고 3 2021년 9 월 모의고사

18.

Dear Mr. Bernstein,

My name is Thomas Cobb, the marketing director of Calbary Hospital. Our hospital is planning to hold a charity concert on September 18th in the Main Hall of our hospital. We expect it to be helpful in raising money to cover the medical costs of those in need. To make the concert more special, we want to invite you for the opening of the concert. Your reputation as a pianist is well known, and everyone will be very happy to see your performance. Beautiful piano melodies will help create an enjoyable experience for the audience. We look forward to your positive reply.

저의 이름은 Thomas Cobb이며, Calbary 병원 마케팅부장입니다. 우리 병원은 9월18일에 우리 병원 대강당에서 자선 음악회 개최를 계획하고 있습니다. 우리는 그 행사가 어려운 분들의 의료비를 충당할 기금을 마련하는 데 도움이 될 것으로 기대합니다. 그 음악회를 더 특별하게 만들고자, 우리는 음악회 개막을 위해 귀하를 초대하고자 합니다. 피아노 연주자로서 귀하의 명성은 잘 알려져 있기에, 모든 이가 귀하의 공연을 보며 매우 기뻐할 것입니다. 아름다운 피아노 선율이 관객들에게 즐거운 경험을 만들어 주는 데 도움이 될 것입니다. 우리는 귀하의 긍정적인 답변을 고대합니다.

19.

As he stepped onto the basketball court, David suddenly thought of the day he had gotten injured last season and froze. He was not sure ***if*** he could play as well as before the injury. A serious wrist injury ***had caused*** him ***to miss*** the rest of the season. Remembering the surgery, he said to himself, “I thought my basketball career was completely over.” However, upon hearing his fans’ wild cheers, he felt his body coming alive and thought, “For sure, my fans, friends, and family are looking forward to watching me play today.” As soon as the game started, he was filled with energy. The first five shots he attempted went in the basket. “I’m back! I got this,” he shouted.

농구 경기장으로 들어서면서, David는 갑자기 지난 시즌 자신이 부상을 당했던 날을 생각하고는 얼어붙었다. 그는 자신이 부상 전만큼 경기를 잘할 수 있을지 확신하지 못했다. 심각한 손목 부상 때문에 그는 그 시즌의 나머지를 놓쳤다. 그 수술을 생각하며 그는 마음속으로 생각했다. “나는 내 농구 경력이 완전히 끝났다고 생각했어.” 하지만, 자신을 응원하는 팬들의 열광하는 소리를 듣자, 그는 몸이 살아나고 있는 것을 느꼈고 “분명히, 나의 팬, 친구, 가족이 내가 오늘 경기하는 모습을 보려고 고대하고 있어.”라고 생각했다. 게임이 시작하자마자, 그는 에너지가 넘쳐흘렀다. 그가 시도한 첫 다섯 차례의 샷이 바스켓으로 들어갔다. “내가 돌아왔어! 내가 이걸 해냈어.” 그는 외쳤다.

어법 정리 – if/ whether ~인지 ~아닌지 [주절 동사가 **‘불확실’**을 의미하면 if/whether 만 쓴다. that 은 의미가 다르게 쓰인다.]
I [**don't know, am not sure, wonder, ask** 등] if/whether she would come. 형용사 curious, uncertain 등

참조: She didn't know **if** it was true. 진실인지 거짓인지 모르는 She didn't know **that** it was true. 진실이었다는 것을 모르는

어법 정리 – 5형식 동사 - 목적보어자리에 to 부정사 사용 [앞으로 ~할, 아직 안한]
ask, allow, advise, beg, cause, compel, enable, encourage, expect, force, inspire, lead, motivate, persuade, require, urge, want + 목 + to ~
V ~하다 목적어가 ~ 하도록[~하는 것을] > 앞으로 할 일이라서 to 부정사

* 참조 She forced him **to do it**. [능동] He was forced **to do it**. [수동] - 수동으로 바뀌어도 to 부정사이어야 함 [2형식으로 바뀜]

20.

We live in a time when everyone seems to be looking for quick and sure solutions. Computer companies have even begun to advertise ways in which computers can replace parents. They are too late — television has already done that. Seriously, however, in every branch of education, including moral education, we make a mistake when we suppose that a particular batch of content or a particular teaching method or a particular configuration of students and space will accomplish our ends. The answer is both harder and simpler. We, parents and teachers, have to live with our children, talk to them, listen to them, enjoy their company, and show them by what we do and how we talk that it is possible to live appreciatively or, at least, nonviolently with most other people.

우리는 모든 이가 빠르고 확실한 해결책을 찾고 있는 듯한 시대에 살고 있다. 컴퓨터 회사들은 심지어 컴퓨터가 부모를 대신할 수 있는 방법을 광고하기 시작했다. 그들은 너무 늦었는데, 텔레비전이 이미 그것을 해버렸다. 하지만 진지하게, 도덕 교육을 포함한 교육의 모든 분야에서, 우리는 우리가 특정한 내용 묶음이나 특정 교육 방법 또는 학생과 공간의 특정 배치가 우리의 목적을 성취할 것이라고 가정할 때 실수를 범하는 것이다. 정답은 더 어렵고 또한 더 단순하다. 우리, 부모와 교사는, 우리의 아이들과 생활하고, 그들과 이야기를 나누고, 그들의 말에 귀 기울이며, 그들과 함께하는 것을 즐기고, 우리가 하는 것과 말하는 방식을 통해 그들에게 감사하며 살거나 최소한 대부분의 다른 사람들과 비폭력적으로 사는 것이 가능하다는 것을 보여주어야 한다.

21.

Flicking the collaboration light switch is something that leaders are uniquely positioned to do, because several obstacles stand in the way of people voluntarily working alone. For one thing, the fear of being left out of the loop can keep them glued to their enterprise social media. Individuals don't want to be — or appear to be — isolated. For another, knowing what their teammates are doing provides a sense of comfort and security, because people can adjust their own behavior to be in harmony with the group. It's risky to go off on their own to try something new that will probably not be *successful* right from the start. But even though it feels reassuring for individuals to be hyperconnected, it's better for the organization if they periodically go off and think for themselves and generate diverse — if not quite mature — ideas. Thus, it becomes the leader's job to create conditions that are good for the whole by enforcing intermittent interaction even when people wouldn't choose it *for themselves*, without making it seem like a punishment.

* intermittent: 간헐적인

협업의 전등 스위치를 휙 누르는 것은 고유하게 지도자들이 해야 하는 위치에 있는 것인데, 왜냐하면 자발적으로 혼자 일하는 사람들에게 여러 장애물이 방해되기 때문이다. 우선, 상황을 잘 모르고 혼자 남겨진다는 두려움은 그들이 계속 자신들의 기업 소셜미디어에 매달리도록 할 수 있다. 개인들은 고립되거나 고립된 듯 보이는 것을 원치 않는다. 또 다른 이유로는, 자신들의 팀 동료들이 무엇을 하고 있는지 아는 것이 편안하고 안전하다는 느낌을 제공하는데, 사람들은 그들 자신의 행동을 집단과 조화를 이루도록 조정할 수 있기 때문이다. 아마도 바로 처음부터 성공적이지 않을 뭔가 새로운 것을 시도하기 위해 홀로 벗어나는 것은 위험천만하다. 하지만 사람들이 과잉 연결되는 것이 안도감이 든다고 느낄지라도, 그들이 주기적으로 (조직을) 벗어나 스스로 생각하여 그다지 성숙하지는 않더라도 다양한 아이디어를 창안하는 것이 조직을 위해 더 좋다. 따라서, 사람들이 그것을 스스로 선택하지 않는 때에도, 처벌처럼 보이게 하지 않으면서 간간이 일어나는 상호작용을 시행함으로써, 전체에게 유익한 여건을 조성하는 것이 지도자의 임무가 된다.

운동 어휘

adopt ⓥ 입양하다/ 채택하다 adapt ⓥ 적응시키다/ 개작하다 adept ⓐ 숙련된, 잘하는

숙어 정리 - 전치사 + ~self (oneself 는 사람, itself 는 사람 외 전부)

by oneself 홀로(외로움/ 남 도움 없이) / for oneself 혼자서(자신을 위해) / beside oneself 제정신이 아닌 / in itself 본질적으로 / of itself 저절로

22.

Historically, the professions and society have engaged in a negotiating process intended to define the terms of their relationship. At the heart of this process is the tension between the professions' pursuit of autonomy and the public's demand for accountability. Society's granting of power and privilege to the professions is premised on their willingness and ability to contribute to social well-being and to conduct their affairs in a manner consistent with broader social values. It has long been recognized that the expertise and privileged position of professionals confer authority and power that could readily be used to advance their own interests at the expense of those they serve. As Edmund Burke observed two centuries ago, "Men are qualified for civil liberty in exact proportion to their disposition to put moral chains upon their own appetites." Autonomy has never been a one-way street and is never granted absolutely and irreversibly.

* autonomy: 자율성 ** privilege: 특권 *** premise: 전제로 말하다

역사적으로 전문직과 사회는 그들의 관계의 조건을 규정하고자 의도된 협상 과정에 참여해 왔다. 이 과정의 핵심에는 전문직의 자율성 추구와 책임성에 대한 공공의 요구 사이의 긴장이 있다. 사회가 전문직에 권한과 특권을 부여한 것은 사회 복지에 기여하고 더 넓은 사회적 가치와 일치하는 방식으로 자신의 일을 수행하는 그들의 자발성과 능력을 전제로 한다. 전문직의 전문지식과 특권적 지위는 그들이 봉사하는 사람들을 희생시키고서 그들 자신의 이익을 향상시키기 위해 쉽게 이용될 수 있는 권위와 권한을 준다는 것이 오랫동안 인식되어 왔다. Edmund Burke가 두 세기 전에 말했듯이, "인간은 자신의 욕구를 도덕적으로 구속하는 그들의 성향에 정확히 비례해서 시민적 자유를 누릴 자격이 부여된다." 자율성은 일방통행로였던 적이 없었으며 결코 절대적이고 뒤집을 수 없게 주어지는 것은 아니다.

23.

In Kant's view, geometrical shapes are too perfect to induce an aesthetic experience. Insofar as they agree with the underlying concept or idea — thus possessing the precision that the ancient Greeks sought and celebrated — geometrical shapes can be grasped, but they do not give rise to emotion, and, most importantly, they do not move the imagination to free and new (mental) lengths. Forms or phenomena, on the contrary, that possess a degree of immeasurability, or that do not appear constrained, stimulate the human imagination — hence their ability to induce a sublime aesthetic experience. The pleasure associated with experiencing immeasurable objects — indefinable or formless objects — can be defined as enjoying one's own emotional and mental activity. Namely, the pleasure ***consists of*** being challenged and struggling to understand and decode the phenomenon present to view. Furthermore, part of the pleasure comes from having one's comfort zone (momentarily) violated.

* geometrical: 기하학의 ** aesthetic: 심미적인 *** sublime: 숭고한

칸트가 보기에, 기하학적 모양은 너무 완벽해서 심미적 경험을 유발할 수 없다. 그것들이 근본적인 개념이나 생각에 일치해서 고대 그리스인들이 추구하고 찬양했던 '정확성'을 갖고 있는 한, 기하학적 모양은 이해될 수는 있지만 감정을 불러일으키지 않으며 가장 중요하게 그것들은 상상력을 자유롭고 새로운 (정신적인) 범위로 움직이게 하지 않는다. 그와는 반대로, 어느 정도의 헤아릴 수 없음을 가지거나 제약되어 보이지 않는 형태나 현상은 인간의 상상력을 자극하기 때문에 숭고한 심미적인 경험을 유발할 수 있다. 헤아릴 수 없는 대상, 즉 규정할 수 없거나 형태가 없는 대상을 경험하는 것과 연관된 즐거움은 사람 자신의 감정적이고 정신적인 활동을 즐기는 것으로 정의될 수 있다. 다시 말해, 그 즐거움은 볼 수 있게 존재하는 현상을 이해하고 해독하려고 도전 받고 애쓰는 것으로 구성된다. 게다가, 그 즐거움의 일부는 사람의 안락구역을 (일시적으로) 벗어나는 데서 온다.

어법 정리 – 수동 불가 동사(be p.p 안됨)

발생하다 happen, occur, take place / 나타나다, 보이다 appear, disappear, seem / 구성하다 consist of / 닮다[타동사] resemble

24.

The world has become a nation of laws and governance that has introduced a system of public administration and management to keep order. With this administrative management system, urban institutions of government have evolved to offer increasing levels of services to their citizenry, provided through a taxation process and/or fee for services (e.g., police and fire, street maintenance, utilities, waste management, etc.). Frequently this has displaced citizen involvement. Money for services is not a replacement for citizen responsibility and public participation. Responsibility of the citizen is slowly being supplanted by government being the substitute provider. Consequentially, there is a philosophical and social change in attitude and sense of responsibility of our urban-based society to become involved. The sense of community and associated responsibility of all citizens to be active participants is therefore diminishing. Governmental substitution for citizen duty and involvement can have serious implications. This impedes the nations of the world to be responsive to natural and man-made disasters as part of global preparedness.

* supplant: 대신하다 ** impede: 방해하다

세상은 질서를 유지하기 위해 공공 행정과 관리의 시스템을 도입한 법과 통치의 나라가 되었다. 이런 행정적인 관리 시스템으로, 도시의 정부 기관들은 자신의 시민에게, 과세 과정 그리고/또는 (예를 들면, 치안과 소방, 도로 유지·보수, 공익사업, 쓰레기관리 등) 서비스 수수료를 통해 제공되는, 증대되는 수준의 서비스를 제공하도록 진화했다. 빈번하게 이것은 시민 참여를 대체했다. 서비스를 위해 내는 돈은 시민의 책임과 공적인 참여를 대체하는 게 아니다. 대체 제공자가 되는 정부가 서서히 시민의 책임을 대신하고 있다. 결과적으로, 도시를 기반으로 하는 우리 사회가 참여해야 하는 책임의 태도와 의식에서 철학적이고 사회적인 변화가 있다. 공동체 의식과 적극적인 참가자가 되어야 한다는 모든 시민의 관련된 책임감은 그래서 줄어들고 있다. 시민의 의무와 참여를 정부가 대신하는 것은 심각한 영향을 미칠 수 있다. 이것은 전반적인 준비 태세의 일부로 자연재해와 인재에 반응하는 전 세계의 국가들을 방해한다.

26.

Henry Moore (1898—1986), one of the most significant British artists of the 20th century, was the seventh child of a coal miner. Henry Moore showed a talent for art from early on in school. After World War I, during which he volunteered for army service, Moore began to study sculpture at the Leeds School of Art. Then, he entered the Royal College of Art in London and earned his degree there. His sculptures, known around the world, present the forms of the body in a unique way. One of his artistic themes was mother-and-child as shown in Madonna and Child at St. Matthew's Church in Northampton. He achieved financial success from his hard work and established the Henry Moore Foundation to support education and promotion of the arts.

20세기의 가장 중요한 영국 예술가 중 한 명인 Henry Moore(1898 ~ 1986)는 석탄 광부의 일곱 번째 자녀였다. Henry Moore는 학창 시절에 일찍이 예술에 재능을 보였다. 군 복무를 자원했던 제1차 세계대전 후에, Moore는 Leeds School of Art에서 조각을 공부하기 시작했다. 그 후, 그는 런던에 있는 Royal College of Art에 들어갔고 거기서 자신의 학위를 취득했다. 전 세계적으로 알려진 그의 조각은 신체 형태를 독특한 방식으로 나타낸다. 그의 예술적 주제 중 하나는 Northampton의 St. Matthew's Church에 있는 Madonna and Child 에서 보여주듯이 엄마와 아이였다. 그는 각고의 노력으로 경제적인 성공을 거두었고 예술 교육과 증진을 후원하기 위해 Henry Moore 재단을 세웠다.

27~28. 안내문

29. 어법

Accepting whatever others are communicating only pays off if their interests correspond to ours — think cells in a body, bees in a beehive. As far as communication between humans is concerned, such commonality of interests is rarely achieved; even a pregnant mother has reasons to mistrust the chemical signals sent by her fetus. Fortunately, there are ways of making communication work even in the most adversarial of relationships. A prey can convince a predator not to chase it. But for such communication to occur, there must be strong guarantees *that* those who receive the signal will be better off believing it. The messages have to be kept, on the whole, honest. In the case of humans, honesty is maintained by a set of cognitive mechanisms that evaluate communicated information. These mechanisms allow us to accept most beneficial messages — to be open — while rejecting most harmful messages — to be vigilant.

* fetus: 태아 ** adversarial: 반대자의 *** vigilant: 경계하는

다른 사람들이 전달하고 있는 것이 무엇이든 그것을 받아들이는 것은 그들의 관심사가 우리의 관심사와 일치할 때에만 성공하는데, 체내의 세포, 벌집 속의 벌을 생각해 보라. 인간 사이의 의사소통에 관한 한, 관심사의 그런 공통성은 좀처럼 이루어지지 않는데, 심지어 임산부도 태아가 보내는 화학적 신호를 믿지 못할 이유가 있다. 다행히도, 가장 적대적인 관계에서도 의사소통이 이루어지게 할 수 있는 방법이 있다. 먹잇감은 포식자에게 자신을 쫓지 말도록 설득할 수 있다. 그러나 그러한 의사소통이 일어나기 위해서는, 신호를 받는 자가 그것을 믿는 것이 더 좋을 것이라는 강력한 보장이 있어야 한다. 메시지는 전체적으로 정직한 상태로 유지되어야 한다. 인간의 경우, 정직성은 전달된 정보를 평가하는 일련의 인지 기제에 의해 유지된다. 이러한 기제는 우리가 가장 유익한 메시지를 받아들이며(개방적이면서), 반면에 가장 해로운 메시지를 거부할(경계할) 수 있게 해 준다.

30. 어휘

In economic systems what takes place in one sector has impacts on another; demand for a good or service in one sector is derived from another. For instance, a consumer buying a good in a store will likely trigger the replacement of this product, which will generate demands for activities such as manufacturing, resource extraction and, of course, transport. What is different about transport is that it cannot exist alone and a movement cannot be stored. An unsold product can remain on the shelf of a store until bought (often with discount incentives), but an unsold seat on a flight or unused cargo capacity in the same flight remains unsold and cannot be brought back as additional capacity later. In this case an opportunity has been *missed*, since the amount of transport being offered has exceeded the demand for it. The derived demand of transportation is often very difficult to reconcile with an equivalent supply, and actually transport companies would prefer to have some additional capacity to accommodate unforeseen demand (often at much higher prices).

경제 시스템에서는 한 부문에서 일어나는 일이 다른 부문에 영향을 미치며, 한 부문에서의 재화나 서비스에 대한 수요는 다른 부문에서 파생된다. 예를 들어, 상점에서 상품을 구매하는 소비자는 아마 이 상품의 보충을 촉발할 것이고, 이것은 제조, 자원출, 그리고 물론 운송과 같은 활동에 대한 수요를 창출할 것이다. 운송이 (상품과) 다른 점은 그것이 혼자서는 존재할 수 없고 이동은 저장될 수 없다는 것이다. 팔리지 않은 상품은 (흔히 할인 인센티브로) 구매될 때까지 매장 진열대에 남아 있을 수 있지만, 항공편의 팔리지 않은 좌석이나 동일 항공편의 미사용 화물 적재 용량은 팔리지 않은 상태로 남게 되며 이후에 추가 용량으로 되돌릴 수 없다. 이 경우, 제공되는 운송량이 그것에 대한 수요를 초과하였기 때문에 기회가 상실되었다. 파생된 운송 수요는 흔히 (그에) 상응하는 공급과 조화를 이루기가 매우 어려워서, 실제로 운송 회사들은 (흔히 훨씬 더 높은 가격으로) 예측하지 못한 수요를 수용할 수있는 얼마간의 추가 용량을 갖는 것을 선호할 것이다.

31.

When examining the archaeological record of human culture, one has to consider that it is vastly *incomplete*. Many aspects of human culture have what archaeologists describe as low archaeological visibility, meaning they are difficult to identify archaeologically. Archaeologists tend to focus on tangible (or material) aspects of culture: things that can be handled and photographed, such as tools, food, and structures. Reconstructing intangible aspects of culture is more difficult, requiring that one draw more inferences from the tangible. It is relatively easy, for example, for archaeologists to identify and draw inferences about technology and diet from stone tools and food remains. Using the same kinds of physical remains to draw inferences about social systems and what people were thinking about is more difficult. Archaeologists do it, but there are necessarily more inferences involved in getting from physical remains recognized as trash to making interpretations about belief systems.

