유명인급' 스포츠 저널리스트 중 엘리트 계층의 생각은 주요 신문사들이 많이 원하고, 그들의 돈을 많이 버는 계약은 저널리즘의 다른 '부문'에 있는 동료들의 선망 대상이 된다. 그러나 스포츠 저널리스트는 스포츠는 스포츠 저널리스트들이 하는 일의 가치를 묵살하는 말로 여전히 쉽게 건네지는 '뉴스 매체의 장난감 부서'라는 (이제는 상투적인 문구의 지위에 이르는) 옛말과 더불어 그들의 독자 수나 급여 액수의 크기에 상응하는 그들 전문성에서의 지위를 누리지 못한다. 이렇게 스포츠 저널리즘을 진지하게 여기기를 꺼리는 것은 스포츠 신문 작가들이 많이 읽히면서도 거의 존경받지 못하는 역설적인 결과를 낳는다.

32

People have always wanted to be around other people and to learn from them. Cities have long been dynamos of s_____ possibility, f_____ of art, music, and fashion. Slang, or, if you prefer, "lexical innovation," has always started in cities — an o_____ of all those different people so f_____ e_____ to one another. It s_____ outward, in a m_____ not unlike trans-missible disease, which itself typically "takes off" in cities. If, as the n_____ linguist Leonard Bloomfield argued, the way a person talks is a "composite r_____ of what he has heard before," then language innovation would happen where the most people heard and t_____ to the most other people. Cities drive taste c_____ because they offer the greatest e_____ to other people, who not s_____ are often the creative people cities seem to a_____. Media, ever more global, ever more far-reaching, spread language f_____ to more people.

사람들은 항상 다른 사람들 주위에 머무르며 그들로부터 배우기를 원해 왔다. 도시는 오랫동안 사회적 가능성의 발전기, 즉 예술, 음악, 패션의 주물 공장이었다. 속어, 또는 여러분이 선호한다면 '어휘의 혁신'은 항상 도시에서 시작되었는데, 그 모든 별의 별 사람이 그렇게도 빈번히 서로에게 접촉한 결과물이다. 그것은 전염성 질병과 다르지 않은 방식으로 외부로 퍼져나가는데, 그 전염성 질병 자체도 보통 도시에서 '이륙한다.' 저명한 언어학자 Leonard Bloomfield가 주장하듯, 한 사람이 말하는 방식이 '그가 전에 들었던 것을 합성한 결과물'이라면, 언어 혁신은 가장 많은 사람이 가장 많은 다른 사람의 말을 듣고 가장 많은 다른 사람에게 말한 곳에서 일어날 것이다. 도시는 그곳이 다른 사람들과의 가장 많은 접촉을 제공하기 때문에 취향 변화를 이끄는데, 그들은 놀랄 것도 없이 흔히 도시가 끌어들이는 듯 보이는 창의적인 사람들이다. 그 어느 때보다 더 전방위적이고, 그 어느 때보다 더 멀리까지 미치는 미디어는 언어를 더 빨리 더 많은 사람에게 퍼뜨린다.

33

The entrance to a honeybee colony, often referred to as the dancefloor, is a market place for i_____ about the state of the colony and the e_____ outside the hive. Studying interactions on the dancefloor p_____ us with a n_____ of i_____ examples of how individuals changing their own b_____ in r_____ to local information allow the colony to r_____ its workforce. For example, upon returning to their hive honeybees that have c_____ water search out a r_____ bee to unload their water to within the hive. If this search time is short then the r_____ bee is more likely to perform a waggle dance to recruit others to the water source. Conversely, if this s_____ time is long then the bee is more likely to give up c_____ water. Since receiver bees will only a_____ water if they require it, either for themselves or to pass on to other bees and brood, this unloading time is c_____ with the colony's overall need of water. Thus the individual water forager's r_____ to u_____ time (up or down) regulates water c_____ in r_____ to the colony's need.

흔히 댄스 플로어라고 불리는 꿀벌 군집의 입구는 군집의 상태와 벌집 밖의 환경에 관한 정보를 교환하기 위한 시장이다. 댄스 플로어에서의 상호 작용을 연구하는 것은 우리에게 지엽적인 정보에 반응하여 그것들 자신의 행동을 바꾸는 개체들이 어떻게 군집이 그것의 노동력을 조절할 수 있게 하는지에 대한 많은 예증이 되는 예들을 제공한다. 예를 들어, 물을 가져온 꿀벌들은 자신들의 벌집으로 돌아오자마자 자신들의 물을 벌집 안으로 넘겨주기 위해 물을 받을 벌을 찾는다. 만약 이 (물을 받을 벌을) 찾는 시간이 짧으면, 그 돌아오는 벌은 물이 있는 곳으로 데려갈 다른 벌들을 모집하기 위해 8자 춤을 출 가능성이 더 크다. 반대로, 이 찾는 시간이 길면 그 벌은 물을 가지러 가는 것을 포기할 가능성이 더 크다. 물을 받는 벌들은 자신들을 위해서든 다른 벌들과 애벌레들에게 전해주기 위해서든, 물이 필요할 때만 물을 받을 것이므로, 이러한 물을 넘겨주는 시간은 군집의 전반적인 물 수요와 상관관계가 있다. 따라서 (시간이 늘어나든 혹은 줄어들든 간에) 물을 넘겨주는 시간에 대한 개별적인 물 조달자의 반응은 군집의 수요에 맞춰서 물 수집(량)을 조절한다.

34

We understand that the segregation of our c_____ into present, past, and future is both a f_____ and an oddly self-referential framework; your p_____ was part of your mother's future, and your children's past will be in part your p_____. Nothing is g_____ wrong with structuring our consciousness of time in this c_____ manner, and it often works well enough. In the case of climate change, however, the sharp d_____ of time into past, present, and future has been d_____ m_____ and has, most importantly, h_____ from view the extent of the r_____ of those of us alive now. The narrowing of our consciousness of time smooths the way to divorcing ourselves from r_____ for developments in the past and the future with which our lives are in fact d_____ intertwined. In the c_____ case, it is not that we face the facts but then deny our r_____. It is that the r_____ are obscured from view by the p_____ of time, and so questions of r_____ t_____ the past and future do not a_____ naturally.

우리는 우리의 의식을 현재, 과거, 미래로 분리하는 것이 허구이며 또한 이상하게도 자기 지시적인 틀이라는 것을 이해하는데, 여러분의 현재는 여러분 어머니 미래의 일부였고 여러분 자녀의 과거는 여러분 현재의 일부일 것이라는 것이다. 시간에 대한 우리의 의식을 이러한 전통적인 방식으로 구조화하는 것에는 일반적으로 잘못된 것이 전혀 없으며 그것은 흔히 충분히 효과적이다. 그러나 기후 변화의 경우, 시간을 과거, 현재, 미래로 분명하게 구분하는 것은 심하게 (사실을) 오도해왔으며 가장 중요하게는 지금 살아 있는 우리들의 책임 범위를 시야로부터 숨겨왔다. 시간에 대한 우리의 의식을 좁히는 것은 사실 우리의 삶이 깊이 뒤얽혀 있는 과거와 미래의 발전에 대한 책임으로부터 우리를 단절시키는 길을 닦는다. 기후의 경우, 우리가 사실을 직면하면서도 우리의 책임을 부인하는 것이 문제가 아니다. 문제는 시간을 나눔으로써 현실이 시야로부터 흐릿해지고 그래서 과거와 현재의 책임에 관한 질문이 자연스럽게 생겨나지 않는 것이다.

35

Actors, singers, politicians and countless others recognise the power of the human v_____ as a means of c_____ beyond the simple decoding of the words that are used. L_____ to c_____ your voice and use it for different purposes is, therefore, one of the most important skills to d_____ as an early career teacher. The more c_____ you give instructions, the higher the chance of a p_____ class response. There are times when being able to p_____ your voice l_____ will be very u_____ when working in school, and knowing that you can cut through a noisy classroom, dinner hall or playground is a great skill to have. However, I would always a_____ that you use your loudest voice i_____ s_____ and avoid shouting as much as possible. A quiet, a_____ and m_____ tone has so much more impact than s_____ panicked shouting.

배우, 가수, 정치가, 그리고 무수한 다른 사람은 사용된 단어의 단순한 해독을 넘어서는 의사소통의 수단으로서의 사람 목소리의 힘을 인정한다. 따라서 여러분의 목소리를 통제하고 그것을 다양한 목적을 위해 사용하는 것을 배우는 것은 경력 초기의 교사로서 개발해야 할 가장 중요한 기술 중 하나이다. 여러분이 더 자신있게 수업할수록, 긍정적인 학급의 반응이 나올 확률은 더 높다. 목소리를 크게 내보낼 수 있는 것이 학교에서 일할 때 매우 유용할 경우가 있으며, 여러분이 시끄러운 교실, 구내식당이나 운동장을 (목소리로) 가를 수 있다는 것을 아는 것은 갖춰야 할 훌륭한 기술이다. 그러나, 나는 가장 큰 목소리는 놀랍도록 드물게 쓰고 소리치는 것을 최대한 피해야 한다고 항상 조언하고자 한다. 조용하고도 권위가 있으며 침착한 어조는 약간 당황한 고함보다 그렇게나 훨씬 더 큰 효과를 가진다.

36

A fascinating species of water flea exhibits a kind of f_____ that e_____ biologists call a_____ plasticity. If the baby water flea is developing into an adult in water that includes the chemical s_____ of c_____ that prey on water fleas, it develops a helmet and spines to d_____ itself against predators. If the water around it doesn't include the chemical s_____ of predators, the water flea doesn't develop these p_____ devices. That's a clever trick, because p_____ spines and a helmet is costly, in terms of energy, and c_____ energy is essential for an organism's ability to s_____ and reproduce. The water flea only e_____ the energy needed to p_____ spines and a helmet when it needs to. So it may well be that this plasticity is an a_____: a trait that came to exist in a species because it c_____ to reproductive fitness. There are many cases, across many species, of adaptive plasticity. Plasticity is c_____ to f_____ if there is s_____ v_____ in the environment.

물벼룩이라는 매혹적인 종은 진화생물학자들이 '적응적 가소성'이라고 부르는 일종의 유연성을 보여 준다. (B) 만일 새끼 물벼룩이 물벼룩을 잡아먹고 사는 생물의 화학적인 (고유한) 특징을 포함하는 물에서 성체로 발달하고 있으면, 그것은 자신을 포식자로부터 지키기 위해 머리 투구와 가시 돌기를 발달시킨다. 만일 자신을 둘러싼 물이 포식자의 화학적인 특징을 포함하지 않으면, 그 물벼룩은 이러한 보호 장치를 발달시키지 않는다. (A) 그것은 영리한 묘책인데, 에너지 면에서 가시 돌기와 머리 투구를 만드는 것은 비용이 많이 들고 에너지를 보존하는 것은 살아남고 생식하는 유기체의 능력을 위해 핵심적이기 때문이다. 물벼룩은 오직 필요할 때만 가시 돌기와 머리 투구를 만드는 데 필요한 에너지를 소모한다. (C) 그러므로 이러한 가소성은 아마 적응일 텐데, 즉 그것은 생식의 적합성에 이바지하기 때문에 생물 종에 존재하게 된 특징이다. 많은 종에 걸쳐 적응적 가소성의 많은 사례가 있다. 가소성은 환경에 충분한 차이가 있을 때 적합성에 도움이 된다.

37

The most commonly known form of results-based pricing is a p_____ called contingency pricing, used by lawyers. Contingency pricing is the major way that p_____ i_____ and certain c_____ cases are billed. In this approach, lawyers do not r_____ fees or p_____ until the case is settled, when they are paid a p_____ of the money that the client receives. Therefore, only an outcome in the client's favor is c_____. From the client's point of view, the pricing makes s_____ in part because most c_____ in these c_____ are u_____ with and possibly i_____ by law firms. Their biggest fears are high fees for a case that may take years to settle. By using contingency pricing, clients are e_____ that they pay no fees until they r_____ a settlement. In these and other i_____ of contingency pricing, the economic value of the service is hard to d_____ before the service, and providers d_____ a price that allows them to share the risks and r_____ of d_____ v_____ to the buyer.

결과 기반 가격 책정 중 가장 일반적으로 알려진 형태는 변호사가 사용하는 '승소 시 보수 약정'이라고 불리는 관행이다. (C) 승소 시 보수 약정은 개인 상해 및 특정 소비자 소송에 대해 비용이 청구되는 주요 방식이다. 이 방식에서 변호사는 소송이 해결될 때까지 수수료나 지불금을 받지 않는데, 그 때 그들은 의뢰인이 받는 금액의 일정 비율을 받는다. (A) 따라서 의뢰인에게 유리한 결과만 보수가 지불된다. 의뢰인의 관점에서 보면, 이러한 소송의 의뢰인 대부분이 법률 사무소에 익숙하지 않고 아마도 겁을 먹을 수 있다는 부분적인 이유로 그 가격 책정은 타당하다. 그들의 가장 큰 두려움은 해결하는 데 몇 년이 걸릴 수 있는 소송에 대한 높은 수수료이다. (B) 승소 시 보수 약정을 사용함으로써 의뢰인은 합의금을 받을 때까지 수수료를 지불하지 않도록 보장받는다. 승소 시 보수 약정의 이런 경우와 여타 경우에서 서비스의 경제적 가치는 서비스 전에 결정하기 어렵고, 공급자는 구매자에게 가치를 전달하는 위험과 보상을 그들이 나눌 수 있게 하는 가격을 전달한다.

