## 2023 수능 특강 영어 15강 - 1 - 해석 [5 차]

| 1        | Modern theories have applied and extended early principles to understand people's behavior when people have the                        |
|----------|--|
|          |  |
|          | opportunity to interact with others while concealing their personal identity and remaining anonymous.                                  |
|          |  |
|          |  |
|          |  |
| _        |  |
| 2        | The term deindividuation was coined by Leon Festinger and colleagues in the 1950s to describe situations in which people               |
|          |  |
|          | cannot be individuated or isolated from others.  |
|          |  |
|          |  |
|          |  |
| <u> </u> | Assembles to Eastinger and collection deign deign dividuated being obsert a loss of individuality.                                     |
| 3        | According to Festinger and colleagues, being deindividuated brings about a loss of individuality.                                      |
|          |  |
|          |  |
|          |  |
|          |  |
|          |  |
|          | They proposed that being deindividuated reduces normal constraints on behavior and people can do things they normally                  |
| 7        | They proposed that being demandance reduces normal constraints on behavior and people can do things they normally                      |
|          | would not do because they are not directly accountable for their actions.  |
|          | would not do because they die not directly decodificable for their dectoris.   |
|          |  |
|          |  |
|          |  |
| 5        | They are, in a sense, liberated to do what they like.  |
|          |  |
|          |  |
|          |  |
|          |  |
|          |  |
|          |  |
| 6        | Festinger and colleagues found support for this idea by demonstrating that participants who were engaged in a group discussion about   |
|          | their parents, while being dressed alike in a dimly lit room, were more likely to make negative comments about their parents than were |
|          | participants in a control condition.   |
|          |  |
|          |  |
|          |  |
|          |  |
| 7        | In other words, the deindividuated situation allowed participants to express views that they would normally keep to                    |
|          |  |
|          | themselves.  |
|          |  |
|          |  |
|          |  |
|          |  |
|          |  |
|          |  |
|          |  |
|          |  |

## 2023 수능 특강 영어 15강 - 2 - 해석 [5 차]

| 1 | Suppose you were participating in an experiment using a new saliva test to detect an enzyme deficiency that predicted             |
|---|---|
|   | pancreatic disease in later life.   |
|   |   |
|   |   |
| 2 | How much would you believe in the accuracy of the new test?   |
|   |   |
|   |   |
| 3 | According to a study done by Peter Ditto and David Lopez on Kent State University students, that would depend on                  |
|   | whether the test identified you as possessing the worrisome deficiency.   |
|   |   |
|   |   |
| 4 | Like the majority of those students, you would likely downgrade the accuracy of the test if it informed you that pancreas         |
|   | problems were in your future.   |
|   |   |
| 5 | A second study showed how you might go about it.  |
|   |   |
|   |   |
|   |   |
| 6 | Ditto and Lopez asked subjects if there were any irregularities in their diet, sleep, or activity patterns over the last 48 hours |
|   | that might have affected the accuracy of the test.  |
|   |   |
|   |   |
| 7 | Those who got health-threatening results listed three times more "irregularities" than did those receiving health-confirming      |
|   | results.  |
|   |   |
| 8 | Thus, they searched for ways to weaken evidence contradicting their preferred image of healthiness.                               |
|   |   |
|   |   |

## 2023 수능 특강 영어 15강 - 3 - 해석 [5 차]

| 1 | Plants need water to give rigidity to their cells, but water stress also produces other, more subtle effects.  |
|---|--|
|   |  |
|   |  |
|   |  |
|   |  |
|   |  |
|   |  |
| 2 | The stressed plant will spend more time with its stomata closed.   |
|   |  |
|   |  |
|   |  |
|   |  |
|   |  |
| 3 | These are the pores, each opened and closed by the expansion and contraction of a pair of guard cells, through which   |
| , | These are the pores, each opened and closed by the expansion and confidence of a pair of guara cens, anough which  |
|   | gases are exchanged and from which water evaporates.   |
|   | gares and area and area mean management of the control of the cont |
|   |  |
|   |  |
|   |  |
| 4 | Keeping stomata closed reduces water loss, but a reduction in the rate of gas exchange implies a reduction in the rate of  |
|   |  |
|   | photosynthesis.  |
|   |  |
|   |  |
|   |  |
| _ | The plant will array many aloudy and will be available to the world athematicable, and array their inhibited before the plant in   |
| 5 | The plant will grow more slowly and will be smaller than it would otherwise be, and growth is inhibited before the plant is  |
|   | so short of water that it wilts visibly.   |
|   | so short of water that it wills visibly.   |
|   |  |
|   |  |
|   |  |
| 6 | When an adequate amount of water becomes available to a formerly stressed plant it will increase its production of foliage   |
|   | but in the case of a crop plant its final weight will never be greater than that of an unstressed plant and usually it will be   |
|   | smaller.   |
|   |  |
|   |  |
|   |  |
|   |  |
|   |  |
|   |  |
|   |  |

## 2023 수능 특강 영어 15강 - 4 - 해석 [5 차]

| 1 | The interpretation of quantitative and numeric data is among the factors relevant to the processing of science  |
|---|---|
|   | communication.  |
|   |   |
|   |   |
| 2 | Although communicators share numeric data (e.g., stock prices, disease risks, or weather forecasts) with lay publics because they presume it is useful in decision-making, the same data can evoke widely different interpretations and conclusions depending on the recipient. |
| 3 | Recent work has found that people with less numeric literacy (numeracy) tend to extract very different meaning from data,   |
|   | such as interpretation of expected likelihoods, than those with higher numeracy.  |
|   |   |
|   |   |
| 4 | But the more numerate also will interpret quantitative information heuristically to make faster judgments.  |
|   |   |
|   |   |
|   |   |
| 5 | This has been found in portrayals of risks and uncertainties when people overvalue gains following a loss or exaggerate   |
|   | inferences made from the most recent data in a trend.   |
|   |   |
|   |   |
| 6 | Some work, however, suggests that less numerate people may be more inclined to rely on these heuristics, which tend to  |
|   | yield biased interpretations of quantitative data.  |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