* archaeological: 고고학의

인류 문화의 고고학 기록을 살펴볼 때, 우리는 그것이 엄청나게 불완전하다는 것을 고려해야 한다. 인류 문화의 많은 측면은 고고학자들이 낮은 고고학적 가시성이라고 말하는 것을 지니고 있는데, 이것은 그것들이 고고학적으로 식별하기 어렵다는 것을 의미한다. 고고학자들은 문화의 유형적인 (혹은 물질적인) 측면, 즉 도구, 음식, 구조물처럼 다루고 사진을 찍을 수 있는 것들에 초점을 맞추는 경향이 있다. 문화의 무형적 측면을 재구성하는 것은 더 어려워서, 우리는 유형적인 것에서 더 많은 추론을 끌어내야 한다. 예를 들어, 고고학자들이 석기와 음식 유물로부터 기술과 식습관을 식별하고 그것에 관한 추론을 도출하기는 비교적 쉽다. 같은 종류의 물질적인 유물을 사용하여 사회 체계와 사람들이 무엇을 생각하고 있었는지에 관한 추론을 도출하는 것은 더 어렵다. 고고학자들은 그렇게 하지만, 쓸모없는 것으로 인식되는 물리적 유물로부터 신념 체계에 관한 해석에 도달하는 것과 관련된 더 많은 추론이 어쩔 수 없이 있어야 한다.

32.

Even as mundane a behavior as watching TV may be a way for some people to *escape painful self-awareness through distraction*. To test this idea, Sophia Moskalenko and Steven Heine gave participants false feedback about their test performance, and then seated each one in front of a TV set to watch a video as the next part of the study. When the video came on, showing nature scenes with a musical soundtrack, the experimenter exclaimed that this was the wrong video and went supposedly to get the correct one, leaving the participant alone as the video played. The participants who had received failure feedback watched the video much longer than those who thought they had succeeded. The researchers concluded that distraction through television viewing can effectively relieve the discomfort associated with painful failures or mismatches between the self and self-guides. In contrast, *successful* participants had little wish to be distracted from their self-related thoughts!

* mundane: 보통의

TV를 보는 것처럼 평범한 행동일지라도 그 행동은 어떤 사람들이 주의를 딴 데로 돌리는 것을 통해 고통스러운 자각에서 벗어나는 방법이 될 수 있다. 이 생각을 검증하기 위해, Sophia Moskalenko와 Steven Heine은 참가자들에게 그들의 시험 성적에 관한 거짓 피드백을 주었고, 그런 다음 연구의 다음 부분으로 각각 TV 앞에 앉아 비디오를 시청하게 했다. 음악 사운드트랙과 함께 자연의 장면을 보여 주는 비디오가 나오자, 실험자는 이것이 잘못된 비디오라고 소리쳤고, 아마도 제대로 된 것을 가지러가면서, 참가자를 비디오가 재생될 때 홀로 남겨두었다. (시험 성적에 관하여) 실패라는 피드백을 받았던 참가자들은 자신이 성공했다고 생각하는 참가자들보다 훨씬 더 오래 비디오를 시청했다. 연구자들은 텔레비전 시청을 통해 주의를 딴 데로 돌리는 것이 고통스러운 실패나 자신과 자기 안내 지침 사이의 불일치와 관련된 불편함을 효과적으로 완화할 수 있다고 결론지었다. 이와 대조적으로, 성공한 참가자들은 자기 자신과 관련된 생각에서 주의가 딴 데로 돌려지기를 거의 바라지 않았다!

어휘 정리 – 혼동 어휘

succeed ⓥ 성공하다, 계속하다 - success ⓝ 성공 / succession ⓝ 연속 successful ⓐ 성공적인 / successive ⓐ 연속적인

33.
새로운 아이디어가 생기기 위해서는 기존 사람들이나 문화가 존재 해야만, 그 위에서 새로운 것이 나올 수 있음.

It is important to recognise the interdependence between individual, culturally formed actions and the state of cultural integration. People work within the forms provided by the cultural patterns that they have internalised, however contradictory these may be. Ideas are worked out as logical implications or consequences of other accepted ideas, and it is in this way that cultural innovations and discoveries are possible. New ideas are discovered through logical reasoning, but such discoveries are inherent in and integral to the conceptual system and are made possible only because of the acceptance of its premises. For example, the discoveries of new prime numbers are 'real' consequences of the particular number system employed. Thus, cultural ideas show 'advances' and 'developments' because they *are outgrowths of previous ideas*. The cumulative work of many individuals produces a corpus of knowledge within which certain 'discoveries' become possible or more likely. Such discoveries are 'ripe' and could not have occurred earlier and are also likely to be made simultaneously by numbers of individuals.

* corpus: 집적(集積) ** simultaneously: 동시에

개별적이고 문화적으로 형성된 행동과 문화적 통합의 상태 사이의 상호의존성을 인식하는 것은 중요하다. 사람들은 아무리 모순되더라도 자신이 내면화한 문화적 패턴에 의해 제공되는 형태 내에서 일한다. 사상은 다른 수용된 사상의 논리적 영향이나 결과로 도출되고, 이러한 방식으로 문화적 혁신과 발견이 가능하다. 새로운 사상은 논리적 추론을 통해 발견되지만, 그러한 발견은 개념 체계에 내재 및 (일부로서) 내장되어 있고, 오직 그 전제를 수용하기 때문에 가능해진다. 예를 들어, 새로운 소수의 발견은 사용되고 있는 특정 숫자 체계의 '실제' 결과이다. 따라서, 문화적 사상은 이전 사상의 결과물이기 때문에 '진보'와 '발전'을 보여 준다. 많은 개인의 축적된 작업은 특정 '발견'이 가능해지거나 가능성이 높아지는 집적된 지식을 생산한다. 그러한 발견은(이루어지기에) '알맞게 익었고', 더 일찍 발생할 수 없었을 것이며, 또한 다수의 개인에 의해 동시에 이루어질 가능성이 있다.

34.

Enabling animals to *operate in the presence of harmless stimuli* is an almost universal function of learning. Most animals innately avoid objects they have not previously encountered. Unfamiliar objects may be dangerous; treating them with caution has survival value. If persisted in, however, such careful behavior could interfere with feeding and other necessary activities to the extent that the benefit of caution would be lost. A turtle that withdraws into its shell at every puff of wind or whenever a cloud casts a shadow would never win races, not even with a lazy rabbit. To overcome this problem, almost all animals habituate to safe stimuli that occur frequently. Confronted by a strange object, an inexperienced animal may freeze or attempt to hide, but if nothing unpleasant happens, sooner or later it will continue its activity. The possibility also exists ***that*** an unfamiliar object may be useful, so if it poses no immediate threat, a closer inspection may be worthwhile.

* innately: 선천적으로

동물이 무해한 자극 앞에서 움직일 수 있게 하는 것은 학습의 거의 보편적인 기능이다. 대부분의 동물은 선천적으로 이전에 마주치지 않은 대상을 피한다. 익숙하지 않은 대상은 위험할 수 있으므로, 그것을 조심해서 다루는 것은 생존가(生存價)를 갖는다. 그러나 그러한 신중한 행동이 지속된다면, 그 행동은 조심해서 얻는 이익이 소실될 정도로 먹이 섭취와 다른 필요한 활동을 방해할 수도 있다. 바람이 조금 불 때마다, 또는 구름이 그림자를 드리울 때마다 등껍질 속으로 움츠리는 거북은 게으른 토끼와의 경주라도 결코 이기지 못할 것이다. 이 문제를 극복하기 위해, 거의 모든 동물은 자주 발생하는 안전한 자극에 익숙해져 있다. 낯선 대상에 직면하면, 경험이 없는 동물은 얼어붙거나 숨으려고 할 수도 있지만, 불쾌한 일이 일어나지 않으면 그것은 머잖아 활동을 계속할 것이다. 익숙하지 않은 대상이 유용할 가능성도 있으므로, 그것이 즉각적인 위협을 주지 않는다면, 더 자세히 살펴보는 것이 가치가 있을 수도 있다.

어법 정리 – that 구분

동격 접속사 I know the fact that the team is called EXO. – ① 앞에 동격인 명사 있음 ② 뒤에 명사가 생략되지 않음 (완전)

that 절이 possibility 를 수식함 V 동격

The possibility / also exists {that / an unfamiliar object / may be / useful}

35. 무관

A variety of theoretical perspectives provide insight into immigration. Economics, which assumes that actors engage in utility maximization, represents one framework. From this perspective, it is assumed that individuals are rational actors, i.e., that they make migration decisions based on their assessment of the costs as well as benefits of remaining in a given area versus the costs and benefits of leaving. Benefits may include but are not limited to short-term and long-term monetary gains, safety, and greater freedom of cultural expression. Individual costs include but are not limited to the expense of travel, uncertainty of living in a foreign land, difficulty of *adapting* to a different language, uncertainty about a different culture, and the great concern about living in a new land. Psychic costs associated with separation from family, friends, and the fear of the unknown also should be taken into account in cost-benefit assessments.

* psychic: 심적인

다양한 이론적 관점은 이주에 대한 통찰을 제공한다. 행위자들이 효용 극대화에 참여 한다고 상정하는 경제학은 하나의 틀을 제시한다. 이런 관점에서는 개인은 합리적인 행위자라고, 즉 그들은 특정한 지역을 떠나는 것의 비용 및 편익과 대비하여 남는 것의 비용과 편익 모두에 대한 자신의 평가에 근거하여 이주 결정을 내린다고 추정된다. 편익은 단기적 및 장기적인 금전적 이득, 안전, 문화적 표현의 더 큰 자유를 포함할 수도 있지만 이에 국한되지는 않는다. 개인적 비용은 이동 비용, 타지에서 사는 것의 불확실성, 다른 언어에 적응하는 것의 어려움, 다른 문화에 대한 불확실성, 새로운 지역에서 사는 것에 대한 큰 염려를 포함하지만 이에 국한되지는 않는다. 가족, 친구와의 이별과 미지의 것에 대한 두려움과 관련된 심리적 비용 또한 비용-편익 평가에서 고려되어야 한다.

운동 어휘

36.

Green products involve, in many cases, higher ingredient costs than those of mainstream products. Furthermore, the restrictive ingredient lists and design criteria that are typical of such products may make green products inferior to mainstream products on core performance dimensions (e.g., less effective cleansers). In turn, the higher costs and lower performance of some products attract only a small portion of the customer base, leading to lower economies of scale in procurement, manufacturing, and distribution. Even if the green product succeeds, it may cannibalize the company's higher-profit mainstream offerings. Given such downsides, companies serving mainstream consumers with *successful* mainstream products face what seems like an obvious investment decision. They'd rather put money and time into known, profitable, high-volume products that serve populous customer segments than into risky, less-profitable, low-volume products that may serve current noncustomers. Given that choice, these companies may choose to leave the green segment of the market to small niche competitors.

* segment: 조각 ** cannibalize: 잡아먹다 *** procurement: 조달

많은 경우, 친환경 제품은 주류 제품보다 더 높은 원료비를 수반한다. 게다가 그런 제품에서 일반적인 제한 성분 목록과 디자인 기준이 친환경 제품을 주류 제품보다 핵심 성능 측면(예를 들어, 덜 효과적인 세척제)에서 더 열등하게 만들 수 있다. 결과적으로, 일부 제품의 더 높은 비용과 더 낮은 성능은 고객층의 오직 적은 부분만 유인해서, 조달, 제조, 유통에서 더 낮은 규모의 경제를 초래한다. 친환경 제품이 성공하더라도 기업의 고수익 주류 제품을 잡아먹을 수 있다. 이런 부정적인 면을 고려하면, 성공적인 주류 제품으로 주류 소비자의 요구를 충족하는 기업들은 마치 뻔한 투자 결정처럼 보이는 것에 직면한다. 그들은 현재 고객이 아닌 사람들의 요구를 충족할 수 있는 위험하고 수익성이 더 낮은 소량의 제품보다는, 다수의 고객 계층의 요구를 충족하는, 이미 알고 있고 수익성이 있는 다량의 제품에 돈과 시간을 투자하고 싶어 한다. 그런 선택을 고려하면, 이들 기업은 소규모 틈새 경쟁업체들에게 시장의 친환경 부문을 남겨두는 선택을 할 수 있다.

37.

Recently, a number of commercial ventures have been launched that offer social robots as personal home assistants, perhaps eventually to rival existing smart-home assistants. Personal robotic assistants are devices that have no physical manipulation or locomotion capabilities. Instead, they have a distinct social presence and have visual features suggestive of their ability to interact socially, such as eyes, ears, or a mouth. They might be motorized and can track the user around the room, giving the impression of being aware of the people in the environment. Although personal robotic assistants provide services similar to those of smart-home assistants, their social presence offers an opportunity that is unique to social robots. For instance, in addition to playing music, a social personal assistant robot would express its engagement with the music so that users would feel like they are listening to the music together with the robot. These robots can be used as surveillance devices, act as communicative intermediates, engage in richer games, tell stories, or be used to provide encouragement or incentives.

* locomotion: 이동 ** surveillance: 감시

최근에, 소셜 로봇을 개인용 가정 도우미로 제공하는 많은 상업적인 벤처 기업들이 진출해 왔는데, 아마도 결국 기존의 스마트홈 도우미와 경쟁하게 될 것이다. 개인용 로봇 도우미는 신체 조작이나 이동 능력이 없는 장치이다. 대신에, 그것들에게는 뚜렷한 사회적 존재감이 있고 눈, 귀 또는 입과 같은 사회적 상호작용을 할 수 있는 능력을 암시하는 시각적 특징을 가지고 있다. 그것들은 동력화 될 수 있으며 실내에서 사용자를 추적할 수 있는데, 환경 내의 사람들을 감지한다는 인상을 준다. 개인용 로봇 도우미는 스마트홈 도우미와 비슷한 서비스를 제공하긴 하지만, 그들의 사회적 존재감은 소셜 로봇에게만 특유한 기회를 제공한다. 예를 들어, 소셜 개인용 도우미 로봇은 음악을 재생할 뿐만 아니라 사용자가 로봇과 함께 그 음악을 듣는 것처럼 느끼도록 음악과의 교감을 표현한다. 이들 로봇은 보안 감시 장치로 사용될 수 있거나, 통신 매개체의 역할을 하거나, 더 다채로운 게임에 참여하거나, 이야기를 들려주거나, 격려나 동기를 제공하는 데 사용될 수 있다.

Recently, **a number of commercial ventures** (s) / have been (v) launched {that (주격) offer social robots ~ } (a number of commercial ventures 수식)

38.

The earliest humans had access to only a very limited number of materials, those that occur naturally: stone, wood, clay, skins, and so on. With time, they discovered techniques for producing materials that had properties superior to those of the natural ones; these new materials included pottery and various metals. Furthermore, it was discovered that the properties of a material could be altered by heat treatments and by the addition of other substances. At this point, materials utilization was totally a selection process that involved deciding from a given, rather limited set of materials, the one best suited for an application based on its characteristics. *It was **not until** relatively recent times **that** scientists came to understand the relationships between the structural elements of materials and their properties.* This knowledge, acquired over approximately the past 100 years, has empowered them to fashion, to a large degree, the characteristics of materials. Thus, tens of thousands of different materials have evolved with rather specialized characteristics that meet the needs of our modern and complex society, including metals, plastics, glasses, and fibers.

초기 인류는 매우 제한된 수의 물질, 즉 돌, 나무, 찰흙, 가죽 등 자연적으로 존재하는 물질에만 접근할 수 있었다. 시간이 흐르면서 그들은 자연적인 특성의 물질보다 더 우수한 특성을 가진 물질을 만들어 내는 기술을 발견했는데, 이 새로운 물질에는 도자기와 다양한 금속이 포함되었다. 게다가, 물질의 특성이 열처리와 여타 다른 물질의 첨가로 바뀔 수 있다는 것이 발견되었다. 이 시기에, 물질 이용은 주어진 상당히 제한된 물질 집합 중에서 물질의 특성에 근거하여 용도에 가장 적합한 물질을 결정하는 것을 수반하는 전적으로 선택의 과정이었다. 비로소 과학자들이 물질의 구조적 요소와 물질 특성의 관계를 이해하게 된 것은 비교적 최근에 이르러서였다. 대략 지난 100년 동안 획득된 이 지식으로 그들은 상당한 정도로 물질의 특성을 형성할 수 있게 되었다. 따라서 금속, 플라스틱, 유리, 섬유를 포함하여, 현대적이고 복잡한 우리 사회의 요구를 충족하는 상당히 특화된 특성을 가진 수만 가지의 다양한 물질이 생성되었다.

어법 정리 - not until 도치 구문

We didn't watch the movie {until he came back}	- 기본 형태. 괄호를 한 덩어리로 생각할 것!

= Not until relatively recent times did scientists come to understand the relationships

= Scientists didn't come to understand the relationships until relatively recent times

39.

The growing complexity of the social dynamics determining food choices makes the job of marketers and advertisers increasingly more difficult. In the past, mass production allowed for accessibility and affordability of products, as well as their wide distribution, and was accepted as a sign of progress. Nowadays it is increasingly replaced by the fragmentation of consumers among smaller and smaller segments that are supposed to reflect personal preferences. Everybody feels different and special and expects products serving his or her inclinations. In reality, these supposedly individual preferences end up overlapping with emerging, temporary, always changing, almost tribal formations solidifying around cultural sensibilities, social identifications, political sensibilities, and dietary and health concerns. *Personal stories connect with larger narratives to generate new identities.* These consumer communities go beyond national boundaries, *feeding on* global and widely shared repositories of ideas, images, and practices.

* fragmentation: 파편화 ** repository: 저장소

식품 선택을 결정하는 사회적 역학이 점점 복잡해지면서 마케팅 담당자와 광고주의 업무가 점점 더 어려워지고 있다. 과거에 대량 생산은 제품을 광범위하게 유통하게 할 뿐만 아니라 제품을 입수하고 구매 비용을 감당할 수 있게 했으며, 발전의 신호로 받아들여졌다. 요즘 그것은 개인의 선호를 반영해야 하는 점점 더 작은 규모의 부문사이에서 소비자 단편화에 의해 점점 더 대체되고 있다. 모든 사람은 각기 다르고 특별하다고 느끼고, 자신의 기호를 만족시키는 제품을 기대한다. 현실에서, 개인적 선호라고 생각되는 이런 것들은 결국 문화적 감성, 사회 정체성, 정치적 감성, 식생활과 건강에 관한 관심을 중심으로 확고해지는, 최근에 생겨나고, 일시적이며, 항상 바뀌고, 거의 부족적인 형성물과 겹쳐지게 된다. 개인의 이야기는 새로운 정체성을 생성하며 더 큰 이야기와 연결된다. 이들 소비자 집단은 국경을 넘어 개념, 이미지, 관습의 전 세계의 널리 공유된 저장소로 인해 더 강화된다.

40.

The computer has, to a considerable extent, solved the problem of acquiring, preserving, and retrieving information. Data can be stored in effectively unlimited quantities and in manageable form. The computer makes available a range of data unattainable in the age of books. It packages it effectively; style is no longer needed to make it accessible, ***nor is*** memorization. In dealing with a single decision separated from its context, the computer supplies tools unimaginable even a decade ago. But it also diminishes perspective. Because information is so accessible and communication instantaneous, there is a diminution of focus on its significance, or even on the definition of what is significant. This dynamic may encourage policymakers to wait for an issue to arise rather than anticipate it, and to regard moments of decision as a series of isolated events rather than part of a historical continuum. When this happens, manipulation of information replaces reflection as the principal policy tool.

* retrieve: (정보를) 추출하다 ** diminution: 감소

컴퓨터는 정보를 획득하고, 보존하고, 추출하는 문제를 상당한 정도로 해결했다. 데이터는 사실상 무한량으로, 그리고 다루기 쉬운 형태로 저장될 수 있다. 컴퓨터는 책의 시대에는 얻을 수 없는 다양한 데이터를 이용할 수 있게 한다. 그것(컴퓨터)은 그것(데이터)을 효과적으로 짜임새 있게 담고, 그것을 이용할 수 있게 만들기 위한 (특수한) 방식은 더는 필요하지 않으며 암기도 또한 필요하지 않다. 맥락과 분리된 단 한 가지 결정을 처리할 때 컴퓨터는 10년 전만 해도 상상할 수 없었던 도구들을 제공한다. 하지만 그것은 또한 관점을 감소시킨다. 정보에 매우 쉽게 접근할 수 있고 의사소통이 순간적이기 때문에, 그것의 중요성이나 심지어 중요한 것의 정의에 관한 관심 집중이 감소한다. 이런 역학은 정책 입안자들이 쟁점을 예상하기보다는 발생하기를 기다리게 하고, 결정의 순간을 역사적인 연속의 일부라기보다는 일련의 고립되어 일어나는 일로 간주하게 한다. 이런 일이 일어나면, 정보 조작이 주요한 정책 도구로서의 숙고를 대체한다.