38

Parks take the shape demanded by the c_____ c_____ of their time. Once parks are in place, they are no inert stage — their p_____ and meanings are made and remade by planners and by park users. Moments of park c_____ are particularly telling, however, for they reveal and a_____ ideas about nature and its r_____ to urban society. Indeed, what d_____ a park from the broader c_____ of public space is the representation of n_____ that parks are meant to embody. Public spaces i_____ parks, concrete plazas, sidewalks, even indoor atriums. Parks t_____ have trees, grass, and other plants as their central features. When e_____ a city park, people often i_____ a sharp s_____ from streets, cars, and buildings. There's a r_____ for that: traditionally, park designers a_____ to create such a feeling by planting tall trees at park boundaries, building stone walls, and c_____ other means of partition. What's b_____ this idea is not only landscape architects' d_____ to d_____ aesthetically s_____ park spaces, but a much longer history of Western thought that e_____ cities and n_____ as antithetical spaces and o_____ forces.

공원은 그것이 속한 시대의 문화적 관심사가 요구하는 형태를 취한다. 일단 공원이 마련되면, 그것은 비활성화된 단계가 아닌데 그것의 목적과 의미는 계획자와 공원 이용자에 의해 만들어지고 다시 만들어진다. 그러나 공원을 조성하는 순간들은 특히 의미가 있는데, 자연과 그것이 도시 사회와 갖는 관계에 대한 생각을 드러내고 실현하기 때문이다. 실제로 공원을 더 넓은 범주의 공공 공간과 구별하는 것은 공원이 구현하려는 자연의 표현이다. 공공 공간에는 공원, 콘크리트 광장, 보도, 심지어 실내 아트리움도 포함된다. 일반적으로 공원에는 그들의 중심적인 특색으로 나무, 풀, 그리고 다른 식물들이 있다. 도시 공원에 들어갈 때, 사람들은 흔히 거리, 자동차, 그리고 건물과의 뚜렷한 분리를 상상한다. 거기에는 이유가 있는데, 전통적으로 공원 설계자들은 공원 경계에 키 큰 나무를 심고, 돌담을 쌓고, 다른 칸막이 수단을 세워 그런 느낌을 만들어 내려고 했다. 이 생각의 배후에는 미적인 암시가 있는 공원 공간을 설계하려는 조경가의 욕망뿐만 아니라 도시와 자연을 대조적인 공간과 반대 세력으로 상상하는 훨씬 더 오래된 서구 사상의 역사가 있다.

39

Negotiators should try to find ways to s_____ a large i_____ into smaller pieces, k_____ _____ using salami tactics. Issues that can be e_____ in quantitative, m_____ units are easy to slice. For example, c_____ d_____ can be d_____ into cents-per-hour increments or lease rates can be q_____ as dollars per square foot. When working to fractionate issues of p_____ or precedent, parties may use the time horizon (when the principle goes into e_____ or how long it will last) as a way to fractionate the issue. It may be e_____ to reach an a_____ when settlement terms don't have to be i_____ until months in the future. Another a_____ is to vary the number of ways that the p_____ may be a_____. For example, a company may d_____ a family e_____ leave plan that allows employees the o_____ to be away from the c_____ for a p_____ of no longer than three hours, and no more than once a month, for illness in the employee's i_____ family.

협상가들은 '살라미 전술'을 사용하는 것으로 알려진, 큰 문제를 더 작은 조각으로 나누는 방법을 찾으려고 노력해야 한다. 정량적이고 측정 가능한 단위로 표현될 수 있는 문제는 나누기 쉽다. 예를 들어, 보상 요구는 시간당 센트 증가로 나누거나 임대료는 평방 피트당 달러로 시세를 매길 수 있다. 원칙이나 관례의 쟁점을 세분화하는 작업을 할 때, 당사자들은 그 쟁점을 세분화하는 방법으로 시간 지평(원칙이 효력을 발휘하거나 지속되는 기간)을 사용할 수 있다. 합의 조건이 향후 몇 개월까지 이행될 필요가 없을 때 합의에 도달하는 것이 더 쉬울 수 있다. 또 다른 접근법은 원칙이 적용될 수 있는 방법의 수를 다양화하는 것이다. 예를 들어, 회사는 직원의 직계 가족의 질병에 대해 직원에게 3시간 이내, 한 달에 한 번 이내의 기간 동안 회사를 비울 기회를 제공하는 가족 비상 휴가 계획을 고안할 수 있다.

40

"Craftsmanship" may suggest a way of life that d_____ with the arrival of industrial society — but this is m_____. Craftsmanship names an enduring, basic human impulse, the d_____ to do a job well for its own sake. Craftsmanship cuts a far wider swath than skilled m_____ labor; it s_____ the computer programmer, the doctor, and the artist; parenting i_____ when it is p_____ as a skilled craft, as does citizenship. In all these domains, craftsmanship f_____ on objective standards, on the thing in itself. Social and economic c_____, however, often stand in the way of the craftsman's discipline and commitment: schools may f_____ to p_____ the tools to do good work, and workplaces may not truly value the a_____ for q_____. And though craftsmanship can r_____ an individual with a sense of pride in work, this reward is not simple. The craftsman often faces c_____ o_____ standards of excellence; the d_____ to do something well for its own sake can be w_____ by c_____ pressure, by frustration, or by o_____.

'장인정신'은 산업 사회의 도래와 함께 쇠퇴한 삶의 방식을 나타낼지도 모르지만, 이것은 오해의 소지가 있다. 장인정신은 지속적이고 기본적인 인간의 충동, 즉 일 자체를 위해 그것을 잘하고 싶은 욕망을 말한다. 장인정신은 숙련된 육체 노동보다 훨씬 더 넓은 구획을 가르는데, 그것은 컴퓨터 프로그래머, 의사, 예술가에게 도움이 되고, 시민정신과 마찬가지로 그것이 숙련된 기술로서 실행될 때 양육은 향상된다. 이 모든 영역에서 장인정신은 객관적인 기준, 즉 그 자체의 것에 초점을 맞춘다. 그러나 사회적, 경제적 조건은 흔히 장인의 수련과 전념을 방해하는데, 즉 학교는 일을 잘하기 위한 도구를 제공하지 못할 수 있고, 직장은 품질에 대한 열망을 진정으로 가치 있게 여기지 않을 수 있다. 그리고 비록 장인정신이 일에 대한 자부심으로 개인에게 보상을 줄 수 있지만, 이 보상은 간단하지 않다. 장인은 흔히 뛰어남에 대한 상충되는 객관적 기준에 직면하며, 어떤 일 그 자체를 위해 그것을 잘하려는 욕망은 경쟁적 압력에 의해, 좌절에 의해 또는 집착에 의해 약화될 수 있다.

[41~42]

There is evidence that even very simple algorithms can o_____ e_____ j_____ on simple p_____ problems. For example, algorithms have p_____ more a_____ than humans in p_____ whether a prisoner r_____ on parole will go on to c_____ another crime, or in p_____ whether a p_____ c_____ will p_____ well in a job in future. In over 100 studies across many different domains, half of all cases show simple formulas make better s_____ predictions than human experts, and the remainder (except a very small handful), show a tie between the two. When there are a lot of different factors i_____ and a s_____ is very uncertain, simple formulas can win out by f_____ on the most important factors and being c_____, while human judgement is too easily i_____ by p_____ s_____ and perhaps irrelevant considerations. A similar idea is s_____ by further e_____ that 'checklists' can improve the q_____ of expert decisions in a range of domains by e_____ that important steps or considerations aren't m_____ when people are feeling overloaded. For example, t_____ patients in i_____ care can require hundreds of small actions per day, and one small error could cost a life. Using checklists to e_____ that no crucial steps are missed has p_____ to be r_____ e_____ in a range of medical contexts, from p_____ live infections to r_____ pneumonia.

매우 간단한 알고리즘조차도 간단한 예측 문제에 대한 전문가의 판단을 능가할 수 있다는 증거가 있다. 예를 들어, 가석방으로 풀려난 죄수가 계속해서 다른 범죄를 저지를 것인지 예측하거나, 잠재적인 후보자가 장차 직장에서 일을 잘할 것인지를 예측하는 데 알고리즘이 인간보다 더 정확하다는 것이 입증되었다. 많은 다른 영역에 걸친 100개가 넘는 연구에서, 모든 사례의 절반은 간단한 공식이 인간 전문가보다 중요한 예측을 더 잘하고, 그 나머지(아주 적은 소수를 제외하고)는 둘 사이의 무승부를 보여준다. 관련된 많은 다른 요인이 있고 상황이 매우 불확실할 때, 가장 중요한 요소에 초점을 맞추고 일관성을 유지함으로써 간단한 공식이 승리할 수 있는 반면, 인간의 판단은 특히 두드러지고 아마도 관련이 없는 고려 사항에 의해 너무 쉽게 영향을 받는다. 사람들이 편안하다고(→ 일이 너무 많다고) 느낄 때 중요한 조치나 고려사항을 놓치지 않도록 함으로써 '체크리스트'가 다양한 영역에서 전문가의 결정의 질을 향상할 수 있다는 추가적인 증거가 유사한 아이디어를 뒷받침한다. 예를 들어, 집중 치료 중인 환자를 치료하려면 하루에 수백 가지의 작은 조치가 필요할 수 있으며, 작은 실수 하나로 목숨을 잃게 할 수 있다. 어떠한 중요한 조치라도 놓치지 않기 위해 체크리스트를 사용하는 것은 당면한 감염을 예방하는 것에서부터 폐렴을 줄이는 것에 이르기까지 다양한 의학적 상황에서 현저하게 효과적이라는 것이 입증되었다.

[43~45]

"Hailey, be careful!" Camila yelled uneasily, watching her sister c_____ a huge cake to the table. "Don't worry, Camila," Hailey r_____, smiling. Camila relaxed only when Hailey had s_____ p_____ the cake on the party table. "Dad will be here shortly. What gift did you buy for his birthday?" Camila a_____ out of i_____. "Dad will be s_____ to find out what it is!" Hailey a_____ with a wink.

"I bet you bought a wallet or a watch for him," Camila said. In reply, Hailey answered, "No. I b_____ something much more p_____. By the way, there's something you should know about Dad..." They were suddenly i_____ by the doorbell ringing. It was their dad and they were o_____ to see him. "My lovely ladies, thank you for i_____ me to your place for my birthday." He walked in joyfully, h_____ his daughters. They all walked into the dining room, where he was g_____ with a rainbow-colored birthday cake and fifty red roses.

"Happy birthday! You're fifty today, Dad. We love you!" Camila said before her sister h_____ him a small parcel. When he opened it, he d_____ a pair of glasses inside. "Hailey, Dad doesn't have e_____ problems," Camila said, puzzled. "Actually Camila, I r_____ found out he has long been s_____ from color blindness. He's kept it a s_____ so as not to worry us," Hailey e_____.

"Dad, these glasses can help c_____ your red-green color blindness," said Hailey. He s_____ put them on, and stared at the birthday p_____ on the table. Seeing v_____ red and green colors for the first time ever, he started to cry. "Incredible! Look at those wonderful colors!" He s_____ in a_____. Hailey told him in tears, "Dad, I'm glad you can now f_____ enjoy the true beauty of rainbows and roses. Red represents love and green represents health. You d_____ both." Camila nodded, seeing how happy her gift of the glasses had made their dad.

(A) "Hailey, 조심해!" Camila는 동생이 테이블로 커다란 케이크를 들고 오는 것을 보며 걱정되어 소리쳤다. "걱정 마, Camila." Hailey는 미소 지으며 답했다. Camila는 Hailey가 파티 테이블에 케이크를 무사히 올려 두었을 때 비로소 안심했다. "아빠가 곧 오실 거야. 너는 아빠 생일을 위해 무슨 선물을 샀어?" Camila는 호기심에서 물었다. "그게 뭔지 알면 아빠가 깜짝 놀라실 거야!" Hailey는 윙크를 하며 답했다.

(D) "틀림없이 너는 아빠를 위해 지갑이나 시계를 샀을 거야."라고 Camila가 말했다. 대꾸하면서 Hailey는 "아니. 난 훨씬 더 개인적인 것을 샀어. 그건 그렇고 언니가 아빠에 대해 알아야 할 게 있어…"라고 대답했다. 초인종이 울리면서 그들의 대화는 갑자기 중단되었다. 그들의 아빠가 왔고 그들은 그를 보고 매우 기뻐했다. "사랑하는 우리 아가씨들, 내 생일에 너희들 집에 초대해줘서 고맙구나." 그는 기쁨에 차서 걸어 들어와 딸들을 껴안았다. 그들은 모두 식당으로 들어갔고, 그곳에서 그는 무지개색 생일 케이크와 50송이의 빨간 장미로 환영받았다.

(C) "생일 축하드려요! 오늘 쉰 살이세요, 아빠. 사랑해요!"라고 Camila가 말하고 나서 그녀의 동생이 그에게 작은 꾸러미를 드렸다. 그것을 열었을 때 그는 안에서 안경을 발견했다. "Hailey, 아빠에게 시력 문제는 없어."라고 Camila가 어리둥절해하며 말했다. "사실은 Camila, 난 아빠가 오랫동안 색맹을 앓고 있다는 것을 최근에 알게 되었어. 아빠는 우리를 걱정시키지 않으려고 그것을 비밀로 해왔어."라고 Hailey가 설명했다.