In studies examining the effectiveness of vitamin C, researchers typically divide the subjects into two groups. One group (the experimental group) receives a vitamin C supplement, and the other (the control group) does not. Researchers observe both groups to determine whether one group has fewer or shorter colds than the other. The following discussion describes some of the pitfalls inherent in an experiment of this kind and ways to avoid them. In sorting subjects into two groups, researchers must ensure that each person has an equal chance of being assigned to either the experimental group or the control group. This is accomplished by randomization; that is, the subjects are chosen randomly from the same population by flipping a coin or some other method involving chance. Randomization helps to ensure that results reflect the treatment and not factors that might influence the grouping of subjects. Importantly, the two groups of people must be similar and must have the same track record with respect to colds to rule out the possibility that observed differences in the rate, severity, or duration of colds ***might have occurred*** anyway. If, for example, the control group would normally catch twice as many colds as the experimental group, then the findings prove nothing. In experiments involving a nutrient, the diets of both groups must also be *similar*, especially with respect to the nutrient being studied. If those in the experimental group were receiving less vitamin C from their usual diet, then any effects of the supplement may not be apparent.

* pitfall: 함정

비타민 C의 효과를 조사하는 연구에서, 연구원들은 일반적으로 실험 대상자들을 두 집단으로 나눈다. 한 집단(실험 집단)은 비타민 C 보충제를 받고 다른 집단(통제 집단)은 비타민 C 보충제를 받지 않는다. 연구원들은 한 집단이 다른 집단보다 감기에 더 적게 또는 더 짧게 걸리는지를 알아내기 위해 두 집단 모두를 관찰한다. 이어지는 논의는 이러한 종류의 실험에 내재한 함정 중 일부와 이를 피하는 방법을 설명한다. 실험 대상자를 두 집단으로 분류할 때, 연구원들은 반드시 각 개인이 실험 집단 또는 통제 집단 둘 중 한 곳에 배정될 확률이 동일하도록 해야 한다. 이는 임의 추출에 의해 달성되는데 즉 실험 대상자는 동전 던지기나 우연이 포함된 어떤 다른 방법에 의해 동일 모집단에서 임의로 선정된다. 임의 추출은 반드시 결과에 처리가 반영되도록, 실험 대상자의 분류에 영향을 줄지도 모르는 요인은 반영되지 않도록 하는 데 도움이 된다. 중요한 것은, 감기의 비율, 심각성, 또는 지속 기간에서 관찰된 차이가 어떤 식으로든 일어났을지도 모른다는 가능성을 배제하기 위해 감기와 관련하여 두 집단의 사람들이 비슷하고 동일한 기록을 가지고 있어야 한다는 것이다. 예를 들어, 통제 집단이 보통 실험 집단보다 감기에 무려 두 배나 많이 걸리는 경우, 연구 결과는 아무것도 입증하지 못한다. 영양분을 포함하는 실험에서, 두 집단의 식단 또한 비슷해야 하며, 연구 중인 영양분에 관련해서 특히 그래야 한다. 실험 집단에 속한 사람들이 평소 식단에서 비타민 C를 적게 섭취하고 있었다면, 보충제의 어떤 효과도 분명하지 않을 수 있다.

[43 ~ 45]

When Sally came back home from her photography class, she could hear Katie moving around, chopping things on a wooden cutting board. Wondering what her roommate was doing, she ran to the kitchen. Sally watched Katie cooking something that looked delicious. But Katie didn't notice her because she was too focused on preparing for her cooking test the next day. She was trying to remember what her professor had said in class that day.

In that class, Professor Brown said, "You have to present your food properly, considering every stage of the dining experience. Imagine you are a photographer." Recalling what the professor had mentioned, Katie said to herself, "We need to see our ingredients as colors that make up a picture." Sally could clearly see that Katie ***was having*** a hard time ***preparing*** for her cooking test. Trying to make her feel better, Sally kindly asked, "Is there anything I can do to help?"

Katie, surprised by her roommate's words, turned her head to Sally and sighed, "I don't know. This is really hard." Stirring her sauce for pasta, Katie continued, "Professor Brown said that visual aspects make up a key part of a meal. My recipe seems good, but I can't think of any ways to alter the feeling of the final dish." Visibly frustrated, she was just about to throw away all of her hard work and start again, when Sally suddenly stopped her.

"Wait! You don't have to start over. You just need to add some color to the plate." Being curious, Katie asked, "How can I do that?" Sally took out a container of vegetables from the refrigerator and replied, "How about making colored pasta to go with your sauce?" Smiling, she added, "It's not that hard, and all you need are brightly colored vegetables to make your pasta green, orange, or even purple." Katie smiled, knowing that now she could make her pasta with beautiful colors like a photographer.

Sally가 사진 수업을 마치고 집에 돌아왔을 때, 그녀는 Katie가 이리저리 다니며 나무 도마 위에서 재료를 썰고 있는 소리를 들을 수 있었다. 룸메이트가 무엇을 하는지 궁금해서 그녀는 부엌으로 달려갔다. Sally는 Katie가 맛있어 보이는 요리를 하고 있는 것을 보았다. 하지만 Katie는 그다음 날 요리 시험을 준비하느라 너무 집중한 나머지 그녀를 알아차리지 못했다. 그녀는 그날 수업 시간에 교수님이 했던 말을 기억하려고 애쓰고 있었다.

그 수업에서 Brown 교수는 "식사 경험의 모든 단계를 고려하여 음식을 적절하게 선보여야 합니다. 여러분이 사진작가라고 상상하세요."라고 말했다. 교수님의 말씀을 떠올리며 Katie는 "우리는 재료를 그림을 구성하는 색으로 봐야 해."라고 혼잣말을 했다. Sally는 Katie가 요리 시험 준비에 어려움을 겪고 있다는 것을 분명히 알 수 있었다. Sally는 그녀의 기분을 좋게 해주고자, "내가 도울 수 있는 일이 있을까?"라고 친절하게 물었다.

룸메이트의 말에 깜짝 놀란 Katie는 Sally에게 고개를 돌리며 "모르겠어. 정말 어렵네."하며 한숨을 쉬었다. Katie는 파스타 소스를 저으면서 이어 말했다. "Brown 교수님은 시각적인 면이 음식의 핵심 부분을 구성한다고 말씀하셨어. 내 요리법은 좋은 것 같지만, 최종 요리의 느낌을 바꿀 어떤 방법도 떠오르지 않아." Sally가 갑자기 그녀를 멈춰 세웠을 때, 눈에 띄게 실망한 그녀는 힘들인 노력을 막 던져버리고 다시 시작하려던 참이었다.

"잠깐만! 다시 시작할 필요 없어. 요리에 약간의 색을 더하기만 하면 돼." 호기심을 느낀 Katie가 "내가 어떻게 그걸 할 수 있어?"라고 물었다. Sally는 냉장고에서 채소가 든 그릇을 꺼내 "네 소스와 어울리는 색깔의 파스타를 만드는 건 어때?"라고 대답했다. 웃으면서 그녀는 "그렇게 어렵지 않아, 그리고 네 파스타를 초록색, 오렌지색, 심지어 보라색으로 만들기 위해 밝은 색깔의 채소만 있으면 돼."라고 덧붙였다. Katie는 이제 자신이 사진작가처럼 아름다운 색으로 파스타를 만들 수 있다는 것을 알고 미소 지었다.

We e_____ it to be helpful in raising money to cover the medical costs of those in need. To make the c_____ more special, we want to invite you for the opening of the concert. Your r_____ as a pianist is well known, and everyone will be very happy to see your performance. Beautiful piano melodies will help c_____ an e_____ e_____ for the a_____. We look forward to your p_____ reply.

저의 이름은 Thomas Cobb이며, Calbary 병원 마케팅부장입니다. 우리 병원은 9월18일에 우리 병원 대강당에서 자선 음악회 개최를 계획하고 있습니다. 우리는 그 행사가 어려운 분들의 의료비를 충당할 기금을 마련하는 데 도움이 될 것으로 기대합니다. 그 음악회를 더 특별하게 만들고자, 우리는 음악회 개막을 위해 귀하를 초대하고자 합니다. 피아노 연주자로서 귀하의 명성은 잘 알려져 있기에, 모든 이가 귀하의 공연을 보며 매우 기뻐할 것입니다. 아름다운 피아노 선율이 관객들에게 즐거운 경험을 만들어 주는 데 도움이 될 것입니다. 우리는 귀하의 긍정적인 답변을 고대합니다.

19.

As he stepped onto the basketball court, David s_____ thought of the day he had gotten i_____ last season and f_____. He was not sure if he could play as well as before the i_____. A serious wrist injury had c_____ him to miss the rest of the season. R_____ the surgery, he said to himself, "I thought my basketball career was c_____ over." However, upon hearing his fans' wild cheers, he felt his body coming a_____ and thought, "For sure, my fans, friends, and family are looking f_____ to w_____ me play today." As soon as the game started, he was filled with e_____. The first five shots he a_____ went in the basket. "I'm back! I got this," he s_____.

농구 경기장으로 들어서면서, David는 갑자기 지난 시즌 자신이 부상을 당했던 날을 생각하고는 얼어붙었다. 그는 자신이 부상 전만큼 경기를 잘할 수 있을지 확신하지 못했다. 심각한 손목 부상 때문에 그는 그 시즌의 나머지를 놓쳤다. 그 수술을 생각하며 그는 마음속으로 생각했다. "나는 내 농구 경력이 완전히 끝났다고 생각했어." 하지만, 자신을 응원하는 팬들의 열광하는 소리를 듣자, 그는 몸이 살아나고 있는 것을 느꼈고 "분명히, 나의 팬, 친구, 가족이 내가 오늘 경기하는 모습을 보려고 고대하고 있어."라고 생각했다. 게임이 시작하자마자, 그는 에너지가 넘쳐흘렀다. 그가 시도한 첫 다섯 차례의 샷이 바스켓으로 들어갔다. "내가 돌아왔어! 내가 이걸 해냈어." 그는 외쳤다.

20.

We live in a time when everyone seems to be looking for q_____ and s_____ solutions. Computer companies have even begun to a_____ ways in which computers can r_____ parents. They are too late — television has a_____ done that. Seriously, however, in every branch of education, i_____ moral education, we make a m_____ when we s_____ that a particular batch of c_____ or a particular teaching method or a particular configuration of students and space will a_____ our ends. The answer is both harder and simpler. We, parents and teachers, have to live with our children, talk to them, listen to them, e_____ their company, and show them by what we do and how we talk that it is p_____ to live appreciatively or, at least, n_____ with most other people.

우리는 모든 이가 빠르고 확실한 해결책을 찾고 있는 듯한 시대에 살고 있다. 컴퓨터 회사들은 심지어 컴퓨터가 부모를 대신할 수 있는 방법을 광고하기 시작했다. 그들은 너무 늦었는데, 텔레비전이 이미 그것을 해버렸다. 하지만 진지하게, 도덕 교육을 포함한 교육의 모든 분야에서, 우리는 우리가 특정한 내용 묶음이나 특정 교육 방법 또는 학생과 공간의 특정 배치가 우리의 목적을 성취할 것이라고 가정할 때 실수를 범하는 것이다. 정답은 더 어렵고 또한 더 단순하다. 우리, 부모와 교사는, 우리의 아이들과 생활하고, 그들과 이야기를 나누고, 그들의 말에 귀 기울이며, 그들과 함께하는 것을 즐기고, 우리가 하는 것과 말하는 방식을 통해 그들에게 감사하며 살거나 최소한 대부분의 다른 사람들과 비폭력적으로 사는 것이 가능하다는 것을 보여주어야 한다.

21.

Flicking the collaboration light switch is something that leaders are u_____ p_____ to do, because s_____ o_____ stand in the way of people v_____ working alone. For one thing, the fear of being left out of the loop can keep them g_____ to their e_____ social media. Individuals don't want to be — or a_____ to be — isolated. For another, knowing what their teammates are doing p_____ a sense of comfort and security, because people can a_____ their own b_____ to be in h_____ with the group. It's risky to go off on their own to try something new that will probably not be s_____ right from the start. But even though it feels r_____ for individuals to be hyperconnected, it's better for the organization if they periodically go off and think for themselves and g_____ d_____ — if not quite mature — ideas. Thus, it becomes the leader's job to c_____ conditions that are good for the whole by e_____ intermittent i_____ even when people wouldn't choose it for themselves, without making it seem like a p_____.

협업의 전등 스위치를 휙 누르는 것은 고유하게 지도자들이 해야 하는 위치에 있는 것인데, 왜냐하면 자발적으로 혼자 일하는 사람들에게 여러 장애물이 방해되기 때문이다. 우선, 상황을 잘 모르고 혼자 남겨진다는 두려움은 그들이 계속 자신들의 기업 소셜미디어에 매달리도록 할 수 있다. 개인들은 고립되거나 고립된 듯 보이는 것을 원치 않는다. 또 다른 이유로는, 자신들의 팀 동료들이 무엇을 하고 있는지 아는 것이 편안하고 안전하다는 느낌을 제공하는데, 사람들은 그들 자신의 행동을 집단과 조화를 이루도록 조정할 수 있기 때문이다. 아마도 바로 처음부터 성공적이지 않을 뭔가 새로운 것을 시도하기 위해 홀로 벗어나는 것은 위험천만하다. 하지만 사람들이 과잉 연결되는 것이 안도감이 든다고 느낄지라도, 그들이 주기적으로 (조직을) 벗어나 스스로 생각하여 그다지 성숙하지는 않더라도 다양한 아이디어를 창안하는 것이 조직을 위해 더 좋다. 따라서, 사람들이 그것을 스스로 선택하지 않는 때에도, 처벌처럼 보이게 하지 않으면서 간간이 일어나는 상호작용을 시행함으로써, 전체에게 유익한 여건을 조성하는 것이 지도자의 임무가 된다.

22.

Historically, the professions and society have e_____ in a negotiating process i_____ to d_____ the terms of their relationship. At the heart of this process is the tension between the professions' p_____ of a_____ and the public's d_____ for accountability. Society's granting of power and p_____ to the professions is p_____ on their willingness and ability to c_____ to social well-being and to c_____ their affairs in a manner c_____ with broader social values. It has long been r_____ that the e_____ and privileged p_____ of professionals c_____ authority and power that could readily be used to a_____ their own interests at the e_____ of those they serve. As Edmund Burke o_____ two centuries ago, "Men are qualified for civil liberty in e_____ proportion to their d_____ to put moral chains upon their own appetites." Autonomy has never been a one-way street and is never g_____ a_____ and i_____.

역사적으로 전문직과 사회는 그들의 관계의 조건을 규정하고자 의도된 협상 과정에 참여해 왔다. 이 과정의 핵심에는 전문직의 자율성 추구와 책임성에 대한 공공의 요구 사이의 긴장이 있다. 사회가 전문직에 권한과 특권을 부여한 것은 사회 복지에 기여하고 더 넓은 사회적 가치와 일치하는 방식으로 자신의 일을 수행하는 그들의 자발성과 능력을 전제로 한다. 전문직의 전문지식과 특권적 지위는 그들이 봉사하는 사람들을 희생시키고서 그들 자신의 이익을 향상시키기 위해 쉽게 이용될 수 있는 권위와 권한을 준다는 것이 오랫동안 인식되어 왔다. Edmund Burke가 두 세기 전에 말했듯이, "인간은 자신의 욕구를 도덕적으로 구속하는 그들의 성향에 정확히 비례해서 시민적 자유를 누릴 자격이 부여된다." 자율성은 일방통행로였던 적이 없었으며 결코 절대적이고 뒤집을 수 없게 주어지는 것은 아니다.

23.

In Kant's view, geometrical shapes are too perfect to i_____ an aesthetic e_____. Insofar as they agree with the underlying c_____ or idea — thus possessing the precision that the a_____ Greeks s_____ and celebrated — geometrical shapes can be g_____, but they do not give rise to e_____, and, most importantly, they do not move the i_____ to free and new (mental) lengths. Forms or phenomena, on the contrary, that p_____ a d_____ of immeasurability, or that do not appear c_____, stimulate the human imagination — hence their ability to induce a sublime aesthetic experience. The p_____ a_____ with experiencing immeasurable o_____ — indefinable or formless objects — can be d_____ as enjoying one's own e_____ and mental activity. Namely, the p_____ c_____ of being challenged and struggling to u_____ and decode the phenomenon p_____ to view. Furthermore, part of the p_____ comes from having one's c_____ zone (momentarily) violated.

칸트가 보기에, 기하학적 모양은 너무 완벽해서 심미적 경험을 유발할 수 없다. 그것들이 근본적인 개념이나 생각에 일치해서 고대 그리스인들이 추구하고 찬양했던 '정확성'을 갖고 있는 한, 기하학적 모양은 이해될 수는 있지만 감정을 불러일으키지 않으며 가장 중요하게 그것들은 상상력을 자유롭고 새로운 (정신적인) 범위로 움직이게 하지 않는다. 그와는 반대로, 어느 정도의 헤아릴 수 없음을 가지거나 제약되어 보이지 않는 형태나 현상은 인간의 상상력을 자극하기 때문에 숭고한 심미적인 경험을 유발할 수 있다. 헤아릴 수 없는 대상, 즉 규정할 수 없거나 형태가 없는 대상을 경험하는 것과 연관된 즐거움은 사람 자신의 감정적이고 정신적인 활동을 즐기는 것으로 정의될 수 있다. 다시 말해, 그 즐거움은 볼 수 있게 존재하는 현상을 이해하고 해독하려고 도전 받고 애쓰는 것으로 구성된다. 게다가, 그 즐거움의 일부는 사람의 안락구역을 (일시적으로) 벗어나는 데서 온다.

24.

The world has become a nation of laws and governance that has i_____ a system of public administration and m_____ to keep order. With this a_____ management system, urban institutions of government have e_____ to offer i_____ levels of s_____ to their citizenry, p_____ through a taxation p_____ and/or fee for services (e.g., police and fire, street maintenance, utilities, w_____ management, etc.). Frequently this has d_____ citizen involvement. Money for services is not a replacement for citizen responsibility and public p_____. Responsibility of the c_____ is slowly being s_____ by government being the s_____ p_____. Consequentially, there is a philosophical and social change in a_____ and sense of r_____ of our urban-based society to become i_____. The sense of c_____ and a_____ responsibility of all citizens to be active participants is therefore d_____. Governmental s_____ for citizen duty and involvement can have s_____ implications. This impedes the nations of the world to be r_____ to n_____ and man-made disasters as part of global preparedness.

세상은 질서를 유지하기 위해 공공 행정과 관리의 시스템을 도입한 법과 통치의 나라가 되었다. 이런 행정적인 관리 시스템으로, 도시의 정부 기관들은 자신의 시민에게, 과세 과정 그리고/또는 (예를 들면, 치안과 소방, 도로 유지·보수, 공익사업, 쓰레기관리 등) 서비스 수수료를 통해 제공되는, 증대되는 수준의 서비스를 제공하도록 진화했다. 빈번하게 이것은 시민 참여를 대체했다. 서비스를 위해 내는 돈은 시민의 책임과 공적인 참여를 대체하는 게 아니다. 대체 제공자가 되는 정부가 서서히 시민의 책임을 대신하고 있다. 결과적으로, 도시를 기반으로 하는 우리 사회가 참여해야 하는 책임의 태도와 의식에서 철학적이고 사회적인 변화가 있다. 공동체 의식과 적극적인 참가자가 되어야 한다는 모든 시민의 관련된 책임감은 그래서 줄어들고 있다. 시민의 의무와 참여를 정부가 대신하는 것은 심각한 영향을 미칠 수 있다. 이것은 전반적인 준비 태세의 일부로 자연재해와 인재에 반응하는 전 세계의 국가들을 방해한다.

26.

Henry Moore (1898—1986), one of the most s_____ British artists of the 20th century, was the seventh child of a coal miner. Henry Moore s_____ a t_____ for art from early on in school. After World War I, during which he volunteered for army service, Moore began to study s_____ at the Leeds School of Art. Then, he e_____ the Royal College of Art in London and e_____ his degree there. His sculptures, known around the world, p_____ the forms of the body in a unique way. One of his artistic themes was mother-and-child as s_____ in Madonna and Child at St. Matthew's Church in Northampton. He a_____ financial s_____ from his hard work and e_____ the Henry Moore Foundation to support e_____ and p_____ of the arts.