(B) "아빠, 이 안경은 적록색맹을 교정하는 데 도움이 될 수 있어요."라고 Hailey가 말했다. 그는 천천히 그것을 쓰고, 테이블 위에 있는 생일 선물을 바라보았다. 지금껏 처음으로 선명한 빨강색과 초록색을 보고 그는 울기 시작했다. "믿을 수가 없구나! 저 경이로운 색깔들을 보렴!" 그는 깜짝 놀라 소리쳤다. Hailey는 눈물을 흘리며 그에게 말했다. "아빠, 난 아빠가 이제 마침내 무지개와 장미의 진정한 아름다움을 즐길 수 있어서 기뻐요. 빨강색은 사랑을 나타내고 초록색은 건강을 나타내요. 아빠는 둘 다 누릴 자격이 있으세요." Camila는 고개를 끄덕이고서, 그녀의 안경 선물이 그들의 아빠를 얼마나 행복하게 했는지 알게 되었다.

To whom it may concern,

My name is Michael Brown. I have been a bird-watcher since childhood. I have always 1) **enjoyed/ been enjoyed** watching birds in my yard and identifying 2) **them/ themselves** by sight and sound. Yesterday, I happened to read an article about your club. I was surprised and excited to find out about a community of passionate bird-watchers 3) **who/ whose** travel annually to go birding. I would love to 4) **miss/ join** your club, but your website appears to be 5) **over/ under** construction. I could not find any information except for this contact email address. I would like to know how to 6) **sign/ resign** up for the club. I look forward to your 7) **reply/ apply**.

19

Putting all of her energy into her last steps of the running race, Jamie 8) **crossed/ was crossed** the finish line. To her 9) **appointment/ disappointment**, she had failed to 10) **bear/ beat** her personal best time, again. Jamie had pushed herself for months to finally break her record, but it was all for nothing. 11) **Recognize/ Recognizing** how she felt about her failure, Ken, her teammate, 12) **approaching/ approached** her and said, "Jamie, 13) **even though/ despite** you didn't set a personal best time today, your performances have improved dramatically. Your running skills have progressed so much! You'll definitely break your personal best time in the next race!" After hearing his comments, she 14) **felt/ was felt** 15) **confidence/ confident** about herself. Jamie, now motivated to keep pushing for her goal, 16) **replied/ refused** with a smile. "You're right! Next race, I'll beat my best time for sure!"

20

At every step in our journey through life we 17) **encounter/ are encountered** junctions with many different pathways 18) **lead/ leading** into the distance. Each choice 19) **involves/ revolves** uncertainty about which path will get you to your destination. 20) **Trust/ Trusting** our intuition to make the choice often 21) **ending/ ends** up with us making a suboptimal choice. 22) **Turn/ Turning** the uncertainty into numbers 23) **has/ have** proved a potent way of analyzing the paths and finding the shortcut to your destination. The mathematical theory of probability hasn't eliminated risk, but it allows us 24) **to manage/ managing** that risk more effectively. The strategy is to analyze all the possible scenarios 25) **that/ what** the future holds and then to 26) **see/ be seen** what proportion of them lead to success or failure. This 27) **giving/ gives** you a much better map of the future on which to base your decisions about which path to choose.

21

Coming of age in the 18th and 19th centuries, the personal diary 28) **became/ becoming** a centerpiece in the construction of a modern subjectivity, at the heart of which is the application of reason and critique to the understanding of world and self, 29) **which/ what** 30) **allowing/ allowed** the creation of a new kind of knowledge. Diaries were central media 31) **which/ through which** enlightened and free subjects could be constructed. They 32) **provided/ were provided** a space where one could write daily about her whereabouts, feelings, and thoughts. Over time and with rereading, disparate entries, events, and happenstances could be rendered into insights and narratives about the self, and 33) **allowing/ allowed** for the formation of subjectivity. It is in that context 34) **that/ what** the idea of "the self [as] both made and explored with words" emerges. Diaries were personal and private; one would write for oneself, or, in Habermas's formulation, one would make oneself public to oneself. By making the self public in a private sphere, the self also became an 35) **object/ obsession** for self-inspection and self-critique.

22

Urban delivery vehicles can be adapted to better suit the density of urban distribution, 36) **which/ what** often involves smaller vehicles such as vans, 37)

include/ including bicycles. The 38) **later/ latter** have the potential to become a preferred 'last-mile' vehicle, particularly in high-density and congested areas. In locations 39) **where/ which** bicycle use is high, such as the Netherlands, delivery bicycles are also used to 40) **carry/ carrying** personal cargo (e.g. groceries). Due to their low acquisition and maintenance costs, cargo bicycles convey much potential in developed and developing countries 41) **like/ alike**, such as the becak (a three-wheeled bicycle) in Indonesia. Services using electrically assisted delivery tricycles have been successfully 42) **implementing/ implemented** in France and 43) **is/ are** gradually being adopted across Europe for services as varied as parcel and catering deliveries. 44) **Use/ Using** bicycles as cargo vehicles 45) **is/ are** particularly encouraged when 46) **combining/ combined** with policies that restrict motor vehicle 47) **access/ assess** to specific areas of a city, such as downtown or commercial districts, or with the extension of dedicated bike lanes.

23

An important advantage of disclosure, as opposed to more aggressive forms of regulation, 48) **is/ are** its flexibility and respect for the operation of free markets. Regulatory mandates are blunt swords; they tend to neglect diversity and may have serious unintended adverse 49) **affects/ effects**. For example, energy efficiency requirements for appliances may 50) **produce/ be produced** goods that work less well or that have characteristics that consumers do not want. Information provision, by contrast, respects freedom of choice. If automobile manufacturers 51) **required/ are required** to measure and publicize the safety characteristics of cars, potential car purchasers can 52) **trade/ track** safety concerns against other attributes, such as price and styling. If restaurant customers 53) **informed/ are informed** of the calories in their meals, those who want to lose weight can make use of the information, 54) **leaving/ left** those who are unconcerned about calories unaffected. Disclosure does not interfere with, and should even promote, the autonomy (and quality) of individual decision-making.

24

Different parts of the brain's visual system 55) **get/ gets** information on a need-to-know basis. Cells 56) **that/ what** help your hand muscles reach out to an object need to know the size and location of the object, but they don't need to know about color. They need to know a little about shape, but not in great detail. Cells that help you 57) **recognize/ are recognized** people's faces need to be extremely sensitive to details of shape, but they can pay 58) **more/ less** attention to location. It is natural to 59) **assume/ resume** 60) **that/ what** anyone who sees an object sees everything about it — the shape, color, location, and movement. However, one part of your brain sees its shape, another sees color, another detects location, and another 61) **perceiving/ perceives** movement. Consequently, after localized brain damage, 62) **this/ it** is possible to see certain aspects of an object and not others. Centuries ago, people found 63) **it/ them** difficult to imagine how someone could see an object without seeing 64) **that/ what** color it is. Even today, you might find it 65) **surprising/ surprised** to learn about people who see an object without seeing 66) **where/ which** it is, or see it without seeing 67) **that/ whether** it is moving.

26

Niklas Luhmann, a renowned sociologist of the twentieth century, 68) **was/ were** born in Lüeburg Germany in1927. After World War II, he 69) **studied/ was studied** law at the University of Freiburg until 1949. Early in his career, he worked for the State of Lower Saxony, 70) **where/ which** he was in charge of educational reform. In 1960—1961, Luhmann had the chance to study sociology at Harvard University, where he 71) **influenced/ was influenced** by Talcott Parsons, one of the most famous social system theorists. 72) **Later/ Latter**, Luhmann developed his own social system theory. In 1968, he became a professor of sociology at the University of Bielefeld. He 73) **researched/ was researched** a variety of subjects, 74) **including/ concluding** mass media and law. 75) **Although/ Despite** his books are known to be difficult to translate, they have in fact been widely

76) **translated/ transplanted** into other languages.

29

Trends constantly suggest new opportunities for individuals to restage themselves, 77) **represent/ representing** occasions for change. To understand how trends can ultimately 78) **give/ be given** individuals power and freedom, one must first discuss fashion's importance as a basis for change. The most common explanation 79) **offered/ suffered** by my informants as to why fashion is so appealing is 80) **that/ what** it constitutes a kind of theatrical costumery. Clothes are part of how people 81) **present/ prevent** themselves to the world, and fashion locates them in the present, relative to what is happening in society and to fashion's own history. As a form of expression, fashion 82) **contains/ contacts** a host of ambiguities, enabling individuals to 83) **recreate/ be recreated** the meanings associated with specific pieces of clothing. Fashion is among the simplest and cheapest methods of self-expression: clothes can be inexpensively purchased 84) **during/ while** 85) **making/ made** 86) **it/ them** easy to convey notions of wealth, intellectual stature, relaxation or environmental consciousness, even if none of these is true. Fashion can also 87) **strengthen/ be strengthened** agency in various ways, opening up space for action.

30

Everywhere we turn we hear about almighty "cyberspace"! The hype promises 88) **that/ what** we will leave our boring lives, put on goggles and body suits, and enter some metallic, three-dimensional, multimedia other world. When the Industrial Revolution 89) **arrived/ attacked** with its great innovation, the motor, we didn't leave our world to go to some remote motorspace! On the contrary, we 90) **brought/ were brought** the motors into our lives, as automobiles, refrigerators, drill presses, and pencil sharpeners. This absorption has been so complete 91) **that/ what** we 92) **refer/ refer to** all these tools with names 93) **that/ what** declare their usage, not their "motorness." These innovations led to a major socioeconomic movement precisely because they entered and 94) **affected/ effected** profoundly our everyday lives. People have not changed fundamentally in thousands of years. Technology changes constantly. It's the one 95) **that/ what** must 96) **adapt/ adopt** to us. That's exactly 97) **that/ what** will 98) **happen/ be happened** with information technology and 99) **its/ it's** devices under human-centric computing. The 100) **long/ longer** we continue to believe 101) **that/ what** computers will take us to a magical new world, the longer we will delay their natural fusion with our lives, the hallmark of every major movement 102) **that/ what** aspires to be 103) **called/ recalled** a socioeconomic revolution.

31

There is something deeply paradoxical about the professional status of sports journalism, 104) **especial/ especially** in the medium of print. In discharging their usual responsibilities of description and commentary, reporters' accounts of sports events are eagerly consulted by sports fans, 105) **during/ while** in their broader journalistic role of 106) **covering/ recovering** sport in its many forms, sports journalists are among the most visible of all contemporary writers. The ruminations of the elite class of 'celebrity' sports journalists are much sought after by the major newspapers, their lucrative contracts 107) **are/ being** the envy of colleagues in other 'disciplines' of journalism. Yet sports journalists do not have a standing in their profession 108) **that/ what** corresponds to the size of their readerships or of their pay packets, with the old saying (now reaching the status of cliche) that sport is the 'toy department of the news media' still readily to hand as a dismissal of the worth of what sports journalists do. This reluctance to 109) **take/ be taken** sports journalism seriously produces the paradoxical outcome 110) **that/ what** sports newspaper writers are much read but little admired.

32

People have always wanted to be around other people and to 111) **earn/ learn** from them. Cities have

long been dynamos of social possibility, foundries of art, music, and fashion. Slang, or, if you prefer, "lexical innovation," 112) **has/ have** always started in cities — an outgrowth of all those different people so frequently exposed to one another. It spreads outward, in a manner not 113) **unlike/ alike** trans-missible disease, 114) **which/ what** itself typically "takes off" in cities. If, as the noted linguist Leonard Bloomfield 115) **argued/ was argued**, the way a person talks 116) **is/ are** a "composite result of what he has heard before," then language innovation would happen 117) **where/ which** the most people heard and talked to the most other people. Cities drive taste change because they 118) **offer/ suffer** the greatest exposure to other people, who not surprisingly 119) **is/ are** often the creative people cities seem to 120) **attract/ distract**. Media, ever more global, ever more far-reaching, spread language faster to more people.

33

The entrance to a honeybee colony, often 121) **referred/ referred to** as the dancefloor, is a market place for information about the state of the colony and the environment outside the hive. 122) **Study/ Studying** interactions on the dancefloor provides us with a number of illustrative examples of how individuals changing their own behavior in response to local information 123) **allow/ allows** the colony 124) **to regulate/ regulating** its workforce. For example, upon returning to their hive honeybees 125) **that/ what** have collected water search out a receiver bee to unload their water to within the hive. If this search time is short then the returning bee is 126) **more/ less** likely to perform a waggle dance to recruit others to the water source. Conversely, if this search time is long then the bee is more likely to 127) **give/ be given** up collecting water. Since receiver bees will only accept water if they require it, either for 128) **them/ themselves** or to pass on to other bees and brood, this unloading time is correlated with the colony's overall need of water. Thus the individual water forager's response to unloading time (up or down) 129) **regulating/ regulates** water collection in response to the colony's need.

34

We understand that the segregation of our consciousness into present, past, and future 130) **is/ are** both a fiction and an oddly self-referential framework; your present was part of your mother's future, and your children's past will be in part your present. Nothing is generally wrong with structuring our consciousness of time in this conventional manner, and it often 131) **fails/ works** well enough. In the case of climate change, however, the sharp 132) **division/ devotion** of time into past, present, and future has been desperately misleading and has, most importantly, hidden from view the extent of the responsibility of those of us 133) **live/ alive** now. The narrowing of our consciousness of time 134) **smoothing/ smooths** the way to divorcing ourselves from responsibility for developments in the past and the future 135) **which/ with which** our lives are in fact deeply intertwined. In the climate case, it is not 136) **that/ what** we face the facts but then deny our responsibility. It is that the realities 137) **obscured/ are obscured** from view by the partitioning of time, and so questions of responsibility toward the past and future do not 138) **arise/ arouse** naturally.

35

Actors, singers, politicians and countless others recognise the power of the human voice as a 139) **mean/ means** of communication beyond the simple decoding of the words that 140) **used/ are used**. 141) **Learn/ Learning** to control your voice and use it for different purposes 142) **is/ are**, therefore, one of the most important skills to develop as an early career teacher. The 143) **more/ less** confidently you give instructions, the higher the chance of a 144) **positive/ negative** class response. There are times when being able to project your voice loudly will be very 145) **useful/ useless** when working in school, and 146) **know/ knowing** 147) **that/ what** you can cut through a noisy classroom, dinner hall or playground is a great skill to have. However, I would always 148) **advice/ advise** 149) **that/ what** you use your loudest voice incredibly sparingly and 150) **accept/ avoid** shouting as much as possible. A quiet, authoritative

and measured tone 151) **has/ have** so much more impact than slightly panicked shouting.

36

A fascinating species of water flea exhibits a kind of flexibility 152) **that/ what** evolutionary biologists call adaptive plasticity. If the baby water flea is developing into an adult in water 153) **that/ what** 154) **includes/ concludes** the chemical signatures of creatures that prey on water fleas, it 155) **develops/ is developed** a helmet and spines to 156) **offend/ defend** itself against predators. If the water around it doesn't include the chemical signatures of predators, the water flea doesn't develop these protective devices. That's a 157) **stupid/ clever** trick, 158) **because/ because of** producing spines and a helmet is costly, in terms of energy, and conserving energy is essential for an organism's ability to survive and reproduce. The water flea only 159) **expending/ expends** the energy needed to produce spines and a helmet when it needs to. So it may well be 160) **that/ what** this plasticity is an adaptation: a trait that came to 161) **exist/ resist** in a species because it contributed to reproductive fitness. There are many cases, across many species, of adaptive plasticity. Plasticity is conducive to fitness if there is 162) **sufficient/ insufficient** variation in the environment.

37

The most commonly known form of results-based pricing is a practice 163) **called/ recalled** contingency pricing, 164) **using/ used** by lawyers. Contingency pricing is the major way that personal injury and certain consumer cases are billed. In this approach, lawyers do not 165) **relieve/ receive** fees or payment until the case is settled, when they 166) **paid/ are paid** a percentage of the money 167) **that/ what** the client receives. Therefore, only an outcome in the client's favor is compensated. From the client's point of view, the pricing 168) **making/ makes** sense in part 169) **because/ because of** most clients in these cases are 170) **familiar/ unfamiliar** with and possibly intimidated by law firms. Their biggest fears are high fees for a case 171) **that/ what** may take years to settle. By using contingency pricing, clients 172) **ensured/ are ensured** 173) **that/ what** they pay no fees until they receive a settlement. In these and other instances of contingency pricing, the economic value of the service is hard to 174) **determine/ detect** before the service, and providers develop a price 175) **that/ what** allows them 176) **to share/ sharing** the risks and rewards of delivering value to the buyer.

38

Parks take the shape demanded by the cultural concerns of their time. Once parks are in place, they are no inert stage — their purposes and meanings are made and remade by planners and by park users. Moments of park creation are particularly telling, however, for they 177) **reveal/ hide** and actualize ideas about 178) **nature/ nurture** and its relationship to urban society. Indeed, 179) **that/ what** distinguishes a park from the broader category of public space is the representation of nature 180) **that/ what** parks are meant to embody. Public spaces 181) **include/ conclude** parks, concrete plazas, sidewalks, even indoor atriums. Parks typically have trees, grass, and other plants as their central features. When 182) **entering/ entered** a city park, people often imagine a sharp separation from streets, cars, and buildings. There's a reason for that: traditionally, park designers attempted to 183) **create/ remove** such a feeling by planting tall trees at park boundaries, building stone walls, and constructing other means of partition. What's behind this idea 184) **is/ are** not only landscape architects' desire to design aesthetically suggestive park spaces, but a 185) **much/ very** longer history of Western thought 186) **that/ what** envisions cities and nature as antithetical spaces and oppositional forces.

39

Negotiators should try to find ways to slice a large issue into smaller pieces, 187) **knowing/ known** as 188) **using/ used** salami tactics. Issues that can be expressed in quantitative, measurable units are easy to slice. For example, compensation demands can be 189) **divided/ driven** into cents-per-hour increments or

lease rates can be quoted as dollars per square foot. When 190) **work/ working** to fractionate issues of principle or precedent, parties may 191) **use/ be used** the time horizon (when the principle goes into 192) **affect/ effect** or how long it will last) as a way to fractionate the issue. It may be 193) **easier/ harder** to reach an agreement when settlement terms don't have to be implemented until months in the future. Another approach is to 194) **vary/ various** the number of ways that the principle may be applied. For example, a company may 195) **devise/ divide** a family emergency leave plan 196) **that/ what** allows employees the opportunity to be away from the company for a period of no longer than three hours, and no more than once a month, for illness in the employee's immediate family.

40

"Craftsmanship" may suggest a way of life 197) **that/ what** declined with the arrival of industrial society — but this is misleading. Craftsmanship names an enduring, basic human impulse, the desire to do a job well for its own sake. Craftsmanship 198) **cutting/ cuts** a far wider swath than skilled manual labor; it 199) **serves/ reserves** the computer programmer, the doctor, and the artist; parenting 200) **proves/ improves** when it is practiced as a skilled craft, as 201) **is/ does** citizenship. In all these domains, craftsmanship focuses on objective standards, on the thing in itself. Social and economic conditions, however, often stand in the way of the craftsman's discipline and commitment: schools may fail to 202) **provide/ prevent** the tools to do good work, and workplaces may not truly value the aspiration for quality. And though craftsmanship can 203) **reward/ be rewarded** an individual with a sense of pride in work, this reward is not simple. The craftsman often faces conflicting objective standards of excellence; the desire to do something well for its own sake can be 204) **strengthened/ weakened** by competitive pressure, by frustration, or by obsession.

[41~42]

There is evidence that even very simple algorithms can 205) **outperform/ be outperformed** expert judgement on simple prediction problems. For example, algorithms 206) **have been proved/ have proved** more accurate than humans in predicting 207) **that/ whether** a prisoner released on parole will go on to commit another crime, or in predicting whether a potential candidate will perform well in a job in future. In over 100 studies across many 208) **different/ indifferent** domains, half of all cases show simple formulas make better significant predictions than human experts, and the remainder (except a very small handful), 209) **show/ showing** a tie between the two. When there are a lot of different factors involved and a 210) **situation/ simulation** is very uncertain, simple formulas can win out by focusing on the most important factors and being consistent, 211) **during/ while** human judgement is too easily influenced by particularly salient and perhaps 212) **relevant/ irrelevant** considerations. A similar idea 213) **supported/ is supported** by further evidence 214) **that/ what** 'checklists' can improve the quality of expert decisions in a range of domains by ensuring that important steps or considerations aren't missed when people are feeling overloaded. For example, 215) **treat/ treating** patients in intensive care can 216) **require/ be required** hundreds of small actions per day, and one small error could cost a life. 217) **Use/ Using** checklists to ensure that no crucial steps are missed has proved to be remarkably 218) **effective/ ineffective** in a range of medical contexts, from preventing 219) **live/ alive** infections to reducing pneumonia.

[43~45]

"Hailey, be careful!" Camila yelled uneasily, watching her sister 220) **to carry/ carrying** a huge cake to the table. "Don't worry, Camila," Hailey responded, smiling. Camila relaxed only when Hailey had safely 221) **placed/ been placed** the cake on the party table. "Dad will be here shortly. What gift did you buy for his birthday?" Camila 222) **asked/ was asked** out of interest. "Dad will be 223) **surprising/ surprised** to find out 224) **that/ what** it is!" Hailey answered with a wink.

"I bet you bought a wallet or a watch for him," Camila said. In reply, Hailey answered, "No. I bought

something 225) **much/ very** more personal. By the way, there's something you should know about Dad..." They were suddenly 226) **interrupted/ uninterrupted** by the doorbell ringing. It was their dad and they were overjoyed to 227) **see/ be seen** him. "My lovely ladies, thank you for inviting me to your place for my birthday." He walked in joyfully, hugging his daughters. They all walked into the dining room, 228) **where/ which** he was greeted with a rainbow-colored birthday cake and fifty red roses.

"Happy birthday! You're fifty today, Dad. We love you!" Camila said before her sister handed him a small parcel. When he opened it, he 229) **covered/ discovered** a pair of glasses inside. "Hailey, Dad doesn't have eyesight problems," Camila said, puzzled. "Actually Camila, I recently found out he has long been suffering from color blindness. He's kept it a secret so as not to worry us," Hailey 230) **explained/ was explained**.

"Dad, these glasses can help correct your red-green color blindness," 231) **saying/ said** Hailey. He slowly put them on, and stared at the birthday presents on the table. 232) **See/ Seeing** vivid red and green colors for the first time ever, he started to cry. "Incredible! Look at those wonderful colors!" He 233) **shouted/ was shouted** in amazement. Hailey told him in tears, "Dad, I'm glad you can now finally enjoy the true beauty of rainbows and roses. Red represents love and green represents health. You 234) **serve/ deserve** both." Camila nodded, seeing how 235) **happily/ happy** her gift of the glasses 236) **had been made/ had made** their dad.

To whom it may concern,

My name is Michael Brown. I have been a bird-watcher since childhood.

(A) I could not find any information except for this contact email address. I would like to know how to sign up for the club. I look forward to your reply.

(B) I have always enjoyed watching birds in my yard and identifying them by sight and sound. Yesterday, I happened to read an article about your club.

(C) I was surprised and excited to find out about a community of passionate bird-watchers who travel annually to go birding. I would love to join your club, but your website appears to be under construction.

Putting all of her energy into her last steps of the running race, Jamie crossed the finish line. To her disappointment, she had failed to beat her personal best time, again.

(A) Your running skills have progressed so much! You'll definitely break your personal best time in the next race!"

(B) Jamie had pushed herself for months to finally break her record, but it was all for nothing. Recognizing how she felt about her failure, Ken, her teammate, approached her and said, "Jamie, even though you didn't set a personal best time today, your performances have improved dramatically.

(C) After hearing his comments, she felt confident about herself. Jamie, now motivated to keep pushing for her goal, replied with a smile. "You're right! Next race, I'll beat my best time for sure!"

At every step in our journey through life we encounter junctions with many different pathways leading into the distance.

(A) Each choice involves uncertainty about which path will get you to your destination. Trusting our intuition to make the choice often ends up with us making a suboptimal choice.

(B) The strategy is to analyze all the possible scenarios that the future holds and then to see what proportion of them lead to success or failure. This gives you a much better map of the future on which to base your decisions about which path to choose.

(C) Turning the uncertainty into numbers has proved a potent way of analyzing the paths and finding the shortcut to your destination. The mathematical theory of probability hasn't eliminated risk, but it allows us to manage that risk more effectively.

Coming of age in the 18th and 19th centuries, the personal diary became a centerpiece in the construction of a modern subjectivity, at the heart of which is the application of reason and critique to the understanding of world and self, which allowed the creation of a new kind of knowledge.

(A) Over time and with rereading, disparate entries, events, and happenstances could be rendered into insights and narratives about the self, and allowed for the formation of subjectivity. It is in that context that the idea of "the self [as] both made and explored with words" emerges.

(B) Diaries were personal and private; one would write for oneself, or, in Habermas's formulation, one would make oneself public to oneself. By making the self public in a private sphere, the self also became an object for self-inspection and self-critique.

(C) Diaries were central media through which enlightened and free subjects could be constructed. They provided a space where one could write daily about her whereabouts, feelings, and thoughts.

Urban delivery vehicles can be adapted to better suit the density of urban distribution, which often involves smaller vehicles such as vans, including bicycles.

(A) Using bicycles as cargo vehicles is particularly encouraged when combined with policies that restrict motor vehicle access to specific areas of a city, such as downtown or commercial districts, or with the extension of dedicated bike lanes.

(B) Due to their low acquisition and maintenance costs, cargo bicycles convey much potential in developed and developing countries alike, such as the becak (a three-wheeled bicycle) in Indonesia. Services using electrically assisted delivery tricycles have been successfully implemented in France and are gradually being adopted across Europe for services as varied as parcel and catering deliveries.

(C) The latter have the potential to become a preferred 'last-mile' vehicle, particularly in high-density and congested areas. In locations where bicycle use is high, such as the Netherlands, delivery bicycles are also used to carry personal cargo (e.g. groceries).