20세기의 가장 중요한 영국 예술가 중 한 명인 Henry Moore(1898~1986)는 석탄 광부의 일곱 번째 자녀였다. Henry Moore는 학창 시절에 일찍이 예술에 재능을 보였다. 군 복무를 자원했던 제1차 세계대전 후에, Moore는 Leeds School of Art에서 조각을 공부하기 시작했다. 그 후, 그는 런던에 있는 Royal College of Art에 들어갔고 거기서 자신의 학위를 취득했다. 전 세계적으로 알려진 그의 조각은 신체 형태를 독특한 방식으로 나타낸다. 그의 예술적 주제 중 하나는 Northampton의 St. Matthew's Church에 있는 Madonna and Child 에서 보여주듯이 엄마와 아이였다. 그는 각고의 노력으로 경제적인 성공을 거두었고 예술 교육과 증진을 후원하기 위해 Henry Moore 재단을 세웠다.

29.

Accepting whatever others are communicating only pays _____ if their interests c_____ to ours — think cells in a body, bees in a beehive. As far as c_____ between humans is concerned, such commonality of interests is r_____ a_____; even a pregnant mother has reasons to m_____ the chemical signals sent by her fetus. Fortunately, there are ways of making c_____ work even in the most a_____ of relationships. A prey can c_____ a predator not to chase it. But for such communication to occur, there must be s_____ guarantees that those who r_____ the signal will be better off believing it. The messages have to be kept, on the whole, honest. In the case of humans, h_____ is m_____ by a set of cognitive mechanisms that e_____ communicated information. These mechanisms allow us to a_____ most beneficial messages — to be open — while r_____ most h_____ m_____ — to be v_____.

다른 사람들이 전달하고 있는 것이 무엇이든 그것을 받아들이는 것은 그들의 관심사가 우리의 관심사와 일치할 때에만 성공하는데, 체내의 세포, 벌집 속의 벌을 생각해 보라. 인간 사이의 의사소통에 관한 한, 관심사의 그런 공통성은 좀처럼 이루어지지 않는데, 심지어 임산부도 태아가 보내는 화학적 신호를 믿지 못할 이유가 있다. 다행히도, 가장 적대적인 관계에서도 의사소통이 이루어지게 할 수 있는 방법이 있다. 먹잇감은 포식자에게 자신을 쫓지 말도록 설득할 수 있다. 그러나 그러한 의사소통이 일어나기 위해서는, 신호를 받는 자가 그것을 믿는 것이 더 좋을 것이라는 강력한 보장이 있어야 한다. 메시지는 전체적으로 정직한 상태로 유지되어야 한다. 인간의 경우, 정직성은 전달된 정보를 평가하는 일련의 인지 기제에 의해 유지된다. 이러한 기제는 우리가 가장 유익한 메시지를 받아들이며(개방적이면서), 반면에 가장 해로운 메시지를 거부할(경계할) 수 있게 해 준다.

30.

In economic systems what takes place in one s_____ has impacts on another; demand for a good or service in one sector is d_____ from another. For instance, a c_____ buying a good in a store will likely t_____ the replacement of this product, which will g_____ demands for activities such as manufacturing, r_____ e_____ and, of course, transport. What is different about transport is that it cannot e_____ alone and a movement cannot be stored. An unsold p_____ can r_____ on the shelf of a store until bought (often with discount incentives), but an unsold seat on a flight or unused cargo c_____ in the same flight r_____ unsold and cannot be brought back as a_____ c_____ later. In this case an o_____ has been missed, since the amount of t_____ being o_____ has e_____ the d_____ for it. The derived demand of t_____ is often very difficult to reconcile with an e_____ supply, and actually transport companies would p_____ to have some a_____ capacity to accommodate unforeseen d_____ (often at much higher prices).

경제 시스템에서는 한 부문에서 일어나는 일이 다른 부문에 영향을 미치며, 한 부문에서의 재화나 서비스에 대한 수요는 다른 부문에서 파생된다. 예를 들어, 상점에서 상품을 구매하는 소비자는 아마 이 상품의 보충을 촉발할 것이고, 이것은 제조, 자원출, 그리고 물론 운송과 같은 활동에 대한 수요를 창출할 것이다. 운송이 (상품과) 다른 점은 그것이 혼자서는 존재할 수 없고 이동은 저장될 수 없다는 것이다. 팔리지 않은 상품은 (흔히 할인 인센티브로) 구매될 때까지 매장 진열대에 남아 있을 수 있지만, 항공편의 팔리지 않은 좌석이나 동일 항공편의 미사용 화물 적재 용량은 팔리지 않은 상태로 남게 되며 이후에 추가 용량으로 되돌릴 수 없다. 이 경우, 제공되는 운송량이 그것에 대한 수요를 초과하였기 때문에 기회가 상실되었다. 파생된 운송 수요는 흔히 (그에) 상응하는 공급과 조화를 이루기가 매우 어려워서, 실제로 운송 회사들은 (흔히 훨씬 더 높은 가격으로) 예측하지 못한 수요를 수용할 수있는 얼마간의 추가 용량을 갖는 것을 선호할 것이다.

31.

When examining the archaeological r_____ of human c_____, one has to c_____ that it is vastly i_____. Many a_____ of human culture have what archaeologists d_____ as low archaeological v_____, m_____ they are d_____ to i_____ archaeologically. Archaeologists tend to focus on t_____ (or material) aspects of culture: things that can be h_____ and photographed, such as tools, food, and structures. R_____ i_____ aspects of culture is more difficult, r_____ that one draw more i_____ from the tangible. It is r_____ easy, for example, for archaeologists to i_____ and draw inferences about technology and diet from stone tools and food r_____. Using the same kinds of physical remains to draw inferences about social systems and what people were thinking about is more difficult. Archaeologists do it, but there are n_____ more inferences involved in getting from physical remains r_____ as trash to making interpretations about b_____ systems.

인류 문화의 고고학 기록을 살펴볼 때, 우리는 그것이 엄청나게 불완전하다는 것을 고려해야 한다. 인류 문화의 많은 측면은 고고학자들이 낮은 고고학적 가시성이라고 말하는 것을 지니고 있는데, 이것은 그것들이 고고학적으로 식별하기 어렵다는 것을 의미한다. 고고학자들은 문화의 유형적인 (혹은 물질적인) 측면, 즉 도구, 음식, 구조물처럼 다루고 사진을 찍을 수 있는 것들에 초점을 맞추는 경향이 있다. 문화의 무형적 측면을 재구성하는 것은 더 어려워서, 우리는 유형적인 것에서 더 많은 추론을 끌어내야 한다. 예를 들어, 고고학자들이 석기와 음식 유물로부터 기술과 식습관을 식별하고 그것에 관한 추론을 도출하기는 비교적 쉽다. 같은 종류의 물질적인 유물을 사용하여 사회 체계와 사람들이 무엇을 생각하고 있었는지에 관한 추론을 도출하는 것은 더 어렵다. 고고학자들은 그렇게 하지만, 쓸모없는 것으로 인식되는 물리적 유물로부터 신념 체계에 관한 해석에 도달하는 것과 관련된 더 많은 추론이 어쩔 수 없이 있어야 한다.

고 3 2021년 9 월 모의고사

32.

Even as mundane a behavior as watching TV may be a way for some people to e_____ painful self-awareness through d_____. To test this idea, Sophia Moskalenko and Steven Heine gave p_____ false f_____ about their test performance, and then s_____ each one in front of a TV set to watch a video as the next part of the study. When the video came on, s_____ n_____ scenes with a musical soundtrack, the experimenter e_____ that this was the wrong video and went s_____ to get the c_____ one, leaving the p_____ alone as the video played. The participants who had r_____ failure feedback watched the video much longer than those who thought they had s_____. The researchers c_____ that distraction through television viewing can e_____ relieve the d_____ a_____ with painful failures or mismatches between the self and self-guides. In contrast, s_____ participants had little wish to be d_____ from their self-related thoughts!

TV를 보는 것처럼 평범한 행동일지라도 그 행동은 어떤 사람들이 주의를 딴 데로 돌리는 것을 통해 고통스러운 자각에서 벗어나는 방법이 될 수 있다. 이 생각을 검증하기 위해, Sophia Moskalenko와 Steven Heine은 참가자들에게 그들의 시험 성적에 관한 거짓 피드백을 주었고, 그런 다음 연구의 다음 부분으로 각각 TV 앞에 앉아 비디오를 시청하게 했다. 음악 사운드트랙과 함께 자연의 장면을 보여 주는 비디오가 나오자, 실험자는 이것이 잘못된 비디오라고 소리쳤고, 아마도 제대로 된 것을 가지러가면서, 참가자를 비디오가 재생될 때 홀로 남겨두었다. (시험 성적에 관하여) 실패라는 피드백을 받았던 참가자들은 자신이 성공했다고 생각하는 참가자들보다 훨씬 더 오래 비디오를 시청했다. 연구자들은 텔레비전 시청을 통해 주의를 딴 데로 돌리는 것이 고통스러운 실패나 자신과 자기 안내 지침 사이의 불일치와 관련된 불편함을 효과적으로 완화할 수 있다고 결론지었다. 이와 대조적으로, 성공한 참가자들은 자기 자신과 관련된 생각에서 주의가 딴 데로 돌려지기를 거의 바라지 않았다!

33.

It is important to recognise the i_____ between individual, culturally f_____ actions and the state of c_____ integration. People work within the forms p_____ by the cultural patterns that they have internalised, however c_____ these may be. Ideas are worked out as l_____ implications or consequences of other a_____ ideas, and it is in this way that cultural innovations and d_____ are possible. New ideas are d_____ through logical reasoning, but such discoveries are i_____ in and i_____ to the conceptual system and are made possible only because of the a_____ of its p_____. For example, the discoveries of new prime numbers are 'real' consequences of the particular number system e_____. Thus, cultural ideas show 'advances' and 'developments' because they are outgrowths of p_____ ideas. The cumulative work of many individuals p_____ a corpus of knowledge within which certain 'discoveries' become p_____ or more likely. Such d_____ are 'ripe' and could not have o_____ earlier and are also likely to be made simultaneously by numbers of individuals.

개별적이고 문화적으로 형성된 행동과 문화적 통합의 상태 사이의 상호의존성을 인식하는 것은 중요하다. 사람들은 아무리 모순되더라도 자신이 내면화한 문화적 패턴에 의해 제공되는 형태 내에서 일한다. 사상은 다른 수용된 사상의 논리적 영향이나 결과로 도출되고, 이러한 방식으로 문화적 혁신과 발견이 가능하다. 새로운 사상은 논리적 추론을 통해 발견되지만, 그러한 발견은 개념 체계에 내재 및 (일부로서) 내장되어 있고, 오직 그 전제를 수용하기 때문에 가능해진다. 예를 들어, 새로운 소수의 발견은 사용되고 있는 특정 숫자 체계의 '실제' 결과이다. 따라서, 문화적 사상은 이전 사상의 결과물이기 때문에 '진보'와 '발전'을 보여 준다. 많은 개인의 축적된 작업은 특정 '발견'이 가능해지거나 가능성이 높아지는 집적된 지식을 생산한다. 그러한 발견은(이루어지기에) '알맞게 익었고', 더 일찍 발생할 수 없었을 것이며, 또한 다수의 개인에 의해 동시에 이루어질 가능성이 있다.

34.

Enabling animals to operate in the presence of h_____ stimuli is an almost universal f_____ of learning. Most animals innately avoid o_____ they have not previously e_____. U_____ objects may be dangerous; t_____ them with caution has survival value. If p_____ in, however, such c_____ behavior could interfere with feeding and other n_____ activities to the extent that the b_____ of c_____ would be lost. A turtle that withdraws into its shell at every puff of wind or whenever a cloud casts a s_____ would never win races, not even with a lazy rabbit. To o_____ this problem, almost all animals habituate to safe stimuli that o_____ f_____. C_____ by a strange object, an inexperienced animal may freeze or a_____ to hide, but if nothing u_____ happens, sooner or later it will continue its a_____. The possibility also e_____ that an unfamiliar object may be useful, so if it poses no i_____ threat, a closer i_____ may be worthwhile.

동물이 무해한 자극 앞에서 움직일 수 있게 하는 것은 학습의 거의 보편적인 기능이다. 대부분의 동물은 선천적으로 이전에 마주치지 않은 대상을 피한다. 익숙하지 않은 대상은 위험할 수 있으므로, 그것을 조심해서 다루는 것은 생존가(生存價)를 갖는다. 그러나 그러한 신중한 행동이 지속된다면, 그 행동은 조심해서 얻는 이익이 소실될 정도로 먹이 섭취와 다른 필요한 활동을 방해할 수도 있다. 바람이 조금 불 때마다, 또는 구름이 그림자를 드리울 때마다 등껍질 속으로 움츠리는 거북은 게으른 토끼와의 경주라도 결코 이기지 못할 것이다. 이 문제를 극복하기 위해, 거의 모든 동물은 자주 발생하는 안전한 자극에 익숙해져 있다. 낯선 대상에 직면하면, 경험이 없는 동물은 얼어붙거나 숨으려고 할 수도 있지만, 불쾌한 일이 일어나지 않으면 그것은 머잖아 활동을 계속할 것이다. 익숙하지 않은 대상이 유용할 가능성도 있으므로, 그것이 즉각적인 위협을 주지 않는다면, 더 자세히 살펴보는 것이 가치가 있을 수도 있다.

35.

A variety of theoretical perspectives provide i_____ into i_____. Economics, which a_____ that actors e_____ in utility maximization, r_____ one framework. From this perspective, it is a_____ that individuals are rational actors, i.e., that they make m_____ decisions based on their assessment of the costs as well as b_____ of r_____ in a given area versus the costs and benefits of leaving. Benefits may i_____ but are not l_____ to short-term and long-term monetary gains, safety, and greater f_____ of cultural e_____. Individual costs include but are not limited to the expense of travel, u_____ of living in a foreign land, difficulty of adapting to a different language, uncertainty about a different culture, and the great concern about living in a new land. Psychic costs a_____ with s_____ from family, friends, and the fear of the u_____ also should be taken into a_____ in cost-benefit assessments.

다양한 이론적 관점은 이주에 대한 통찰을 제공한다. 행위자들이 효용 극대화에 참여 한다고 상정하는 경제학은 하나의 틀을 제시한다. 이런 관점에서는 개인은 합리적인 행위자라고, 즉 그들은 특정한 지역을 떠나는 것의 비용 및 편익과 대비하여 남는 것의 비용과 편익 모두에 대한 자신의 평가에 근거하여 이주 결정을 내린다고 추정된다. 편익은 단기적 및 장기적인 금전적 이득, 안전, 문화적 표현의 더 큰 자유를 포함할 수도 있지만 이에 국한되지는 않는다. 개인적 비용은 이동 비용, 타지에서 사는 것의 불확실성, 다른 언어에 적응하는 것의 어려움, 다른 문화에 대한 불확실성, 새로운 지역에서 사는 것에 대한 큰 염려를 포함하지만 이에 국한되지는 않는다. 가족, 친구와의 이별과 미지의 것에 대한 두려움과 관련된 심리적 비용 또한 비용-편익 평가에서 고려되어야 한다.

36.

Green products involve, in many cases, higher i_____ costs than those of m_____ products. Furthermore, the r_____ ingredient lists and design criteria that are t_____ of such products may make green products i_____ to mainstream p_____ on core performance dimensions (e.g., less effective cleansers). In turn, the higher costs and lower performance of some products a_____ only a small p_____ of the customer base, leading to lower economies of scale in procurement, manufacturing, and d_____. Even if the green product succeeds, it may cannibalize the company's higher-profit m_____ offerings. Given such downsides, companies s_____ mainstream consumers with s_____ mainstream products face what seems like an o_____ investment decision. They'd rather put money and time into known, p_____, high-volume products that serve populous customer segments than into risky, less-profitable, low-volume products that may serve c_____ noncustomers. Given that choice, these companies may choose to leave the green s_____ of the m_____ to small niche competitors.

많은 경우, 친환경 제품은 주류 제품보다 더 높은 원료비를 수반한다. 게다가 그런 제품에서 일반적인 제한 성분 목록과 디자인 기준이 친환경 제품을 주류 제품보다 핵심 성능 측면(예를 들어, 덜 효과적인 세척제)에서 더 열등하게 만들 수 있다. 결과적으로, 일부 제품의 더 높은 비용과 더 낮은 성능은 고객층의 오직 적은 부분만 유인해서, 조달, 제조, 유통에서 더 낮은 규모의 경제를 초래한다. 친환경 제품이 성공하더라도 기업의 고수익 주류 제품을 잡아먹을 수 있다. 이런 부정적인 면을 고려하면, 성공적인 주류 제품으로 주류 소비자의 요구를 충족하는 기업들은 마치 뻔한 투자 결정처럼 보이는 것에 직면한다. 그들은 현재 고객이 아닌 사람들의 요구를 충족할 수 있는 위험하고 수익성이 더 낮은 소량의 제품보다는, 다수의 고객 계층의 요구를 충족하는, 이미 알고 있고 수익성이 있는 다량의 제품에 돈과 시간을 투자하고 싶어 한다. 그런 선택을 고려하면, 이들 기업은 소규모 틈새 경쟁업체들에게 시장의 친환경 부문을 남겨두는 선택을 할 수 있다.

37.

Recently, a number of commercial ventures have been l_____ that offer social robots as p_____ home assistants, perhaps e_____ to rival e_____ smart-home assistants. Personal robotic a_____ are d_____ that have no physical manipulation or locomotion capabilities. Instead, they have a d_____ social p_____ and have visual features suggestive of their ability to i_____ socially, such as eyes, ears, or a mouth. They might be m_____ and can track the user around the room, giving the i_____ of being a_____ of the people in the e_____. Although personal robotic assistants provide services s_____ to those of smart-home assistants, their social p_____ offers an opportunity that is unique to social robots. For instance, in addition to playing music, a social personal assistant robot would e_____ its engagement with the music so that users would feel like they are listening to the music t_____ with the robot. These robots can be used as surveillance devices, act as communicative intermediates, e_____ in richer games, tell stories, or be used to p_____ e_____ or incentives.

최근에, 소셜 로봇을 개인용 가정 도우미로 제공하는 많은 상업적인 벤처 기업들이 진출해 왔는데, 아마도 결국 기존의 스마트홈 도우미와 경쟁하게 될 것이다. 개인용 로봇 도우미는 신체 조작이나 이동 능력이 없는 장치이다. 대신에, 그것들에게는 뚜렷한 사회적 존재감이 있고 눈, 귀 또는 입과 같은 사회적 상호작용을 할 수 있는 능력을 암시하는 시각적 특징을 가지고 있다. 그것들은 동력화 될 수 있으며 실내에서 사용자를 추적할 수 있는데, 환경 내의 사람들을 감지한다는 인상을 준다. 개인용 로봇 도우미는 스마트홈 도우미와 비슷한 서비스를 제공하긴 하지만, 그들의 사회적 존재감은 소셜 로봇에게만 특유한 기회를 제공한다. 예를 들어, 소셜 개인용 도우미 로봇은 음악을 재생할 뿐만 아니라 사용자가 로봇과 함께 그 음악을 듣는 것처럼 느끼도록 음악과의 교감을 표현한다. 이들 로봇은 보안 감시 장치로 사용될 수 있거나, 통신 매개체의 역할을 하거나, 더 다채로운 게임에 참여하거나, 이야기를 들려주거나, 격려나 동기를 제공하는 데 사용될 수 있다.

38.

The earliest humans had access to only a very l_____ number of materials, those that occur n_____: stone, wood, clay, skins, and so on. With time, they d_____ techniques for producing materials that had properties s_____ to those of the natural ones; these new materials i_____ pottery and v_____ metals. Furthermore, it was d_____ that the properties of a material could be a_____ by heat t_____ and by the addition of other substances. At this point, materials u_____ was totally a selection process that i_____ deciding from a given, rather limited set of materials, the one best s_____ for an application based on its characteristics. It was not until r_____ r_____ times that scientists came to u_____ the relationships between the structural elements of materials and their p_____. This knowledge, a_____ over a_____ the past 100 years, has empowered them to fashion, to a large degree, the characteristics of materials. Thus, tens of thousands of different materials have e_____ with rather s_____ characteristics that meet the needs of our modern and c_____ society, i_____ metals, plastics, glasses, and fibers.