23

An important advantage of disclosure, as opposed to more aggressive forms of regulation, is its flexibility and respect for the operation of free markets. Regulatory mandates are blunt swords; they tend to neglect diversity and may have serious unintended adverse effects.

(A) If restaurant customers are informed of the calories in their meals, those who want to lose weight can make use of the information, leaving those who are unconcerned about calories unaffected. Disclosure does not interfere with, and should even promote, the autonomy (and quality) of individual decision-making.

(B) For example, energy efficiency requirements for appliances may produce goods that work less well or that have characteristics that consumers do not want.

(C) Information provision, by contrast, respects freedom of choice. If automobile manufacturers are required to measure and publicize the safety characteristics of cars, potential car purchasers can trade safety concerns against other attributes, such as price and styling.

Different parts of the brain's visual system get information on a need-to-know basis. Cells that help your hand muscles reach out to an object need to know the size and location of the object, but they don't need to know about color.

(A) Centuries ago, people found it difficult to imagine how someone could see an object without seeing what color it is. Even today, you might find it surprising to learn about people who see an object without seeing where it is, or see it without seeing whether it is moving.

(B) They need to know a little about shape, but not in great detail. Cells that help you recognize people's faces need to be extremely sensitive to details of shape, but they can pay less attention to location. It is natural to assume that anyone who sees an object sees everything about it — the shape, color, location, and movement.

(C) However, one part of your brain sees its shape, another sees color, another detects location, and another perceives movement. Consequently, after localized brain damage, it is possible to see certain aspects of an object and not others.

Niklas Luhmann, a renowned sociologist of the twentieth century, was born in Lüeburg Germany in1927. After World War II, he studied law at the University of Freiburg until 1949.

(A) Early in his career, he worked for the State of Lower Saxony, where he was in charge of educational reform. In 1960—1961, Luhmann had the chance to study sociology at Harvard University, where he was influenced by Talcott Parsons, one of the most famous social system theorists.

(B) He researched a variety of subjects, including mass media and law. Although his books are known to be difficult to translate, they have in fact been widely translated into other languages.

(C) Later, Luhmann developed his own social system theory. In 1968, he became a professor of sociology at the University of Bielefeld.

Trends constantly suggest new opportunities for individuals to restage themselves, representing occasions for change. To understand how trends can ultimately give individuals power and freedom, one must first discuss fashion's importance as a basis for change.

(A) As a form of expression, fashion contains a host of ambiguities, enabling individuals to recreate the meanings associated with specific pieces of clothing.

(B) Fashion is among the simplest and cheapest methods of self-expression: clothes can be inexpensively purchased while making it easy to convey notions of wealth, intellectual stature, relaxation or environmental consciousness, even if none of these is true. Fashion can also strengthen agency in various ways, opening up space for action.

(C) The most common explanation offered by my informants as to why fashion is so appealing is that it constitutes a kind of theatrical costumery. Clothes are part of how people present themselves to the world, and fashion locates them in the present, relative to what is happening in society and to fashion's own history.

Everywhere we turn we hear about almighty "cyberspace"! The hype promises that we will leave our boring lives, put on goggles and body suits, and enter some metallic, three-dimensional, multimedia other world. When the Industrial Revolution arrived with its great innovation, the motor, we didn't leave our world to go to some remote motorspace!

(A) These innovations led to a major socioeconomic movement precisely because they entered and affected profoundly our everyday lives. People have not changed fundamentally in thousands of years. Technology changes constantly. It's the one that must adapt to us.

(B) That's exactly what will happen with information technology and its devices under human-centric computing. The longer we continue to believe that computers will take us to a magical new world, the longer we will delay their natural fusion with our lives, the hallmark of every major movement that aspires to be called a socioeconomic revolution.

(C) On the contrary, we brought the motors into our lives, as automobiles, refrigerators, drill presses, and pencil sharpeners. This absorption has been so complete that we refer to all these tools with names that declare their usage, not their "motorness."

31

There is something deeply paradoxical about the professional status of sports journalism, especially in the medium of print. In discharging their usual responsibilities of description and commentary, reporters' accounts of sports events are eagerly consulted by sports fans, while in their broader journalistic role of covering sport in its many forms, sports journalists are among the most visible of all contemporary writers.

(A) This reluctance to take sports journalism seriously produces the paradoxical outcome that sports newspaper writers are much read but little admired.

(B) Yet sports journalists do not have a standing in their profession that corresponds to the size of their readerships or of their pay packets, with the old saying (now reaching the status of cliche) that sport is the 'toy department of the news media' still readily to hand as a dismissal of the worth of what sports journalists do.

(C) The ruminations of the elite class of 'celebrity' sports journalists are much sought after by the major newspapers, their lucrative contracts being the envy of colleagues in other 'disciplines' of journalism.

People have always wanted to be around other people and to learn from them. Cities have long been dynamos of social possibility, foundries of art, music, and fashion.

(A) Cities drive taste change because they offer the greatest exposure to other people, who not surprisingly are often the creative people cities seem to attract. Media, ever more global, ever more far-reaching, spread language faster to more people.

(B) Slang, or, if you prefer, "lexical innovation," has always started in cities — an outgrowth of all those different people so frequently exposed to one another. It spreads outward, in a manner not unlike trans-missible disease, which itself typically "takes off" in cities.

(C) If, as the noted linguist Leonard Bloomfield argued, the way a person talks is a "composite result of what he has heard before," then language innovation would happen where the most people heard and talked to the most other people.

33

The entrance to a honeybee colony, often referred to as the dancefloor, is a market place for information about the state of the colony and the environment outside the hive. Studying interactions on the dancefloor provides us with a number of illustrative examples of how individuals changing their own behavior in response to local information allow the colony to regulate its workforce.

(A) For example, upon returning to their hive honeybees that have collected water search out a receiver bee to unload their water to within the hive. If this search time is short then the returning bee is more likely to perform a waggle dance to recruit others to the water source.

(B) Thus the individual water forager's response to unloading time (up or down) regulates water collection in response to the colony's need.

(C) Conversely, if this search time is long then the bee is more likely to give up collecting water. Since receiver bees will only accept water if they require it, either for themselves or to pass on to other bees and brood, this unloading time is correlated with the colony's overall need of water.

34

We understand that the segregation of our consciousness into present, past, and future is both a fiction and an oddly self-referential framework; your present was part of your mother's future, and your children's past will be in part your present.

(A) In the case of climate change, however, the sharp division of time into past, present, and future has been desperately misleading and has, most importantly, hidden from view the extent of the responsibility of those of us alive now. The narrowing of our consciousness of time smooths the way to divorcing ourselves from responsibility for developments in the past and the future with which our lives are in fact deeply intertwined.

(B) Nothing is generally wrong with structuring our consciousness of time in this conventional manner, and it often works well enough.

(C) In the climate case, it is not that we face the facts but then deny our responsibility. It is that the realities are obscured from view by the partitioning of time, and so questions of responsibility toward the past and future do not arise naturally.

35

Actors, singers, politicians and countless others recognise the power of the human voice as a means of communication beyond the simple decoding of the words that are used.

(A) There are times when being able to project your voice loudly will be very useful when working in school, and knowing that you can cut through a noisy classroom, dinner hall or playground is a great skill to have.

(B) Learning to control your voice and use it for different purposes is, therefore, one of the most important skills to develop as an early career teacher. The more confidently you give instructions, the higher the chance of a positive class response.

(C) However, I would always advise that you use your loudest voice incredibly sparingly and avoid shouting as much as possible. A quiet, authoritative and measured tone has so much more impact than slightly panicked shouting.

36

264) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

That's a clever trick, because producing spines and a helmet is costly, in terms of energy, and conserving energy is essential for an organism's ability to survive and reproduce.

A fascinating species of water flea exhibits a kind of flexibility that evolutionary biologists call adaptive plasticity. ① If the baby water flea is developing into an adult in water that includes the chemical signatures of creatures that prey on water fleas, it develops a helmet and spines to defend itself against predators. ② If the water around it doesn't include the chemical signatures of predators, the water flea doesn't develop these protective devices. ③ The water flea only expends the energy needed to produce spines and a helmet when it needs to. ④ So it may well be that this plasticity is an adaptation: a trait that came to exist in a species because it contributed to reproductive fitness. ⑤ There are many cases, across many species, of adaptive plasticity. Plasticity is conducive to fitness if there is sufficient variation in the environment.

265) 윗글의 주제로 가장 적절한 것을 고르시오.

① how a water flea lives ② difficult adaptation
③ attacking the predators ④ the protective organism
⑤ flexible features in evolution

37

266) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

Therefore, only an outcome in the client's favor is compensated.

The most commonly known form of results-based pricing is a practice called contingency pricing, used by lawyers. ① Contingency pricing is the major way that personal injury and certain consumer cases are billed. ② In this approach, lawyers do not receive fees or payment until the case is settled, when they are paid a percentage of the money that the client receives. ③ From the client's point of view, the pricing makes sense in part because most clients in these cases are unfamiliar with and possibly intimidated by law firms. Their biggest fears are high fees for a case that may take years to settle. ④ By using contingency pricing, clients are ensured that they pay no fees until they receive a settlement. In these and other instances of contingency pricing, the economic value of the service is hard to determine before the service, and providers develop a price that allows them to share the risks and rewards of delivering value to the buyer. ⑤

38

Parks take the shape demanded by the cultural concerns of their time. Once parks are in place, they are no inert stage — their purposes and meanings are made and remade by planners and by park users.

(A) Public spaces include parks, concrete plazas, sidewalks, even indoor atriums. Parks typically have trees, grass, and other plants as their central features. When entering a city park, people often imagine a sharp separation from streets, cars, and buildings. There's a reason for that: traditionally, park designers attempted to create such a feeling by planting tall trees at park boundaries, building stone walls, and constructing other means of partition.

(B) What's behind this idea is not only landscape architects' desire to design aesthetically suggestive park spaces, but a much longer history of Western thought that envisions cities and nature as antithetical spaces and oppositional forces.

(C) Moments of park creation are particularly telling, however, for they reveal and actualize ideas about nature and its relationship to urban society. Indeed, what distinguishes a park from the broader category of public space is the representation of nature that parks are meant to embody.

39

Negotiators should try to find ways to slice a large issue into smaller pieces, known as using salami tactics. Issues that can be expressed in quantitative, measurable units are easy to slice.

(A) For example, a company may devise a family emergency leave plan that allows employees the opportunity to be away from the company for a period of no longer than three hours, and no more than once a month, for illness in the employee's immediate family.

(B) It may be easier to reach an agreement when settlement terms don't have to be implemented until months in the future. Another approach is to vary the number of ways that the principle may be applied.

(C) For example, compensation demands can be divided into cents-per-hour increments or lease rates can be quoted as dollars per square foot. When working to fractionate issues of principle or precedent, parties may use the time horizon (when the principle goes into effect or how long it will last) as a way to fractionate the issue.

269) 윗글의 알맞은 순서를 배열하시오. [주관식]

270) 윗글의 주제로 가장 적절한 것을 고르시오.
① 협상에 드는 비용 ② 말싸움의 원인
③ 큰 문제를 작게 나누기 ④ 협상에 걸리는 시간
⑤ 작은 문제들의 스트레스

40

"Craftsmanship" may suggest a way of life that declined with the arrival of industrial society — but this is misleading. Craftsmanship names an enduring, basic human impulse, the desire to do a job well for its own sake.

(A) Social and economic conditions, however, often stand in the way of the craftsman's discipline and commitment: schools may fail to provide the tools to do good work, and workplaces may not truly value the aspiration for quality.

(B) And though craftsmanship can reward an individual with a sense of pride in work, this reward is not simple. The craftsman often faces conflicting objective standards of excellence; the desire to do something well for its own sake can be weakened by competitive pressure, by frustration, or by obsession.

(C) Craftsmanship cuts a far wider swath than skilled manual labor; it serves the computer programmer, the doctor, and the artist; parenting improves when it is practiced as a skilled craft, as does citizenship. In all these domains, craftsmanship focuses on objective standards, on the thing in itself.

271) 윗글의 알맞은 순서를 배열하시오. [주관식]

[41~42]

There is evidence that even very simple algorithms can outperform expert judgement on simple prediction problems.

(A) For example, treating patients in intensive care can require hundreds of small actions per day, and one small error could cost a life. Using checklists to ensure that no crucial steps are missed has proved to be remarkably effective in a range of medical contexts, from preventing live infections to reducing pneumonia.

(B) For example, algorithms have proved more accurate than humans in predicting whether a prisoner released on parole will go on to commit another crime, or in predicting whether a potential candidate will perform well in a job in future. In over 100 studies across many different domains, half of all cases show simple formulas make better significant predictions than human experts, and the remainder (except a very small handful), show a tie between the two.

(C) When there are a lot of different factors involved and a situation is very uncertain, simple formulas can win out by focusing on the most important factors and being consistent, while human judgement is too easily influenced by particularly salient and perhaps irrelevant considerations. A similar idea is supported by further evidence that 'checklists' can improve the quality of expert decisions in a range of domains by ensuring that important steps or considerations aren't missed when people are feeling overloaded.

[43~45]

"Hailey, be careful!" Camila yelled uneasily, watching her sister carrying a huge cake to the table. "Don't worry, Camila," Hailey responded, smiling. Camila relaxed only when Hailey had safely placed the cake on the party table. "Dad will be here shortly. What gift did you buy for his birthday?" Camila asked out of interest. "Dad will be surprised to find out what it is!" Hailey answered with a wink.

(A) "Dad, these glasses can help correct your red-green color blindness," said Hailey. He slowly put them on, and stared at the birthday presents on the table. Seeing vivid red and green colors for the first time ever, he started to cry. "Incredible! Look at those wonderful colors!" He shouted in amazement. Hailey told him in tears, "Dad, I'm glad you can now finally enjoy the true beauty of rainbows and roses. Red represents love and green represents health. You deserve both." Camila nodded, seeing how happy her gift of the glasses had made their dad.

(B) "I bet you bought a wallet or a watch for him," Camila said. In reply, Hailey answered, "No. I bought something much more personal. By the way, there's something you should know about Dad..." They were suddenly interrupted by the doorbell ringing. It was their dad and they were overjoyed to see him. "My lovely ladies, thank you for inviting me to your place for my birthday." He walked in joyfully, hugging his daughters. They all walked into the dining room, where he was greeted with a rainbow-colored birthday cake and fifty red roses.

(C) "Happy birthday! You're fifty today, Dad. We love you!" Camila said before her sister handed him a small parcel. When he opened it, he discovered a pair of glasses inside. "Hailey, Dad doesn't have eyesight problems," Camila said, puzzled. "Actually Camila, I recently found out he has long been suffering from color blindness. He's kept it a secret so as not to worry us," Hailey explained.

Coming of age in the 18th and 19th centuries, the personal diary became a centerpiece in the construction of a modern subjectivity, at the heart of which is the application of reason and critique to the understanding of world and self, which ① **allowed** the creation of a new kind of knowledge. Diaries were central media ② **through which** enlightened and free subjects could be constructed. They provided a space ③ **which** one could write daily about her whereabouts, feelings, and thoughts. Over time and with rereading, disparate entries, events, and happenstances ④ **could be rendered** into insights and narratives about the self, and allowed for the formation of subjectivity. It is in that context ⑤ **that** the idea of "the self [as] both made and explored with words" emerges. Diaries were personal and private; one would write for oneself, or, in Habermas's formulation, **oneself / one / public / make / would** to oneself. By making the self public in a private sphere, the self also became an object for self-inspection and self-critique.

Urban delivery vehicles can be adapted to better suit the density of urban distribution, ① **which** often involves smaller vehicles such as vans, including bicycles. The latter have the potential to become a preferred 'last-mile' vehicle, particularly in high-density and congested areas. In locations ② **where** bicycle use is high, such as the Netherlands, delivery bicycles are also used to carry personal cargo (e.g. groceries). Due to their low acquisition and maintenance costs, **cargo bicycles convey much potential in developed and developing countries like**, such as the becak (a three-wheeled bicycle) in Indonesia. Services using electrically assisted delivery tricycles ③ **have been successfully implemented** in France and are gradually being adopted across Europe for services as ④ **varied** as parcel and catering deliveries. Using bicycles as cargo vehicles is particularly encouraged when ⑤ **combined** with policies that restrict motor vehicle access to specific areas of a city, such as downtown or commercial districts, or with the extension of dedicated bike lanes.

Everywhere we turn we hear about almighty "cyberspace"! The hype promises that we will leave our boring lives, put on goggles and body suits, and enter some metallic, three-dimensional, multimedia other world. When the Industrial Revolution ① **arrived** with its great innovation, the motor, we didn't leave our world to go to some remote motorspace! _____, we brought the motors into our lives, as automobiles, refrigerators, drill presses, and pencil sharpeners. This absorption has been so complete ② **what** we refer to all these tools with names that declare their usage, not their "motorness." These innovations led to a major socioeconomic movement precisely because they ③ **entered** and affected profoundly our everyday lives. People have not changed fundamentally in thousands of years. Technology ④ **changes** constantly. It's the one that must adapt to us. That's exactly what will happen with information technology and its devices under human-centric computing. The longer we continue to believe that computers will take us to a magical new world, the longer we will delay their natural fusion with our lives, the hallmark of every major movement that ⑤ **aspires** to be called a socioeconomic revolution.

The entrance to a honeybee colony, often referred to as the dancefloor, ① **is** a market place for information about the state of the colony and the environment outside the hive. Studying interactions on the dancefloor ② **provide** us with a number of illustrative examples of how individuals changing their own behavior in response to local information allow the colony to regulate its workforce. (A) _____, upon returning to their hive honeybees that have collected water search out a receiver bee ③ **to unload** their water to within the hive. If this search time is short then the returning bee is more likely to perform a waggle dance to recruit others to the water source. Conversely, if this search time is long then the bee is more likely ④ **to give** up collecting water. Since receiver bees will only accept water if they require it, either for ⑤ **themselves** or to pass on to other bees and brood, this unloading time is correlated with the colony's overall need of water. (B) _____ the individual water forager's response to unloading time (up or down) regulates water collection in response to the colony's need.

We understand that the _____ of our consciousness into present, past, and future is both a fiction and an oddly self-referential framework; your present was part of your mother's future, and your children's past will be in part your present. Nothing is generally wrong with structuring our consciousness of time in this conventional manner, and it often ① **works** well enough. In the case of climate change, however, the sharp division of time into past, present, and future ② **has been desperately misleading** and has, most importantly, hidden from view the extent of the responsibility of those of us alive now. The narrowing of our consciousness of time ③ **smooths** the way to divorcing ourselves from responsibility for developments in the past and the future ④ **with which** our lives are in fact deeply intertwined. In the climate case, it is not that we face the facts but then deny our responsibility. It is ⑤ **what** the realities are obscured from view by the partitioning of time, and so questions of responsibility toward the past and future do not arise naturally.

305) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① segregation ② repetition ③ preservation

③ However - Also ④ Therefore - However
⑤ In addition - Yet

36

308) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

A fascinating species of water flea exhibits a kind of _____ that evolutionary biologists call adaptive plasticity. If the baby water flea is developing into an adult in water that ① **includes** the chemical signatures of creatures that prey on water fleas, it develops a helmet and spines to defend itself against predators. If the water around it doesn't include the chemical signatures of predators, the water flea doesn't develop these protective devices. That's a clever trick, ② **because of** producing spines and a helmet is costly, in terms of energy, and conserving energy is essential for an organism's ability ③ **to survive** and reproduce. The water flea only expends the energy needed to produce spines and a helmet when it needs to. So it may well be ④ **that** this plasticity is an adaptation: a trait that came to exist in a species because it ⑤ **contributed** to reproductive fitness. There are many cases, across many species, of adaptive plasticity. Plasticity is conducive to fitness if there is sufficient variation in the environment.

309) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① gap ② disorder ③ reliability
④ flexibility ⑤ debut

310) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

The most commonly known form of results-based pricing is a practice ① **called** contingency pricing, used by lawyers. Contingency pricing is the major way ② **that** personal injury and certain consumer cases are billed. In this approach, lawyers do not receive fees or payment until the case is settled, when they are paid a percentage of the money that the client receives. _____, only an outcome in the client's favor is compensated. From the client's point of view, the pricing makes sense in part ③ **because of** most clients in these cases are unfamiliar with and possibly intimidated by law firms. Their biggest fears are high fees for a case that may take years to settle. By using contingency pricing, clients ④ **are ensured** that they pay no fees until they receive a settlement. In these and other instances of contingency pricing, the economic value of the service is hard ⑤ **to determine** before the service, and providers develop a price that allows them to share the risks and rewards of delivering value to the buyer.

311) 윗글 빈칸에 들어갈 연결어로 가장 적절한 것은?

④ However ⑤ Furthermore

38

312) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

Parks take the shape demanded by the c_____ concerns of their time. Once parks are in place, they are no inert stage — their purposes and meanings are made and remade by planners and by park users. Moments of park creation are particularly telling, however, for they reveal and actualize ideas about nature and ① **its** relationship to urban society. Indeed, what distinguishes a park from the broader category of public space ② **is** the representation of nature that parks are meant to embody. Public spaces include parks, concrete plazas, sidewalks, even indoor atriums. Parks typically ③ **have** trees, grass, and other plants as their central features. When ④ **entered** a city park, people often imagine a sharp separation from streets, cars, and buildings. There's a reason for that: traditionally, park designers attempted to create such a feeling by planting tall trees at park boundaries, building stone walls, and constructing other means of partition. ⑤ **What's** behind this idea is not only landscape architects' desire to design aesthetically suggestive park spaces, but a much longer history of Western thought that envisions cities and nature as antithetical spaces and oppositional forces.

313) 빈칸에 들어갈 한 단어를 본문을 참조하여 쓰시오.

39

314) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

Negotiators should try to find ways to _____ _____, known as using salami tactics. Issues that can be expressed in quantitative, measurable units are easy to slice. For example, compensation demands ① **can be divided** into cents-per-hour increments or lease rates can be quoted as dollars per square foot. When working to fractionate issues of principle or precedent, parties ② **may be used** the time horizon (when the principle goes into effect or how long it will last) as a way to fractionate the issue. It may be easier ③ **to reach** an agreement when settlement terms don't have to be implemented until months in the future. Another approach is ④ **to vary** the number of ways that the principle may be applied. For example, a company may devise a family emergency leave plan ⑤ **that** allows employees the opportunity to be away from the company for a period of no longer than three hours, and no more than once a month, for illness in the employee's immediate family.

315) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① ignore the total compensation
② save a period of time
③ reach an agreement as soon as possible
④ allow employees more opportunities
⑤ slice a large issue into smaller pieces

40

316) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

"Craftsmanship" may suggest a way of life that declined with the arrival of industrial society — but this is misleading. Craftsmanship ① **names** an enduring, basic human impulse, the desire ② **to do** a job well for its own sake. Craftsmanship cuts a far wider swath than skilled manual labor; it serves the computer programmer, the doctor, and the artist; parenting improves when it ③ **is practiced** as a skilled craft, as does citizenship. In all these domains, craftsmanship focuses on objective standards, on the thing in itself. Social and economic conditions, however, often stand in the way of the craftsman's discipline and commitment: schools may fail ④ **to provide** the tools to do good work, and workplaces may not truly _____. And though craftsmanship can reward an individual with a sense of pride in work, this reward is not simple. The craftsman often ⑤ **facing** conflicting objective standards of excellence; the desire to do something well for its own sake can be weakened by competitive pressure, by frustration, or by obsession.

317) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① calculate the interests
② help the poor people
③ make them take a rest
④ spend all of the money
⑤ value the aspiration for quality

[41~42]

318) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

There is evidence that even very simple algorithms can _____ on simple prediction problems. For example, algorithms have proved more accurate than humans in predicting whether a prisoner ① **released** on parole will go on to commit another crime, or in predicting whether a potential candidate will perform well in a job in future. In over 100 studies across many different domains, half of all cases show simple formulas ② **make** better significant predictions than human experts, and the remainder (except a very small handful), show a tie between the two. When there are a lot of different factors ③ **involved** and a situation is very uncertain, simple formulas can win out by focusing on the most important factors and being consistent, while human judgement is too easily ④ **influenced** by particularly salient and perhaps irrelevant considerations. A similar idea is supported by further evidence ⑤ **what** 'checklists' can improve the quality of expert decisions in a range of domains by ensuring that important steps or considerations aren't missed when people are feeling overloaded. For example, treating patients in intensive care can require hundreds of small actions per day, and one small error could cost a life. Using checklists to ensure that no crucial steps are missed has proved to be remarkably effective in a range of medical contexts, from preventing live infections to reducing pneumonia.

319) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① give it up ② perceive the world
③ help the others ④ cure the disease
⑤ outperform expert judgement

At every step in our journey through life we encounter junctions with many different pathways ① **leading** into the distance. Each choice ② **involves** uncertainty about which path will get you to your destination. Trusting our intuition ③ **to make** the choice often ends up with us making a suboptimal choice. **Turning the uncertainty into numbers have proved a potent way of analyzing the paths and finding the shortcut to your destination**. The mathematical theory of probability hasn't eliminated risk, but it allows us ④ **to managing** that risk more effectively. The strategy is to analyze all the possible scenarios that the future holds and then to see what proportion of them lead to success or failure. This gives you a much better map of the future on which ⑤ **to base** your decisions about which path to choose.

Coming of age in the 18th and 19th centuries, the personal diary ① **became** a centerpiece in the construction of a modern subjectivity, at the heart of which is the application of reason and critique to the understanding of world and self, ② **what** allowed the creation of a new kind of knowledge. Diaries were central media through which ③ **enlightened** and free subjects could be constructed. They provided a space where one could write daily about her whereabouts, feelings, and thoughts. Over time and with rereading, disparate entries, events, and happenstances could be rendered into insights and narratives about the self, and ④ **allowed** for the formation of subjectivity. It is in that context that the idea of "the self [as] both made and explored with words" emerges. Diaries were personal and private; one ⑤ **would write** for oneself, or, in Habermas's formulation, one would make oneself public to oneself. By making the self public in a private sphere, the self also became an object for self-inspection and self-critique.