초기 인류는 매우 제한된 수의 물질, 즉 돌, 나무, 찰흙, 가죽 등 자연적으로 존재하는 물질에만 접근할 수 있었다. 시간이 흐르면서 그들은 자연적인 특성의 물질보다 더 우수한 특성을 가진 물질을 만들어 내는 기술을 발견했는데, 이 새로운 물질에는 도자기와 다양한 금속이 포함되었다. 게다가, 물질의 특성이 열처리와 여타 다른 물질의 첨가로 바뀔 수 있다는 것이 발견되었다. 이 시기에, 물질 이용은 주어진 상당히 제한된 물질 집합 중에서 물질의 특성에 근거하여 용도에 가장 적합한 물질을 결정하는 것을 수반하는 전적으로 선택의 과정이었다. 비로소 과학자들이 물질의 구조적 요소와 물질 특성의 관계를 이해하게 된 것은 비교적 최근에 이르러서였다. 대략 지난 100년 동안 획득된 이 지식으로 그들은 상당한 정도로 물질의 특성을 형성할 수 있게 되었다. 따라서 금속, 플라스틱, 유리, 섬유를 포함하여, 현대적이고 복잡한 우리 사회의 요구를 충족하는 상당히 특화된 특성을 가진 수만 가지의 다양한 물질이 생성되었다.

39.

The growing complexity of the sdocial _____ d_____ food choices makes the job of marketers and a_____ increasingly more difficult. In the past, mass p_____ a_____ for accessibility and affordability of products, as well as their wide d_____, and was a_____ as a sign of progress. Nowadays it is increasingly r_____ by the fragmentation of consumers among smaller and smaller segments that are s_____ to reflect personal preferences. Everybody feels d_____ and special and e_____ products s_____ his or her inclinations. In reality, these supposedly i_____ p_____ end up overlapping with emerging, temporary, always changing, almost tribal formations solidifying around cultural sensibilities, social identifications, political sensibilities, and dietary and health concerns. Personal s_____ c_____ with larger narratives to generate new identities. These c_____ communities go beyond n_____ boundaries, feeding on global and widely s_____ repositories of ideas, images, and practices.

식품 선택을 결정하는 사회적 역학이 점점 복잡해지면서 마케팅 담당자와 광고주의 업무가 점점 더 어려워지고 있다. 과거에 대량 생산은 제품을 광범위하게 유통하게 할 뿐만 아니라 제품을 입수하고 구매 비용을 감당할 수 있게 했으며, 발전의 신호로 받아들여졌다. 요즘 그것은 개인의 선호를 반영해야 하는 점점 더 작은 규모의 부문사이에서 소비자 단편화에 의해 점점 더 대체되고 있다. 모든 사람은 각기 다르고 특별하다고 느끼고, 자신의 기호를 만족시키는 제품을 기대한다. 현실에서, 개인적 선호라고 생각되는 이런 것들은 결국 문화적 감성, 사회 정체성, 정치적 감성, 식생활과 건강에 관한 관심을 중심으로 확고해지는, 최근에 생겨나고, 일시적이며, 항상 바뀌고, 거의 부족적인 형성물과 겹쳐지게 된다. 개인의 이야기는 새로운 정체성을 생성하며 더 큰 이야기와 연결된다. 이들 소비자 집단은 국경을 넘어 개념, 이미지, 관습의 전 세계의 널리 공유된 저장소로 인해 더 강화된다.

40.

The computer has, to a considerable extent, s_____ the problem of acquiring, p_____, and retrieving information. Data can be s_____ in e_____ u_____ quantities and in m_____ form. The computer makes available a range of data unattainable in the age of books. It p_____ it effectively; style is no longer needed to make it a_____, nor is memorization. In dealing with a single d_____ s_____ from its context, the computer s_____ tools unimaginable even a decade ago. But it also d_____ p_____. Because information is so accessible and communication instantaneous, there is a diminution of focus on its s_____, or even on the d_____ of what is significant. This dynamic may e_____ policymakers to wait for an issue to arise rather than a_____ it, and to r_____ moments of decision as a series of i_____ events rather than part of a historical continuum. When this happens, m_____ of information replaces r_____ as the p_____ policy tool.

컴퓨터는 정보를 획득하고, 보존하고, 추출하는 문제를 상당한 정도로 해결했다. 데이터는 사실상 무한량으로, 그리고 다루기 쉬운 형태로 저장될 수 있다. 컴퓨터는 책의 시대에는 얻을 수 없는 다양한 데이터를 이용할 수 있게 한다. 그것(컴퓨터)은 그것(데이터)을 효과적으로 짜임새 있게 담고, 그것을 이용할 수 있게 만들기 위한 (특수한) 방식은 더는 필요하지 않으며 암기도 또한 필요하지 않다. 맥락과 분리된 단 한 가지 결정을 처리할 때 컴퓨터는 10년 전만 해도 상상할 수 없었던 도구들을 제공한다. 하지만 그것은 또한 관점을 감소시킨다. 정보에 매우 쉽게 접근할 수 있고 의사소통이 순간적이기 때문에, 그것의 중요성이나 심지어 중요한 것의 정의에 관한 관심 집중이 감소한다. 이런 역학은 정책 입안자들이 쟁점을 예상하기보다는 발생하기를 기다리게 하고, 결정의 순간을 역사적인 연속의 일부라기보다는 일련의 고립되어 일어나는 일로 간주하게 한다. 이런 일이 일어나면, 정보 조작이 주요한 정책 도구로서의 숙고를 대체한다.

[41 ~ 42]

In studies examining the effectiveness of vitamin C, researchers t_____ d_____ the subjects into two groups. One group (the experimental group) r_____ a vitamin C supplement, and the other (the control group) does not. Researchers o_____ both groups to d_____ whether one group has fewer or shorter colds than the other. The f_____ discussion d_____ some of the pitfalls i_____ in an e_____ of this kind and ways to avoid them. In sorting subjects into two groups, researchers must e_____ that each person has an e_____ chance of being a_____ to either the experimental group or the control group. This is a_____ by randomization; that is, the subjects are chosen r_____ from the same population by flipping a coin or some other method i_____ chance. Randomization helps to ensure that results r_____ the treatment and not factors that might i_____ the grouping of subjects. Importantly, the two groups of people must be s_____ and must have the same track record with r_____ to colds to rule out the possibility that o_____ differences in the rate, severity, or d_____ of colds might have o_____ anyway. If, for example, the control group would n_____ catch twice as many colds as the experimental group, then the findings p_____ nothing. In experiments involving a nutrient, the diets of both groups must also be similar, e_____ with respect to the n_____ being studied. If those in the experimental group were r_____ less vitamin C from their usual diet, then any e_____ of the supplement may not be a_____.

비타민 C의 효과를 조사하는 연구에서, 연구원들은 일반적으로 실험 대상자들을 두 집단으로 나눈다. 한 집단(실험 집단)은 비타민 C 보충제를 받고 다른 집단(통제 집단)은 비타민 C 보충제를 받지 않는다. 연구원들은 한 집단이 다른 집단보다 감기에 더 적게 또는 더 짧게 걸리는지를 알아내기 위해 두 집단 모두를 관찰한다. 이어지는 논의는 이러한 종류의 실험에 내재한 함정 중 일부와 이를 피하는 방법을 설명한다. 실험 대상자를 두 집단으로 분류할 때, 연구원들은 반드시 각 개인이 실험 집단 또는 통제 집단 둘 중 한 곳에 배정될 확률이 동일하도록 해야 한다. 이는 임의 추출에 의해 달성되는데 즉 실험 대상자는 동전 던지기나 우연이 포함된 어떤 다른 방법에 의해 동일 모집단에서 임의로 선정된다. 임의 추출은 반드시 결과에 처리가 반영되도록, 실험 대상자의 분류에 영향을 줄지도 모르는 요인은 반영되지 않도록 하는 데 도움이 된다. 중요한 것은, 감기의 비율, 심각성, 또는 지속 기간에서 관찰된 차이가 어떤 식으로든 일어났을지도 모른다는 가능성을 배제하기 위해 감기와 관련하여 두 집단의 사람들이 비슷하고 동일한 기록을 가지고 있어야 한다는 것이다. 예를 들어, 통제 집단이 보통 실험 집단보다 감기에 무려 두 배나 많이 걸리는 경우, 연구 결과는 아무것도 입증하지 못한다. 영양분을 포함하는 실험에서, 두 집단의 식단 또한 비슷해야 하며, 연구 중인 영양분에 관련해서 특히 그래야 한다. 실험 집단에 속한 사람들이 평소 식단에서 비타민 C를 적게 섭취하고 있었다면, 보충제의 어떤 효과도 분명하지 않을 수 있다.

[43 ~ 45]

When Sally came back home from her photography class, she could hear Katie moving around, chopping things on a wooden cutting board. Wondering what her r_____ was doing, she ran to the kitchen. Sally w_____ Katie cooking something that looked d_____. But Katie didn't n_____ her because she was too f_____ on p_____ for her cooking test the next day. She was trying to r_____ what her p_____ had said in class that day.

In that class, Professor Brown said, "You have to p_____ your food properly, c_____ every stage of the dining experience. I_____ you are a photographer." Recalling what the professor had m_____, Katie said to herself, "We need to see our ingredients as colors that make up a picture." Sally could clearly see that Katie was having a hard time p_____ for her cooking test. Trying to make her feel better, Sally k_____ asked, "Is there anything I can do to help?"

Katie, s_____ by her roommate's words, turned her head to Sally and sighed, "I don't know. This is really hard." S_____ her sauce for pasta, Katie continued, "Professor Brown said that visual a_____ make up a key part of a meal. My recipe seems good, but I can't think of any ways to alter the feeling of the final dish." Visibly f_____, she was just about to throw away all of her hard work and start again, when Sally s_____ stopped her.

"Wait! You don't have to start over. You just need to a_____ some color to the plate." Being curious, Katie asked, "How can I do that?" Sally took out a c_____ of vegetables from the refrigerator and replied, "How about making colored pasta to go with your sauce?" Smiling, she added, "It's not that hard, and all you need are b_____ colored vegetables to make your pasta green, orange, or even purple." Katie s_____, knowing that now she could make her pasta with beautiful colors like a photographer.

Sally가 사진 수업을 마치고 집에 돌아왔을 때, 그녀는 Katie가 이리저리 다니며 나무 도마 위에서 재료를 썰고 있는 소리를 들을 수 있었다. 룸메이트가 무엇을 하는지 궁금해서 그녀는 부엌으로 달려갔다. Sally는 Katie가 맛있어 보이는 요리를 하고 있는 것을 보았다. 하지만 Katie는 그다음 날 요리 시험을 준비하느라 너무 집중한 나머지 그녀를 알아차리지 못했다. 그녀는 그날 수업 시간에 교수님이 했던 말을 기억하려고 애쓰고 있었다.
그 수업에서 Brown 교수는 "식사 경험의 모든 단계를 고려하여 음식을 적절하게 선보여야 합니다. 여러분이 사진작가라고 상상하세요."라고 말했다. 교수님의 말씀을 떠올리며 Katie는 "우리는 재료를 그림을 구성하는 색으로 봐야 해."라고 혼잣말을 했다. Sally는 Katie가 요리 시험 준비에 어려움을 겪고 있다는 것을 분명히 알 수 있었다. Sally는 그녀의 기분을 좋게 해주고자, "내가 도울 수 있는 일이 있을까?"라 고 친절하게 물었다.
룸메이트의 말에 깜짝 놀란 Katie는 Sally에게 고개를 돌리며 "모르겠어. 정말 어렵네."하며 한숨을 쉬었다. Katie는 파스타 소스를 저으면서 이어 말했다. "Brown 교수님은 시각적인 면이 음식의 핵심 부분을 구성한다고 말씀하셨어. 내 요리법은 좋은 것 같지만, 최종 요리의 느낌을 바꿀 어떤 방법도 떠오르지 않아." Sally가 갑자기 그녀를 멈춰 세웠을 때, 눈에 띄게 실망한 그녀는 힘들인 노력을 막 던져버리고 다시 시작하려던 참이었다.
"잠깐만! 다시 시작할 필요 없어. 요리에 약간의 색을 더하기만 하면 돼." 호기심을 느낀 Katie가 "내가 어떻게 그걸 할 수 있어?"라고 물었다. Sally는 냉장고에서 채소가 든 그릇을 꺼내 "네 소스와 어울리는 색깔의 파스타를 만드는 건 어때?"라고 대답했다. 웃으면서 그녀는 "그렇게 어렵지 않아, 그리고 네 파스타를 초록색, 오렌지색, 심지어 보라색으로 만들기 위해 밝은 색깔의 채소만 있으면 돼."라고 덧붙였다. Katie는 이제 자신이 사진작가처럼 아름다운 색으로 파스타를 만들 수 있다는 것을 알고 미소 지었다.

【 어법 / 어휘 선택 】

18.

My name is Thomas Cobb, the marketing director of Calbary Hospital. Our hospital is planning to 1) **hold/ be held** a charity concert on September 18th in the Main Hall of our hospital. We 2) **expect/ respect** it 3) **to be/ being** helpful in 4) **rising/ raising** money to cover the medical costs of those in need. To make the concert more special, we want to 5) **visit/ invite** you for the opening of the concert. Your reputation as a pianist is well known, and everyone will be very 6) **happy/ unhappy** to see your performance. Beautiful piano melodies will help 7) **create/ remove** an enjoyable experience for the audience. We look forward to your positive reply.

19.

As he stepped onto the basketball court, David suddenly 8) **thinking/ thought** of the day he had gotten injured last season and froze. He was not sure if he could 9) **play/ display** as well as before the injury. A serious wrist injury 10) **had been caused/ had caused** him 11) **to miss/ missing** the rest of the season. 12) **Remember/ Remembering** the surgery, he said to himself, "I thought my basketball career was completely over." However, upon hearing his fans' wild cheers, he 13) **felt/ was felt** his body coming 14) **live/ alive** and thought, "For sure, my fans, friends, and family are looking forward to 15) **watch/ watching** me play today." As soon as the game started, he 16) **filled/ was filled** with energy. The first five shots he attempted went in the basket. "I'm back! I got this," he 17) **shouted/ was shouted**.

20.

We live in a time when everyone seems to be looking for quick and sure solutions. Computer companies have even begun to 18) **advertise/ be advertised** ways in which computers can 19) **replace/ be replaced** parents. They are too late — television has already done that. Seriously, however, in every branch of education, 20) **including/ concluding** moral education, we make a mistake when we suppose 21) **that/ what** a particular batch of content or a particular teaching method or a particular configuration of students and space will 22) **accomplish/ be accomplished** our ends. The answer is both harder and simpler. We, parents and teachers, have to live with our children, talk to them, listen to 23) **them/ themselves**, enjoy their company, and show them by what we do and how we talk 24) **that/ what** 25) **it/ this** is possible to live appreciatively or, at least, nonviolently with most other people.

21.

Flicking the collaboration light switch is something 26) **that/ what** leaders are uniquely positioned to do, 27) **because/ because of** several obstacles stand in the way of people voluntarily working alone. For one thing, the fear of being left out of the loop can keep 28) **them/ themselves** glued to their enterprise social media. Individuals don't want to be — or appear to be — isolated. For another, 29) **know/ knowing** 30) **that/ what** their teammates are doing 31) **provide/ provides** a sense of comfort and security, 32) **because/ because of** people can 33) **adjust/ absorb** their own behavior to be in harmony with the group. It's risky to go off on their own to try something new that will probably not be 34) **successful/ successive** right from the start. But even though it feels reassuring for individuals to be hyperconnected, 35) **its/ it's** 36) **better/ worse** for the organization if they periodically go off and think for 37) **them/ themselves** and generate diverse — if not quite mature — ideas. Thus, it becomes the leader's job to 38) **create/ remove** conditions that are good for the whole by enforcing intermittent interaction even when people wouldn't choose it for 39)

them/ themselves, without making it seem like a punishment.

22.

Historically, the professions and society have engaged in a negotiating process intended to 40) **define/ refine** the terms of their relationship. At the heart of this process is the tension between the professions' pursuit of autonomy and the public's demand for accountability. Society's granting of power and privilege to the professions 41) **premised/ is premised** on their willingness and ability to contribute to social well-being and to conduct their affairs in a manner consistent with broader social values. It has long been recognized 42) **that/ what** the expertise and privileged position of professionals 43) **confer/ conferring** authority and power 44) **that/ what** could readily be used to 45) **advance/ advancing** their own interests at the expense of those they 46) **serve/ reserve**. As Edmund Burke 47) **obeyed/ observed** two centuries ago, "Men are qualified for civil liberty in exact proportion to their disposition to put moral chains upon their own appetites." Autonomy has never been a one-way street and is never 48) **granting/ granted** absolutely and irreversibly.

23.

In Kant's view, geometrical shapes are too perfect to 49) **induce/ reduce** an aesthetic experience. Insofar as they agree with the underlying concept or idea — thus possessing the precision 50) **that/ what** the ancient Greeks sought and celebrated — geometrical shapes can be grasped, but they do not give 51) **rise/ raise** to emotion, and, most importantly, they do not move the imagination to free and new (mental) lengths. Forms or phenomena, on the contrary, 52) **that/ what** possess a degree of immeasurability, or that do not 53) **appear/ disappear** constrained, stimulate the human imagination — hence their ability to induce a sublime aesthetic experience. The pleasure associated with experiencing immeasurable objects — indefinable or formless objects — can be 54) **defined/ refined** as enjoying one's own emotional and mental activity. Namely, the pleasure 55) **consists/ is consisted** of being challenged and struggling to understand and decode the phenomenon 56) **absent/ present** to view. Furthermore, part of the pleasure 57) **coming/ comes** from having one's comfort zone (momentarily) violated.

24.

The world has become a nation of laws and governance 58) **that/ what** 59) **has been introduced/ has introduced** a system of public administration and management to keep order. With this administrative management system, urban institutions of government 60) **has/ have** evolved to 61) **offer/ suffer** 62) **increasing/ decreasing** levels of services to their citizenry, provided through a taxation process and/or fee for services (e.g., police and fire, street maintenance, utilities, waste management, etc.). Frequently this 63) **has been displaced/ has displaced** citizen involvement. Money for services 64) **is/ are** not a replacement for citizen responsibility and public participation. Responsibility of the citizen is slowly being supplanted by government being the substitute provider. Consequentially, there is a philosophical and social change in 65) **attitude/ altitude** and sense of responsibility of our urban-based society to become 66) **involved/ revolved**. The sense of community and associated responsibility of all citizens to be active participants 67) **is/ are** therefore diminishing. Governmental substitution for citizen duty and involvement can 68) **have/ behave** serious implications. This impedes the nations of the world to be responsive to 69) **natural/ artificial** and man-made disasters as part of global preparedness.

26.

Henry Moore (1898—1986), one of the most significant British artists of the 20th century, 70) **was/ were** the seventh child of a coal miner. Henry Moore 71) **showing/ showed** a talent for art from early on in school. After World War I, 72) **which/ during which** he 73) **volunteered/ was volunteered** for army service, Moore began to study sculpture at the Leeds School of Art. Then, he 74) **entered/ was entered** the Royal College of Art in London and earned his degree there. His sculptures, known around the world, present the forms of the body in a unique way. One of his artistic themes 75) **was/ were** mother-and-child as shown in Madonna and Child at St. Matthew's Church in Northampton. He achieved financial 76) **success/ failure** from his hard work and 77) **establishing/ established** the Henry Moore Foundation to support education and promotion of the arts.

29.

Accepting whatever others are communicating only 78) **pay/ pays** off if their interests correspond to ours — think cells in a body, bees in a beehive. As far as communication between humans 79) **is/ are** concerned, such commonality of interests 80) **is/ are** rarely achieved; even a pregnant mother has reasons to mistrust the chemical signals 81) **sending/ sent** by her fetus. Fortunately, there are ways of making communication work even in the most adversarial of relationships. A prey can convince a predator not to 82) **chase/ be chased** it. But for such communication to occur, there must be strong guarantees that those who 83) **receive/ deceive** the signal will be better off believing it. The messages have to be kept, on the whole, honest. In the case of humans, honesty 84) **maintained/ is maintained** by a set of cognitive mechanisms 85) **that/ what** evaluate communicated information. These mechanisms allow us 86) **to accept/ accepting** most beneficial messages — to be open — 87) **during/ while** rejecting most 88) **harmful/ harmless** messages — to be vigilant.

30.

In economic systems what takes place in one sector 89) **having/ has** impacts on another; demand for a good or service in one sector is derived from another. For instance, a consumer 90) **buy/ buying** a good in a store will likely trigger the replacement of this product, 91) **it/ which** will generate demands for activities such as manufacturing, resource extraction and, of course, transport. 92) **That/ What** is different about transport is 93) **that/ what** it cannot 94) **exist/ resist** alone and a movement cannot be stored. An unsold product can 95) **remain/ remind** on the shelf of a store until bought (often with discount incentives), but an unsold seat on a flight or unused cargo capacity in the same flight 96) **remains/ reminds** unsold and cannot be brought back as additional capacity 97) **later/ latter**. In this case an opportunity has been missed, since the amount of transport being offered 98) **has/ have** exceeded the demand for it. The derived demand of transportation is often very difficult to reconcile with an equivalent supply, and actually transport companies would 99) **refer/ prefer** to have some additional capacity to accommodate unforeseen demand (often at much higher prices).

31.

When examining the archaeological record of human culture, one has to consider 100) **that/ what** it is vastly incomplete. Many 101) **aspects/ respects** of human culture have what archaeologists 102) **describing/ describe** as low archaeological visibility, meaning they are 103) **simple/ difficult** to identify

archaeologically. Archaeologists tend to focus on tangible (or material) aspects of culture: things that can be handled and photographed, such as tools, food, and structures. 104) **Reconstruct/ Reconstructing** intangible aspects of culture is more difficult, requiring 105) **that/ what** one draw more inferences from the tangible. It is relatively easy, for example, 106) **of/ for** archaeologists to identify and draw inferences about technology and diet from stone tools and food remains. 107) **Use/ Using** the same kinds of physical remains to draw inferences about social systems and 108) **that/ what** people were thinking about is more difficult. Archaeologists do it, but there are necessarily more inferences 109) **involving/ involved** in getting from physical remains recognized as trash to making interpretations about belief systems.

32.

Even as mundane a behavior as watching TV may be a way for some people to 110) **exert/ escape** painful self-awareness through distraction. To test this idea, Sophia Moskalenko and Steven Heine 111) **giving/ gave** participants false feedback about their test performance, and then seated each one in front of a TV set to watch a video as the next part of the study. When the video came on, 112) **show/ showing** nature scenes with a musical soundtrack, the experimenter exclaimed 113) **that/ what** this was the wrong video and went supposedly to get the correct one, 114) **leave/ leaving** the participant alone as the video played. The participants who 115) **had been received/ had received** failure feedback watched the video much longer than those who thought they had succeeded. The researchers concluded 116) **that/ what** distraction through television viewing can effectively relieve the discomfort associated with painful failures or mismatches between the self and self-guides. In contrast, 117) **successful/ successive** participants had little wish to be 118) **distracting/ distracted** from their self-related thoughts!

33.

It is important to recognise the interdependence between individual, culturally formed actions and the state of cultural integration. People 119) **work/ working** within the forms provided by the cultural patterns 120) **that/ what** they have internalised, however contradictory these may be. Ideas are worked out as logical implications or consequences of other accepted ideas, and it is in this way 121) **that/ what** cultural innovations and discoveries are possible. New ideas are 122) **discovered/ recovered** through logical reasoning, but such discoveries are inherent in and integral to the conceptual system and are 123) **made/ making** 124) **possibly/ possible** only 125) **because/ because of** the acceptance of its premises. For example, the discoveries of new prime numbers 126) **is/ are** 'real' consequences of the particular number system employed. Thus, cultural ideas 127) **show/ showing** 'advances' and 'developments' because they are outgrowths of previous ideas. The cumulative work of many individuals 128) **produce/ produces** a corpus of knowledge 129) **which/ within which** certain 'discoveries' become possible or more likely. Such discoveries are 'ripe' and could not have occurred earlier and are also likely to be made simultaneously by numbers of individuals.

34.

Enabling animals to operate in the 130) **absence/ presence** of harmless stimuli is an almost universal 131) **function/ mention** of learning. Most animals innately 132) **accept/ avoid** objects they have not previously encountered. Unfamiliar objects may be 133) **dangerous/ safe**; treating them with caution has survival value. If persisted in, however, such 134) **careful/ careless** behavior could interfere with

feeding and other necessary activities to the extent that the benefit of caution would be lost. A turtle 135) **that/ what** withdraws into its shell at every puff of wind or whenever a cloud casts a shadow would never win races, not even with a lazy rabbit. To overcome this problem, almost all animals habituate to safe stimuli 136) **that/ what** occur frequently. Confronted by a strange object, an inexperienced animal may freeze or attempt to hide, but if nothing 137) **pleasant/ unpleasant** happens, sooner or 138) **later/ latter** it will continue its activity. The possibility also 139) **exists/ resists** 140) **that/ what** an unfamiliar object may be 141) **useful/ useless**, so if it poses no immediate threat, a closer inspection may be worthwhile.

35.

A variety of theoretical perspectives provide 142) **sight/ insight** into immigration. Economics, 143) **it/ which** assumes 144) **that/ what** actors engage in utility maximization, represents one framework. From this perspective, it is assumed 145) **that/ what** individuals are rational actors, i.e., that they make migration decisions based on their assessment of the costs as well as benefits of remaining in a given area versus the costs and benefits of leaving. Benefits may 146) **include/ conclude** but are not limited to short-term and long-term monetary gains, safety, and greater freedom of cultural expression. Individual costs include but are not limited to the expense of travel, 147) **certainty/ uncertainty** of living in a foreign land, difficulty of 148) **adapting/ adopting** to a different language, uncertainty about a different culture, and the great concern about living in a new land. Psychic costs associated with separation from family, friends, and the fear of the 149) **known/ unknown** also should be 150) **taking/ taken** into account in cost-benefit assessments.

36.

Green products involve, in many cases, higher ingredient costs than those of mainstream products. Furthermore, the restrictive ingredient lists and design criteria 151) **that/ what** are typical of such products may make green products inferior to mainstream products on core performance dimensions (e.g., less effective cleansers). In turn, the higher costs and lower performance of some products 152) **attract/ distract** only a small portion of the customer base, 153) **lead/ leading** to lower economies of scale in procurement, manufacturing, and distribution. Even if the green product succeeds, it may cannibalize the company's higher-profit mainstream offerings. Given such downsides, companies 154) **serving/ reserving** mainstream consumers with 155) **successful/ successive** mainstream products face 156) **that/ what** seems like an 157) **obvious/ oblivious** investment decision. They'd rather put money and time into known, profitable, high-volume products 158) **that/ what** serve populous customer segments than into risky, less-profitable, low-volume products that may serve current noncustomers. Given that choice, these companies may choose to 159) **live/ leave** the green segment of the market to small niche competitors.

37.

Recently, a number of commercial ventures 160) **have launched/ have been launched** 161) **that/ what** offer social robots as personal home assistants, perhaps eventually to rival existing smart-home assistants. Personal robotic assistants are devices 162) **that/ what** have no physical manipulation or locomotion capabilities. Instead, they have a distinct social presence and have visual features suggestive of their ability to interact socially, such as eyes, ears, or a mouth. They might be 163) **motorizing/ motorized** and can track the user around the room, 164) **giving/ given**

the impression of being aware of the people in the environment. 165) **Although/ Despite** personal robotic assistants 166) **provide/ prevent** services similar to those of smart-home assistants, their social presence 167) **offers/ suffers** an opportunity that is unique to social robots. For instance, in addition to playing music, a social personal assistant robot would express 168) **its/ it's** engagement with the music 169) **so that/ in that** users would feel like they are listening to the music together with the robot. These robots can be used as surveillance devices, act as communicative intermediates, engage in richer games, tell stories, or be used to 170) **provide/ providing** encouragement or incentives.

38.

The earliest humans had access to only a very 171) **limited/ unlimited** number of materials, those 172) **that/ what** occur naturally: stone, wood, clay, skins, and so on. With time, they 173) **discovered/ recovered** techniques for producing materials 174) **that/ what** had properties 175) **superior/ inferior** to those of the 176) **natural/ artificial** ones; these new materials 177) **included/ concluded** pottery and various metals. Furthermore, it was discovered 178) **that/ what** the properties of a material could be 179) **altered/ alerted** by heat treatments and by the addition of other substances. At this point, materials utilization was totally a selection process that 180) **involved/ revolved** deciding from a given, rather limited set of materials, the one best suited for an application based on its characteristics. It was not until relatively 181) **decent/ recent** times that scientists came to understand the relationships between the structural elements of materials and their properties. This knowledge, acquired over approximately the past 100 years, has empowered 182) **them/ themselves** to fashion, to a large degree, the characteristics of materials. Thus, tens of thousands of 183) **different/ indifferent** materials have evolved with rather specialized characteristics 184) **that/ what** meet the needs of our modern and complex society, 185) **include/ including** metals, plastics, glasses, and fibers.

39.

The growing complexity of the social dynamics determining food choices 186) **make/ makes** the job of marketers and advertisers increasingly more 187) **difficult/ difficultly**. In the past, mass production allowed for accessibility and affordability of products, as well as their wide distribution, and was 188) **accepted/ attacked** as a sign of progress. Nowadays it is increasingly 189) **replaced/ displaced** by the fragmentation of consumers among smaller and smaller segments that are supposed to 190) **reflect/ inflect** personal preferences. Everybody feels different and special and expects products 191) **serving/ reserving** his or her inclinations. In reality, these supposedly individual preferences end up overlapping with emerging, temporary, always changing, almost tribal formations solidifying around cultural sensibilities, social identifications, political sensibilities, and dietary and health concerns. Personal stories 192) **connect/ disconnect** with larger narratives to generate new identities. These consumer communities go beyond national boundaries, 193) **feed/ feeding** on global and widely shared repositories of ideas, images, and practices.

40.

The computer has, to a considerable extent, solved the problem of acquiring, 194) **preserving/ deserving**, and retrieving information. Data can be stored in effectively unlimited quantities and in manageable form. The computer makes available a range of data 195) **attainable/ unattainable** in the age of books. It packages it 196) **effectively/**

ineffectively; style is no longer needed to make it accessible, 197) **or/ nor** is memorization. In dealing with a single decision separated from its context, the computer supplies tools 198) **imaginable/ unimaginable** even a decade ago. But it also diminishes perspective. 199) **Because/ Because of** information is so accessible and communication instantaneous, there is a diminution of focus on its significance, or even on the definition of what is significant. This dynamic may 200) **encourage/ be encouraged** policymakers 201) **to wait/ waiting** for an issue to arise rather than anticipate it, and to regard moments of decision as a series of isolated events rather than part of a historical continuum. When this 202) **happens/ is happened**, manipulation of information replaces reflection as the principal policy tool.

[41 ~ 42]

In studies examining the effectiveness of vitamin C, researchers 203) **typically divide** the subjects into two groups. One group (the experimental group) receives a vitamin C supplement, and the other (the control group) does not. Researchers 204) **observe/ reserve** both groups to determine whether one group has fewer or shorter colds than the other. The following discussion 205) **describing/ describes** some of the pitfalls inherent in an experiment of this kind and ways to 206) **accept/ avoid** them. In sorting subjects into two groups, researchers must ensure 207) **that/ what** each person has an equal chance of being assigned to either the experimental group or the control group. This 208) **is accomplished/ is accomplished** by randomization; that is, the subjects are chosen randomly from the same population by flipping a coin or some other method involving chance. Randomization helps to ensure 209) **that/ what** results reflect the treatment and not factors that might influence the grouping of subjects. Importantly, the two groups of people must be similar and must have the same track record with respect to colds to rule out the possibility that 210) **obeyed/ observed** differences in the rate, severity, or duration of colds might have occurred anyway. If, for example, the control group would normally catch twice as many colds as the experimental group, then the findings 211) **prove/ improve** nothing. In experiments involving a nutrient, the diets of both groups must also be similar, especially with 212) **expect/ respect** to the nutrient being studied. If those in the experimental group 213) **was/ were** receiving less vitamin C from their usual diet, then any 214) **affects/ effects** of the supplement may not be apparent.

[43 ~ 45]

When Sally came back home from her photography class, she could hear Katie 215) **to move/ moving** around, chopping things on a wooden cutting board. 216) **Wonder/ Wondering** 217) **that/ what** her roommate was doing, she ran to the kitchen. Sally watched Katie 218) **to cook/ cooking** something that looked delicious. But Katie didn't notice her because she was too focused on preparing for her cooking test the next day. She was trying to 219) **remember/ forget** 220) **that/ what** her professor had said in class that day.

In that class, Professor Brown said, "You have to present your food properly, 221) **consider/ considering** every stage of the dining experience. 222) **Imagining/ Imagine** you are a photographer." Recalling 223) **that/ what** the professor had mentioned, Katie said to herself, "We need to see our ingredients as colors that make up a picture." Sally could clearly see 224) **that/ what** Katie was having a hard time preparing for her cooking test. Trying to make her 225) **feel/ to feel** better, Sally kindly asked, "Is there anything I can do to help?"

Katie, 226) **surprise/ surprised** by her roommate's words, turned her head to Sally and sighed, "I don't know. This is really hard." Stirring her sauce

for pasta, Katie continued, "Professor Brown said 227) **that/ what** visual aspects make up a key part of a meal. My recipe seems good, but I can't think of any ways to 228) **alter/ alert** the feeling of the final dish." Visibly 229) **frustrating/ frustrated**, she was just about to throw away all of her hard work and start again, when Sally suddenly stopped her.

"Wait! You don't have to start over. You just need to 230) **add/ aid** some color to the plate." Being curious, Katie 231) **asked/ was asked**, "How can I do that?" Sally took out a container of vegetables from the refrigerator and replied, "How about making colored pasta to go with your sauce?" Smiling, she added, "It's not that hard, and all you need are brightly colored vegetables to make your pasta green, orange, or even purple." Katie smiled, 232) **know/ knowing** 233) **that/ what** now she could make her pasta with beautiful colors 234) **like/ alike** a photographer.

My name is Thomas Cobb, the marketing director of Calbary Hospital.

(A) To make the concert more special, we want to invite you for the opening of the concert.

(B) Our hospital is planning to hold a charity concert on September 18th in the Main Hall of our hospital. We expect it to be helpful in raising money to cover the medical costs of those in need.

(C) Your reputation as a pianist is well known, and everyone will be very happy to see your performance. Beautiful piano melodies will help create an enjoyable experience for the audience. We look forward to your positive reply.

As he stepped onto the basketball court, David suddenly thought of the day he had gotten injured last season and froze.

(A) However, upon hearing his fans' wild cheers, he felt his body coming alive and thought, "For sure, my fans, friends, and family are looking forward to watching me play today."

(B) As soon as the game started, he was filled with energy. The first five shots he attempted went in the basket. "I'm back! I got this," he shouted.

(C) He was not sure if he could play as well as before the injury. A serious wrist injury had caused him to miss the rest of the season. Remembering the surgery, he said to himself, "I thought my basketball career was completely over."

Flicking the collaboration light switch is something that leaders are uniquely positioned to do, because several obstacles stand in the way of people voluntarily working alone. For one thing, the fear of being left out of the loop can keep them glued to their enterprise social media. Individuals don't want to be — or appear to be — isolated.

(A) Thus, it becomes the leader's job to create conditions that are good for the whole by enforcing intermittent interaction even when people wouldn't choose it for themselves, without making it seem like a punishment.

(B) But even though it feels reassuring for individuals to be hyperconnected, it's better for the organization if they periodically go off and think for themselves and generate diverse — if not quite mature — ideas.

(C) For another, knowing what their teammates are doing provides a sense of comfort and security, because people can adjust their own behavior to be in harmony with the group. It's risky to go off on their own to try something new that will probably not be successful right from the start.

22.

Historically, the professions and society have engaged in a negotiating process intended to define the terms of their relationship.

(A) It has long been recognized that the expertise and privileged position of professionals confer authority and power that could readily be used to advance their own interests at the expense of those they serve.

(B) At the heart of this process is the tension between the professions' pursuit of autonomy and the public's demand for accountability. Society's granting of power and privilege to the professions is premised on their willingness and ability to contribute to social well-being and to conduct their affairs in a manner consistent with broader social values.

(C) As Edmund Burke observed two centuries ago, "Men are qualified for civil liberty in exact proportion to their disposition to put moral chains upon their own appetites." Autonomy has never been a one-way street and is never granted absolutely and irreversibly.

23.

In Kant's view, geometrical shapes are too perfect to induce an aesthetic experience.

(A) Forms or phenomena, on the contrary, that possess a degree of immeasurability, or that do not appear constrained, stimulate the human imagination — hence their ability to induce a sublime aesthetic experience. The pleasure associated with experiencing immeasurable objects — indefinable or formless objects — can be defined as enjoying one's own emotional and mental activity.

(B) Insofar as they agree with the underlying concept or idea — thus possessing the precision that the ancient Greeks sought and celebrated — geometrical shapes can be grasped, but they do not give rise to emotion, and, most importantly, they do not move the imagination to free and new (mental) lengths.

(C) Namely, the pleasure consists of being challenged and struggling to understand and decode the phenomenon present to view. Furthermore, part of the pleasure comes from having one's comfort zone (momentarily) violated.

242) 윗글의 알맞은 순서를 배열하시오. [주관식]

24.

The world has become a nation of laws and governance that has introduced a system of public administration and management to keep order.

(A) With this administrative management system, urban institutions of government have evolved to offer increasing levels of services to their citizenry, provided through a taxation process and/or fee for services (e.g., police and fire, street maintenance, utilities, waste management, etc.).

(B) The sense of community and associated responsibility of all citizens to be active participants is therefore diminishing. Governmental substitution for citizen duty and involvement can have serious implications. This impedes the nations of the world to be responsive to natural and man-made disasters as part of global preparedness.

(C) Frequently this has displaced citizen involvement. Money for services is not a replacement for citizen responsibility and public participation. Responsibility of the citizen is slowly being supplanted by government being the substitute provider. Consequentially, there is a philosophical and social change in attitude and sense of responsibility of our urban-based society to become involved.

Henry Moore (1898—1986), one of the most significant British artists of the 20th century, was the seventh child of a coal miner.

(A) Then, he entered the Royal College of Art in London and earned his degree there. His sculptures, known around the world, present the forms of the body in a unique way.

(B) One of his artistic themes was mother-and-child as shown in Madonna and Child at St. Matthew's Church in Northampton. He achieved financial success from his hard work and established the Henry Moore Foundation to support education and promotion of the arts.

(C) Henry Moore showed a talent for art from early on in school. After World War I, during which he volunteered for army service, Moore began to study sculpture at the Leeds School of Art.

29.

Accepting whatever others are communicating only pays off if their interests correspond to ours — think cells in a body, bees in a beehive.

(A) The messages have to be kept, on the whole, honest. In the case of humans, honesty is maintained by a set of cognitive mechanisms that evaluate communicated information. These mechanisms allow us to accept most beneficial messages — to be open — while rejecting most harmful messages — to be vigilant.

(B) Fortunately, there are ways of making communication work even in the most adversarial of relationships. A prey can convince a predator not to chase it. But for such communication to occur, there must be strong guarantees that those who receive the signal will be better off believing it.

(C) As far as communication between humans is concerned, such commonality of interests is rarely achieved; even a pregnant mother has reasons to mistrust the chemical signals sent by her fetus.

30.

In economic systems what takes place in one sector has impacts on another; demand for a good or service in one sector is derived from another.

(A) For instance, a consumer buying a good in a store will likely trigger the replacement of this product, which will generate demands for activities such as manufacturing, resource extraction and, of course, transport. What is different about transport is that it cannot exist alone and a movement cannot be stored.

(B) In this case an opportunity has been missed, since the amount of transport being offered has exceeded the demand for it. The derived demand of transportation is often very difficult to reconcile with an equivalent supply, and actually transport companies would prefer to have some additional capacity to accommodate unforeseen demand (often at much higher prices).

(C) An unsold product can remain on the shelf of a store until bought (often with discount incentives), but an unsold seat on a flight or unused cargo capacity in the same flight remains unsold and cannot be brought back as additional capacity later.

31.

When examining the archaeological record of human culture, one has to consider that it is vastly incomplete. Many aspects of human culture have what archaeologists describe as low archaeological visibility, meaning they are difficult to identify archaeologically.

(A) Using the same kinds of physical remains to draw inferences about social systems and what people were thinking about is more difficult. Archaeologists do it, but there are necessarily more inferences involved in getting from physical remains recognized as trash to making interpretations about belief systems.

(B) Archaeologists tend to focus on tangible (or material) aspects of culture: things that can be handled and photographed, such as tools, food, and structures. Reconstructing intangible aspects of culture is more difficult, requiring that one draw more inferences from the tangible.