An important advantage of disclosure, as opposed to more aggressive forms of regulation, is its flexibility and respect for the operation of free markets. Regulatory mandates are blunt swords; they tend ① **to neglect** diversity and may have serious unintended adverse effects. For example, energy efficiency requirements for appliances may produce goods ② **that** work less well or that have characteristics that consumers do not want. Information provision, by contrast, respects freedom of choice. If automobile manufacturers ③ **are required** to measure and publicize the safety characteristics of cars, potential car purchasers ④ **can be traded** safety concerns against other attributes, such as price and styling. If restaurant customers are informed of the calories in their meals, those ⑤ **who** want to lose weight can , leaving those who are unconcerned about calories unaffected. Disclosure does not interfere with, and should even promote, the autonomy (and quality) of individual decision-making.

332) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① come down with the information
② get rid of the information
③ keep pace with the information
④ make use of the information
⑤ have nothing to do with the information

Different parts of the brain's visual system get information on a need-to-know basis. Cells ① **that** help your hand muscles reach out to an object need to know the size and location of the object, but **그들은 색깔에 대해 알 필요는 없다**. They need to know a little about shape, but not in great detail. Cells that help you recognize people's faces need to be extremely sensitive to details of shape, but they can pay less attention to location. It is natural ② **to assume** that anyone who sees an object sees everything about it — the shape, color, location, and movement. However, one part of your brain ③ **sees** its shape, another sees color, another detects location, and another perceives movement. Consequently, after localized brain damage, it is possible to see certain aspects of an object and not others. Centuries ago, people found it ④ **difficultly** to imagine how someone could see an object without seeing what color it is. Even today, you might find it ⑤ **surprising** to learn about people who see an object without seeing where it is, or see it without seeing whether it is moving.

Trends constantly suggest new opportunities for individuals to restage themselves, ① **representing** occasions for change. To understand how trends can ultimately give individuals power and freedom, one must first discuss fashion's importance as a basis for change. The most common explanation ② **offered** by my informants as to why fashion is so appealing is that it constitutes a kind of theatrical costumery. Clothes are part of how people ③ **present** themselves to the world, and fashion locates them in the present, relative to what is happening in society and to fashion's own history. As a form of expression, fashion ④ **misses** a host of ambiguities, enabling individuals to recreate the meanings associated with specific pieces of clothing. Fashion is among the simplest and cheapest methods of self-expression: clothes can be inexpensively purchased **while making them easy to convey notions of wealth, intellectual stature, relaxation or environmental consciousness**, even if none of these is true. Fashion can also strengthen agency in various ways, ⑤ **opening up** space for action.

Everywhere we turn we hear about almighty "cyberspace"! The hype promises that we will leave our boring lives, put on goggles and body suits, and ① **enter** some metallic, three-dimensional, multimedia other world. When the Industrial Revolution arrived with its great innovation, the motor, we didn't leave our world ② **to go** to some remote motorspace! On the contrary, we brought the motors into our lives, as automobiles, refrigerators, drill presses, and pencil sharpeners. This absorption ③ **has been** so complete that we refer to all these tools with names that declare their usage, not their "motorness." These innovations ④ **leading** to a major socioeconomic movement precisely because they entered and affected profoundly our everyday lives. People have not changed fundamentally in thousands of years. Technology changes constantly. It's the one that must adapt to us. That's exactly ⑤ **what** will happen with information technology and its devices under human-centric computing. The longer we continue to believe that computers will _____, the longer we will delay their natural fusion with our lives, the hallmark of every major movement that aspires to be called a socioeconomic revolution.

340) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① give us more stress
② make us work more
③ take our jobs away
④ take us to a magical new world
⑤ break all of the innovations we have made

There is something deeply paradoxical about the professional status of sports journalism, especially in the medium of print. In discharging their usual responsibilities of description and commentary, reporters' accounts of sports events are eagerly ① **consulted** by sports fans, while in their broader journalistic role of covering sport in its many forms, sports journalists ② **are** among the most visible of all contemporary writers. The ruminations of the elite class of 'celebrity' sports journalists are much ③ **seeking** after by the major newspapers, **their lucrative contracts are the envy of colleagues in other 'disciplines' of journalism**. Yet sports journalists do not have a standing in their profession that corresponds to the size of their readerships or of their pay packets, with the old saying (now reaching the status of cliche) that sport is the 'toy department of the news media' still readily to hand as a dismissal of the worth of what sports journalists do. This reluctance ④ **to take** sports journalism seriously produces the paradoxical outcome that sports newspaper writers are much read but little ⑤ **admired**.

345) 다음, 어법상 틀린 것을 찾아 고치시오. [주관식]

The entrance to a honeybee colony, often referred to as the dancefloor, is a market place for information about the state of the colony and the environment outside the hive. ① **Studying** interactions on the dancefloor provides us with a number of illustrative examples of how individuals changing their own behavior in response to local information ② **allow** the colony to regulate its workforce. For example, upon returning to their hive honeybees that ③ **have been collected** water search out a receiver bee to unload their water to within the hive. If this search time is short then the returning bee is more likely ④ **to perform** a waggle dance to recruit others to the water source. Conversely, if this search time is long then the bee is more likely to give up ⑤ **collecting** water. Since receiver bees will only accept water if they require it, either for themselves or to pass on to other bees and brood, this unloading time is correlated with the colony's overall need of water. Thus the individual water forager's response to unloading time (up or down) _____ in response to the colony's need.

346) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① makes more trouble ② breaks the cooperation
③ gives more stress ④ only wastes time
⑤ regulates water collection

We understand that the segregation of our consciousness into present, past, and future is both a fiction and an oddly self-referential framework; your present ① **was** part of your mother's future, and your children's past will be in part your present. Nothing is generally wrong with structuring our consciousness of time in this conventional manner, and it often works ② **well enough**. In the case of climate change, however, the sharp division of time into past, present, and future _____ and has, most importantly, hidden from view the extent of the responsibility of those of us ③ **alive** now. The narrowing of our consciousness of time smooths the way to divorcing ④ **ourselves** from responsibility for developments in the past and the future with which our lives are in fact deeply intertwined. In the climate case, ⑤ **this** is not that we face the facts but then deny our responsibility. It is that the realities are obscured from view by the partitioning of time, and so questions of responsibility toward the past and future do not arise naturally.

348) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① makes us keep time
② has been desperately misleading
③ has helped us
④ could solve all of the problems
⑤ removes the burden of responsibility

A fascinating species of water flea exhibits a kind of flexibility ① **that** evolutionary biologists call adaptive plasticity. If the baby water flea is developing into an adult in water ② **what** includes the chemical signatures of creatures that prey on water fleas, it develops a helmet and spines to _____. If the water around it doesn't include the chemical signatures of predators, the water flea doesn't develop these protective devices. That's a clever trick, because ③ **producing** spines and a helmet is costly, in terms of energy, and conserving energy is essential for an organism's ability to survive and reproduce. The water flea only ④ **expends** the energy needed to produce spines and a helmet when it needs to. So it may well be that this plasticity is an adaptation: a trait that came to exist in a species ⑤ **because** it contributed to reproductive fitness. There are many cases, across many species, of adaptive plasticity. Plasticity is conducive to fitness if there is sufficient variation in the environment.

352) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① play with the predators② train the babies
③ show off its skills ④ mate others successfully
⑤ defend itself against predators

There is evidence that even very simple algorithms can outperform expert judgement on simple prediction problems. For example, algorithms ① **have proved** more accurate than humans in predicting whether a prisoner released on parole will go on to commit another crime, or in predicting ② **that** a potential candidate will perform well in a job in future. In over 100 studies across many different domains, half of all cases show simple formulas make better significant predictions than human experts, and the remainder (except a very small handful), show a tie between the two. **관련된 많은 다른 요인이 있을 때** and a situation is very uncertain, simple formulas can win out by focusing on the most important factors and being consistent, ③ **while** human judgement is too easily influenced by particularly salient and perhaps irrelevant considerations. A similar idea is supported by further evidence that 'checklists' can improve the quality of expert decisions in a range of domains by ensuring that important steps or considerations aren't missed when people are feeling overloaded. For example, ④ **treating** patients in intensive care can require hundreds of small actions per day, and one small error could cost a life. Using checklists ⑤ **to ensure** that no crucial steps are missed has proved to be remarkably effective in a range of medical contexts, from preventing live infections to reducing pneumonia.

Different parts of the brain's visual system (A) **get/ gets** information on a need-to-know basis. Cells that help your hand muscles reach out to an object need to know the size and location of the object, but they don't need to know about color. They need to know a little about shape, but not in great detail. Cells that help you recognize people's faces need to be extremely sensitive to details of shape, but they can pay less attention to location. It is natural to assume that anyone who sees an object sees everything about it — the shape, color, location, and movement. However, one part of your brain sees its shape, another sees color, another detects location, and another perceives movement. Consequently, after localized brain damage, it is possible to see certain aspects of an object and not others. Centuries ago, people found (B) **it/ them** difficult to imagine **an / could / object / see / how / someone** without seeing what color it is. Even today, you might find it (C) **surprising/ surprised** to learn about people who see an object without seeing where it is, or see it without seeing whether it is moving.

387) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The entrance to a honeybee colony, often referred to as the dancefloor, is a market place for information about the state of the colony and the environment outside the hive. (A) **Study/ Studying** interactions on the dancefloor provides us with a number of illustrative examples of how individuals changing their own behavior in response to local information allow the colony (B) **to regulate/ regulating** its workforce. For example, upon returning to their hive honeybees that have collected water search out a receiver bee to unload their water to within the hive. If this search time is short then the returning bee is more likely to perform a waggle dance to recruit others to the water source. Conversely, if this search time is long then the bee **to / collecting / water / is / up / give / more likely**. Since receiver bees will only accept water if they require it, either for (C) **them/ themselves** or to pass on to other bees and brood, this unloading time is correlated with the colony's overall need of water. Thus the individual water forager's response to unloading time (up or down) regulates water collection in response to the colony's need.

389) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

We understand that the segregation of our consciousness into present, past, and future (A) **is/ are** both a fiction and an oddly self-referential framework; your present was part of your mother's future, and your children's past will be in part your present. Nothing is generally wrong with structuring our consciousness of time in this conventional manner, and it often works well enough. In the case of climate change, however, the sharp _____ of time into past, present, and future has been desperately misleading and has, most importantly, hidden from view the extent of the responsibility of those of us (B) **live/ alive** now. The narrowing of our consciousness of time smooths the way to divorcing ourselves from responsibility for developments in the past and the future (C) **which/ with which** our lives are in fact deeply intertwined. In the climate case, it is not that we face the facts but then deny our responsibility. It is that the realities are obscured from view by the partitioning of time, and so questions of responsibility toward the past and future do not arise naturally.

36

393) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

A fascinating species of water flea exhibits a kind of flexibility that evolutionary biologists call adaptive plasticity. If the baby water flea is developing into an adult in water that includes the chemical signatures of creatures (A) **that/ what** prey on water fleas, it develops a helmet and spines to defend itself against predators. If the water around it doesn't include the chemical signatures of predators, the water flea doesn't develop these protective devices. That's a clever trick, because (B) **produce/ producing** spines and a helmet is costly, in terms of energy, and conserving energy is essential for an organism's ability to survive and reproduce. The water flea only expends the energy needed to produce spines and a helmet when it needs to. So it may well be that this plasticity is an _____: a trait that came to exist in a species (C) **because/ because of** it contributed to reproductive fitness. There are many cases, across many species, of adaptive plasticity. Plasticity is conducive to fitness if there is sufficient variation in the environment.

394) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① alliance ② adaptation ③ architecture
④ utterance ⑤ irrelevance

37

395) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The most commonly known form of results-based pricing is a practice (A) **calling/ called** contingency pricing, used by lawyers. Contingency pricing is the major way that personal injury and certain consumer cases are billed. In this approach, lawyers do not receive fees or payment until the case is settled, when they are paid a percentage of the money that the client receives. Therefore, only an outcome in the client's favor is compensated. From the client's point of view, the pricing makes sense in part because most clients in these cases are unfamiliar with and possibly intimidated by law firms. Their biggest fears are high fees for a case **settle / years / may / to / that / take**. By using contingency pricing, clients are ensured (B) **that/ what** they pay no fees until they receive a settlement. In these and other instances of contingency pricing, the economic value of the service is hard to determine before the service, and providers develop a price that allows them (C) **to share/ sharing** the risks and rewards of delivering value to the buyer.

Parks take the shape demanded by the cultural concerns of their time. Once parks are in place, they are no inert stage — their purposes and meanings are made and remade by planners and by park users. Moments of park creation are particularly telling, however, for they reveal and actualize ideas about nature and its relationship to urban society. Indeed, (A) **that/ what** distinguishes a park from the broader category of public space is the representation of nature that parks are meant to embody. Public spaces include parks, concrete plazas, sidewalks, even indoor atriums. Parks typically have trees, grass, and other plants as their central features. When entering a city park, people often imagine a sharp separation from streets, cars, and buildings. There's a reason for that: traditionally, park designers attempted to (B) **create/ be created** such a feeling by planting tall trees at park boundaries, building stone walls, and constructing other means of partition. What's behind this idea is not only landscape architects' desire to design aesthetically suggestive park spaces, but a much longer history of Western thought (C) **that/ what** envisions cities and nature as antithetical spaces and oppositional forces.