(C) It is relatively easy, for example, for archaeologists to identify and draw inferences about technology and diet from stone tools and food remains.

32.

Even as mundane a behavior as watching TV may be a way for some people to escape painful self-awareness through distraction.

(A) To test this idea, Sophia Moskalenko and Steven Heine gave participants false feedback about their test performance, and then seated each one in front of a TV set to watch a video as the next part of the study.

(B) The researchers concluded that distraction through television viewing can effectively relieve the discomfort associated with painful failures or mismatches between the self and self-guides. In contrast, successful participants had little wish to be distracted from their self-related thoughts!

(C) When the video came on, showing nature scenes with a musical soundtrack, the experimenter exclaimed that this was the wrong video and went supposedly to get the correct one, leaving the participant alone as the video played. The participants who had received failure feedback watched the video much longer than those who thought they had succeeded.

33.

It is important to recognise the interdependence between individual, culturally formed actions and the state of cultural integration.

(A) The cumulative work of many individuals produces a corpus of knowledge within which certain 'discoveries' become possible or more likely. Such discoveries are 'ripe' and could not have occurred earlier and are also likely to be made simultaneously by numbers of individuals.

(B) People work within the forms provided by the cultural patterns that they have internalised, however contradictory these may be. Ideas are worked out as logical implications or consequences of other accepted ideas, and it is in this way that cultural innovations and discoveries are possible. New ideas are discovered through logical reasoning, but such discoveries are inherent in and integral to the conceptual system and are made possible only because of the acceptance of its premises.

(C) For example, the discoveries of new prime numbers are 'real' consequences of the particular number system employed. Thus, cultural ideas show 'advances' and 'developments' because they are outgrowths of previous ideas.

34.

Enabling animals to operate in the presence of harmless stimuli is an almost universal function of learning. Most animals innately avoid objects they have not previously encountered. Unfamiliar objects may be dangerous; treating them with caution has survival value.

(A) To overcome this problem, almost all animals habituate to safe stimuli that occur frequently. Confronted by a strange object, an inexperienced animal may freeze or attempt to hide, but if nothing unpleasant happens, sooner or later it will continue its activity.

(B) If persisted in, however, such careful behavior could interfere with feeding and other necessary activities to the extent that the benefit of caution would be lost. A turtle that withdraws into its shell at every puff of wind or whenever a cloud casts a shadow would never win races, not even with a lazy rabbit.

(C) The possibility also exists that an unfamiliar object may be useful, so if it poses no immediate threat, a closer inspection may be worthwhile.

② races with the slow rabbit
③ the dangerous objects
④ a closer inspection
⑤ animal's response to safe stimuli

35.

A variety of theoretical perspectives provide insight into immigration. Economics, which assumes that actors engage in utility maximization, represents one framework.

(A) Benefits may include but are not limited to short-term and long-term monetary gains, safety, and greater freedom of cultural expression.

(B) Individual costs include but are not limited to the expense of travel, uncertainty of living in a foreign land, difficulty of adapting to a different language, uncertainty about a different culture, and the great concern about living in a new land. Psychic costs associated with separation from family, friends, and the fear of the unknown also should be taken into account in cost-benefit assessments.

(C) From this perspective, it is assumed that individuals are rational actors, i.e., that they make migration decisions based on their assessment of the costs as well as benefits of remaining in a given area versus the costs and benefits of leaving.

In turn, the higher costs and lower performance of some products attract only a small portion of the customer base, leading to lower economies of scale in procurement, manufacturing, and distribution.

Green products involve, in many cases, higher ingredient costs than those of mainstream products. ① Furthermore, the restrictive ingredient lists and design criteria that are typical of such products may make green products inferior to mainstream products on core performance dimensions (e.g., less effective cleansers). ② Even if the green product succeeds, it may cannibalize the company's higher-profit mainstream offerings. Given such downsides, companies serving mainstream consumers with successful mainstream products face what seems like an obvious investment decision. ③ They'd rather put money and time into known, profitable, high-volume products that serve populous customer segments than into risky, less-profitable, low-volume products that may serve current noncustomers. ④ Given that choice, these companies may choose to leave the green segment of the market to small niche competitors. ⑤

37.

257) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

For instance, in addition to playing music, a social personal assistant robot would express its engagement with the music so that users would feel like they are listening to the music together with the robot.

Recently, a number of commercial ventures have been launched that offer social robots as personal home assistants, perhaps eventually to rival existing smart-home assistants. Personal robotic assistants are devices that have no physical manipulation or locomotion capabilities. ① Instead, they have a distinct social presence and have visual features suggestive of their ability to interact socially, such as eyes, ears, or a mouth. ② They might be motorized and can track the user around the room, giving the impression of being aware of the people in the environment. ③ Although personal robotic assistants provide services similar to those of smart-home assistants, their social presence offers an opportunity that is unique to social robots. ④ These robots can be used as surveillance devices, act as communicative intermediates, engage in richer games, tell stories, or be used to provide encouragement or incentives. ⑤

38.

The earliest humans had access to only a very limited number of materials, those that occur naturally: stone, wood, clay, skins, and so on. With time, they discovered techniques for producing materials that had properties superior to those of the natural ones; these new materials included pottery and various metals.

(A) Thus, tens of thousands of different materials have evolved with rather specialized characteristics that meet the needs of our modern and complex society, including metals, plastics, glasses, and fibers.

(B) Furthermore, it was discovered that the properties of a material could be altered by heat treatments and by the addition of other substances. At this point, materials utilization was totally a selection process that involved deciding from a given, rather limited set of materials, the one best suited for an application based on its characteristics.

(C) It was not until relatively recent times that scientists came to understand the relationships between the structural elements of materials and their properties. This knowledge, acquired over approximately the past 100 years, has empowered them to fashion, to a large degree, the characteristics of materials.

258) 윗글의 알맞은 순서를 배열하시오. [주관식]

39.

The growing complexity of the social dynamics determining food choices makes the job of marketers and advertisers increasingly more difficult. In the past, mass production allowed for accessibility and affordability of products, as well as their wide distribution, and was accepted as a sign of progress.

(A) In reality, these supposedly individual preferences end up overlapping with emerging, temporary, always changing, almost tribal formations solidifying around cultural sensibilities, social identifications, political sensibilities, and dietary and health concerns.

(B) Personal stories connect with larger narratives to generate new identities. These consumer communities go beyond national boundaries, feeding on global and widely shared repositories of ideas, images, and practices.

(C) Nowadays it is increasingly replaced by the fragmentation of consumers among smaller and smaller segments that are supposed to reflect personal preferences. Everybody feels different and special and expects products serving his or her inclinations.

40.

The computer has, to a considerable extent, solved the problem of acquiring, preserving, and retrieving information. Data can be stored in effectively unlimited quantities and in manageable form. The computer makes available a range of data unattainable in the age of books.

(A) This dynamic may encourage policymakers to wait for an issue to arise rather than anticipate it, and to regard moments of decision as a series of isolated events rather than part of a historical continuum. When this happens, manipulation of information replaces reflection as the principal policy tool.

(B) It packages it effectively; style is no longer needed to make it accessible, nor is memorization. In dealing with a single decision separated from its context, the computer supplies tools unimaginable even a decade ago.

(C) But it also diminishes perspective. Because information is so accessible and communication instantaneous, there is a diminution of focus on its significance, or even on the definition of what is significant.

[41 ~ 42]

In studies examining the effectiveness of vitamin C, researchers typically divide the subjects into two groups. One group (the experimental group) receives a vitamin C supplement, and the other (the control group) does not. Researchers observe both groups to determine whether one group has fewer or shorter colds than the other.

(A) Randomization helps to ensure that results reflect the treatment and not factors that might influence the grouping of subjects. Importantly, the two groups of people must be similar and must have the same track record with respect to colds to rule out the possibility that observed differences in the rate, severity, or duration of colds might have occurred anyway.

(B) If, for example, the control group would normally catch twice as many colds as the experimental group, then the findings prove nothing. In experiments involving a nutrient, the diets of both groups must also be similar, especially with respect to the nutrient being studied. If those in the experimental group were receiving less vitamin C from their usual diet, then any effects of the supplement may not be apparent.

(C) The following discussion describes some of the pitfalls inherent in an experiment of this kind and ways to avoid them. In sorting subjects into two groups, researchers must ensure that each person has an equal chance of being assigned to either the experimental group or the control group. This is accomplished by randomization; that is, the subjects are chosen randomly from the same population by flipping a coin or some other method involving chance.

[43 ~ 45]

When Sally came back home from her photography class, she could hear Katie moving around, chopping things on a wooden cutting board. Wondering what her roommate was doing, she ran to the kitchen. Sally watched Katie cooking something that looked delicious. But Katie didn't notice her because she was too focused on preparing for her cooking test the next day. She was trying to remember what her professor had said in class that day.

(B) In that class, Professor Brown said, "You have to present your food properly, considering every stage of the dining experience. Imagine you are a photographer." Recalling what the professor had mentioned, Katie said to herself, "We need to see our ingredients as colors that make up a picture." Sally could clearly see that Katie was having a hard time preparing for her cooking test. Trying to make her feel better, Sally kindly asked, "Is there anything I can do to help?"

(A) Katie, surprised by her roommate's words, turned her head to Sally and sighed, "I don't know. This is really hard." Stirring her sauce for pasta, Katie continued, "Professor Brown said that visual aspects make up a key part of a meal. My recipe seems good, but I can't think of any ways to alter the feeling of the final dish." Visibly frustrated, she was just about to throw away all of her hard work and start again, when Sally suddenly stopped her.

(C) "Wait! You don't have to start over. You just need to add some color to the plate." Being curious, Katie asked, "How can I do that?" Sally took out a container of vegetables from the refrigerator and replied, "How about making colored pasta to go with your sauce?" Smiling, she added, "It's not that hard, and all you need are brightly colored vegetables to make your pasta green, orange, or even purple." Katie smiled, knowing that now she could make her pasta with beautiful colors like a photographer.

We live in a time when everyone seems to be looking for quick and sure solutions. Computer companies ① **have even begun** to advertise ways in which computers can replace parents. They are too late — television ② **has already done** that. Seriously, however, in every branch of education, including moral education, we make a mistake when we suppose ③ **what** a particular batch of content or a particular teaching method or a particular configuration of students and space ④ **will accomplish** our ends. The answer is both harder and simpler. We, parents and teachers, have to live with our children, talk to them, listen to them, enjoy their company, and ⑤ **show** them by what we do and how we talk that it is possible to live appreciatively or, at least, nonviolently with most other people.

270) 윗글의 내용을 한 문장으로 요약하고자 한다. 빈 칸 (A)와 (B)에 들어갈 말로 가장 적절한 것은?

To bring the true (A) _____, students and others should (B) _____ often.

Flicking the collaboration light switch is something that leaders are uniquely positioned to do, because several _____ stand in the way of people voluntarily working alone. For one thing, the fear of being left out of the loop can keep them ① **glued** to their enterprise social media. Individuals don't want to be — or appear to be — isolated. For another, knowing ② **that** their teammates are doing provides a sense of comfort and security, because people can adjust their own behavior to be in harmony with the group. It's risky ③ **to go off** on their own to try something new that will probably not be successful right from the start. But ④ **even though** it feels reassuring for individuals to be hyperconnected, it's better for the organization if they periodically go off and think for themselves and generate diverse — if not quite mature — ideas. Thus, it becomes the leader's job to create conditions that are good for the whole by enforcing intermittent interaction even when people wouldn't choose it for themselves, without making it ⑤ **seem** like a punishment.

272) 윗글의 빈칸에 가장 적절한 답을 고르시오.

Historically, the professions and society have engaged in a negotiating process ① **intended** to define the terms of their relationship. At the heart of this process is the tension between the professions' pursuit of (A) a_____ and the public's demand for (B) a_____. Society's granting of power and privilege to the professions is premised on their willingness and ability ② **to contribute** to social well-being and to conduct their affairs in a manner consistent with broader social values. It ③ **has long been recognized** that the expertise and privileged position of professionals confer authority and power that could readily be used to advance their own interests at the expense of those they serve. As Edmund Burke ④ **observed** two centuries ago, "Men are qualified for civil liberty in exact proportion to their disposition to put moral chains upon their own appetites." Autonomy has never been a one-way street and ⑤ **are** never granted absolutely and irreversibly.

In Kant's view, geometrical shapes are too perfect ① **to induce** an aesthetic experience. Insofar as they agree with the underlying concept or idea — thus possessing the precision ② **that** the ancient Greeks sought and celebrated — geometrical shapes can be grasped, but they do not give rise to emotion, and, most importantly, they do not move the imagination to free and new (mental) lengths. Forms or phenomena, (A) _____, that possess a degree of immeasurability, or that do not appear constrained, ③ **stimulate** the human imagination — hence their ability to induce a sublime aesthetic experience. The pleasure associated with experiencing immeasurable objects — indefinable or formless objects — can be ④ **defining** as enjoying one's own emotional and mental activity. Namely, the pleasure consists of being challenged and struggling ⑤ **to understand** and decode the phenomenon present to view. (B) _____, part of the pleasure comes from having one's comfort zone (momentarily) violated.

The world has become a nation of laws and governance that has introduced a system of public administration and management to _____. With this administrative management system, urban institutions of government have evolved to offer increasing levels of services to their citizenry, provided through a taxation process and/or fee for services (e.g., police and fire, street maintenance, utilities, waste management, etc.). Frequently this ① **has displaced** citizen involvement. Money for services is not a replacement for citizen responsibility and public participation. Responsibility of the citizen is slowly being supplanted by government being the substitute provider. Consequentially, there is a philosophical and social change in attitude and sense of responsibility of our urban-based society ② **to become** involved. The sense of community and associated responsibility of all citizens to be active participants ③ **are** therefore diminishing. Governmental substitution for citizen duty and involvement ④ **can have** serious implications. This impedes the nations of the world ⑤ **to be** responsive to natural and man-made disasters as part of global preparedness.

278) 윗글의 빈칸에 가장 적절한 답을 고르시오.

Accepting whatever others are communicating only ① **pays off** if their interests correspond to ours — think cells in a body, bees in a beehive. As far as communication between humans ② **is concerned**, such commonality of interests is rarely achieved; even a pregnant mother has reasons to mistrust the chemical signals sent by her fetus. Fortunately, there are ways of making communication work even in the most adversarial of relationships. A prey can convince a predator not ③ **to chase it**. But for such communication to occur, there must be strong guarantees that those ④ **who** receive the signal will be better off believing it. The messages have to be kept, on the whole, honest. In the case of humans, honesty ⑤ **maintained** by a set of cognitive mechanisms that evaluate communicated information. These mechanisms allow us to accept most (A) b_____ messages — to be open — while rejecting most (B) h_____ messages — to be vigilant.

In economic systems what takes place in one sector ① **has** impacts on another; demand for a good or service in one sector is derived from another. (A) _____, a consumer buying a good in a store will likely trigger the replacement of this product, which will generate demands for activities such as manufacturing, resource extraction and, of course, transport. ② **That** is different about transport is that it cannot exist alone and a movement cannot be stored. An unsold product can remain on the shelf of a store until bought (often with discount incentives), (B) _____ an unsold seat on a flight or unused cargo capacity in the same flight remains unsold and ③ **cannot be brought back** as additional capacity later. In this case an opportunity has been missed, since the amount of transport being offered ④ **has exceeded** the demand for it. The derived demand of transportation is often very difficult to reconcile with an equivalent supply, and actually transport companies would prefer ⑤ **to have** some additional capacity to accommodate unforeseen demand (often at much higher prices).

When examining the archaeological record of human culture, one has to consider ① **that** it is vastly incomplete. Many aspects of human culture have ② **what** archaeologists describe as low archaeological visibility, meaning they are difficult to identify archaeologically. Archaeologists tend to focus on _____ (or material) aspects of culture: things that can be handled and photographed, such as tools, food, and structures. Reconstructing intangible aspects of culture is more difficult, ③ **require** that one draw more inferences from the tangible. It is relatively easy, for example, for archaeologists to identify and draw inferences about technology and diet from stone tools and food remains. ④ **Using** the same kinds of physical remains to draw inferences about social systems and what people were thinking about is more difficult. Archaeologists do it, but there are necessarily more inferences ⑤ **involved** in getting from physical remains recognized as trash to making interpretations about belief systems.

Enabling animals to operate in the presence of harmless stimuli is an almost universal function of learning. Most animals innately ① **avoid** objects they have not previously encountered. Unfamiliar objects may be dangerous; treating them with caution has survival value. If persisted in, _____, such careful behavior could interfere with feeding and other necessary activities to the extent ② **that** the benefit of caution would be lost. A turtle that withdraws into its shell at every puff of wind or whenever a cloud casts a shadow would never win races, not even with a lazy rabbit. ③ **Overcome** this problem, almost all animals habituate to safe stimuli that occur frequently. ④ **Confronted** by a strange object, an inexperienced animal may freeze or attempt to hide, but if nothing unpleasant happens, sooner or later it will continue its activity. The possibility also ⑤ **exists** that an unfamiliar object may be useful, so if it poses no immediate threat, a closer inspection may be worthwhile.

Green products involve, in many cases, higher ingredient costs than those of mainstream products. (A) _____, the restrictive ingredient lists and design criteria that are typical of such products may make green products inferior to mainstream products on core performance dimensions (e.g., less effective cleansers). (B) _____, the higher costs and lower performance of some products attract only a small portion of the customer base, ① **leading** to lower economies of scale in procurement, manufacturing, and distribution. ② **Even if** the green product succeeds, it may cannibalize the company's higher-profit mainstream offerings. Given such downsides, companies ③ **serving** mainstream consumers with successful mainstream products face ④ **that** seems like an obvious investment decision. They'd rather put money and time into known, profitable, high-volume products that serve populous customer segments than into risky, less-profitable, low-volume products that may serve current noncustomers. ⑤ **Given** that choice, these companies may choose to leave the green segment of the market to small niche competitors.

The earliest humans had access to only a very _____ number of materials, those that occur naturally: stone, wood, clay, skins, and so on. With time, they discovered techniques for producing materials that had properties superior to those of the natural ones; these new materials ① **included** pottery and various metals. Furthermore, it was discovered ② **what** the properties of a material could be altered by heat treatments and by the addition of other substances. At this point, materials utilization was totally a selection process that ③ **involved** deciding from a given, rather limited set of materials, the one best suited for an application based on its characteristics. It was not until relatively recent times that scientists came ④ **to understand** the relationships between the structural elements of materials and their properties. This knowledge, ⑤ **acquired** over approximately the past 100 years, has empowered them to fashion, to a large degree, the characteristics of materials. Thus, tens of thousands of different materials have evolved with rather specialized characteristics that meet the needs of our modern and complex society, including metals, plastics, glasses, and fibers.

The computer has, to a considerable extent, solved the problem of acquiring, preserving, and retrieving information. Data ① **can be stored** in effectively unlimited quantities and in manageable form. The computer makes ② **availably** a range of data unattainable in the age of books. It packages it effectively; style is no longer needed to make it accessible, _____ is memorization. In dealing with a single decision separated from its context, the computer supplies tools unimaginable even a decade ago. But it also ③ **diminishes** perspective. Because information is so accessible and communication instantaneous, there is a diminution of focus on its significance, or even on the definition of ④ **what** is significant. This dynamic may encourage policymakers to wait for an issue to arise rather than anticipate it, and to regard moments of decision as a series of isolated events rather than part of a historical continuum. When this ⑤ **happens**, manipulation of information replaces reflection as the principal policy tool.

In studies examining the effectiveness of vitamin C, researchers typically ① **divide** the subjects into two groups. One group (the experimental group) receives a vitamin C supplement, and the other (the control group) does not. Researchers observe both groups to determine ② **whether** one group has fewer or shorter colds than the other. The following discussion describes some of the pitfalls inherent in an experiment of this kind and ways to avoid them. In sorting subjects into two groups, researchers must ensure ③ **what** each person has an equal chance of being assigned to either the experimental group or the control group. This is accomplished by randomization; that is, the subjects are chosen randomly from the same population by flipping a coin or some other method involving chance. Randomization helps to ensure that results reflect the treatment and not factors that might influence the grouping of subjects. Importantly, the two groups of people must be similar and must have the same track record with respect to colds to rule out the possibility that observed differences in the rate, severity, or duration of colds (A) **occur** anyway. If, for example, the control group would normally catch twice as many colds as the experimental group, then the findings prove nothing. In experiments ④ **involving** a nutrient, the diets of both groups must also be similar, especially with respect to the nutrient being studied. If those in the experimental group ⑤ **were receiving** less vitamin C from their usual diet, then any effects of the supplement may not be apparent.

When Sally came back home from her photography class, she could hear Katie ① **moving** around, chopping things on a wooden cutting board. Wondering what her roommate was doing, she ran to the kitchen. Sally watched Katie cooking something that looked delicious. But Katie didn't notice her ② **because** she was too focused on preparing for her cooking test the next day. She was trying to remember what her professor had said in class that day.

In that class, Professor Brown said, "You have to present your food properly, ③ **consider** every stage of the dining experience. Imagine you are a photographer." Recalling what the professor had mentioned, Katie said to herself, "We need to see our ingredients as colors that make up a picture." **Sally could clearly see that Katie was having a hard time to prepare for her cooking test**. Trying to make her feel better, Sally kindly asked, "Is there anything I can do to help?"

Katie, surprised by her roommate's words, turned her head to Sally and sighed, "I don't know. This is really hard." ④ **Stirring** her sauce for pasta, Katie continued, "Professor Brown said that visual aspects make up a key part of a meal. My recipe seems good, but I can't think of any ways to alter the feeling of the final dish." Visibly frustrated, she was just about to throw away all of her hard work and start again, when Sally suddenly stopped her.

"Wait! You don't have to start over. You just need to add some color to the plate." Being curious, Katie asked, "How can I do that?" Sally took out a container of vegetables from the refrigerator and replied, "How about making colored pasta to go with your sauce?" Smiling, she added, "It's not that hard, and all you need are brightly colored vegetables ⑤ **to make** your pasta green, orange, or even purple." Katie smiled, knowing that now she could make her pasta with beautiful colors like a photographer.

The world has become a nation of laws and governance that ① **has introduced** a system of public administration and management to keep order. With this administrative management system, urban institutions of government ② **have evolved** to offer increasing levels of services to their citizenry, provided through a taxation process and/or fee for services (e.g., police and fire, street maintenance, utilities, waste management, etc.). Frequently this has displaced citizen involvement. Money for services ③ **are** not a replacement for citizen responsibility and public participation. (A) _____ responsibility of the citizen is slowly being supplanted by government being the substitute provider. (B) _____, there is a philosophical and social change in attitude and sense of responsibility of our urban-based society to become ④ **involved**. The sense of community and associated responsibility of all citizens to be active participants is therefore diminishing. Governmental substitution for citizen duty and involvement can have serious implications. This impedes the nations of the world ⑤ **to be** responsive to natural and man-made disasters as part of global preparedness.

Accepting whatever others are communicating only pays off if their interests ① **correspond** to ours — think cells in a body, bees in a beehive. As far as communication between humans is concerned, such commonality of interests is ② **often** achieved; even a pregnant mother has reasons to mistrust the chemical signals sent by her fetus. (A) _____, there are ways of making communication work even in the most adversarial of relationships. A prey can convince a predator not to chase it. (B) _____ for such communication to occur, there must be strong guarantees that those who ③ **receive** the signal will be better off believing it. The messages have to be kept, on the whole, honest. In the case of humans, ④ **honesty** is maintained by a set of cognitive mechanisms that evaluate communicated information. These mechanisms ⑤ **allow** us to accept most beneficial messages — to be open — while rejecting most harmful messages — to be vigilant.

In economic systems what takes place in one sector has impacts on another; demand for a good or service in one sector ① **is derived** from another. For instance, a consumer buying a good in a store will likely trigger the replacement of this product, **it will generate demands for activities such as manufacturing, resource extraction and, of course, transport**. What is different about transport is that it cannot exist alone and a movement ② **cannot be stored**. An unsold product can remain on the shelf of a store until bought (often with discount incentives), but an unsold seat on a flight or unused cargo capacity in the same flight remains ③ **unsold** and cannot be brought back as additional capacity later. In this case an opportunity has been missed, since the amount of transport being offered has exceeded the demand for it. The derived demand of transportation ④ **are** often very difficult to reconcile with an equivalent supply, and actually transport companies ⑤ **would prefer** to have some additional capacity to accommodate unforeseen demand (often at much higher prices).

Enabling animals to operate in the presence of harmless stimuli is an almost universal function of learning. Most animals innately avoid objects they have not previously encountered. Unfamiliar objects may be dangerous; ① **treating** them with caution has survival value. If persisted in, however, such careful behavior ② **could interfere** with feeding and other necessary activities to the extent that the benefit of caution would be lost. A turtle that withdraws into its shell at every puff of wind or ③ **whenever** a cloud casts a shadow would never win races, not even with a lazy rabbit. To overcome this problem, almost all animals habituate to _____ that occur frequently. Confronted by a strange object, an inexperienced animal may freeze or attempt ④ **to hide**, but if nothing unpleasant happens, sooner or later it will continue its activity. The possibility also exists ⑤ **what** an unfamiliar object may be useful, so if it poses no immediate threat, a closer inspection may be worthwhile.

Green products involve, in many cases, higher ingredient costs than _____ of mainstream products. Furthermore, the restrictive ingredient lists and design criteria ① **that** are typical of such products may make green products inferior to mainstream products on core performance dimensions (e.g., less effective cleansers). In turn, the higher costs and lower performance of some products ② **attract** only a small portion of the customer base, leading to lower economies of scale in procurement, manufacturing, and distribution. Even if the green product ③ **succeeds**, it may cannibalize the company's higher-profit mainstream offerings. Given such downsides, companies serving mainstream consumers with successful mainstream products face what seems like an obvious investment decision. They'd rather put money and time into known, profitable, high-volume products ④ **that** serve populous customer segments than into risky, less-profitable, low-volume products that may serve current noncustomers. Given that choice, these companies may ⑤ **be chosen** to leave the green segment of the market to small niche competitors.

In studies examining the effectiveness of vitamin C, researchers ① **typically** divide the subjects into two groups. One group (the experimental group) receives a vitamin C supplement, and the other (the control group) does not. Researchers observe both groups to determine whether one group has fewer or shorter colds than the other. The following discussion describes some of the pitfalls inherent in an experiment of this kind and ways to avoid them. In sorting subjects into two groups, researchers must ensure that each person has an equal chance of being assigned to either the experimental group or the control group. This is accomplished by randomization; (A) _____, the subjects are chosen randomly from the same population by flipping a coin or some other method involving chance. Randomization helps ② **to ensure** that results reflect the treatment and not factors that might influence the grouping of subjects. Importantly, the two groups of people must be similar and must have the same track record with respect to colds ③ **to rule out** the possibility that observed differences in the rate, severity, or duration of colds might have occurred anyway. If, (B) _____, the control group would normally catch twice as many colds as the experimental group, then the findings prove nothing. In experiments ④ **involving** a nutrient, the diets of both groups must also be similar, especially with respect to the nutrient being studied. If those in the experimental group ⑤ **was** receiving less vitamin C from their usual diet, then any effects of the supplement may not be apparent.

When Sally came back home from her photography class, she could hear Katie moving around, ① **chopping** things on a wooden cutting board. Wondering what her roommate was doing, she ran to the kitchen. **Sally watched / delicious / looked / Katie / something / cooking / that**. But Katie didn't notice her because she was too focused on preparing for her cooking test the next day. She was trying to remember ② **that** her professor had said in class that day.

In that class, Professor Brown said, "You have to present your food properly, considering every stage of the dining experience. Imagine you are a photographer." Recalling what the professor had mentioned, Katie said to herself, "We need to see our ingredients as colors that make up a picture." Sally could clearly see that Katie ③ **was having** a hard time preparing for her cooking test. Trying to make her feel better, Sally kindly asked, "Is there anything I can do to help?"

Katie, surprised by her roommate's words, turned her head to Sally and sighed, "I don't know. This is really hard." Stirring her sauce for pasta, Katie continued, "Professor Brown said that visual aspects make up a key part of a meal. My recipe seems good, but I can't think of any ways to alter the feeling of the final dish." Visibly ④ **frustrated**, she was just about to throw away all of her hard work and start again, when Sally suddenly stopped her.

"Wait! You don't have to start over. You just need to add some color to the plate." Being curious, Katie asked, "How can I do that?" Sally took out a container of vegetables from the refrigerator and replied, "How about making colored pasta to go with your sauce?" Smiling, she added, "It's not that hard, and all you need are brightly colored vegetables to make your pasta green, orange, or even purple." Katie smiled, ⑤ **knowing** that now she could make her pasta with beautiful colors like a photographer.

Even as mundane a behavior as watching TV may be a way for some people to escape painful self-awareness through distraction. To test this idea, Sophia Moskalenko and Steven Heine (A) **giving/ gave** participants false feedback about their test performance, and then seated each one in front of a TV set to watch a video as the next part of the study. When the video came on, showing nature scenes with a musical soundtrack, the experimenter exclaimed that this was the wrong video and went supposedly to get the correct one, (B) **leaving/ left** the participant alone as the video played. The participants who had received failure feedback watched the video much longer than those **succeeded / they / who / had / thought**. The researchers concluded that distraction through television viewing can effectively relieve the discomfort associated with painful failures or mismatches between the self and self-guides. In contrast, successful participants (C) **having/ had** little wish to be distracted from their self-related thoughts!

Enabling animals to operate in the presence of harmless stimuli is an almost universal function of learning. Most animals innately (A) **avoid/ avoiding** objects they have not previously encountered. Unfamiliar objects may be dangerous; treating them with caution _____. If persisted in, however, such careful behavior could interfere with feeding and other necessary activities to the extent (B) **that/ what** the benefit of caution would be lost. A turtle that withdraws into its shell at every puff of wind or whenever a cloud casts a shadow would never win races, not even with a lazy rabbit. To overcome this problem, almost all animals habituate to safe stimuli that occur frequently. (C) **Confronting/ Confronted** by a strange object, an inexperienced animal may freeze or attempt to hide, but if nothing unpleasant happens, sooner or later it will continue its activity. The possibility also exists that an unfamiliar object may be useful, so if it poses no immediate threat, a closer inspection may be worthwhile.

The earliest humans had access to only a very limited number of materials, those that occur naturally: stone, wood, clay, skins, and so on. With time, they discovered techniques for producing materials that had properties superior to _____ of the natural ones; these new materials included pottery and various metals. Furthermore, it was discovered (A) **that/ what** the properties of a material could be altered by heat treatments and by the addition of other substances. At this point, materials utilization was totally a selection process that involved deciding from a given, rather limited set of materials, the one best suited for an application based on its characteristics. (B) **This/ It** was not until relatively recent times that scientists came to understand the relationships between the structural elements of materials and their properties. This knowledge, acquired over approximately the past 100 years, has empowered them to fashion, to a large degree, the characteristics of materials. Thus, tens of thousands of different materials have evolved with rather specialized characteristics that meet the needs of our modern and complex society, (C) **include/ including** metals, plastics, glasses, and fibers.

The computer has, to a considerable extent, solved the problem of acquiring, preserving, and retrieving information. Data can be stored in effectively unlimited quantities and in manageable form. The computer makes available a range of data unattainable in the age of books. It packages it effectively; style is no longer needed to make it accessible, nor (A) **does/ is** memorization. In dealing with a single decision separated from its context, the computer supplies tools unimaginable even a decade ago. But it also diminishes perspective. Because information is so accessible and communication instantaneous, there is a diminution of focus on its significance, or even on the definition of what is significant. This dynamic may encourage policymakers (B) **to wait/ waiting** for an issue to arise rather than anticipate it, and to regard moments of decision as a series of isolated events rather than part of a historical continuum. When this (C) **happens/ is happened**, manipulation of information replaces reflection as the principal policy tool.

In studies examining the effectiveness of vitamin C, researchers typically (A) **dividing/ divide** the subjects into two groups. One group (the experimental group) receives a vitamin C supplement, and the other (the control group) does not. Researchers observe both groups to determine whether one group has fewer or shorter colds than the other. ① The following discussion describes some of the pitfalls inherent in an experiment of this kind and ways to avoid them. In sorting subjects into two groups, researchers must (B) **ensure/ be ensured** that each person has an equal chance of being assigned to either the experimental group or the control group. ② This is accomplished by randomization; that is, the subjects are chosen randomly from the same population by flipping a coin or some other method (B) **involve/ involving** chance. Randomization helps to ensure that results reflect the treatment and not factors that might influence the grouping of subjects. ③ Importantly, the two groups of people must be similar and must have the same track record with respect to colds to rule out the possibility that observed differences in the rate, severity, or duration of colds might have occurred anyway. ④ In experiments involving a nutrient, the diets of both groups must also be similar, especially with respect to the nutrient being studied. ⑤ If those in the experimental group were receiving less vitamin C from their usual diet, then any effects of the supplement may not be apparent.

397) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

If, for example, the control group would normally catch twice as many colds as the experimental group, then the findings prove nothing.

When Sally came back home from her photography class, she could hear Katie moving around, chopping things on a wooden cutting board. Wondering what her roommate was doing, she ran to the kitchen. Sally watched Katie (A) **to cook/ cooking** something that looked delicious. But Katie didn't notice her because she was too focused on preparing for her cooking test the next day. She was trying to remember what her professor had said in class that day.

In that class, Professor Brown said, "You have to present your food properly, considering every stage of the dining experience. Imagine you are a photographer." Recalling (B) **that/ what** the professor had mentioned, Katie said to herself, "We need to see our ingredients as colors that make up a picture." Sally could clearly see that Katie was having a hard time preparing for her cooking test. Trying to make her feel better, Sally kindly asked, "Is there anything I can do to help?"

Katie, surprised by her roommate's words, turned her head to Sally and sighed, "I don't know. This is really hard." Stirring her sauce for pasta, Katie continued, "Professor Brown said that visual aspects make up a key part of a meal. My recipe seems good, but I can't think of any ways to alter the feeling of the final dish." Visibly (C) **frustrating/ frustrated**, she was just about to throw away all of her hard work and start again, when Sally suddenly stopped her.

"Wait! You don't have to start over. You just need to add some color to the plate." Being curious, Katie asked, "How can I do that?" Sally took out a container of vegetables from the refrigerator and replied, "How about making _____ pasta to go with your sauce?" Smiling, she added, "It's not that hard, and all you need are brightly colored vegetables to make your pasta green, orange, or even purple." Katie smiled, knowing that now she could make her pasta with beautiful colors like a photographer.

Recently, a number of commercial ventures have been launched that (A) **offer/ suffer** social robots as personal home assistants, perhaps eventually to rival existing smart-home assistants. Personal robotic assistants are devices that have no physical manipulation or locomotion capabilities. Instead, they have a distinct social presence and have visual features suggestive of their ability to interact socially, such as eyes, ears, or a mouth. They might be motorized and can track the user around the room, giving the impression of being aware of the people in the environment. Although personal robotic assistants (B) **provide/ prevent** services similar to those of smart-home assistants, their social presence offers an opportunity that is unique to social robots. For instance, in addition to playing music, a social personal assistant robot would (C) **express/ expire** its engagement with the music so that users would feel like they are listening to the music together with the robot. These robots can be used as surveillance devices, act as communicative intermediates, engage in richer games, tell stories, or be used to provide encouragement or incentives.

38.

432) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The earliest humans had access to only a very limited number of materials, those that occur naturally: stone, wood, clay, skins, and so on. With time, they discovered techniques for producing materials that had properties s_____ to those of the natural ones; these new materials included pottery and various metals. Furthermore, it was (A) **discovered/ recovered** that the properties of a material could be altered by heat treatments and by the addition of other substances. At this point, materials utilization was totally a selection process that involved deciding from a given, rather limited set of materials, the one best suited for an application based on its characteristics. It was not until relatively (B) **decent/ recent** times that scientists came to understand the relationships between the structural elements of materials and their properties. This knowledge, acquired over approximately the past 100 years, has empowered them to fashion, to a large degree, the characteristics of materials. Thus, tens of thousands of different materials have (C) **evolved/ involved** with rather specialized characteristics that meet the needs of our modern and complex society, including metals, plastics, glasses, and fibers.

433) 빈칸에 들어갈 한 단어를 본문을 참조하여 쓰시오.

39.

434) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The growing complexity of the social dynamics determining food choices makes the job of marketers and advertisers increasingly more difficult. In the past, mass production allowed for accessibility and affordability of products, as well as their wide distribution, and was (A) **accepted/ rejected** as a sign of progress. Nowadays it is increasingly replaced by the fragmentation of consumers among smaller and smaller segments that are supposed to (B) **reflect/ inflect** personal preferences. Everybody feels different and special and expects products (C) **serving/ deserving** his or her inclinations. In reality, these supposedly individual preferences end up overlapping with emerging, temporary, always changing, almost tribal formations solidifying around cultural sensibilities, social identifications, political sensibilities, and dietary and health concerns. Personal stories connect with larger narratives to generate new identities. These consumer communities go beyond national boundaries, feeding on global and widely shared repositories of ideas, images, and practices.

40.

435) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

The computer has, to a considerable extent, solved the problem of acquiring, preserving, and retrieving information. ① Data can be stored in effectively (A) **limited/ unlimited** quantities and in manageable form. The computer makes available a range of data unattainable in the age of books. ② It packages it effectively; style is no longer needed to make it accessible, nor is memorization. In dealing with a single decision separated from its context, the computer (B) **supplies/ applies** tools unimaginable even a decade ago. ③ Because information is so accessible and communication instantaneous, there is a diminution of focus on its significance, or even on the definition of what is significant. This dynamic may (C) **encourage/ discourage** policymakers to wait for an issue to arise rather than anticipate it, and to regard moments of decision as a series of isolated events rather than part of a historical continuum. ④ When this happens, manipulation of information replaces reflection as the principal policy tool. ⑤

436) 글의 흐름으로 보아 문장의 위치로 적절한 것은?

But it also diminishes perspective.

[41 ~ 42]

437) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

In studies examining the effectiveness of vitamin C, researchers typically divide the subjects into two groups. One group (the experimental group) receives a vitamin C supplement, and the other (the control group) does not. Researchers (A) **observe/ reserve** both groups to determine whether one group has fewer or shorter colds than the other. The following discussion describes some of the pitfalls inherent in an experiment of this kind and ways to avoid them. In sorting subjects into two groups, researchers must ensure that each person has an equal chance of being assigned to either the experimental group or the control group. This is accomplished by randomization; that is, the subjects are chosen randomly from the same (B) **population/ popularity** by flipping a coin or some other method involving chance. Randomization helps to ensure that results reflect the treatment and not factors that might influence the grouping of subjects. Importantly, the two groups of people must be similar and must have the same track record with respect to colds to rule out the possibility that observed differences in the rate, severity, or duration of colds might have occurred anyway. If, for example, the control group would normally catch twice as many colds as the experimental group, then the findings prove nothing. In experiments involving a nutrient, the diets of both groups must also be similar, especially with respect to the nutrient being studied. If those in the experimental group were receiving less vitamin C from their usual diet, then any (C) **affects/ effects** of the supplement may not be apparent.

[43 ~ 45]

438) 각 밑줄 (A), (B), (C) 에서 올바른 것을 고르시오.

When Sally came back home from her photography class, she could hear Katie moving around, chopping things on a wooden cutting board. Wondering what her roommate was doing, she ran to the kitchen. Sally watched Katie cooking something that looked (A) **delicious/ deliciously**. But Katie didn't notice her because she was too focused on preparing for her cooking test the next day. She was trying to remember what her professor had said in class that day.

In that class, Professor Brown said, "You have to present your food properly, considering every stage of the dining experience. Imagine you are a photographer." Recalling what the professor had mentioned, Katie said to herself, "We need to see our ingredients as colors that make up a picture." Sally could clearly see that **a / was / Katie / hard / preparing / having / time** for her cooking test. Trying to make her feel better, Sally kindly asked, "Is there anything I can do to help?"

Katie, surprised by her roommate's words, turned her head to Sally and sighed, "I don't know. This is really hard." Stirring her sauce for pasta, Katie continued, "Professor Brown said that visual aspects make up a key part of a meal. My recipe seems good, but I can't think of any ways to alter the feeling of the final dish." Visibly (B) **frustrating/ frustrated**, she was just about to throw away all of her hard work and start again, when Sally suddenly stopped her.

"Wait! You don't have to start over. You just need to add some color to the plate." Being curious, Katie asked, "How can I do that?" Sally took out a container of vegetables from the refrigerator and replied, "How about making colored pasta to go with your sauce?" Smiling, she added, "It's not that hard, and all you need are brightly colored vegetables to make your pasta green, orange, or even purple." Katie smiled, (C) **know/ knowing** that now she could make her pasta with beautiful colors like a photographer.

439) 윗글 주어진 문장을 문맥에 맞게 배열하시오.