39

398) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Negotiators should try to find ways to slice a large issue into smaller pieces, (A) **knowing/ known** as using salami tactics. Issues that can be expressed in quantitative, measurable units are easy to slice. For example, compensation demands can be divided into cents-per-hour increments or lease rates can be quoted as dollars per square foot. When (B) **work/ working** to fractionate issues of principle or precedent, parties may use the time horizon (when the principle goes into effect or how long it will last) as a way to fractionate the issue. **may / reach / to / easier / It / be / an agreement** when settlement terms don't have to be implemented until months in the future. Another approach is to vary the number of ways that the principle may be applied. For example, a company may devise a family emergency leave plan that (C) **allowing/ allows** employees the opportunity to be away from the company for a period of no longer than three hours, and no more than once a month, for illness in the employee's immediate family.

400) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

"Craftsmanship" may suggest a way of life (A) **that/ what** declined with the arrival of industrial society — but this is misleading. Craftsmanship names an enduring, basic human impulse, the desire to do a job well for its own sake. Craftsmanship cuts a far wider swath than skilled manual labor; it serves the computer programmer, the doctor, and the artist; parenting improves when it is practiced as a skilled craft, as does citizenship. In all these domains, craftsmanship focuses on objective standards, on the thing in itself. Social and economic conditions, however, often stand in the way of the craftsman's discipline and commitment: schools may fail to (B) **provide/ be provided** the tools to do good work, and workplaces may not truly value the aspiration for quality. And (C) **though/ despite** craftsmanship can reward an individual with a sense of pride in work, this reward is not simple. The craftsman often faces conflicting objective standards of excellence; the desire to do something well for its own sake can be w_____ by competitive pressure, by frustration, or by obsession.

매우 간단한 알고리즘조차도 간단한 예측 문제에 대한 전문가의 판단을 능가할 수 있다는 증거가 있다. For example, algorithms have proved more accurate than humans in predicting whether a prisoner released on parole will go on to commit another crime, or in predicting whether a potential candidate will perform well in a job in future. In over 100 studies across many different domains, half of all cases show simple formulas (A) **making/ make** better significant predictions than human experts, and the remainder (except a very small handful), show a tie between the two. When there are a lot of different factors involved and a situation is very uncertain, simple formulas can win out by focusing on the most important factors and being consistent, (B) **during/ while** human judgement is too easily influenced by particularly salient and perhaps irrelevant considerations. A similar idea is supported by further evidence that 'checklists' can improve the quality of expert decisions in a range of domains by ensuring that important steps or considerations aren't missed when people are feeling overloaded. For example, (C) **treat/ treating** patients in intensive care can require hundreds of small actions per day, and one small error could cost a life. Using checklists to ensure that no crucial steps are missed has proved to be remarkably effective in a range of medical contexts, from preventing live infections to reducing pneumonia.

412) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Coming of age in the 18th and 19th centuries, the personal diary became a centerpiece in the construction of a modern subjectivity, at the heart of which is the application of reason and critique to the understanding of world and self, which allowed the (A) **creation/ cure** of a new kind of knowledge. Diaries were central media through which enlightened and free subjects could be constructed. They provided a space where one could write daily about her whereabouts, feelings, and thoughts. Over time and with rereading, disparate entries, events, and happenstances could be (B) **raged/ rendered** into insights and narratives about the self, and allowed for the formation of subjectivity. It is in that context that the idea of "the self [as] both made and (C) **expired/ explored** with words" emerges. Diaries were personal and private; one would write for oneself, or, in Habermas's formulation, one would make oneself public to oneself. By making the self public in a private sphere, the self also became an object for self-inspection and self-critique.

If, as the noted linguist Leonard Bloomfield argued, the way a person talks is a "composite result of what he has heard before," then language innovation would (B) **disappear/ happen** where the most people heard and talked to the most other people. Cities drive taste change because they offer the greatest exposure to other people, who not surprisingly are often the creative people cities seem to (C) **attract/ distract**. Media, ever more global, ever more far-reaching, spread language faster to more people.

424) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The entrance to a honeybee colony, often (A) **referred/ referred to** as the dancefloor, is a market place for information about the state of the colony and the environment outside the hive. ① Studying interactions on the dancefloor provides us (B) **from/ with** a number of illustrative examples of how individuals changing their own behavior in response to local information allow the colony to regulate its workforce. ② For example, upon returning to their hive honeybees that have collected water search out a receiver bee to unload their water to within the hive. If this search time is short then the returning bee is (C) **more/ less** likely to perform a waggle dance to recruit others to the water source. ③ Since receiver bees will only accept water if they require it, either for themselves or to pass on to other bees and brood, this unloading time is correlated with the colony's overall need of water. ④ Thus the individual water forager's response to unloading time (up or down) regulates water collection in response to the colony's need. ⑤

425) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

Conversely, if this search time is long then the bee is more likely to give up collecting water.

426) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

We understand that the segregation of our consciousness into present, past, and future is both a fiction and an oddly self-referential framework; your present was part of your mother's future, and your children's past will be in part your present. ① Nothing is generally wrong with (A) **ignoring/ structuring** our consciousness of time in this conventional manner, and it often works well enough. ② The narrowing of our consciousness of time smooths the way to divorcing ourselves from responsibility for developments in the past and the future with which our lives are in fact (B) **rarely/ deeply** intertwined. ③ In the climate case, it is not that we face the facts but then deny our responsibility. ④ It is that the realities are obscured from view by the partitioning of time, and so questions of responsibility toward the past and future do not (C) **arise/ arouse** naturally. ⑤

427) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

In the case of climate change, however, the sharp division of time into past, present, and future has been desperately misleading and has, most importantly, hidden from view the extent of the responsibility of those of us alive now.

428) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Actors, singers, politicians and countless others recognise the power of the human voice as a means of communication beyond the simple decoding of the words that are used. ① Learning to control your voice and use it for different purposes is, therefore, one of the most important skills to (A) **develop/ destruct** as an early career teacher. ② The more confidently you give instructions, the higher the chance of a (B) **positive/ negative** class response. ③ There are times when being able to project your voice loudly will be very (C) **useful/ useless** when working in school, and knowing that you can cut through a noisy classroom, dinner hall or playground is a great skill to have. ④ A quiet, authoritative and measured tone has so much more impact than slightly panicked shouting. ⑤

429) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

However, I would always advise that you use your loudest voice incredibly sparingly and avoid shouting as much as possible.

430) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

A fascinating species of water flea exhibits a kind of flexibility that evolutionary biologists call adaptive plasticity. If the baby water flea is developing into an adult in water that includes the chemical signatures of creatures that prey on water fleas, it develops a helmet and spines to (A) **offend/ defend** itself against predators. If the water around it doesn't include the chemical signatures of predators, the water flea doesn't develop these protective devices. **That's a clever trick, because producing spines and a helmet is cost**, in terms of energy, and conserving energy is essential for an organism's ability to survive and reproduce. The water flea only (B) **expends/ expires** the energy needed to produce spines and a helmet when it needs to. So it may well be that this plasticity is an adaptation: a trait that came to (C) **exist/ resist** in a species because it contributed to reproductive fitness. There are many cases, across many species, of adaptive plasticity. Plasticity is conducive to fitness if there is sufficient variation in the environment.

The most commonly known form of results-based pricing is a practice called contingency pricing, used by lawyers. Contingency pricing is the major way that personal injury and certain consumer cases are (A) **bullied/ billed**. In this approach, lawyers do not receive fees or payment until the case is settled, when they are paid a percentage of the money that the client receives. Therefore, only an outcome in the client's favor is (B) **confused/ compensated**. From the client's point of view, the pricing makes sense in part because most clients in these cases are (C) **familiar/ unfamiliar** with and possibly intimidated by law firms. Their biggest fears are high fees for a case that may take years to settle. By using contingency pricing, clients are ensured that they pay no fees until ____ _____. In these and other instances of contingency pricing, the economic value of the service is hard to determine before the service, and providers develop a price that allows them to share the risks and rewards of delivering value to the buyer.

433) 윗글의 빈칸에 가장 적절한 답을 고르시오.

① they lose the case ② they receive a settlement
③ they become rich ④ they could make money
⑤ they are not interested in it

Parks take the shape demanded by the cultural concerns of their time. Once parks are in place, they are no inert stage — their purposes and meanings are made and remade by planners and by park users. Moments of park creation are particularly telling, however, for they reveal and actualize ideas about (A) **nature/ nurture** and its relationship to urban society. Indeed, what distinguishes a park from the broader category of public space is the representation of nature that parks are meant to embody. Public spaces include parks, concrete plazas, sidewalks, even indoor atriums. Parks typically have trees, grass, and other plants as their central features. When entering a city park, people often imagine a sharp (B) **separation/ support** from streets, cars, and buildings. There's a reason for that: traditionally, park designers attempted to create such a feeling by planting tall trees at park boundaries, building stone walls, and constructing other means of partition. What's behind this idea is not only landscape architects' desire to (C) **design/ resign** aesthetically suggestive park spaces, but a much longer history of Western thought that envisions cities and nature as antithetical spaces and oppositional forces.

435) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

Negotiators should try to find ways to **a / slice / pieces / into / issue / smaller / large**, known as using salami tactics. Issues that can be expressed in quantitative, measurable units are easy to slice. For example, compensation demands can be (A) **divided/ derived** into cents-per-hour increments or lease rates can be quoted as dollars per square foot. When working to fractionate issues of principle or precedent, parties may use the time horizon (when the principle goes into effect or how long it will last) as a way to fractionate the issue. It may be (B) **easier/ harder** to reach an agreement when settlement terms don't have to be implemented until months in the future. Another approach is to (C) **vary/ various** the number of ways that the principle may be applied. For example, a company may devise a family emergency leave plan that allows employees the opportunity to be away from the company for a period of no longer than three hours, and no more than once a month, for illness in the employee's immediate family.

40

437) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

"Craftsmanship" may suggest a way of life that (A) **detected/ declined** with the arrival of industrial society — but this is misleading. Craftsmanship names an enduring, basic human impulse, the desire to do a job well for its own sake. Craftsmanship cuts a far wider swath than skilled manual labor; it (B) **serves/ deserves** the computer programmer, the doctor, and the artist; parenting improves when it is practiced as a skilled craft, as does citizenship. In all these domains, craftsmanship focuses on objective standards, on the thing in itself. Social and economic conditions, however, often stand in the way of the craftsman's discipline and commitment: schools may fail to (C) **provide/ prevent** the tools to do good work, and workplaces may not truly value the aspiration for quality. And though craftsmanship can reward an individual with a sense of pride in work, this reward is not simple. The craftsman often faces conflicting objective standards of excellence; the desire to do something well for its own sake can be weakened by competitive pressure, by frustration, or by obsession.

438) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

There is evidence that even very simple algorithms can outperform expert judgement on simple prediction problems. For example, algorithms have proved (A) **more/ less** accurate than humans in predicting whether a prisoner released on parole will go on to commit another crime, or in predicting whether a potential candidate will perform well in a job in future. In over 100 studies across many different domains, half of all cases show simple formulas make better significant predictions than human experts, and the remainder (except a very small handful), show a tie between the two. When there are a lot of different factors involved and a situation is very uncertain, simple formulas can win out by focusing on the most important factors and being consistent, while human judgement is too easily influenced by particularly salient and perhaps (B) **relevant/ irrelevant** considerations. A similar idea is supported by further evidence that 'checklists' can improve the quality of expert decisions in a range of domains by ensuring that important steps or considerations aren't missed when people are feeling overloaded. For example, treating patients in intensive care can (C) **require/ reject** hundreds of small actions per day, and one small error could cost a life. Using checklists to ensure that **no crucial steps are missed has proved to be remarkably effective in a range of medical contexts, from preventing live infections to reduce pneumonia**.

"Hailey, be careful!" Camila yelled uneasily, watching her sister carrying a huge cake to the table. "Don't worry, Camila," Hailey responded, smiling. Camila relaxed only when Hailey had safely placed the cake on the party table. "Dad will be here shortly. What gift did you buy for his birthday?" Camila asked out of interest. "Dad will be (A) **surprising/ surprised** to find out what it is!" Hailey answered with a wink.

"I bet you bought a wallet or a watch for him," Camila said. In reply, Hailey answered, "No. I bought something much more personal. By the way, there's something you should know about Dad..." They were suddenly interrupted by the doorbell ringing. It was their dad and they were overjoyed to see him. "My lovely ladies, thank you for inviting me to your place for my birthday." He walked in joyfully, hugging his daughters. They all walked into the dining room, where he was greeted with a rainbow-colored birthday cake and fifty red roses.

"Happy birthday! You're fifty today, Dad. We love you!" Camila said before her sister handed him a small parcel. When he opened it, he (B) **discovered/ was discovered** a pair of glasses inside. "Hailey, Dad doesn't have eyesight problems," Camila said, puzzled. "Actually Camila, I recently found out he has long been suffering from color blindness. He's kept it a secret **not / us / worry / as / to / so**," Hailey explained.

"Dad, these glasses can help correct your red-green color blindness," said Hailey. He slowly put them on, and stared at the birthday presents on the table. Seeing vivid red and green colors for the first time ever, he started to cry. "Incredible! Look at those wonderful colors!" He shouted in amazement. Hailey told him in tears, "Dad, I'm glad you can now finally enjoy the true beauty of rainbows and roses. Red represents love and green represents health. You deserve both." Camila nodded, seeing how happy her gift of the glasses (C) **had been made/ had made** their dad.
